PHENIX, fe'niks, *s.* In Mythology, a bird of great celebrity among the ancients, and regarded as the emblem of immortality. It was described as of the size of an eagle, the head crested, the body covered with a beautiful plumage, and the eyes sparkling like stars. It was said to live for 500 or 600 years in the wilderness, at the termination of which it built itself a funeral pile of wood and aromatic gums, which it kindled with the fanning of its wings, and thus apparently consumed itself, but not really; this being the process by which it endowed itself with new vitality. In Astronomy, one of the modern constellations of the southern hemisphere. In Botany, the Date-palm, a genus of plants: Order, *Palmaceæ*.

PHENOCOMA, fe-nok'o-ma, *s.* (*phoinos*, blood-red, and *kome*, hair, Gr. from the character of the involucre.) A genus of Composite plants: Suborder, *Tubulifloræ*.

PHOLADARIA, fol-a-da're-a, *s.* (*pholas*, one of the genera.) A name given by Lamarck to a genus of Conchifera, in which he places the genera *Pholas* and *Gasterochæna*.

PHOLADE, fo'lade, *s.* An animal of the family *Pholidæ*.

PHOLADÆÆ, fo-la'de-æ, } *s.* (*pholas*, one of }
PHOLADÆANS, fo-la'de-ans, } the genera.) A }
family of Mollusca, of which *Pholas* is the type.

PHOLADITE, fo-la-dite, *s.* A fossil or petrified *pholas*.—See *Pholas*.

PHOLADOMYA, fo-la-do-mi'a, *s.* (combination of *pholas* and *mya*.) A genus of Mollusca; shell not tubular, but *pholas*-shaped; perlaceous; slightly gaping, no accessory valves; ligament short; external hinge with a small elongated pit, something triangular, and a marginal plate on each valve; umbones very close: Family, *Pholidæ*.

PHOLÆBIUS, fo-le-o-be-us, *s.* (*pholas*, and *bios*, life, Gr.) A name given by Dr. Leach for a part of the genus *Saxicava*: Family, *Lithophagidæ*.

PHOLARITE, fo-la-rite, *s.* (*pholas*, Gr.) The hydrated silica of alumina, a mineral which occurs in small pearly scales, usually convex, white, soft, and friable.

PHOLAS, fo'las, *a.* (*pholas*, lurking in a hole, Gr.) A genus of perforating Mollusca, the shell of which gapes at both extremities over the umbones; it has no ligament: Type of the family *Pholidæ*.

PHOLCUS, fol'kus, *s.* (*pholkos*, squinting, Gr.) A genus of Arachnideans: Order, *Pulmonaria*.

PHOLIDÆ, fo'le-de, *s.* A family of the tribe *Macrotrachinæ*, distinguished by the bivalve shells being sedentary, generally perforating, and opening at one or both ends; the valves often prolonged into a shelly tube of great length.

PHOLIDÆA, fo-le-de'a, *s.* (*pholas*, and *eidos*, resemblance, Gr.) A genus of the *Pholidæ*, in which the shell resembles *pholas*, but the anterior end is closed by a thin calcareous prolongation of

PHOLIDOPHORUS—PHORONOMIA.

- each valve, and the posterior end has a cup-shaped appendage.
- PHOLIDOPHORUS**, fo-le-dof'o-rus, *s.* (*pholidotos*, armed with scales, and *phoreo*, I bear, Gr.) A genus of fossil fishes from the lias of England.
- PHOLIDOTA**, fo-le-do'ta, *s.* (*pholis*, a scale, Gr.) A genus of plants remarkable for the close manner in which the flowers are covered over by the imbricated scale-like bractes: Order, Orchidaceæ.
- PHOLIDOTUS**, fol-e-do'tus, *s.* (*pholis*, a scale, and *ous otos*, the ear, Gr.) A genus of Coleopterous insects, natives of Patagonia: Family, Lucanidæ.
- PHOLIS**, fo'lis, *s.* (Greek, a scale of a reptile, or spot.) A genus of fishes resembling *Bleinnius*, but having the dorsal fin slightly carinated, and being without crests: Family, Blennidæ. Also, an old name for gypsum.
- PHOLIURUS**, fo-le-u'rus, *s.* (*pholis*, a scale, and *oura*, a tail, Gr.) A genus of plants: Order, Graminaceæ.
- PHOMA**, fo'ma, *s.* A genus of Fungi: Tribe, Gasteromycetes.
- PHONEMUS**, fo-ne'mus, *s.* (*phonios*, bloody, and *nema*, a thread, Gr.) A genus of microscopic Foraminifera.
- PHONETIC**, fo-net'ik, *a.* (*phonetikos*, Gr.) Vocal; expressive of sound.
- PHONIC**, fo'nik, *a.* (*phone*, the voice, Gr.) Pertaining to the voice.
- PHONICS**, fon'iks, *s.* (from *phone*, sound, Gr.) The doctrine or science of sounds; also termed *acoustics*.
- PHONOCAMPTIC**, fo-no-kamp'tik, *a.* (*phone*, and *kampto*, I bend, Gr.) Having the power to inflect sound, or turn it from its direction, and thus to alter it.
- PHONOGRAPHIC**, fo-no-graf'ik, } *a.* Descriptive of the human voice.
- PHONOGRAPHICAL**, fo-no-graf'e-kal, }
- PHONOGRAPHER**, fo-nog'ra-fist, *s.* One who explains the laws of the human voice.
- PHONOLITE**, fo'no-lite, *s.* (*phone*, sound, and *lithos*, a stone.) A species of compact basalt, which gives a sonorous sound when struck; called also *clink-stone*.
- PHONOLOGICAL**, fo-no-loj'e-kal, *a.* Relating to phonology.
- PHONOLOGIST**, fon-ol'o-jist, *s.* One versed in the doctrine of elementary sounds uttered by the human voice in speech.
- PHONYGAMA**, fon-ig'a-ma, *s.* A genus of birds: Family, Corvidæ.
- PHORCUS**, fawr'kus, *s.* In Mythology, a marine deity, the son of Terra and Pontus. He was the father of Gorgon, the dragon who guarded the apples of the Hesperides, and other fabulous monsters.
- PHORCYN**, fawr'sin, } See Phorcus.
- PHORCYS**, fawr'sis, }
- PHORCYNIA**, for-si'ne-a, *s.* (*Phorcyn*, an ancient sea god, Gr.) A genus of Pulmograda: Family, Oceanidæ.
- PHORMIUM**, fawr'me-um, *s.* (*phormos*, a basket, Gr.) The New Zealand flax, or flax-lily, a genus of plants, the leaves of which yield a very beautiful and strong fibre, used in the manufacture of ropes and other cordage: Order, Liliaceæ.
- PHORONOMIA**, fo-ro-no'me-a, *s.* (*phero*, I bear, or carry, Gr.) The science of motion; mechanical philosophy.—A word seldom used.

PHORUS—PHOSPHORUS.

- PHORUS**, fo'rus, *s.* (*phoros*, bearing, Gr.) In Conchology, a name given by De Montfort to those shells of the trochoid form, which are loaded with pebbles, shells, &c., generally known to collectors by the name of carrier shells.
- PHOS**, fos, *s.* (Greek, light.) A name given by De Montfort for a genus of turbinated Gasteropods with a turreted thick shell, which is carinated and varicose; spire pointed, but not produced; aperture rounded or oval; outer lip ridged internally; columella with an oblique plait or plaits; canal short, with the external form of a raised varix.
- PHOSGENE**, fos'jene, *a.* (*phos*, light, and *gennaos*, I produce, Gr.) Producing or generating light. In Chemistry, a gas produced by the action of light on chlorine and carbonic oxide.
- PHOSPHAS**, fos'fas, *s.* A term used in pharmacy for phosphate.—See Phosphate.
- PHOSPHATE**, fos'fate, *s.* A salt formed by phosphoric acid with a base. *Phosphate of lime*, a salt consisting of lime, 59.0, and phosphoric acid, 41.0. It is destitute of taste, insoluble in water, and not affected by exposure to the atmosphere. It constitutes the base of the bones of animals. *Mineral phosphate of lime* contains several species, as *apatite*, *asparagus stone*, &c.
- PHOSPHEA**, fos'fe-a, *s.* (*phos*, light, Gr.) The Trumpeter, a genus of beautiful birds inhabiting the woods of South America: Family, Ardeæ.
- PHOSPHITE**, fos'fite, *s.* A salt formed by the combination of phosphorous acid with a salifiable base.
- PHOSPHOR**, fos'for, *s.* That which brings light; the morning-star; phosphorus.
- PHOSPHORATE**, fos'fo-rate, *v. a.* To combine or impregnate with phosphorus.
- PHOSPHORESCENCE**, fos'fo-res', *v. n.* To emit light or shine as phosphorus faintly, without sensible heat.
- PHOSPHORESCENCE**, fos'fo-res'sens, *s.* Faint or slight appearance of light from a body, without sensible heat. *Phosphorescence of the sea*, a luminous appearance of sea-water, arising from the presence of innumerable microscopic medusæ which people every region of the ocean, and being specifically lighter than the sea-water, float in incalculable numbers on its surface.
- PHOSPHORESCENT**, fos'fo-res'sent, *a.* Luminous or shining with a faint light, unaccompanied by sensible heat.
- PHOSPHORIC**, fos'fo-rik, *a.* Relating to or obtained from phosphorus; having a faint luminous appearance. *Phosphoric acid*, an acid obtained by various methods from phosphorus. It is colourless, intensely sour, reddens litmus, and neutralizes alkalies, but does not destroy the texture of the skin. Its equivalent is 71.4; symb. $P_2 + 50$ or $P_2 + O_5$.
- PHOSPHORITE**.—See Apatite.
- PHOSPHORITIC**, fos'fo-rit'ik, *a.* Relating to phosphorite or apatite.
- PHOSPHOROUS**, fos'fo-rus, *a.* The epithet of an acid in which phosphorus is combined with only one degree of oxygen.
- PHOSPHORUS**, fos'fo-rus, *s.* A substance obtained by an elaborate chemical process from bones. It is considered a simple substance, never having yet been decomposed; when pure, it is nearly colourless; it is soft, and can easily be cut with a knife, and its surface exhibits a waxy lustre. In the atmosphere, at common temperatures, it emits white fumes, which in the dark appear luminous, to which circumstance it owes its name. A name given to

PHOSPHURET—PHOTOLOGY.

various artificial substances which emit light at common temperatures, or at a degree of heat disproportionate to the effect, producing the appearance called phosphorescence. This may be exemplified by mixing three parts of calcined oyster shells with one of the flowers of sulphur, and exposing the mixture for an hour to a strong heat in a covered crucible. Exposing this substance for a few seconds to the action of the sun's light, will enable it to phosphoresce in a dark room for several hours afterwards.

PHOSPHURET, fos'fu-ret, *s.* A compound having no sensible properties of an acid, in which phosphorus is combined with a base. *Metallic phosphurets*, are combinations which may be made with most if not all of the metals, by bringing them, at a high temperature, into immediate contact with phosphorus.

PHOSPHURETTED, fos'fu-ret-ted, *a.* Combined with a phosphuret. *Phosphuretted hydrogen*, a combination of phosphorus and hydrogen, which was discovered in 1812 by Sir H. Davy. It is a transparent colourless gas, of an exceedingly offensive smell and bitter taste. When obtained in an impure state, by the action of phosphorus or potassa, or hydrate of lime, it is remarkable for inflaming spontaneously, on coming into contact with air or oxygen. Its equivalent is 34.4, symb. $P_2 + H_3$. It is this gas, produced by the decomposition of organized matter in marshy places, and burning by the action of the oxygen of the atmosphere, as it bubbles upwards to the surface, that causes the familiar phenomenon known by the name of 'Will-o'-the-wisp,' and various other epithets. *Phosphuret of nitrogen*, a light snow-white powder, insoluble in water, in dilute acids or alkaline solutions, composed of 2 atoms of phosphorus and 1 atom of nitrogen. Its equivalent is 45.55, symb. $N + 2P$.

PHOTINIA, fo-tin'e-a, *s.* (*photeinos*, shining, Gr. in reference to the leaves.) A genus of plants: Order, Pomaceæ.

PHOTINIANS, fo-tin'e-ans, *s.* In Ecclesiastical History, a sect of heretics, in the fourth century, who denied the divinity of our Lord. They derive their name from Photinus their founder, who was bishop of Sirmium, and a disciple of Marcellus.

PHOTINX, fo'tingks, *s.* An ancient wind instrument of Egypt, said to have been of a curved form.

PHOTOGENIC, fo-to-je'nik, *a.* (*phos*, light, and *gignomai*, I generate, Gr.) An epithet applied to the process, discovered by M. Daguerre, of fixing on the polished surface of a metallic plate, by means of certain preparations, and the use of an instrument of the nature of a camera obscura, a correct likeness of any object reflected thereon.

PHOTOGRAPHIC, fo-to-graf'ik, } *a.* Relating
PHOTOGRAPHICAL, fo-to-graf'e-kal, } to photography.

PHOTOGRAPHIST, fo-tog'ra-fist, *s.* One who practises photography.

PHOTOGRAPHY, fo-tog'ra-fe, *s.* (*phos*, light, and *grapho*, I delineate, Gr.) The process of photo-genic drawing.—See Photogenic.

PHOTOLOGIC, fo-to-loj'ik, } *a.* Relating to
PHOTOLOGICAL, fo-to-loj'e-kal, } photology, or the doctrine of light.

PHOTOLOGY, fo-to-lo'je, *s.* (*phos*, light, and *logos*, a discourse, Gr.) The doctrine or science which explains the nature and varied phenomena of light.

PHOTOMETER—PHRENETICALLY.

PHOTOMETER, fo-toim'e-tur, *s.* (*phos*, light, and *metron*, a measure, Gr.) An instrument for ascertaining the intensity of light or illumination.

PHOTOMETRIC, fo-to-met'rik, } *a.* Relating to
PHOTOMETRICAL, fo-to-met're-kal, } or obtained by a photometer.

PHOTOMETRY, fo-toim'e-tre, *s.* The science which treats of the measurement of light.

PHOTOPHOBIA, fo-to-fu'be-a, *s.* (*phos*, *photos*, light, and *phobos*, fear, Gr.) In Pathology, intolerance of light, a symptom of amaurosis.

PHOTOPSTA, fo-top'se-a, *s.* (*phos*, *photos*, light, and *opsis*, sight, Gr.) In Pathology, lammous vision; a symptom of amaurosis.—It is the marmarigo of Hippocrates.

PHOXICHILUS, foks-e-ki'lus, *s.* (*phoxos*, conical, *cheilos*, a lip, Gr.) A genus of Arachnideans: Order, Tracheariae.

PHRACTOCEPHALUS, frak-to-sef'a-lus, *s.* (*phraktos*, fenced in, and *kephale*, the head, Gr. from the head being covered with granulated bony plates.) A genus of fishes: Family, Cobitidae.

PHRAGMITES, frag-mi'tes, *s.* (*fragmos*, a hedge, Gr.) A genus of plants: Order, Gramineae.

PHRAGMOCERAS, frag-mos'e-ras, *s.* (*phragmos*, a hedge, and *keras*, a horn, Gr.) A genus of fossil camerated shells, distinguished from Orthoceras by being curved, and having a nearly marginal siphuncle: Order, Cephalopoda.

PHRASE, fraze, *s.* (*phrasis*, Gr.) An idiom; a mode of speech peculiar to a language; a short sentence or expression characteristic of an idiom, people, or conventional arrangement; style;

Thou speak'st

In better phrase and matter than thou didst.—*Shaks.*

—*v. n.* to employ peculiar expressions; —*v. a.* to style; to call; to give a distinctive meaning to. In music, a short melody, in which a perfect musical idea is not entirely developed.

PHRASELESS, fraze'les, *a.* Not to be described or expressed.

PHRASEOLOGIC, fray-ze-o-loj'ik, } *a.* Peculiar
PHRASEOLOGICAL, fray-ze-o-loj'e-kal, } to a language or phrase.

PHRASEOLOGY, fray-ze-o-lo'je, *s.* (*phrazo*, and *logos*, a discourse, Gr.) Mode of expression; peculiar words used in a sentence; style; diction; a collection of phrases in a language.

PHRATRY, frat're, *s.* (*phratris*, Gr.) In Antiquity, a subdivision of the Athenian citizens, analogous to the Spartan *ode*, and the Roman *curia*.

PHREATIS, fre-a'tes, } *s.* (*phreas*, a reservoir

PHREATTIUM, fre-a'te-nm, } or well, Gr.) In Grecian Antiquity, a court belonging to the civil government of Athens, situated upon the sea-shore, in the Piræus. It decided such causes as concerned persons who had fled from their own country for murder, or those committing involuntary murder, and afterwards committing a wilful and deliberate murder. The court is said to have derived its name from having been usually held in a pit, or other hollow.

PHRENETIC, fre-net'ik, *a.* (from *phren*, the mind, Gr.) Bordering on madness; under the influence of ungovernable excitement; wild and erratic;—this term is generally written *Frantic*; —*s.* a person who is affected with madness, or erratic sallies of imagination.

PHRENETICALLY, fre-net'e-kal-le, *ad.* In a frantic or delirious manner.

PHRENIC—PHTHIRUSA.

PHRENIC, fren'ik, *a.* (*phrenes*, the diaphragm, Gr.) Pertaining to the diaphragm.

PHRENITES, fren-ni'tes, *s.* (*phren*, the mind, Gr.) Inflammation of the brain.

PHRENOLOGIC, fren-o-loj'ik, } *a.* Relating to
PHRENOLOGICAL, fren-o-loj'e-kal, } phrenology.
PHRENOLOGICALLY, fren-o-loj'e-kal-le, *ad.* According to phrenology.

PHRENOLOGIST, fren-o-lo-jist, *s.* One skilled in phrenology.

PHRENOLOGY, fren-o-lo-je, *s.* The science of mind, or of its faculties, dispositions, &c., as studied through the peculiar development of the cranium of the individual.

PHRENSY.—See Frenzy.

PHRENTIC.—See Phrenetic.

PHRONTISTERY, fron'tis-ter-e, *s.* (*phrontisterion*, Gr.) A school or seminary of learning.—Obsolete.

PHRONIMA, fro-ni'ma, *s.* (*phronimos*, staid.) A genus of Crustaceans: Order, Amphipoda.

PHROSINE, fro'se-ne, *s.* A genus of amphipodous Crustaceans.

PHRYGANEÆ, fre-ga'ne-a, *s.* A genus of Neuropterous insects: Type of the family Phryganidæ.

PHRYGANIDÆ, fre-gan'e-de, *s.* A family of Neuropterous insects, of which the genus Phryganea is the type.

PHRYGANINÆ, fre-ga-ni'ne, *s.* May-flies, a subfamily of the Phryganidæ. Of all insects they bear the closest resemblance to the Lepidoptera, their wings being covered with hairs or narrow scales; in their transformations they also bear considerable resemblance to that order; from which, however, they are sufficiently distinct, in having a mandibulated mouth.

PHRYGIAN, frij'e-an, *a.* Of or belonging to Phrygia, as the *Phrygian marble*. Among the ancients it denoted a sprightly animating music. In Ecclesiastical History, the Phrygians were those Montanists who resided in Phrygia.

PHRYMA, fri'ma, *s.* (meaning unknown.) A genus of plants: Order, Lamiaceæ.

PHRYNEIDÆ, fre-ne'e-de, *s.* (*phrynus*, one of the genera.) A family of pulmonary Arachnidæ, distinguished from the Vagabondæ by their anterior legs being not unguled, and very like antennæ; and by their maxillary palpi being very spinose, and terminating in hooks or chela.

PHRYNOCEPHALUS, frin-o-sef'a-lus, *s.* (*phryne*, a toad, and *kephale*, a head, Gr.) A genus of Saurian reptiles: Family, Iguanidæ.

PHRYNOSOMA, frin-o-so'ma, *s.* (*phryne*, a toad, and *soma*, a body, Gr.) A genus of Saurian reptiles: Family, Iguanidæ.

PHRYNUS, fri'nus, *s.* (*phryne*, a toad, Gr.) A genus of pulmonary Arachnidæ: Type of the family Phryganidæ.

PHRYXUS, friks'us, *s.* In Fabulous History, a son of Athamas, king of Thebes, by Nephele.

PHTHEREIROSPERNUM, ter-re-ro-sper'mum, *s.* (*phtheiro*, I corrupt, and *sperma*, a seed, Gr. in reference to the seeds being wrapped in a spongy reticulated membrane.) A genus of plants: Order, Scrophulariaceæ.

PHTHIRIA, ti're-a, *s.* (*phtheir*, a louse, Gr.) A genus of Dipterous insects: Family, Tanysonia.

PHTHIRIASIS, tir-i'a-sis, *s.* (*phtheir*, a louse, Gr.) A disease in which the body is overrun with lice.

PHTHIRUSA, te-ra'za, *s.* (*phtheiro*, I destroy, the

PHTHISIC—PHYLLAGNATHUS.

species destroying the trees on which they grow.) A genus of plants: Order, Loranthaceæ.

PHTHISIC, ti's'ik, } *s.* (Greek.) Pulmonary consump-
PHTHISIS, ti'sis, } tion, a genus of diseases char-
acterized by progressive emaciation of the body.

PHTHISICAL, ti'z'e-kal, *a.* Consumptive; relating to pulmonary consumption or phthisic.

PHTHISIOLOGY, ti'z-e-ol'o-je, *s.* A discourse or treatise on consumption.

PHTHISIPNEUMONY, ti-sip-nu'no-ne, *s.* Pulmonary consumption.

PHTHISIURIA, ti-se-u're-a, *s.* (*phtthisis*, and *ouron*, urine, Gr.) The emaciation which characterizes diabetes.

PHTHOE, to'e, *s.* (*phtthino*, I corrupt, Gr.) Ulceration of the lungs. This, and phtthisis, are the two branches under which the Greek pathologists generally treated consumption.

PHTHORON, to'ron, *s.* (Greek, destruction.) In Chemistry, the presumed base of fluoric acid, so named as destroying all the vessels in which it has hitherto been attempted to be confined.

PHU, fu, *s.* Garden Valerian, or the specific name of the plant Valeriana phu.

PHULLUSIA, ful-lu'zhe-a, *s.* A subgenus of Ascidiæ, which differs from Cynthis in not having the branchial sac plicated; the test or case is gelatinous.

PHYCELLA, fi-sel'la, *s.* (dim. of *phykos*, red alkanet, from the colour of the plants.) A genus of plants: Order, Amaryllidaceæ.

PHYCOMATER, fi-kom'a-tur, *s.* (*phykos*, sea-weed, *mater*, mother, Gr.) The gelatine in which the sporules of the Algae first vegetate.

PHYGETHLON, fi-ge'thlon, *s.* (Greek.) In Pathology, inflammation of the subcutaneous lymphatic glands.

PHYLACTER, fe-lak'tur, } *s.* (*phylakterion*, Gr.)
PHYLACTERY, fe-lak'ter-e, } Anciently, a name given to all kinds of spells, charms, or amulets, that were supposed by their possessors to act as a preventative against the approach of danger or disease; among the Jews, a slip of parchment on which some text of scripture was inscribed, particularly one from the decalogue, worn by devout persons on the forehead, breast, or neck, as a mark of their religion; among the Primitive Christians, a case for enclosing relics of the dead.

PHYLACTERED, fe-lak'turd, *a.* Wearing a phylactery; dressed like the Pharisees.

PHYLACTERIC, fe-lak'ter-ik, } *a.* Relating to
PHYLACTERICAL, fe-lak'ter-e-kal, } phylacterics.

PHYLÆ, fi'le, *s.* (*phyle*, a tribe, Gr.) In Antiquity, the name given to the tribes into which Attica in Greece was divided.

PHYLARCH, fi'lark, *s.* (*phylarchos*, Gr.) In Antiquity, an Athenian officer appointed by each phyle or tribe to superintend the registration of its members, and other common duties. The office corresponded with that of the Roman tribune.

PHYLARCHY, fi'lark-ke, *s.* The jurisdiction of the governor of a tribe.

PHYLICA, fi'e-ka, *s.* (*phyllikos*, leafy, Gr. in reference to the curious evergreen foliage.) A genus of plants: Order, Rhamaceæ.

PHYLLADE, fil'la-de, *s.* (*phyllon*, a leaf, Gr.) The name given by D'Aubuisson, and the French geologists, to clay slate.

PHYLLAGNATHUS, fil-ag-na'thus, *s.* (*phyllon*, a leaf, and *agathis*, a round heap, Gr., the flowers being disposed in heaps or heads surrounded by

PHYLLANTHERA—PHYLLODUS.

- leaves or bractea.) A genus of plants: Order, Melastomaceae.
- PHYLLANTHERA, fil-an-the'ra, *s.* (*phylon*, a leaf, and *anthera*, an anther, Gr. in reference to the anthers being dilated and foliaceous at the apex.) A genus of plants: Order, Asclepiadaceae.
- PHYLLANTHUS, fil-lan'thus, *s.* (*phylon*, a leaf, and *anthos*, a flower, Gr.) A genus of plants: Order, Euphorbiaceae.
- PHYLLASTREPHUS, fil-las'tre-fus, *s.* (*phyllas*, a heap of leaves, and *strepho*, I turn, Gr.) A genus of birds: Family, Merulidae.
- PHYLLIDEA, fil-lid'e-a, *s.* (*phylon*, a leaf, and *eidos*, resemblance, Gr.) A genus of Sea-slugs, type of the subfamily Phyllidinæ: Tribe, Tectibranchia.
- PHYLLIDIANS, fil-lid'yans, *s.* Lamarck's name for a family of Gasteropodous Molluscs, including the genera Phyllidia, Chitonella, Chiton, Patella, Patelloidea, and Siphonaria.
- PHYLLIDINÆ, fil-lid'e-ne, *s.* (*phyllidea*, one of the genera.) A subfamily of Tectibranchiate Mollusca, consisting of sea-slugs without shells; the branchia generally covered by a coriaceous or testaceous plate, placed on both sides of the body under the edges of the mantle; tentacula small, short, two or four.
- PHYLLINE, fil-l'i-ne, *s.* (*phylon*, a leaf, Gr.) A genus of Annelides: Family, Dorsibranchiata.
- PHYLLIROE, fil-lir'o-e, *s.* (*phylon*, green stuff, and *roe*, a stream, Gr.) A genus of Mollusca: Order, Heteropoda.
- PHYLLIS, fil'lis, *s.* (*phylon*, a leaf, Gr. the leaves are the chief beauty of the shrub.) A genus of plants: Order, Cinchonaceae. In Zoology, a genus of Annelides: Family, Nereidae.
- PHYLLITE, fil'li-te, *s.* (*phylon*, a leaf, and *lithos*, a stone, Gr.) A petrified leaf; a mineral of a brownish black colour, composed of thin plates, without any perceptible regularity of shape; lustre semi-metallic, splendid; opaque; sectile. Its constituents are—silica, 38.40; alumina, 23.68; peroxide of iron, 17.52; magnesia, 8.96; potash, 6.80; water, 4.80. Hardness, 5.75; sp. gr. 2.889.
- PHYLLIUM, fil'le-um, *s.* (*phylon*, a leaf, Gr.) A genus of Coleopterous insects: Family, Mantidae.
- PHYLLIUS, fil-lo'be-us, *s.* (*phylon*, a leaf, and *bios*, life, Gr.) A genus of Coleopterous insects: Family, Curculionidae.
- PHYLLÓCEROS, fil-los'er-os, *s.* (*phylon*, a leaf, and *keras*, a horn, Gr.) A genus of Coleopterous insects: Family, Elateridae.
- PHYLLÓCHARIS, fil-lo-ka'ris, *s.* (*phylon*, a leaf, and *charis*, beauty, Gr.) A genus of Coleopterous insects: Family, Chrysomelidae.
- PHYLLCLADUS, fil-lok'la-dus, *s.* (*phylon*, a leaf, and *klados*, a branch, Gr.) A genus of plants: Order, Taxaceae.
- PHYLLODACTYLUS, fil-lo-dak'te-lus, *s.* (*phylon*, a leaf, and *daktylos*, a digit, Gr.) A genus of Saurian reptiles: Family, Iguanidae.
- PHYLLODEA, fil-lo'de-a, *s.* (*phylon*, a leaf, Gr.) In Botany, a term applied to the petioles of certain leafless plants, which become so much developed as to assume the appearance of leaves, all the functions of which they perform.
- PHYLLODOCE, fil-lo'd'o-se, *s.* In Mythology, one of the attendant nymphs of Cyrene. In Botany, a genus of plants: Order, Ericaceae.
- PHYLLODUS, fil-lo-dus, *s.* (*phylon*, a leaf, and

PHYLLOLACCA—PHYLLOSTEGIA.

- odous*, a tooth, Gr.) A genus of fossil fishes from the isle of Sheppey.
- PHYLLOLACCA, fil-lo-lak'ka, *s.* (*phylon*, a plant, Gr. and *lac*, milk, Lat.) A genus of plants: Order, Chenopodiaceae.
- PHYLLOLOBIUM, fil-lo-lo'be-um, *s.* (*phylon*, a leaf, and *lobos*, a pod, Gr.) A genus of Leguminous plants: Suborder, Papilionaceae.
- PHYLLOMA, fil-lo'ma, *s.* (*phylon*, a leaf, and *loma*, a fringe, Gr. in reference to the broad red edge of the leaves.) A genus of plants: Order, Liliaceae.
- PHYLLOMORPHUS, fil-lo-maw'r-fus, *s.* (*phylon*, a leaf, and *morphe*, form, Gr.) A genus of Hemipterous insects: Family, Pentatomidae.
- PHYLLONOTUS, fil-lo-no'tus, *s.* (*phylon*, a leaf, and *notos*, the back, Gr.) A genus of Mollusca, belonging to the Muricinae or Murexes, the shells of which have the canal moderate, and the varices foliated, lacinated, compressed, or resembling leaves: Family, Muricidae.
- PHYLLONTYCTERA, fil-lon-ik'ter-a, } *s.* (*phylon*,
PHYLLONTYCTERANS, fil-lon-ik'ter-ans, } a leaf, and
nykteris, a bat, Gr.) A division of the order
Chiroptera, including the foliated bats, or those
species which have the ears and nose complicated
by grotesque and variously figured membranous
foliations, which serve as antennae. The species
are characterized likewise by having a single finger,
the innermost, armed with a hook-shaped claw,
and the molar teeth beset with sharp-pointed
tubers, adapted for crushing insects.
- PHYLLOPHAGA, fil-lof'a-ga, } *s.* (*phylon*, a
PHYLLOPHAGANS, fil-lof'a-gans, } leaf, and *phago*,
I eat, Gr.) A tribe of Marsupial quadrupeds, in-
cluding the phalangiers, petaurists, and kaola;
also, a tribe of Coleopterous insects, which live on
the leaves and succulent parts of vegetables.
- PHYLLOPHAGI, fil-lof'a-je, *s.* (*phylon*, a leaf, and
phago, I eat, Gr.) A section of Coleopterous in-
sects of the family Scarabaeidae.
- PHYLLOPHEROUS, fil-lof'er-us, *s.* (*phylon*, a leaf,
and *phoreo*, I bear, Gr.) Leaf-bearing.
- PHYLLPODA, fil-lop'o-da, } *s.* A tribe of Crus-
PHYLLPODANS, fil-op'o-dans, } taceans, including
such species as have the feet of a leaf-like form.
- PHYLLPODIUM, fil-lo-po'de-um, *s.* (*phylon*, a leaf,
and *pous*, a foot, Gr. in reference to the floral
leaves being adnate to the pedicels or flower-stalks.)
A genus of plants: Order, Scrophulariaceae.
- PHYLLOPTERYX, fil-lop'ter-iks, *s.* (*phylon*, a leaf,
and *pteryx*, a fin or wing, Gr.) A genus of Pike
fishes, allied to Hippocampus: body fusiform,
but broadest in the middle, and furnished with
leaf-like appendages: Family, Syngnathidae.
- PHYLLOPUS, fil-lo-pus, *s.* (*phylon*, a leaf, and *pous*,
a foot, Gr. in reference to the pedicels or foot-
stalks bearing two leafy bractea each.) A genus
of plants: Order, Melastomaceae.
- PHYLLOSCIA, fil-los'she-a, *s.* (*phylon*, a leaf, and
skio, an image, Gr.) A genus of Isopoda: Tribe,
Oniscides.
- PHYLLÓSOMA, fil-lo-so'ma, *s.* (*phylon*, a leaf, and
soma, a body, Gr.) A genus of Crustaceans,
belonging to the order Stomapoda, and family
Bipelta of Cuvier.
- PHYLLOSTEGIA, fil-lo-sta'je-a, *s.* (*phylon*, a leaf,
and *stegos*, a covering, Gr. in allusion to the
foliaceous lobes of the calyx.) A genus of plants:
Order, Lamiaceae.

PHYLLOSTOMATA, fil'-los-to-ma'ta, } *s.* (*phylon*, a
PHYLLOSTOMES, fil'-los-to-mse, } leaf, and *stoma*,
a mouth, Gr.) A family of bats, including those
species in which the nose supports a simple leaf-
shaped appendage.

PHYLLURUS, fil'-lu'-rus, *s.* (*phylon*, a leaf, and *oura*,
a tail, Gr.) A genus of Reptiles: Family, Lacer-
tidae.

PHYLOLOBE, fil'-lo'l'o-be, *s.* (*phylon*, a leaf, and
lobos, a lobe, Gr. in reference to the lobes of the
embryo or cotyledons being foliaceous.) In Botany,
a section of the Papilionaceae, distinguished by
the cotyledons being thin and foliaceous.

PHYMA, fi'ma, *s.* (Greek, from *phyo*, I produce.) In
Pathology, an imperfectly suppurating tumour,
forming an abscess, often with a core in the centre;
a genus of the tubercula of Bateman, including
boils, carbuncles, &c.

PHYSA, fi'sa, *s.* (Greek, a bladder, from the blad-
der capsules.) A genus of animal plants, natives
of Madagascar. In Conchology, a genus of fresh-
water Mollusca, belonging to the Limnæinæ; the
shells of which are generally reversed, smooth,
and polished; the aperture oval, and not dilated.

PHYSALLA, fi-sa'le-a, *s.* (*physalis*, a bladder, Gr.)
A genus of Acalephans: Order, Hydrostatica.

PHYSALLIS, fis'a-lis, *s.* (*physis*, a bladder, Gr. in
reference to the inflated calyx.) A genus of plants:
Order, Solanaceae.

PHYSALITE, fis'a-lite, *s.* (*physis*, a bladder, and *lithos*,
a stone, Gr.) A variety of prismatic topaz, of a
greenish-white colour. It occurs in coarse granu-
lar concretions, having a low degree of lustre;
edges feebly translucent. It consists of alumina,
57.75; silica, 34.30; fluoric acid, 7.82. It is
found at Finbo, in Sweden, and at Altenberg, in
Saxony.

PHYSALOPTERA, fis-a-lop'ter-a, *s.* (*physalis*, a
bladder, and *pteron*, a wing, Gr.) A genus of
Entozoa: Order, Nematodea.

PHYSARUM, fis'a-rum, *s.* (*physis*, a bladder, Gr. on
account of the bladder appearance of the peri-
dium.) A genus of Fungi: Tribe, Gasteromycetes.

PHYSOCTIA, fis-ko'-ne-a, *s.* (*physkon*, the paunch or
belly, Gr.) In Nosology, a genus instituted to
comprehend all voluminous tumours which, de-
veloped in the belly, do not exhibit the phenomena
of fluctuation or sound.

PHYSEMA, fi-se'ma, } *s.* (*physao*, I inflate,
PHYSOCELES, fi-sos'e-les, } Gr.) In Pathology,
a windy tumour.

PHYSETER, fi-se'tur, *s.* (Greek.) The Cachelot, a
genus of Cetaceans, belonging to the whale family,
natives of the Northern Ocean.

PHYSHARMONICA, fis-har-mon'e-ka, *s.* (*physis*,
breath, and *harmonia*, harmony, Gr.) A musical
instrument, in which the tones are produced by the
action of a current of air on metallic springs.
It is of the same kind as the æolodicon, was in-
vented by Hockel at Vienna, and now reproduced
in England.

PHYSIANTHROPY, fiz-e-an'thro-pe, *s.* (*physis*,
nature, and *anthropos*, a man, Gr.) The philoso-
phy of human life, or the doctrine of the consti-
tution and diseases of man, and the remedies.

PHYSIANTHUS, fiz-e-an'thus, *s.* (*physis*, a bladder,
and *anthos*, a flower, Gr.) A genus of plants:
Order, Asclepiadaceae.

PHYSIC, fiz'ik, *s.* The science of healing diseases;
medicines; remedies for diseases; a purge, or medi-
VOL. II.

cine that purges;—(this latter sense is vulgar, and
excluded from elegant or technical language;—
v. a. to treat with physic; to evacuate the bowels
with a cathartic; to purge; to cure. *Physic-nut*,
the English name of plants of the genus *Jatro-
pha*.

PHYSICAL, fiz'e-kal, *a.* Relating to nature, or to
natural philosophy, as opposed to things moral or
imaginary; external; perceptible; relating to the
art of healing; having the property of evacuating
the bowels; medicinal; promoting the cure of dis-
eases; resembling physic—(the three latter senses
are seldom used by professional men.) *Physical
geography*, a science which comprehends a de-
scription of the structure of the earth, of the ar-
rangement of the solid and liquid materials which
compose its surface, of the nature of the elastic
fluids with which it is surrounded, and an account
of the distribution of the organized beings by which
it is inhabited.

PHYSICALLY, fiz'e-kal-le, *ad.* According to nature;
by natural operation in the material system of
things, as distinguished from moral power or influ-
ence; according to the science of medicine.—Ob-
solete in the last sense.

He that lives *physically*, must live miserably.—*Cheney*.

PHYSICIAN, fe-zish'an, *s.* A person skilled in the
art of healing, and who prescribes remedies for dis-
eases; in a spiritual sense, one who heals moral
and spiritual diseases.

PHYSIOLOGIC, fiz-e-ko-loj'ik, *s.* Logic illustrated
by natural philosophy.

PHYSIOLOGICAL, fiz-e-ko-loj'e-kal, *a.* Relating to
physiologic science.

PHYSICO-THEOLOGY, fiz-e-ko-the-ol'o-je, *s.* Divini-
ty enforced or illustrated by natural philosophy.

PHYSICS, fiz'iks, *s.* (*physis*, nature, Gr.) In its most
extended sense, the whole study of natural philo-
sophy; in a more restricted sense, it is a science
which regards the properties of bodies, considered
in masses, as opposed to chemistry, which studies
their elementary principles, and to natural history,
which observes their physiognomy or general ap-
pearance.

PHYSIGNATHUS, fis'e-na'thus, *s.* (*physa*, bladder,
and *gnathos*, a jaw, Gr.) A genus of Saurian rep-
tiles: Family, Agamidae.

PHYSINÆ, fe-si'ne, *s.* (*physis*, one of the genera.)
A subfamily of the Gadidae, in which the head is
broad and depressed; ventral fins with the posterior
rays obsolete, or almost wanting; dorsal fins two.

PHYSINGA, fis-ing'a, *s.* (*physis*, bladder, Gr. from
the shape of the labellum.) A genus of plants:
Order, Asclepiadaceae.

PHYSIOGNOMER.—See Physiognomist.

PHYSIOGNOMIC, fiz-e-og-nom'ik, } *a.* Relating
PHYSIOGNOMICAL, fiz-e-og-nom'e-kal, } to physi-
ognomy.

PHYSIOGNOMICS, fiz-e-og-nom'iks, *s.* A name given
by physicians to signs on the countenance, by which
the temperament or constitution of the body and
mind may be determined.

PHYSIOGNOMIST, fiz-e-og'no-mist, *s.* One skilled
in physiognomy.

PHYSIOGNOSE, fiz-e-og'no-me, *s.* (*physis*, nature,
gignosko, I know, Gr.) The art of perceiving char-
acter from the features of the face; the face.

PHYSIOGNOTYPE, fiz-e-og'no-tipe, *s.* An apparatus
for taking an exact imprint of the face or other
part, lately invented in Paris.

PHYSIOGRAPHER—PHYSONEMUS.

PHYSIOGRAPHER, fiz-e-og'ra-fur, *s.* A naturalist.
PHYSIOGRAPHICAL, fiz-e-o-graf'e-kal, *a.* Descriptive of natural objects.
PHYSIOGRAPHY, fiz-e-og'ra-fe, *s.* (*physis*, and *grapho*, I write, Gr.) A description of nature or the sciences of natural objects.
PHYSIOLOGIC, fiz-e-o-loj'ik, } *a.* Relative to
PHYSIOLOGICAL, fiz-e-o-loj'e-kal, } physiology.
PHYSIOLOGICALLY, fiz-e-o-loj'e-kal-le, *ad.* According to the principles of physiology.
PHYSIOLOGIST, fiz-e-o-lo-jist, *s.* One versed in the properties, functions, and laws by which living beings or plants are governed or regulated; one that treats of physiology.—The older word is *physiologist*.
PHYSIOLOGY, fiz-e-o-lo-jic, *s.* (*physis*, nature, and *logos*, a discourse, Gr.) The science which treats of the phenomena of organized beings, or that which describes the changes which take place in the assimilation of inorganic into organic matter.
PHYSIS, fi'sis, *s.* (*physao*, I blow or puff, or *physis*, nature, Gr.) A genus of fishes belonging to the Physine: dorsal fins two, the first triangular and higher than the second; head moderately large and depressed; caudal rounded; ventral fins each composed of a single cirriform ray unequally forked: Family, Gadidae.
PHYSNOMY, fiz'no-me, *s.* The old word for physiognomy.
 Yet certes by her face and *physnomy*.—*Spenser*.
PHYSOBLEPHARON, fis-o-blef'a-ron, *s.* (*physa*, wind, and *blepharon*, eyelid, Gr.) Blotted or puffed up swelling of the eyelid.
PHYSOCALYMNA, fi-so-ka-lim'na, *s.* (*physa*, a bladder, and *kalymma*, a covering, Gr. in reference to the inflated bracteas which enclose the flower before expansion.) A genus of plants: Order, Lythraceae.
PHYSOCALYX, fi-so-ka'lik, *s.* (*physa*, a bladder, and *calyx*, Gr. in reference to the inflated calyx.) A genus of plants: Order, Scrophulariaceae.
PHYSOCEPHALUS, fis-o-sef'a-lus, *s.* (*physa*, wind, and *kephale*, the head, Gr.) Emphysema of the head.
PHYSOCHLAINA, fi-so-klai'na, *s.* (*physa*, a bladder, and *chlaina*, an outer garment, Gr. in reference to the inflated calyx.) A genus of herbaceous perennial plants: Order, Solanaceae.
PHYSOCCELIA, fis-o-se'le-a, *s.* (*physa*, wind, and *koilia*, the belly, Gr.) Gaseous distension of the belly.
PHYSODACTYLUS, fis-o-dak'te-lus, *s.* (*physa*, a bladder, and *daktylos*, a digit, Gr.) A genus of Coleopterous insects: Family, Cerbrionidae.
PHYSOGRADA, fi-so-gra'da, } *s.* (*physis*, Gr. and
PHYSOGRADUS, fi-so-gra'dus, } *gradior*, I proceed, Lat.) A tribe of Acalephae, comprehending those species which swim by means of air-bladders.
PHYSONEMUS, fi-so-me'rus, *s.* (*physa*, a bladder, and *meros*, the thigh, Gr. from the swollen posterior femora.) A genus of Hemipterous insects: Family, Pentatomidae.
PHYSOMETRA, fis-om'e-tra, *s.* (*physao*, I inflate, and *metra*, the uterus, Gr.) In Pathology, inflation of the uterus; the presence of air within the uterus.
PHYSONCUS, fi-son'kus, *s.* (*physa*, wind, and *ogkos*, a swelling, Gr.) A tumour formed by atmospheric air or other gas.
PHYSONEMUS, fi-so-ne'mus, *s.* (*physa*, a bladder,

PHYSOPHORA—PHYTOLOGY.

and *nema*, a thread, Gr.) A genus of fossil fishes from the mountain limestone of Ireland.
PHYSOPHORA, fi-sof'o-ra, *s.* (*physa*, a bladder, and *phoreo*, I bear, Gr.) A genus of Acalephae: Order, Hydrostatica.
PHYSOSPASM, fis'o-spazim, *s.* (*physa*, wind, and *spasmos*, spasm, Gr.) Windy colic; tympanitis, attended with spasmodic contraction of some portion of the intestinal canal.
PHYSOSPERMUM, fi-so-sper'mum, *s.* (*physa*, a bladder, and *sperma*, a seed, Gr. in reference to the tegument not adhering to the seed in its young state.) A genus of Leguminous plants: Suborder, Orthospermæ.
PHYSOSTEGIA, fi-so-ste'je-a, *s.* (*physa*, a bladder, and *stego*, I cover, Gr. in allusion to the inflated calyx.) A genus of plants: Order, Lamiaceae.
PHYSOSTELMA, fi-so-stel'ma, *s.* (*physa*, a bladder, and *stelma*, a crown, Gr. the leaflets being inflated.) A genus of plants: Order, Asclepiadaceae.
PHYSY.—See *Fusee*.
PHYTELEPHUS, fi-tel'lef-us, *s.* (*phyton*, a plant, and *elephas*, an elephant, Gr.) A genus of plants: Order, Pandaceae.
PHYTEUMA, fi-te-u'ma, *s.* (a name adopted by Dioscorides.) A genus of perennial herbs: Order, Campanulaceae.
PHYTIPHAGA, fi-tif'a-ga, } *s.* (*phyton*, a plant,
PHYTIPHAGANS, fi-tif'a-gans, } and *phago*, I eat, Gr.) A tribe of Cetaceans, called also Herbivora; also, the name of a section of trachelipod mollusca.
PHYTIVOROUS, fi-tiv'o-rus, *a.* (*phyton*, a plant, Gr. and *voro*, I eat, Lat.) Feeding on plants or herb-
 age.
PHYTOCHEMY, fi-tok'e-me, *s.* (*phyton*, a plant, and *chemia*, chemistry, Gr.) Vegetable chemistry.
PHYTOGEOGRAPHY, fi-to-je-og'ra-fe, *s.* (*phyton*, a plant, and *geography*,) The geography of plants.
PHYTOGRAPHICAL, fi-to-graf'e-kal, *a.* Relating to the description of plants.
PHYTOGRAPHY, fi-tog'ra-fe, *s.* (*phyton*, a plant, and *grapho*, I describe, Gr.) The description and naming of plants.
PHYTOLACCA, fi-to-lak'ka, *s.* (*phyton*, a plant, Gr. and *lac*, milk, Lat.) A genus of plants: Type of the order Phytolaccaceae.
PHYTOLACCACEÆ, fi-to-lak-ka'se-e, *s.* A natural order of Exogenous plants, belonging to the Chenopod alliance of Lindley. It consists of undershrubs or herbs, with entire alternate leaves without stipules, often with pellucid dots; flowers racemose; calyx of four or five imbricated leaves; stamens hypogynous, or nearly so; indefinite, or, if equal to the number of the divisions of the calyx, alternate with them; anthers two-celled, opening lengthwise; carpels solitary or several, each containing one ascending ovule; styles and stigmas equal in number to the carpels; fruit baccate or dry, and indehiscent.
PHYTOLITE, fi-to-lite, *s.* (*phyton*, a plant, and *lithos*, a stone, Gr.) A petrified plant.
PHYTOLITHOLOGIST, fi-to-lith-ol'o-jist, *s.* (*phyton*, a plant, *lithos*, a stone, and *logos*, a discourse, Gr.) One who is skilled in, or writes upon, fossil plants.
PHYTOLITHOLOGY, fi-to-le-thol'o-je, *s.* (*phyton*, a plant, and *lithos*, a stone, Gr.) A treatise on fossil plants.
PHYTOLOGIST, fi-tol'o-jist, *s.* One versed in plants; one skilled in phytology; a botanist.
PHYTOLOGY, fi-tol'o-je, *s.* (*phyton*, a plant, and

logos, a discourse, Gr.) A treatise on or description of the growth, the kind, and the virtues of plants.

PHYTOPATHOLOGIST, fi-to-path-ol'o-jist, *s.* (*phyton*, a plant, *pathos*, a disease, and *logos*, a discourse, Gr.) One skilled in the pathology of plants.

PHYTOPATHOLOGY, fi-to-path-ol'o-je, *s.* (*phyton*, a plant, *pathos*, a disease, and *logos*, a discourse, Gr.) A treatise on the diseases of plants.

PHYTOPHAGA, fi-tof'a-ga, *s.* (*phyton*, a plant, and *phago*, I eat, Gr.) In the arrangement of Lamarck, the first section of his order Trachelipodes, including those genera which feed on plants. They are distinguished by the aperture of the shells being without notch or canal.

PHYTOPHAGOUS, fi-tof'a-gus, *a.* (*phyton*, and *phago*, I eat, Gr.) Eating or subsisting on plants.

PHYTOSAURUS, fi-to-saw'rus, *s.* (*phyton*, a plant, and *saurus*, a saurian, Gr.) An extinct fossil Saurian, the remains of which are found in the new red sandstone formation.

PHYTOTOMA, fi-tof'o-ma, *s.* (*phyton*, a leaf, and *temno*, I cut, Gr.) A genus of birds belonging to the Phytominae, or Plant-cutters: Family, Musophagidae.

PHYTOTOMINÆ, fi-to tom'e-ne, *s.* (*phytotoma*, one of the genera.) The Plant-cutters, a subfamily of the Musophagidae, in which the bill is serrated but not swollen; the feet with two or three toes forward and one backward. It consists of the genera *Phytotoma* and *Hyreus*.

PHYTOMY, fi-tof'o-me, *s.* (*phyton*, a plant, and *tome*, incision, Gr.) The anatomy or dissection of plants.

PHYTOZOA, fi-to-zo'a, *s.* Plural of *phytozoon*.—Which see.

PHYTOZOOM, fi-to-zo'on, *s.* (*phyton*, a plant, and *zoon*, an animal, Gr.) A zoophyte.—See *Zoophyte*.

PHYZELIA, fi-ze'le-a, *s.* (*phyzelos*, shunning the sun, Gr.) A genus of Annelides: Order, Tubicolæ.

PIABA, pi'a-ba, *s.* A small fresh-water fish, about the size of a minnow, a native of Brazil. It is much esteemed as food.

PIABUCUS, pi-a-bu'kus, *s.* (meaning not given.) A genus of fishes, in which the body is oblong, lanceate; belly carinated; mouth small; teeth minute. Family, Salmonidae.

PIACLE, pi'a-kl, *s.* (*piaculum*, Latin.) An enormous crime.—Obsolete.

To tear the paps that gave them suck! Can there be a greater *piacle* against nature,—can there be a more execrable or horrid thing?—*Howell*.

Being drawn up to the top, and then let fall from a considerable height, it comes down upon the head of the pile with a violent blow. *Thermo-electric pile*, an instrument which shows that heat, under certain circumstances, produces a galvanic effect. Melloni's pile consists of fifty small bars of bismuth and antimony, placed parallel, side by side, in one close bundle, bound together by a ring. The first and last bars have wires to them, which are connected with a galvanometer. The alternate bars of bismuth and antimony are soldered at the extremities, being separated in every other part by some insulating substance, as silk. The slightest difference in the heat of the extremities of the pile is indicated by the galvanometer. In Galvanism, the *Galvanic pile* is a number of galvanic circles united together, so as to form a compound series of elements acting in unison, or galvanic battery. Those batteries are more particularly called *piles*, in which the elements are piled one upon another, and are commonly formed by heaping up alternate pieces of copper and zinc with a piece of damped cloth or pasteboard between each pair of the metallic plates.

PILEA, pil'e-a, *s.* (*pileos*, a cap, Gr. in allusion to one of the divisions of the perianthium.) A genus of plants: Order, Urticaceae.

PILEANTHUS, pil-e-an'thus, *s.* (*pileus*, a cap, and *anthos*, a flower, Gr. in reference to the flower, which is enclosed within a one-leaved involucre before expansion.) A genus of American shrubs: Order, Myrtaceae.

The cellular substance which forms the centre of the stems of Exogenous plants, and round which the annual concentric vascular wood is arranged; the spinal cord of animals; strength or force; energy; cogency; concentrated force; closeness and vigour of thought and style; condensed substance or matter; quintessence; weight; moment; importance;
Enterprises of great pith and moment.—Shaks.
—*v. a.* to sever the spinal cord. *Pith-balls*, small balls made of the pith of the elder-tree, extremely useful in numerous electrical experiments, to show the effects of attraction and repulsion.

PITHESIA—PITTACAL.

PITHESIA, *pith-ish'e-a*, *s.* (*pithekos*, an ape, Gr.) A genus of Quadrumana of nocturnal habits, and making a near approach to the apes, the tail being only a few inches long.

PITHICUS, *pith'e-kus*, *s.* (*pithekos*, an ape, Gr.) The Pongo, a genus of apes.

PITHILY, *pith'e-le*, *ad.* With strength; with close or concentrated force; cogently; energetically.

PITHINESS, *pith'e-nes*, *s.* Energy; strength.—Seldom used.

PITHLESS, *pith'les*, *ad.* Destitute of pith; wanting strength, cogency, or concentrated force.

PITHO, *pi'tho*, *s.* In Fabulous History, the goddess of Persuasion among the Romans. She was supposed to be the daughter of Mercury and Venus, and was represented with a diadem upon her head, to indicate the influence she exercised over the affairs of men.

PITHOLE, *pit'hole*, *s.* A mark or cavity made on the skin by disease, more particularly small-pox;
I have known a lady, sick of the small-pox, only to keep her face from *pitholes*, take cold, strike them in again, kick up the heels, and vanish!—*Beau. & Flet.*

PITHY, *pith'e*, *a.* Consisting of pith; abounding with pith; strong; forcible; energetic.

PITHYS, *pith'is*, *s.* A genus of birds belonging to Myotherinæ, or Ant-thrushes: Family, Merulidæ.

PITIABLE, *pit'e-a-bl*, *a.* (*pitoyable*, Fr.) Deserving pity; worthy of compassion; miserable.

PITIABLENESS, *pit'e-a-bl-nes*, *s.* The state of deserving pity.

PITIEDLY, *pit'e-ed-le*, *ad.* In a situation to be pitied.—Not usual.
He is properly and *pitiedly* to be counted alone that is illiterate.—*Fellham.*

PITIFUL, *pit'e-ful*, *a.* Tender; compassionate; melancholy; moving compassion; miserable; worthy of being pitied; paltry; contemptible; despicable; very small; insignificant.

PITIFULNESS, *pit'e-ful-nes*, *s.* Tenderness; mercy; compassion; despicableness.

PITIFULLY, *pit'e-ful-e*, *ad.* With pity; with compassion; in a manner to excite pity; contemptibly; despicably; meanly.

PITILESS, *pit'e-les*, *a.* Without pity; destitute of compassion; merciless; exciting no pity;
But they do perish *pitiless* that wear
Through sloth away.
So I do perish *pitiless* through fear.—*Davies.*

PITILESSLY, *pit'e-les-le*, *ad.* Without mercy or compassion.

PITILESSNESS, *pit'e-les-nes*, *s.* Unmercifulness; insensibility to the distresses of others.

PITMAN, *pit'man*, *s.* In Sawing, the man who stands in the pit, or beneath the timber sawn; the piece of timber which connects the lower end of a saw-mill with the wheel which moves it; a collier.

PITSAW, *pit'saw*, *s.* The large saw used in dividing timber, used in a saw-pit.

PITTA, *pit'ta*, *s.* (*pissa*, or *pitta*, pitch, Gr.) A genus of birds placed by Swainson among the Myotherinæ, or Ant-thrushes: Family, Merulidæ.

PITTACAL, *pit'ta-kal*, *s.* (*pitta*, pitch, and *kallor*, beautiful, Gr.) A dark-blue solid substance, somewhat like indigo; assumes a metallic, fiery appearance on friction, and varies in tint from copper to golden. It has neither taste nor smell, is diffusible in water, and dyes a fast blue upon linen and cotton goods, with the usual mordants. It is obtained from wood-tar, and is one of the six principles discovered in that substance by M. Reichenbach.

PITTACUS—PLACABILITY.

PITTACUS, pit'ta-kus, *s.* A native of Mitylene, in Lesbos, one of the seven wise men of Greece, so called.

PITTANCE, pit'tans, *s.* (*pitance*, Fr.) Originally, the allowance of meat doled out to a monk in the convent; a very small portion allowed or assigned.

PITTIZITE, pit'te-zite, *s.* (*pittoz*, pitch, Gr.) A species of pitchy iron ore.—See Pitchy iron ore.

PITOSPORACEÆ, pit-to-spo-ra'se-æ, *s.* A natural order of Exogenous plants, consisting of trees or shrubs, with regular symmetrical flowers, axile and parietal placentæ; stamens five, alternate with the petals; ascending or horizontal ovules and imbricated petals; fruit capsular or berried; seed often covered with a glutinous or resinous pulp. It belongs to the Berbal alliance of Lindley.

PITOSPORUM, pit-tos-po-rum, *s.* (*pitto*, resin, and *sporos*, a seed, Gr. in allusion to the seeds being covered with resinous pulp.) A genus of plants, with tubular, white, or yellowish flowers: Type of the order Pittosporaceæ.

PITUITA, pit-u'e-ta, *s.* (Latin, *pituite*, French.) In Pathology, phlegm; viscid mucus.

PITUITARY, pit-u'e-ta-re, *a.* (*pituitarius*, Lat.) Conducting phlegm. *Pituitary gland*, in Anatomy, a process of the brain situated in a duplicature of the dura mater in the sella turcica of the sphenoid bone. *Pituitary membrane*, the mucous membrane which lines the nostrils, and sinuses communicating with the nose; is so called because it secretes the mucus of those parts.

PITUITOUS, pit-u'e-tus, *a.* Consisting of phlegm.

PITUS, pi'tus, *s.* A genus of fossil plants from the carboniferous strata of Tweeddale.

PITY, pit'e, *s.* (*pitie*, Fr. *pitié*, Ital.) Compassion; sympathy with misery; the ground or subject of misery; cause of grief; thing to be regretted;—*v. a.* to regard with tenderness on account of unhappiness; to compassionate; to sympathise with.

PITYING, pit'e-ing, *v. a.* Expressing pity; bestowing pity.

PITYRIASIS, pit-e-ri'a-sis, *s.* (*pityron*, bran, Gr.) Dr. Willan's name for a genus of cutaneous diseases, characterized by irregular patches of small thin scales, which frequently form and separate, but do not collect into crusts, nor are attended with inflammation.

PIVOT, piv'ot, *s.* (French, from *pivolo* or *piulo*, a peg or pin, Ital.) A pin on which anything turns.

PIX, piks, *s.* (*pyxis*, Lat.) The little box or chest in which the consecrated host of the Roman Catholic Church is kept. A box kept at the British mint, in which a small sample of the coins struck is deposited, in order to be assayed and compared with a standard preserved in the Exchequer. This operation, called 'Trial of the Pix,' is performed in presence of certain members of the Privy Council, the officers of the mint, and a jury of the Goldsmiths' Company. It usually takes place on the appointment of a new master of the mint, before his predecessor receives his discharge.

PIZZICATO, piz-ze-ka'to, *s.* (Italian.) A term in Music, signifying that the strings of the violin must be pinched with the fingers.

PIZZLE, piz'z'l, *s.* (*pees*, a tendon or string, Dutch.) In Bovine or other quadrupeds, the male urinary organ.

PLACABILITY, plak-a-bil'ete, } *s.* Willingness to
PLACABLENESS, plak-a-bl-nes, } be appeased;
possibility to be appeased.

PLACABLE—PLACENTA.

PLACABLE, pla'ka-bl, *a.* (*placabilis*, Lat.) That may be appeased; willing to forgive.
Methought I saw him placable and mild.—Mild.

PLACARD, pla-kard', } *s.* (French, from *plaz*, a ta-
PLACART, pla-kart', } ble, Gr.) Originally, an edict, declaration, or manifesto; now used for an advertisement posted in a public place;—*r. a.* to libel or denounce by posting a notification in a public place; to notify by a placard or advertisement. In Architecture, the decorations of the door of an apartment. *Placart* is not in use.

PLACATE, pla'kate, *v. a.* (*placo*, Lat.) To appease.—Not used.

PLACATED, pla'kay-ted, *a.* Appeased.—Not used.
The protection and beneficence of a placated Deity is not deducible from nature.—Forbes.

PLACE, plase, *s.* (French, *plaza*, Span.) A particular portion of indefinite space, occupied, or intended to be occupied, by any person or thing; any portion of space, as distinct from space in general; locality; ubiety; local relation; local existence; separate room or apartment;
In his brain
He hath strange places crammed with observation.—Shaks.

a seat; a residence; a mansion; passage or portion in a book; point or degree in order of proceeding; rank; order of priority, dignity, or importance; ground; room;
There is no place of doubting but it is the very same.—Hammond.

station in life; calling; occupation; condition; a city, town, village; fortress; a country, kingdom, &c.; space in general; room or stead, in the sense of substitution. In Astronomy, *place* of the sun, a planet, or a star, denotes the sign and degree of the zodiac which the luminary is in; or the degree of the ecliptic, counting from the beginning of Aries, which the planet or star's circle of longitude cuts, and therefore coincides with the longitude of the sun, planet, or star. In Falconry, height.

A falcon towering in his pride of place.—Shaks.

In Arithmetic, the situation of figures in a numerical order of notation, which is distinguished into units, tens, hundreds, &c.;—*v. a.* to put in any rank, condition, or office; to fix; to settle; to induct; to establish; to invest; to put out at interest; to take place, to happen; to come into actual existence or operation; to take the precedence or priority; to give place, to give room; to give advantage; to yield to the influence of; to listen to;
Neither give place to the devil.—Eph. iv.

to give way; to yield or suffer to pass by. *High places*, in Scripture, the mounts on which idolatrous sacrifices were offered.

PLACEBO, pla-se'bo, *a.* (*placeo*, I please, Lat.) An epithet for any medicine, the object of which is to please and soothe the patient.

PLACED, plaste, *a.* Elected; appointed; applied to military and naval officers, and to clergymen of the Church of Scotland, signifying their actual enjoyment of office.

PLACEMAN, plase'man, *s.* One who has a place or office under government.

PLACENTA, pla-sen'ta, *s.* (Latin, *placous*, a cake, Gr.) In Anatomy, the afterbirth, the cellular substance which connects the mother with the child. In Botany, a copious development of cel-

lular tissue formed at some point of the inside of a carpellum, and out of which the ovules or young seeds arise. In Geology, a name given to a section of the Catocysti, because the shells are flat.

PLACENTAL, pla-sen'tal, *a.* Pertaining to the placenta.

PLACENTARIA, pla-sen-ta'le-a, *s.* The name of that primary division of the class Mammalia, which includes the orders which have either a placenta or a vascular chorion, by which the foetus is attached to the parietis of the uterus.

PLACENTATION, pla-sen-ta'shun, *s.* In Botany, the disposition of the cotyledons or lobes in the germination of seeds.

PLACENTIFEROUS, pla-sen-tif'er-us, *a.* In Botany, bearing or producing a placenta.

PLACENTULA, pla-sen'tu-la, *s.* A genus of microscopic Foraminifera.

PLACER, pla'sur, *s.* One who places, locates, or sets.

PLACID, plas'id, *a.* (*placidus*, Lat.) Gentle; undisturbed; quiet; equable; serene; mild; unruffled; calm; tranquil.

PLACIDITY, pla-sid'e-te, *s.* Calmness.

PLACIDLY, plas'id-le, *ad.* Mildly; calmly; quietly; without disturbance of the passions.

PLACIDNESS, plas'id-nes, *s.* Calmness; quietness; tranquillity; unruffled state of mind; mildness; gentleness; sweetness of disposition.

PLACIT, plas'it, *s.* (*placitum*, that which pleases, Lat.) A decree or determination.—Obsolete.

We spend time in defence of our *placita*, which might have been employed upon the universal Author.—*Glanville*.

PLACITORY, plas'e-to-re, *a.* (*placitum*, a decree, Lat.) Relating to pleas or pleadings in courts of law.

PLACITUM, plas'e-tum, *s. plu.* (Latin, a decree.) A public court or assembly of the middle ages, in which the sovereign presided, when a consultation was held upon the affairs of the state.

PLACKET, } plak'et, *s.* (*placquer*, to clap on, Fr.)

PLAQUET, } A petticoat.—Obsolete.

The bone-ache is the curse dependant on those that war for a *placket*.—*Shaks.*

PLACOBANCHIATA, pla-ko-brang-ke-a'ta, } *s.* A

PLACOBANCHIDEÆ, pla-ko-brang-ke de, } name given by M. Rang for his fifth family of Gastropods, but placed by Cuvier among his Nudibranchiata.

PLACOBANCHUS, plak-o-brang'kus, *s.* (*plakous*, a flat cake, Gr.) A genus of Mollusca: Order, Nudibranchiata.

PLACOID, plak'oyd, *a.* (*plax*, a broad plate, and *eidos*, a form, Gr.) In Geology, having the skin covered irregularly with what seem like plates.

PLACOIDIAN, pla-koy'de-an, *s.* (*plax*, a broad plate, and *eidos*, form, Gr.) One of the orders into which M. Agassiz divides the class of fishes. The Placoidians are distinguished by their skin being irregularly covered with plates of enamel. In this order are comprised all the cartilaginous fishes of Cuvier, the sturgeon only excepted;—*a.* belonging to the order of Placoidians.

PLACUNA, pla-ku'na, *s.* (*plakous*, a thin broad plate, Gr.) A genus of Mollusca, the shells of which are much compressed, perlaceous, and with two internal lamellar, sagittate, cardinal teeth in one valve: Family, Ostracidae.

PLACUNOMIA, pla-ku-no'me-a, *s.* (*placuna*, and *onomia*.) A genus of Mollusca, the shells of

which are attached, and possess the form and general structure of Anomia, but having two cardinal teeth: Family, Ostracidae.

PLADAROTIS, plad-a-ro'tis, *s.* (*pladaros*, wet, Gr.) A fungous and flaccid tumour within the eyelid.

It has been supposed to be the purulent ophthalmia.

PLADERA, plad'er-a, *s.* (*pladeros*, abounding in juice, *platys*, broad, and *cheilos*, a lip, Gr.) A genus of Leguminous plants: Suborder, Papilionaceae.

PLAFOND, pla'fond, } *s.* (*playfond*, Fr.) In Archi-

PLATFOND, plat'fond, } tecture, the ceiling of a room; the under side of the projection of the lamier of the cornice; generally, any soffit.

PLAGAL, pla'gal, *a.* (*plagios*, oblique, Gr.) In Music, plagal melodies are such as have their principal notes lying between the fifth of the key, and the octave or twelfth.

PLAGIANTHUS, plaj-e-an'thus, *s.* (*plagios*, oblique, and *anthos*, a flower, Gr. because two of the petals are remote from the rest, which causes the flower to have an oblique-appearance.) A genus of plants: Order, Bombacae.

PLAGIARISM, pla'jer-izm, *s.* (*plagiarius*, a kidnapping, Lat.) A literary theft; an appropriation of the literary labours of another.

PLAGIARIST, pla'jer-ist, *s.* One who purloins the writings of an author, and imposes them on others as his own.

PLAGIARIZE, pla'jer-ize, *v. a.* To steal or purloin from the writings of another.

PLAGIARY, pla'jer-e, *a.* Kidnapping; practising literary theft;—*s.* a literary thief; a plagiarist.

PLAGIHEDRAL, plaj-e-he'dral, *a.* (*plagios*, oblique, and *hedra*, a base, Gr.) In Mineralogy, having oblique sides.

PLAGII, pla'je-i, *s.* (*plagiarius*, a kidnapper, Lat.) In Scottish Law, the stealing of human beings.

PLAGIOBOTRYS, plaj-e-o-bot'ris, *s.* (*plagios*, transverse, and *botrys*, a pit, Gr. in reference to the pits at the base of the carpels being transverse, and not longitudinal.) A genus of plants: Order, Boraginaceae.

PLAGIOLOBIUM, plaj-e-o-lo'be-um, *s.* (*plagios*, oblique, and *lobos*, a pod, Gr. in reference to the shape of the pod.) A genus of Leguminous plants: Suborder, Papilionaceae.

PLAGIONITE, plaj'e-o-nite, *s.* (*plagios*, oblique, Gr. from the form of the crystals.) A mineral occurring in oblique four-sided prisms, occupying the drusy cavities of the matrix, at Wolfsberg, in the Hartz. Composition—antimony, 37.94; lead, 40.52; sulphur, 21.53.

PLAGIOSTOMA, plaj-e-os-to-ma, *s.* (*plagios*, oblique, and *stoma*, a mouth, Gr.) A genus of Mollusca, the shells of which are free, inequilateral, and oblique; umbones remote; subarticulated on one side; hinge straight in one valve, with a triangular notch in the other; surface spinous or smooth. Found in the fossil state only: Family, Ostracidae.

PLAGUE, plage, *s.* (*plaign*, a stroke, Gael. *plaga*, Lat. *pege*, Gr.) A disease eminently contagious and destructive; pestilence; state of misery; anything troublesome and vexatious; a typhus fever eminently contagious and attended with great debility; at an uncertain period of the disease, carbuncles or buboes ensue.—*Cullen*.

—*v. a.* to infest with disease, calamity, or natural evil of any kind; to vex; to harass; to trouble; to embarrass.

PLAGUEFUL—PLAINHEARTEDNESS.

PLAGUEFUL, plague'fūl, *a.* Abounding with plague or plagues.

PLAGUELESS, plague'les, *a.* Free from plague.

PLAGUEY, plague'e, *s.* Vexatious; troublesome; tormenting; full of the plague.

When did the heat which my veins fill,
Add one more to the plaguey bill?—*Doune.*

Methinks I see him entering ordinaries,
Dispensing for the pox and plaguey houses,
Reaching his dose, walking Moorfields for lepers.—
Ben Jonson.

PLAGUITY, plague'e-le, *ad.* Vexatiously; in a manner to harass or embarrass; greatly; horribly.—
Two last significations vulgar.

PLAGUSIA, pla-goo'zhe-a, *s.* (*plagos*, obtuse, Gr.) A genus of fishes, in which the snout is obtuse, and very much advanced before the mouth; without pectoral fins; dorsal, caudal, and ventral fins united: Family, Siluridae.

PLAICE, plase, *s.* (*plie*, Fr. *plattesse*, Germ.) A species of flounder (*Platessa vulgaris*), taken in great abundance on the coasts of Great Britain and Ireland. It grows to the weight of eight or ten lbs., spawns in February or March, and is in the best condition for the table at the end of May. *Plaice-mouth*, a wry mouth.

PLAID, plad, *s.* (Celtic, a blanket.) A striped or variegated cloth, constituting a prominent part of the costume of the Highlanders of Scotland: its different patterns served to distinguish the various clans. It is sometimes spelt, but erroneously, *plad*.

PLAIN, plane, *a.* (French, from *planus*, Lat.) Smooth; level; free from protuberances; without elevations and depressions; open; clear; flat; void of ornament; simple; artless; not subtle; not spacious; not learned; honestly rough; frank; open in manner; sincere; mere; bare;

He that beguiled you in plain accent was a plain knave.—
Shaks.

evident; manifest; discernible; not obscure; not varied with much art;

A plain song plain-singing voice requires;
For warbling notes from inward cheering flow.—
Sidney.

not ornamented with figures; not dyed, as *plain muslin*;—*ad.* not obscurely; distinctly; articulately; simply; with rough sincerity; artlessly; bluntly;—*s.* level land; an open flat field; a flat expanse; a field of battle;

Pour forth Britannia's legions on the plain.—*Arbuthnot.*
—*v. a.* to level; to make even or level; to make plain, evident, or clear;

What's dumb in show, I'll plain in speech.—*Shaks.*

—*v. n.* to lament; to wail.—*Obsolete.*

The fox that first this cause of grief did find,
'Gan first, thus plain, his case with words unkind.—
Spenser.

Plain work, plain needle-work, as distinguished from embroidery. *Plain chant*, in ancient ecclesiastical music, signified the chief melody, which was confined within the natural bounds of the scale.

PLAINDEALING, plane-de'ling, *a.* Honest; open; acting sincerely and without art;—*s.* management without art or duplicity; sincerity.

PLAINHEARTED, plane-hār'ted, *a.* Having a sincere and open disposition; communicating without art, reserve, or hypocrisy.

PLAINHEARTEDNESS, plane-hār'ted-ness, *s.* Frankness of disposition; sincerity.

PLAINING—PLANARIUM.

PLAINING, plain'ing, *s.* Complaint; the act of making level or smooth.

The incessant weepings of my wife,
And piteous plannings of the pretty babes,
Forced me to seek delays.—*Shaks.*

PLAINLY, plane'le, *ad.* With a level surface; without cunning or disguise; without ornamental or artificial decoration; frankly; honestly; sincerely; in earnest; fairly; in manner easily to be understood; evidently; clearly; not obscurely.

PLAINNESS, plane'nes, *s.* Levelness; evenness of surface; openness; rough sincerity; candour; artlessness; simplicity; clearness.

PLAINSONG, plane'song, *s.* The plain unvaried song or church-chant; the *planus cantus* of the Roman Catholic Church, so called in contradistinction to the *prick-song*, or music by note.

PLAIN-SPOKEN, plane-spo'kn, *a.* Spoken with unreserved sincerity.

PLAINST, playnt, *s.* (*plainte*, from *plaindre*, to lament, Fr.) Lamentation; complaint; audible expression of grief; representation of injury or wrongs. In Law, a private memorial, in which is set forth the complaint and cause of action; the propounding or exhibiting of any action, personal or real, in writing.

PLAINSTFUL, playnt-fūl, *a.* Complaining; lamenting.

PLAINSTIFF, plane'tif, *s.* (*plaintif*, mournful, making complaint, Fr.) In Law, the person who commences a suit before a tribunal for the recovery of a claim. *Plaintiff* is used improperly by Prior for *plaintive* in the following lines:—

His younger son on the polluted ground,
First fruit of death, lies *plaintif* of a wound
Given by a brother's hand.

PLAINSTIVE, plane'tiv, *a.* Complaining; lamenting; expressive of sorrow.

PLAINSTIVELY, plane'tiv-le, *ad.* In a manner expressive of grief; sorrowfully.

PLAINSTIVENESS, plane'tiv-nes, *s.* The quality or state of expressing grief.

PLAINSTLESS, plane'tles, *s.* Without plaint; unrepining.

PLAIT, plate, *s.* (*pleat*, Gael. *pleth*, Welsh, the old form of the word is that of the Gaelic.) A fold; a doubling; a braid of hair; a tress.

Holding base sin in *pleats* of majesty.—*Shaks.*

—*v. a.* to fold; to double; to interweave straws; to braid; to entangle; to involve.

Time shall unfold what *plaited* cunning hides.—*Shaks.*

PLAITED, pla'ted, *a.* Folded; braided.

PLAITER, pla'tur, *s.* One who plaits or braids.

PLAN, plan, *s.* (*planus*, flat, Lat.) The representation of something on a plan, as the ichnography of a building; a scheme; a project detailed; the form of something to be done existing in the mind, with the several parts adjusted in idea, expressed in words or committed to writing; a horizontal section of the walls, partitions, &c. of a building, showing the distribution of the ground plot;—*v. a.* to scheme; to devise; to form a draught or representation of any intended work; to form in design.

PLANARIA, pla-na're-a, *s.* (*planus*, flat, Lat.) A genus of Entozoa: Order, Parenchymata. In Conchology, the name given by Captain Brown to a genus of discoid fossil shells, which resemble *Planorbis*, but the outer lip is reflected, and the animal is supposed to have been marine.

PLANARIUM, pla-na're-um, *s.* (*planarius*, plain, Gr.

PLANARY—PLANE.

in reference to the broad fat legumes.) A genus of Leguminous plants; Suborder, Papilionaceæ.

PLANARY, pla'na-re, *a.* Pertaining to a plan.

PLANAXIS, pla-nak'sis, *s.* (*planus*, flat, Lat. and *axon*, an axis, Gr.) A genus of marine Mollusca, belonging to the Melaniana, in which the shell is obovate; inner lip much thickened above; pillar flattened; the base with a small notch: Family, Turbidæ.

PLANCH, plantsh, *v. a.* (*planche*, a plank, Gr.) To plank; to cover with planks or boards.

PLANCHER, plantsh'ur, *s.* A floor made of planks or boards.—Obsolete.

PLANCHET, plantsh'et, *s.* (*planchette*, Fr.) A flat piece of metal, as the *planchets* prepared for the coining press.

PLANCHING, plantsh'ing, *s.* The laying of the wooden floors of a building.

PLANE, plane, *s.* (*planus*, flat, Lat.) In Geometry, a surface without curvature, or one which everywhere coincides with a right line, corresponding to a plain or level in popular language. In Astronomy, an imaginary surface passing through any of the circles of the sphere, as the *plane* of the ecliptic, the *plane* of the earth's orbit, &c. In Crystallography, the face of a crystal. In Mechanics, a tool used by joiners, &c. who work in wood, consisting of a piece of wood called the stock, through which passes obliquely a broad flat chisel, generally double, called the cutting-iron; the instrument, of which there are several kinds, as the *juck-plane*, *hand-plane*, &c. is so designated, because it is contrived for the purpose of producing plain or smooth surfaces. In Perspective, there are principally three *planes* to be considered—the *perspective plane* or table on which the object is formed, usually perpendicular to the horizon, between the eye and the object; the *geometrical or ground plane*, on which the former is supposed to stand at right angles; and the *vertical plane*, passing along the principal ray through the eye, and perpendicular to the two already mentioned. In Optics, the *plane of reflection*, that which passes through the point of reflection; *plane of refraction*, a plane surface, drawn through the incident and refracted rays. In Dialling, the surface upon which any dial is drawn. *Plane of gravitation*, a plane supposed to pass through the centre of gravity of any body. *Horizontal plane*, a plane parallel to the horizon. *Inclined plane*, a plane inclined to the horizon, and forming one of the mechanical powers. *Plane angle*, an angle contained under two lines or surfaces, so called in contradistinction to a solid angle. *Plane problem*, in Geometry, is a problem which can be solved by the intersection of straight lines and circles, without the aid of the conic sections, or any of the higher curves. *Plane trigonometry*, the art of determining the sides and angles of plane triangles: it is used in almost every part of practical mathematics, navigation, and surveying, as very often by this science only can altitudes be ascertained. *Plane chart*, a map of the earth, or any portion of it, in which the meridians and parallels of latitude are all straight lines. *Plane sailing*, the operation of working a ship on a plane chart, constructed on the principle of the earth being an extended plain. *Plane table*, an instrument greatly used in taking angles previous to the general use of the theodolite. It consisted of a board on which the paper was laid, graduated along the sides, by

PLANER—PLANIPODES.

which the lines were plotted. It had a compass and pair of sights connected with it.

PLANER, pla'nur, *s.* One who smooths with a plane.

PLANET, plan'et, *s.* (*planco*, I wander, Gr.) Literally, that which wanders; a celestial body revolving round another; the name given by the ancient Greeks to a few bright and conspicuous stars which are constantly changing their place in the celestial sphere, and thus appear to wander among the constellations. *Elements of the planets*, certain quantities necessary to be known in order to determine the theory of the elliptic motion of the planets. Astronomers reckon seven of those elements, of which five relate to their elliptic motion, viz. the duration of the sidereal revolution, the mean distance, the eccentricity, the mean longitude of the planet at any given epoch, and the longitude of the perihelion at the same epoch. The other elements relate to the position of the orbit, and are, the longitude at a given epoch of the nodes of the orbit with the ecliptic, and the inclination of the orbit to this place. *Planet-wheels*, a mechanical contrivance for producing a variable angular motion, by the revolution on their foci, of two elliptical wheels, working in each other by means of teeth placed on their perimeters. *Planet-struck*, affected by the influence of the planets; blasted.

PLANETARIUM, plan-e-ta-re-um, *s.* An astronomical instrument for showing the movements of the different planets; an orrery.

PLANETARY, plan'e-ta-re, *a.* (*planetaire*, Fr.) Pertaining to the planets; consisting of planets; under the dominion or influence of a planet; produced by planets; having the nature of a planet; erratic or revolving. *Planetary system*, the solar system.

PLANETED, plan'et-ed, *a.* Belonging to the planets.

Tell me, ye stars, ye planets; tell me, all
Ye star'd and planeted inhabitants, what is it,—
What are these sons of wonder?—Young.

PLANETICAL, plan-et'e-kal, *a.* Pertaining to the planets.

PLANE-TREE, plane'tre, *s.* The common name of trees of the genus *Platanus*, *Planetule*, or *Sycamore*.

PLANETULE, plan'et-ule, *s.* A little planet.—*Conybear*.

PLANGENT, plan'jent, *a.* Beating in the manner of a wave.

PLANI, pla'ni, *s.* A family of flat fishes.

PLANICEPS, plan'e-seps, *s.* A genus of Hymenopterous insects: Family, Fossoræ.

PLANIFOLIOUS, plan-e-fo-le-us, *a.* (*planus*, flat, and *folium*, a leaf, Lat.) Flat-leaved.

PLANIMETRICAL, plan-met're-kal, } *a.* Pertaining
PLANIMETRIC, plan-e-met'rik, } to the mensuration of plane surfaces.

PLANIMETRY, plan-im'e-tre, *s.* (*planus*, plain, and *metior*, a measure, Lat.) The mensuration of plane surfaces.

PLANIPENNER, plan-e-pen'nis, *s.* (*planus*, flat, and *penna*, a wing, Lat.) The name given by Cuvier to his second family of the Neuroptera, comprising such genera as have the antennæ always multi-articulated, and much longer than the head, without being subulate or styliform; the wings much reticulated and naked.

PLANIPETALOUS, plan-e-pet'a-lus, *a.* (*planus*, flat, Lat. and *petalon*, a petal, Gr.) In Botany, having flat petals.

PLANIPODES, pla-nip'o-des, *s.* (*planus*, Lat. and *pous*, a foot, Gr.) A name given to the Mimi or

PLANISH—PLANTABLE.

- Mimics of the Romans, because they always acted barefooted.
- PLANISH**, plan'ish, *v. a.* To make smooth; to polish.
- PLANISHING**, plan'ish-ing, *s.* (A Scotch word.) Furniture of a house.
- PLANISPHERE**, plan'is-fere, *s.* (*planus*, plain, and *sphera*, a sphere or globe, Lat.) A projection of the sphere and its circles on a plane; an astronomical instrument for observing the motions of the heavenly bodies, consisting in a plane representing the stars, constellations, &c. in their proper situations.
- PLANITES**, pla-ni'tes, *s.* (*planus*, flat, Lat.) A subgenus of the Ammonites, in which the edge of the septa is foliaceous.
- PLANK**, plank, *s.* (*planche*, Fr.) A broad piece of sawed timber, differing only from a board in being thicker;—*v. a.* to cover or lay with planks. *Plank-hook*, a pole with an iron hook at the end, with which navigators shift their runs or wheeling planks as occasion requires. *Plank plant*, the shrub *Bossia scolopendrium*.
- PLANLESS**, plan'les, *a.* Having no plan.
- PLANNER**, plan'nur, *s.* One who plans; a projector.
- PLANO**, pla'no, (*planus*, Lat.) A prefix, signifying flat. *Plano-concave*, flat on one side and concave on the other; *plano-convex*, flat on one side and convex on the other; *plano-conical*, flat on one side and conical on the other; *plano-horizontal*, having a level horizontal surface or position; *plano-subulate*, smooth and awl-shaped.
- PLANORBIS**, plan-awr'bis, *s.* (*planus*, flat, and *orbis*, an orb, Lat.) A genus of discoidal freshwater univalves, resembling the ammonite, but not chambered. The shells of this genus are reversed; they abound in pools and ditches: Family, Helicidae.
- PLANT**, plant, *s.* (*plante*, Fr.) A vegetable; an organic body, distinguished chiefly from an animal by its want of digestive organs and a nervous system;—*v. a.* to put in the ground in order to grow; to set; to cultivate; to engender; to set the germ of anything that may increase; to place; to fix; to settle; to establish, as to *plant* a colony; to furnish with plants, as to *plant* a garden; to direct or point properly, as to *plant* a cannon; to introduce and establish, as to *plant* Christianity among the heathen;—*v. n.* to perform the act of planting;
- NOTE**.—The neuter of this verb, though given by previous lexicographers, seems improper; to plant, in every instance, must imply something planted.
- In the Manege, a horse is said to be well *planted*, when he stands equally firm on all his legs, and not with one advanced before the other;—(*planta*, Gr.) the soles of the feet.
- Knotty legs and plants of clay,
Seek for ease, or love delay.—Ben Jonson.
- Plant cane*, a West Indian name for sugar-canes of the first growth, in contradistinction to the ratoons, or sprouts from roots of canes which have been cut. *Plant-bugs*, insects of the genus *Coccus*. *Plant-louse*, the Aphides, an insect which infests plants, called also the vine-freter and puceron.
- PLANTABLE**, plant'a-bl, *a.* Capable of being planted.

PLANTAGE—PLANTING.

- PLANTAGE**, plant'aje, *s.* Herbage, or herbs in general.—Obsolete.
- Truth tired with irritation,—
As true as steel, as *plantage* to the moon.—Shaks.
- PLANTAGENET**, plan-taj'e-net, *s.* (*planta*, a plant, and *genista*, the broom, Lat. from the Earl of Anjou, the ancestor of the royal race, having been scourged with broom twigs during a pilgrimage to Rome; or, according to others, from the broom having been worn as a badge in the cap of the ancestors of Henry II.) The surname of the royal family of England, from Henry II. to Richard III. inclusive. This name belongs to the noble house of Buckingham.
- PLANTAGINACEÆ**, plan-ta-jin-a'se-e, *s.* (*plantago*, one of the genera.) A natural order of Exogenous herbaceous plants, usually without a stem; leaves flat or ribbed; flowers in spikes; stamens single, without any floral envelope, but with several small scales and appendages mixed among them; anthers linear and two-celled; ovary one-celled, and terminated by a thick awl-shaped style, with the stigmated surface on one side; ovules solitary or two; seeds pendulous and elongated.
- PLANTAGO**, plan-ta'go, *s.* (Latin name, supposed to be from *planta*, the sole of the foot.) A genus of plants, type of the order Plantaginaceæ.
- PLANTAIN**, or **PLANTAIN-TREE**.—See *Musa*.
- PLANTAL**, plant'al, *a.* Pertaining to plants.—Obsolete.
- PLANTAR**, plan'tar, *a.* (*planta*, the sole of the foot, Lat.) In Anatomy, appertaining to the sole of the foot. *Plantar aponeurosis*, the strong tendinous expansion which lies under the integuments in the sole of the foot. *Plantar arteries*, two branches of the posterior tibial.
- PLANTARIS**, plan-ta'ris, *s.* A muscle of the foot, situated on the leg, that assists the soleus, and pulls the capsular ligament of the knee from between the bones.
- PLANTATION**, plan-ta'shun, *s.* The act or practice of planting; a piece of ground upon which trees or shrubs have been planted; an estate appropriated to the cultivation of sugar, cotton, coffee, indigo, &c.; a colony; introduction; establishment.
- PLANT-CUTTERS**.—See *Phytotomiae*.
- PLANTED**, plant'ed, *part.* Settled; well-grounded.
- A man in all the world's new fashion *planted*,
That hath a mint of phrases in his brain.—Shaks.
- PLANTER**, plant'ur, *s.* One who plants, sets, introduces, or establishes; the owner of a plantation.
- PLANTERSHIP**, plant'ur-ship, *s.* The business of a planter. In the West Indies, plantership denotes the management of a sugar plantation, including not only the cultivation of the cane, but the care of the various processes for the extraction of sugar, and the making of sugar-spirits.
- PLANTICLE**, plant'e-kl, *s.* A name given to a young plant, or plant in embryo.
- PLANTIGRADA**, plan-te-gra'da, *s.* (*planta*, the sole of the foot, and *gradior*, I walk, Lat.) The Plantigrades, a tribe of carnivorous Mammifera, comprehending those who, like the bears, apply the entire, or nearly the entire, sole of the foot to the ground in walking.
- PLANTIGRADE**, plant'e-grade, *a.* Walking on the sole of the foot;—*s.* an animal which walks on the sole of the foot.
- PLANTING**, plant'ing, *s.* The act of forming plan-

tations of trees; the process of inserting plants in the soil by the spade, dibble, trowel, or other instrument. In Architecture, the laying of the first courses of stone on the foundation, according to the plan, with all the exactness possible.

PLANTULE, plant'ule, *s.* The embryo of a plant.

PLANULACEA, plan-u-la'se-a, *s.* (*planus*, flat, Lat.)

The name given by De Blainville for the second family of his Cellulacea, containing the genera *Rennulina* and *Peneropsis*: Order, Foraminifera.

PLANULARIA, plan-u-la're-a, *s.* (*planus*, flat, Lat.)

A genus of microscopic Foraminifera.

PLANULINA, plan-u-li'na, *s.* (*planus*, flat, Lat.)

A genus of microscopic Foraminifera.

PLANULITES, plan-u-li'tes, *s.* (*planus*, flat, Lat. and *lithos*, a stone, Gr.)

A genus of microscopic Foraminifera.

PLANUM OS, pla-num os, *s.* (Latin, plain bone.)

The orbitary plate of the othmoid bone, so called from its plain surface.

PLANKTY, plank'te, *s.* The name of an Irish dance.

PLASH, splash, *s.* (*plus*, a puddle, Dutch.) A collection of stagnant water; a puddle; the branch of a tree partly cut or lopped, and bound to other branches;—*v. n.* to dabble in water; to splash;—*v. a.* (*plisser*, Fr. from *plico*, I fold, Lat.) to interweave branches.

FLASHING, flash'ing, *s.* A mode of repairing or modifying a hedge by bending down a portion of the shoots, cutting them half through near the ground, and then twisting them through the upright stems, so as to render the whole more effective as a fence.

FLASHY, flash'y, *a.* Watery; abounding in puddles.

PLASM, plazm, *s.* (*plasma*, Gr.) A mould or matrix in which anything is cast or formed.

PLASMA, plaz'ma, *s.* (Greek.) A grass-green variety of rhombohedral quartz; fracture conchoidal; lustre feeble and resinous. It occurs in beds associated with common chalcedony. It is brought from Italy and the Levant; was worn by the Romans, and formed into ornamental articles of dress.

PLASMATICAL, plaz-mat'e-kal, *a.* Having the power of giving form.

PLASTER, plas'tur, *s.* (Swedish.) A composition of lime, sand, and water, for coating walls; the material in which architectural ornaments are cast. In Pharmacy, an external application, consisting generally of oxide of lead and olive oil;—*v. a.* to overlay with plaster; to cover with any viscous matter, as a plaster; to smooth over; to cover or conceal defects or irregularities. *Plaster of Paris*, a composition of several kinds of gypsum, dug near Montmartre, in the neighbourhood of Paris, used in building and in casting of busts, statues, &c.

PLASTERED, plas'turd, *part. a.* Overlaid with plaster.

PLASTERER, plas'tur-ur, *s.* One whose trade is to plaster walls, &c.; one who forms figures of plaster.

The plasterer makes his figures by addition, and the carver by subtraction.—*Wotton*.

PLASTERING, plas'tur-ing, *s.* The act of overlaying with plaster; work done in plaster; a covering of plaster;

A heart settled upon a thought of understanding, is as a fair plastering on the wall.—*Eccles. xxii. 17.*

PLASTER-STONE.—See Gypsum.

PLASTIC—PLATE.

PLASTIC, plas'tik, } *a.* (*plastikos*, from *plasseo*,
PLASTICAL, plas'te-cal, } I form, Gr.) Having the power to give form.

Benign Creator, let thy plastic hand
Dispose its own effect.—*Prior*.

In Physiology, an epithet applied to the power which determines the production of germs in organized bodies. *Plastic clay*, the lower part of the tertiary series of England and France, yielding, with green sands and pebbles, beds of red, white, or mottled clay, often of excellent quality for the potter. The series of beds related to these clays and sands has received the name of the plastic clay formation; but, by a large view of its geological and zoological characters, it may be ranked in the same group as the London clay, and thus be contained in the Eocene deposits of Lyell.

Plastic nature, a certain power by which, as an instrument, many philosophers, both ancient and modern, supposed that the great motions in the corporeal world, and the various processes of generation and corruption, were perpetually carried on.

PLASTICITY, plas-tis'e-te, *s.* The quality of giving form or shape to matter.

PLASTRON, plas'tron, *s.* (French.) A kind of leathern pad used by fencers to defend the body against thrusts; a name for the sternum of reptiles.

PLAT, plat, *v. a.* (Dutch and Danish, *flat*.) To weave; to form by texture;

When they had *platted* a crown of thorns, they put it upon his head.—*St. Matth. xxvii. 29.*

—*s.* a small piece of ground usually plain or smooth; a plain; a flat;—(obsolete;)—*adj.* plainly; openly; entirely; downright; smoothly; evenly;—(obsolete.) *Plats* of a ship are flat ropes of rope-yarn woven together, and used for the same purposes as *marline*. *Plat-vein*, in the Manege, a vein on the inside of each fore thigh, a little below the elbow.

PLATALEA, pla-ta'le-a, *s.* (*platys*, broad, Gr. from the nature of the bill, which is long, depressed, and spoon-shaped, with the tip considerably dilated.) A genus of birds of the Heron kind: Family, Ardeidae.

PLATANACEÆ, pla-ta-na'se-e, } *s.* (*platanus*, the
PLATANEEÆ, pla-ta'ne-e, } only genus.) The

Planes, an order of Exogenous plants with deciduous sheathing stipules, capitate flowers, limpid juice, an inferior radicle, albuminous embryo, and minute plumule. The planes are noble timber trees, natives of Barbary, the Levant, and North America, and are chiefly cultivated for their magnificent appearance.

PLATANE, plat'ane, *s.* The plane-tree.

PLANTHERA, pla-tan-the'ra, *s.* (*platys*, broad, and *unthera*, an anther, Gr.) A genus of plants: Order, Orchidaceæ.

PLATHAND, plat'band, *s.* (*plate*, and *bande*, Fr.)

An architectural term for any square moulding with little projection, as the list between flutings, the fasciæ of an architrave, &c. The lintel of a door or window is sometimes so called. In Gardening, a border of flowers along a wall or the side of a parterre.

PLATE, plate, *s.* (*plaat*, Dutch, *platte*, Germ.) A flat or extended piece of metal; armour in flat pieces, distinguished from mail; a shallow vessel from which provisions are eaten at table; wrought silver. In Architecture, a piece of timber lying

horizontally on a wall, for the reception of girders, joists, &c.; a silver cup or other piece of plate awarded as a prize in horse-racing; a page of stereotype, or fixed metallic plate, used in printing; a flat piece of copper, steel, or other metal, on which engravings are made. In common language, the impression from an engraved plate;—*v. a.* to cover or overlay with plate or metal, particularly with silver; to arm with plate or metal for defence;

Why plated in habiliments of war?—*Shaks.*

to adorn with plate; to beat out into thin laminæ. In Gunnery, the *prize-plates* are two plates of iron placed on the cheeks of a gun-carriage; *breast-plates*, two plates on the face of the carriage; and the *dudge-plates*, are the six which are placed on the carriage wheels. *Plate-rack*, a fixture over the sink in a scullery, for the reception of dinner plates and dishes after washing. *Plate-glass*, the fine kind of glass cast in thick plates and used for mirrors, the better kind of windows, &c. *Plate-electrical machine*, an electrical machine so called because a plate of glass is substituted for the cylinder.

PLATEAU, *plā-to'*, *s.* (French.) A plain; a flat surface; a kind of tray on which an epergne or candelabrum is placed.

PLATED, *plā'ted*, *a.* Overlaid with silver, as a *plated* candlestick. *Plated ware*, articles made of a common metal, mostly copper, and washed over with a thin coat of silver.

PLATEN, *plā'ten*, *s.* The flat part of a printing press, by which the impression is made.

PLATESSA, *plāt'es-sā*, *s.* (*platys*, flat, Gr.) The Plaice, a genus of flat fishes; obtuse trenchant teeth in each jaw; form of the body rhomboidal; eyes on the right side; the *Pleuronectus platessa* of Linnæus: Family, *Pleuronectidae*.

PLATFOND, *plā'fond*, } *s.* (French.) The ceiling of
PLAFOND, *plā'fond*, } a room; the bottom of the projection of the larnier of a cornice; a soffit.

PLATFOORM, *plā'fawrm*, *s.* (*plat*, and *form*, Tuet.) In Architecture, an assemblage of timbers for carrying a flat covering of a house, or the flat covering itself; a terrace or open covering at the top of a building; any number of planks or other materials forming a floor for any purpose. In Fortification, an elevation of earth, or a floor of wood or stone on which the ordnance are mounted. In Navigation, the orlop in small vessels; a plan; a scheme; groundwork; a sketch of anything horizontally delineated.

PLATIC, *plā'tik*, *a.* Wide, as a road. In Astrology, the *platic* aspect is a ray cast from one planet to another, not exactly, but within the orbit of its own light.

PLATINA, *plāt'e-nā*, } *s.* A metal so called on
PLATINUM, *plāt'e-num*, } account of its silvery appearance, or from the river Plata in South America, near which it was first found. It is the heaviest substance in nature; will not fuse with the strongest heat of our furnaces, and, from its capacity of resisting oxidation in air or water, it constitutes one of the perfect metals. *Native platinum* has hitherto been found only in grains, but some of these are of a large size. It occurs principally in the provinces of Chocó and Barbacoas in South America, at Matto Grosso in Brazil, and it has also been found in St. Domingo. It has likewise been discovered in some parts of the Uralian

PLATINAMORH—PLATOON.

Mountains. It is usually combined with iron, copper, rhodium, iridium, and other metals. Colour steel-grey; streak similar, in irregular grains, sometimes a little convex on one side; lustre metallic; shining; opaque; ductile. *Sp. gr.* about 17.332; hardness = 2.75.

PLATINAMORH, *plāt'e-nā-morē*, *s.* Black platina.

PLATING, *plā'ting*, *s.* The art of covering anything with silver.

PLATINIFEROUS, *plāt'e-nīf'er-us*, *a.* (*platina*, and *fero*, I bear, Lat.) Producing or containing platina. *Platiniferous grey copper*, a grey-coloured variety of copper ore, formerly found at Guadalupe in Estremadura, in Spain, where it occurs with ores of silver and arsenic. According to Vauquelin, it consists of copper, lead, antimony, iron, silver, platina, and sulphur.

PLATINIST, *plāt'e-nīst*, *s.* A large fish of the Ganges, like a dolphin.

PLATINODE, *plāt'e-node*, *s.* The negative pole of a galvanic battery.

PLATINUS, *plāt'e-nus*, *s.* (*platys*, broad, Gr. from the broad leaves.) The plane-tree, a genus of Amentaceous plants, forming the order *Platinaceæ*.

PLATITUDE, *plāt'e-tude*, *s.* Flatness; dulness; insipidity.

PLATOGRAPHY, *plā-tog'ra-fē*, *s.* The art of forming figures in plaster.

PLATONIC, *plā-ton'ik*, } *a.* Relating to Plato
PLATONICAL, *plā-ton'e-kal*, } or his philosophy; thus, *Platonic love* denoted a pure and spiritual affection, which regarded no other object but the mind and its beauties. *Platonic bodies*, a name given in honour of Plato to the five regular geometrical solids, because they were treated of or described by that philosopher. *Platonic year*, the great year; the period of time determined by the revolution of the equinoxes, upon a supposition of the precession going on uniformly, till they have made a complete revolution.

PLATONICALLY, *plā-ton'e-kal-le*, *ad.* After the manner of Plato.

PLATONISM, *plā-ton-izm*, *s.* The philosophy of Plato. It consisted of three branches—*theology*, *physics*, and *mathematics*. Under *theology* is included moral philosophy. The foundation of Plato's theology is the opinion that there are two eternal, primary, independent, and incorruptible principles or causes of all things, which are God, the maker of all things, and matter, from which all things are made. It was a fundamental maxim with him, that from nothing, nothing can proceed. While, therefore, he held God to be the maker of the universe, he held matter, the substance of which the universe was made, to be eternal.—*Enfield*.

PLATONIST, *plā-ton-ist*, *s.* A believer in the Platonic philosophy.

PLATONIZE, *plā-ton-ize*, *v. a.* To explain on the principles of the Platonic school;—*v. n.* to adopt or disseminate the doctrines of Plato.

PLATONIZER, *plā-ton-ize-ur*, *s.* One who reasons according to the doctrines and after the manner of Plato.

PLATOON, *plā-toon'*, *s.* (a corruption of *peloton*, Fr.) A small square body of soldiers or musketeers, drawn out of a battalion of foot, when they form a hollow square, to strengthen the angles; or a small body acting together, but separate from the main body.

PLATOPHRYS—PLATYGASTER.

- PLATOPHRYS**, plat'-o-fris, *s.* (*platys*, broad, and *ophrys*, the eyebrow, Gr.) A genus of flat fishes; the body rhomboidal; the eyes very remote from each other; the ventral fins confounded with the anal: Family, Pleuronectidae.
- PLATTER**, plat'-tur, *s.* A large shallow dish for holding the provisions placed on a table; one who plaits or forms by weaving. *Platter-faced*, having a broad face.
- PLATTING**, plat'-ting, *s.* In Commerce, slips of cane, straw, &c., platted or plaited together for making hats, &c.
- PLATURUS**, plat'-u-rus, *s.* (*platys*, broad, and *oura*, a tail, Gr.) A genus of Serpents: Family, Crotalidae.
- PLATY**, plat'-e, *a.* Like a plate.
- PLATYCANTHUS**, plat-e-kan'-thus, *s.* (*platys*, broad, and *akantha*, a spine, Gr.) A genus of fishes, the body compressed, subtriangular, with broad or obtuse plates or spines scattered over the body and eyes: Family, Balistidae.
- PLATYCARCINUS**, plat-e-kar'-se-nus, *s.* (*platys*, broad, *karkinos*, a crab, Gr.) A genus of Crabs. *P. pagurus* is the common black-clawed or edible crab; the Partan of the Scotch.
- PLATYCARPUM**, plat-e-kar'-pum, *s.* (*platys*, broad, and *karpus*, a fruit, in reference to the broad compressed fruit.) A genus of plants: Order, Bignonaceae.
- PLATYCEPHALINÆ**, plat-e-sef-a-lī'ne, *s.* (*platycephalus*, one of the genera.) A subfamily of the Scorpenidae; the head and body broad and depressed; ventral fins and eyes large; the latter vertical; form slender; dorsal fins two; body scaly.
- PLATYCEPHALOUS**, plat-e-sef'al-us, *a.* (*platys*, broad, and *kephale*, a head, Gr.) Broad-headed. —Used principally in geology.
- PLATYCEPHALUS**, plat-e-sef-a-lus, *s.* (*platys*, broad, and *kephale*, a head, Gr.) A genus of fishes, type of the subfamily Platycephalinae, in which the head is large, long, very broad, and armed with acute spines; the muzzle produced; the mouth opening longitudinally, but the under jaw longer: Family, Scorpenidae.
- PLATYCERCINÆ**, plat-e-ser-si'ne, *s.* (*platycercus*, one of the genera.) The Loriets, a subfamily of birds, in which the tail is long and very broad; the bill strong, thick, and toothed: Family, Psittacidae.
- PLATYCERCUS**, plat-e-ser'-kus, *s.* (*platys*, broad, and *kerkos*, a tail, Gr.) A genus of birds, remarkable for the breadth of the tail; type of the subfamily Platycercinae: Family, Psittacidae.
- PLATYCERUS**, pla-tis'er-us, *s.* (*platys*, broad, and *keras*, a horn, Gr.) A genus of Lamellicorn Coleopterous insects: Family, Lucanidae.
- PLATYCODON**, plat-e-ko'-don, *s.* (*platys*, broad, and *kodon*, a bell, Gr. in reference to the shape and breadth of the flowers.) A genus of plants: Order, Campanulaceae.
- PLATYCRINITES**, plat-e-kre-ni'tes, *s.* (*platys*, broad, and *krinon*, a lily, Gr.) Crinoidians, which have the body composed of but two ranges of plates, one of three and the other of five.
- PLATYGASTER**, plat-e-gas'-tur, *s.* (*platys*, broad, and *gaster*, the belly, Gr.) A genus of fishes, belonging to the Clupine, or Herrings, having the general form of the herring, but with the ventral fins almost obsolete; the dorsal fin is placed between the ventral and the anal, the latter of which is very long; belly serrated: Family, Salmonidae.

PLATYGENIA—PLATYSCELIS

- PLATYGENIA**, plat-e-je'-ne-a, *s.* (*platys*, broad, and *genys*, the lower jaw, Gr.) A genus of Coleopterous insects: Family, Scarabaeidae.
- PLATYLEPAS**, pla-til'e-pas, *s.* (*platys*, broad, and *lepas*, a limpet, Gr.) A genus of Cirripeds, the shell of which is conical, depressed, consisting of six valves, each divided internally by an angular plate or buttress springing from the centre, and its operculum consisting of four pairs.
- PLATYLEPIS**, pla-til'e-pis, *s.* (*platys*, broad, and *lepis*, a scale.) A genus of fishes, with an oval-oblong body; mouth large, and obliquely vertical; lower jaw the longer; the lateral line formed of a row of flat smooth scales larger than the others, the hinder fins with minute scales: Family, Zeidae.
- PLATYLITHIC**, plat-e-lith'ik, *a.* (*platys*, broad, and *lithos*, a stone, Gr.) Epithet applied to a water-filterer, from the form of the stone employed.
- PLATYLOPHUS**, pla-til'o-fas, *s.* (*platys*, broad, and *lophos*, a crest, Gr. the capsule being so much compressed at the apex as to appear winged.) A genus of plants: Order, Cunoniaceae. Also, a genus of birds: Family, Corvidae.
- PLATYMERIA**, pla-tim'e-ra, *s.* (*platys*, flat, and *meros*, a part, Gr.) A genus of Decapod Crustaceans: Family, Brachyura.
- PLATYMERIUM**, plat-e-me'-re-um, *s.* (*platys*, broad, and *meris*, a part, Gr. probably from the parts of the flowers being broad.) A genus of plants: Order, Cinchonaceae.
- PLATYNUS**, plat'-e-nus, *s.* (*platys*, broad, Gr.) A genus of Coleopterous insects: Family, Carabidae.
- PLATYONYX**, plat-e-on'iks, *s.* (*platys*, broad, and *onyx*, a claw, Gr.) A genus of Coleopterous insects: Family, Curculionidae.
- PLATYOPHTHALMOS**, plat-e-of-thal'mon, *s.* (*platys*, broad, and *ophthalmos*, the eye, Gr.) A name among the ancient chemists for antimony, which was so called because it was used by females to enlarge the appearance of the eye.
- PLATYPETALUM**, plat-e-pet'a-lum, *s.* (*platys*, broad, and *petalon*, Gr.) A genus of Cruciferous plants: Suborder, Diplacolobae.
- PLATYPEZA**, plat-e-pe'-za, *s.* (*platys*, broad, and *peza*, the foot, Gr.) A genus of Dipterous insects: Family, Tanystoma.
- PLATYPTERIS**, pla-tip'ter-is, *s.* (*platys*, broad, and *pteron*, a wing, Gr. in allusion to the margin of the seeds.) A genus of Composite plants: Suborder, Tubuliflorae.
- PLATYPTERIX**, pla-tip'ter-iks, *s.* (*platys*, broad, and *pteryx*, a wing, Gr.) A genus of nocturnal Lepidopterous insects.
- PLATYPTERUS**, pla-tip'ter-us, *s.* (*platys*, broad, and *pteron*, a wing or fin, Gr.) A genus of fishes with broad ventral fins; the branchial aperture wide: mouth small; scales broad; head short and depressed: Family, Gobiidae.
- PLATYPUS**, plat'-e-pus, *s.* (*platys*, broad, and *pous*, a foot, Gr.) A genus of Coleopterous insects: Family, Xylophagi.
- PLATYRHINÆ**, plat-e-rhi'ne, } *s.* (*platys*, broad, and
PLATYRHINES, plat'e-rhin-e, } *rhin*, the nose, Gr.)
A section of the Linnaean genus Simia, including those species which have a wide space between the nostrils.
- PLATYRHYNCHUS**, plat-e-ring'-kus, *s.* (*platys*, broad, and *rhynchos*, a bill, Gr.) A genus of birds: Family, Muscipidae.
- PLATYSCELIS**, pla-tis'e-lis, *s.* (*platys*, broad, and

PLEBEIANCE—PLEDGE.

PLEBEIANCE, ple-be'yans, *s.* The common people.—Obsolete.

PLEBEIANISM, ple-be'yan-izm, *s.* The conduct of plebeians.

PLEBISCITUM, ple-bis'se-tum, *s.* (Latin, a decree of the people.) In Roman History, a law enacted by the common people, under the superintendence of the tribune, or some subordinate plebeian magistrate, without the intervention of the senate.

PLECOSTOMUS, ple-kos'to-mus, *s.* (*plektos*, plaited, and *stoma*, a mouth, Gr.) A genus of fishes, in which the body is lengthened; head short; cirri none; caudal fin lunate; the upper point lengthened into a filament: Family, Siluridae.

PLECTANEA, plek-ta-ne'ya, *s.* (*plektos*, twisted, Gr.) A genus of plants: Order, Apocynaceae.

PLECTOCEPHALUS, plek-to-sef'a-lus, *s.* (*plektos*, plaited, and *kephale*, the head, Gr.) A genus of Composite plants: Suborder, Tubuliflorae.

PLECTOGNATHES, plek-to-na'this, *s.* (*plektos*, plaited, and *gnathos*, a jaw, Gr.) Cuvier's sixth order of fishes, the chief distinguishing character of which is in the maxillary being fixed or permanently attached to the side of the intermaxillary, which alone constitutes the jaw, and in the mode in which the palatine arch is united by a suture to the cranium, and consequently having no power of motion. It is formed of the two families, Gymnodontes and Sclerodermes.

PLECTORYNCHUS, plek-to-ring'kus, *s.* (*plektos*, twisted, and *rhynchos*, a snout, Gr.) A genus of fishes, the body of which is ovate-oblong; the head generally thick or obtuse: Family, Chaetodonidae.

PLECTRANTHUS, plek-tran'thus, *s.* (*plektron*, a cock's spur, and *anthos*, a flower, Gr. in reference to the corolla being spurred or gibbous above the base.) A genus of plants: Order, Lamiaceae.

PLECTRIS, plek'tris, *s.* (*plektron*, a cock's spur, or instrument for striking the lyre, Gr.) A genus of Coleopterous insects: Family, Scarabaeidae.

PLECTRITIS, plek-tri'tis, *s.* (*plektron*, a cock's spur, Gr. in reference to the flower being gibbous in front.) A genus of plants: Order, Valerianaceae.

PLECTRONIA, plek-tro-ne'a, *s.* (*plektron*, a thorn, Gr.) A genus of plants, natives of the Cape of Good Hope: Order, Celastrineae.

PLECTROPHANES, plek-trof'a-nes, *s.* (*plectrum*, a quill, Lat. and *phanos*, brilliant, Gr.) A genus of birds: Family, Fringillidae.

PLECTROPOMA, plek-tro-po'ma, *s.* (*plektron*, a cock's spur, and *poma*, a lid or cover, Gr.) A genus of fishes, so named from the spines situated on the lower edge of the preoperculum: Family, Percidae.

PLECTROPTERIS, plek-trop'ter-is, *s.* (*plectrum*, a quill, Lat. and *pteron*, a wing, Gr.) A genus of Anserine birds, in which the wings are armed with naked tubercles or spines: Family, Anatidae.

PLECTRUM, plek'trum, *s.* (Latin, a quill, &c.) A small implement of wood, horn, ivory, &c., with which the ancients struck the lyre and other stringed instruments. In Anatomy, the styloid process of the temporal bone, and of the uvula.

PLEDGE, plej, *s.* (*pleige*, Fr.) Anything put in pawn; that which is deposited with another as security for the repayment of money borrowed, or for the performance of some agreement or obligation; anything given or considered as a security

PLEDGE—PLENIPOTENCE.

for the performance of an act; a surety; a bail; a hostage;

Good sureties will we have for thy return,
And at thy *pledge's* peril keep thy day.—Dryden.

In Law, a gage or security, real or personal, given for the repayment of money; bail given for the prosecution of a suit, or for the appearance of a defendant, or for restoring goods taken in distress and replevied. *Plegius acquitandis*, a writ that lies against a surety, if the money be not paid on the day appointed;—*v. a.* to deposit in pawn; (pledge is applied in this sense chiefly to the depositing of goods or personal property;) to give as a warrant or security, as to pledge one's word of honour; to pledge one's veracity; to engage by promise or declaration; to pledge a health; anciently, to be surety for a person, that while he was drinking he should receive no harm—a practice which commenced in this country with the Danes, who were frequently stabbed by the natives while so engaged; hence the present custom of persons pledging or drinking to each other's health.

PLEDGE, pledj'e, *s.* The person to whom anything is pledged.

PLEDGER, pledj'ur, *s.* One who pledges or pawns anything; one that warrants or secures; one who accepts the invitation to drink after another, or who pledges another in drinking.

PLEDGERY, pledj'e-re, *s.* A pledging; suretiship.—Not in use.

PLEDGET, pledj'et, *s.* In Surgery, a compress or small flat tent of lint laid over a wound, to imbibed the matter discharged and keep it clean.

PLEEA, ple'e-a, *s.* (*pleias*, the seven stars, Gr.) A genus of plants: Order, Juncaceae.

PLEIADES, ple'a-des, } *s.* (*pleiades*, Gr.) In My-PLEIADS, ple'yads, } thology, the seven daughters of Atlas and Pleione were so called, said to have been transformed by Jupiter into stars, in which state they now form a cluster in the neck of the constellation Taurus.

PLEIOCENE.—See Pliocene.

PLEISTOCENE, pli'sto-sene, *s.* (*pleistos*, most, and *kainos*, recent, Gr.) In Geology, the newer Pliocene of Lyell; the newest division of the tertiary formation.

PLEKOCHILUS.—See Bulimus.

PLENAL, ple'nal, *a.* (*plenus*, full, Lat.) Full; complete.—Obsolete.

This free and *plenal* act I make.—Beaumont.

PLENARE, ple'na-re, *s.* Decisive procedure.

PLENARILY, ple'na-ril-e, *ad.* Fully; completely.

PLENARINESS, ple'nar-e-nes, *s.* Fulness; completeness.

PLENARTY, plen'ar-te, *s.* The state of a benefice when occupied.

PLENARY, ple'na-re, *a.* Full; entire; complete.

PLENILUNAR, plen-e-loo'nar, } *a.* (*plenus*, full,PLENILUNARY, plen-e-loo'na-re, } and *Luna*, the moon, Lat.) Pertaining or relating to the full moon.

PLENILUNE, plen'e-lune, *s.* The full moon.—Obsolete.

Whose glory (like a lasting *plenilune*),

Seems ignorant of what it is to wane.—Don Jonson.

PLENIPOTENCE, ple-nip'o-tens, *s.* (*plenus*, full, and *potentia*, power, Lat.) Fulness or completeness of power;

A whole parliament assembled by election, and endued with the *plenipotence* of a free nation, to make laws, not to be denied laws.—Milton.

PLENIPOTENT—PLEONASTE.

PLENIPOTENT, ple-nip'o-tent, *a.* (*plenipotens*, Lat.) Invested with or possessing full power.

My substitutes I send you, and create
Plenipotenti on earth, of matchless might
Issuing from me.—*Milton*.

PLENIPOTENTIARY, plen-e-po-ten'sha-re, *s.* (*plenipotentiare*, Fr.) A person invested with full power to transact any business; usually an ambassador or envoy to a foreign court;—*a.* containing full power; having the powers of a plenipotentiary.

PLENISH, plen'ish, *a. a.* (*plenir*, old French.) To replenish; to fill.—Obsolete.

PLENIST, ple'nist, *s.* (*plenus*, full, Lat.) One who maintains that all space is full of matter; not admitting the existence of a vacuum. Des Cartes belonged to this school.

Those spaces which the vacuists would have empty, the plenists do not prove replenished with subtle matter by any sensible effects.—*Boyle*.

PLENITUDE, plen'e-tude, *s.* (*plenitudo*, from *plenus*, full, Lat.) Fulness, as the plenitude of space; repletion; animal fulness; plethora;

Relaxation from plenitude is cured by spare diet.—*Arbuthnot*.

fulness; complete competence, as the plenitude of the Pope's power.

PLENTEOUS, plen'te-us, *a.* Copious; abundant; exuberant; fruitful; fertile; having an abundance.

PLENTEOUSLY, plen'te-us-le, *ad.* Copiously; abundantly; exuberantly; plentifully:

Thy due from me is tears,
Which nature, love, and filial tenderness,
Shall, O dear father, pay thee plentifully.—*Shaks.*

PLENTEOUSNESS, plen'te-us-ness, *s.* Abundance;

PLENTIFULNESS, plen'te-ful-ness, *s.* copiousness; fertility; plenty;

The seven years of *plenteousness* were ended.—*Gen. xli.*

PLENTIFUL, plen'te-ful, *a.* Copious; abundant; adequate to every purpose; exuberant.

PLENTIFULLY, plen'te-ful-le, *ad.* Copiously; abundantly; with ample supply.

PLENTY, plen'te, *s.* Abundance; copiousness; full or adequate supply; fruitfulness—a poetic use;

Peace,
Dear nurse of arts, *plenties*, and joyful birth.—*Shaks.*
—*a.* plentiful; being in abundance:

If reasons were as *plenty* as blackberries.—*Shaks.*

PLENUM, ple'nium, *s.* (Latin, full.) In Natural Philosophy, that state of things in which every portion of space is supposed to be occupied by material substance. *Plene administravit*, in Law, a plea made by an executor or administrator to an action on a liability of the deceased, that he has fully administered his goods.

PLEODONTS, ple'o-donts, *s.* (*pleos*, full, and *odous*, a tooth, Gr.) A subfamily of lizards, divided into two great groups: the first with a compressed tail surmounted with crests, as in the crocodiles; the other with a tail perfectly conical, or very slightly flattened on its four surfaces.

PLEONASM, ple'on-azm, *s.* (*pleon*, more, Gr.) In Rhetoric, a redundant phrase or expression, sometimes introduced to give additional energy, at other times needless and ungraceful.

PLEONASTE, ple'o-nayst, *s.* (*plenastos*, abundant, rich, Gr.) A mineral allied to spinel, nearly black, and opaque. It occurs crystallized, the primary crystal a regular octahedron. Its constituents are—alumina, 65.0; silica, 2.0; magnesia, 12.0 or 13.0; lime, 00. or 2.0; oxide of iron, 16.5: sp. gr. 3.64.

PLEONASTIC—PLEURISY.

PLEONASTIC, ple-o-nas'tik, } *a.* Pertaining to
PLEONASTICAL, ple-o-nas'tik-al, } pleonasm; re-
dundant.

PLEONASTICALLY, ple-o-nas'tik-al-e, *ad.* Redundantly.

PLEOMA, ple-ro'ma, *s.* (Greek, fulness, from the cells of the capsule.) A genus of American shrubs: Order, Melastomaceæ.

PLEROPHORY, ple-ro'fo-re, *s.* (*plieres*, full, and *phero*, I bear, Gr.) Full persuasion or confidence; Abraham had a *plerophory*, that what was promised God was able to perform.—*Barrow*.

PLEROSIS, ple-ro'sis, *s.* (Greek, fulness.) In Physiology, the filling up or restoration of the animal body when worn down by abstinence or disease.

PLEROTIC, ple-ro'tik, *a.* (*plerosis*, fulness, Gr.) In Pharmacy, an epithet applied to remedies which are calculated to effect the cicatrization of a wound or sore.

PLESH, plesh, *s.* A boggy marsh.—Not used.

PLESIOMORPHISM, ple-ze-o-maw'r'izm, *s.* (*plesios*, near, and *morphe*, form, Gr.) The state of crystallized substances, in which the forms are nearly identical.

PLESIOMORPHOUS, ple-ze-o-maw'r'fus, *a.* In Crystallography, being near in form.

PLESIOPS, ple-ze-ops, *s.* (*plesios*, near, and *ops*, the eye, Gr.) A genus of fishes, in which the ventral fins are excessively long; operculum scaled; preoperculum smooth; teeth minute: Family, Chaetodonidae.

PLESIOSAURUS, ple-ze-o-saw'r'us, *s.* (*plesios*, near to, and *saura*, a lizard, Gr.) A genus of extinct marine animals, nearly allied to the Ichthyosaurus. This animal united the teeth of a crocodile to the head of a lizard; its neck was of enormous length, exceeding that of its body, and resembling the body of a serpent. Five or six species of the plesiosaurs are known: they appear to have lived in shallow seas and estuaries, and, in the opinion of some, they swam near the surface, having the neck arched like that of a swan, and darting it down at the prey within reach. Some of them were upwards of twenty feet long. Prodigious numbers of their remains are found in the lias.

PLESTIODON, ple's'te-o-don, *s.* A genus of lizards: Family, Scincoidæ.

PLETHORA, pleth'o-ra, } *s.* (*pletho*, I fill, Gr.) A
PLETHORY, pleth'o-re, } redundant fulness of the
blood-vessels, arising from various causes, generally referred to *sanguine* plethora, to which the robust and athletic are most subject, and *serous* plethora, which attacks debilitated constitutions.

PLETHORETIC, pleth'o-ret'ik, } *a.* Having a full
PLETHORIC, ple-thor'ik, } habit of body, or
the vessels overcharged with fluids.

PLETHRON, pleth'ron, } *s.* (*plethron*, Gr.) A square
PLETHRUM, pleth'rum, } measure anciently used
in Greece, the cubical contents of which are doubtful.

PLEURA, plu'ra, *s.* (Greek.) A rib; the side of the thorax formed by the ribs; but now applied anatomically to the membrane which lines the internal surface of the thorax, and covers its viscera.

PLEURANDRA, plu-ran'dra, *s.* (*pleuron*, a side, and *aner*, a male, Gr. in allusion to the stamens being all inserted on one side of the flower.) A genus of plants: Order, Dilleniaceæ.

PLEURISY, plu're-se, *s.* (*pleuron*, the side, Gr.) Inflammation of the pleura commonly distinguished

PLEURITIC—PLEURORTHOPNEA.

- into two species or varieties, the acute and the chronic.—See Pleuritis.
- PLEURITIC**, plu-rit'ik, } *a.* Pertaining to
PLEURITIC, plu-rit'-e-kal, } pleurisy; diseased
 with pleurisy.
- PLEURITIS**, plu-ri'tis, *s.* Pleurisy; inflammation of the pleura. This disease begins with fever, and is characterized by pain in the side, with a peculiar, hard, and strong pulse.
- PLEUROBRANCHENA**, plu-ro-brang-ke'na, *s.* A genus of Mollusca, with shells; the anus above the branchia; tentacula four, short and remote; branchia and genital orifices at the base.
- PLEUROBRANCHINÆ**, plu-ro-brang-ke-ne, *s.* (*pleurobranchus*, one of the genera.) A subfamily of the Tectibranchia, or Sea-slugs.
- PLEUROBRANCHUS**, plu-ro-brang'kus, *s.* (*pleuron*, a side, and *branchia*, branchia, gills, Gr.) A genus of Mollusca.
- PLEURODYNIA**, plu-ro-din'e-a, *s.* (*pleuron*, the side, and *odyne*, pain, Gr.) In Pathology, pain in the side resembling pleurisy, but dependent on rheumatic inflammation of the fibrous and muscular portions of the thoracic parietis, and more especially of the intercostal muscles.
- PLEUROGYNIA**, plu-ro-jin'e-a, *s.* (*pleuron*, a side, and *gyne*, a female, Gr. in reference to the two stigmata being adnate longitudinally.) A genus of plants: Order, Gentianaceæ.
- PLEURONECTES**, plu-ro-nek'tis, *s.* (*pleuron*, a side, and *neo*, I swim, Gr.) A genus of flat fishes: Type of the family Pleuronectidæ.
- PLEURONECTIA**, plu-ro-nek'she-a, *s.* (*pleuron*, a side, *neo*, I swim, Gr.) A genus of Mollusca, the shell of which has the general form of Pecten, but the valves are much compressed, and gaping at their edges: Family, Ostreidæ.
- PLEURONECTIDÆ**, plu-ro-nek'te-de, *s.* (*pleuronectes*, one of the genera, Lat.) A family of fishes, in which the body is thin and oval; the dorsal and ventral fins extending nearly the whole length of the fish; the rays simple and spinous, but hid in the flesh; both eyes placed on the same side of the head.
- PLEURO-PTERA**, plu-ro-op'ter-a, *s.* (*pleuron*, a side, and *pteron*, a wing, Gr.) A genus of quadrupeds, known by the names of Flying-lemurs, Flying-cats, or Flying-foxes. They are placed by Gray in his family Galeopithecidae, situated between the lemurs and the bats.
- PLEURO-PNEUMONIA**, plu-ro-na-mo'ne-a, *s.* (*pleuron*, the side, and *pneumon*, the lungs, Gr.) Simultaneous inflammation of the pleura and the lungs.
- PLEURORHIZÆ**, plu-ro-ri'ze-e, *s.* (*pleuron*, a side, and *rhiza*, a root, Gr.) A suborder of the Cruciferae, or Brassicæ, distinguished by having the cotyledons flat and accumbent; radicle lateral; the seeds compressed.
- PLEURORHYNCHUS**, plu-ro-ring'kus, *s.* (*pleuron*, a side, and *rhynchos*, a beak, Gr.) A genus of fossil shells allied to Cardium, distinguished by the lateral production of the valves, from beneath their incurved beaks, into a spine-like or conical umbo.
- PLEURORRHEA**, plu-ror-re'a, *s.* (*pleuron*, the side, and *reo*, I flow, Gr.) In Pathology, collection of fluid in the sacs of the pleura.
- PLEURORTHOPNEA**, plu-ror-thop'ne-a, *s.* (*pleuron*, the side, and *orthopnea*, upright breathing, Gr.) Pain in the side, which renders an erect posture necessary for facility of respiration.

PLEUROSPASM—PLIABLENESS.

- PLEUROSPASM**, plu-ro-spazm, *s.* (*pleuron*, the side, and *spasma*, spasm, convulsion, Gr.) Spasm in the side; the intercostal pain of hysterical females.
- PLEUROSPERMUM**, plu-ro-sper'mum, *s.* (*pleuron*, a rib, and *sperma*, a seed, Gr. in allusion to the mericarps being furnished with a double membrane, both having ribs.) A genus of umbelliferous plants: Suborder, Campylospermeæ.
- PLEUROSTEMON**, plu-ro-ste'mon, *s.* (*pleuron*, a side, and *stemon*, a stamen, Gr. in reference to the stamens being all on one side of the flower.) A genus of plants: Order, Orobanchaceæ.
- PLEUROSTHOTOS**, plu-ro-thot'o-nos, *s.* (*pleuron*, the side, and *teino*, I stretch, Gr.) A spasmodic disease, in which the body is bent to one side.
- PLEUROTHALIS**, plu-ro-thal'is, *s.* (*pleuron*, a side, and *thalia*, bloom, Gr. in allusion to the one-sided disposition of the flowers.) A genus of plants: Order, Orchidaceæ.
- PLEUROTOMA**, plu-rot'o-ma, *s.* (*pleuron*, a side, and *temno*, I cut, Gr.) A genus of Gastropods, forming the type of the subfamily Pleurotominae: the shell is fusiform and turreted; channel lengthened, and nearly as long as the spire; the slit long and narrow; inner lip wanting: Family, Strombidæ.
- PLEUROTOMARIA**, plu-ro-tom-a're-a, *s.* (*pleuron*, a side, and *temno*, I cut, Gr.) A genus of turbinated, spiral, univalve shells, belonging to the family Turbinacea. They occur only fossil, and are found in the inferior oolite.
- PLEUROTOMINÆ**, plu-ro-tom'e-ne, *s.* (*pleurotoma*, one of the genera.) A subfamily of the Strombidæ, the shells of which are turreted and sub-fusiform; the base channelled, and often much produced; outer lip never thickened, but detached at the top from the whorl by a slit or sinus.
- PLEVIN**.—See Replevin.
- PLEXAURES**, pleks-aw'ris, *s.* (*plexis*, a twisting, and *auron*, gold, Gr.) A genus of Corals: Family, Corticati.
- PLEXIFORM**, pleks'e-fawrm, *a.* (*plexus*, a fold, and *forma*, a form, Lat.) In the form of network; complicated.
- PLEXIMETER**, plek-sim'e-tur, *s.* (*plexis*, percussion, and *metron*, a measure, Gr.) The ivory plate used in mediate percussion.
- PLEXUS**, pleks'us, *s.* (Latin.) Network: applied to blood-vessels, nerves, &c. when they are numerous, and intertwine in the form of a net. *Plexus cardiacus*, a ganglion or network of nerves, formed from the union of the eighth pair and the great sympathetic. *Plexus chovoides*, a network of vessels situated in the lateral ventricles of the brain. *Plexus pampiniformis*, the complication of vessels about the spermatic chord. *Plexus pulmonicus*, a ganglion formed by the union of the eighth pair of nerves with the sympathetic. *Plexus reticularis*, a network of vessels under the brain.
- PLIABILITY**, pli-a-bil'e-te, *s.* The quality of yielding to force or pressure without rupture; flexibility; pliability.
- PLIABLE**, pli'a-bl, *a.* (*plier*, to bend, Fr.) Easy to be bent; that readily yields to pressure without rupture; flexible; flexible in disposition; easy to be persuaded.
- PLIABLENESS**, pli'a-bl-nes, *s.* Flexibility; the quality of easily yielding to force or moral influence; pliability.

PLIANCY—PLIGHTER.

PLIANCY, pli'an-se, *s.* The quality of bending easily; readiness to yield to moral influence.

PLIANT, pli'ant, *a.* (French.) Bending easily; readily yielding to force or persuasion; flexible; flexible; that may be easily formed or moulded.

The will was then more ductile and *pliant* to right reason.—*South.*

PLIANTNESS, pli'ant-nes, *s.* Flexibility; toughness.

PLICA, pli'ka, *s.* (*plico*, I entangle, Lat.) A disease of the hair, in which it becomes matted and inextricably entangled. It is said to be peculiar to Poland, Lithuania, and Tartary, and hence it is often called *Plica Polonica*.

PLICADOMUS, pli-kad'o-mus, *s.* (*plico*, I fold, and *domus*, a house, Lat.) A genus of Gasteropods, belonging to the Helicinae, or Land-snails, the shells of which have the spire moderate, regular, and thick, but gradually conic; the tip obtuse; aperture perpendicular; inner lip wanting; outer lip semicircular; the margin dilated and reflected: Family, Helicidae.

PLICATE, pli'kate, } *a.* (*plicatus*, folded, Lat.)

PLICATED, pli'ka-ted, } Plaited; folded as a fan. *Plicate*, in Botany, applied to leaves when the disc is acutely folded up and down.

PLICATELLA, pli-ka-tel'la, *s.* (*plico*, I fold, and *telum*, a dart, Lat.) A genus of Gasteropods, belonging to the subfamily Scolyminae; the shells are fusiform; the spire produced; the pillar with two or three obtuse, basal, transverse folds: Family, Turbellidae.

PLICATION, ple-ka'shun, } *s.* A fold; a doubling.

PLICATURE, plik'a-ture, }

PLICATULA, pli-kat'u-la, *s.* (*plico*, I plait, and *tulos*, a knot, Gr.) A genus of Conchifera, the shells of which are irregularly ovate, plicate, and inequivalve, one valve being more convex than the other; cardinal teeth 2, and sagittate; the sides strongly, regularly, and transversely grooved; the internal ligament between the teeth: Family, Ostracidae.

PLICIPENNES, ple-se-pen-nes, *s.* (*plico*, I plait, and *penna*, a wing, Lat.) The name given by Cuvier to his third family of the Neuroptera, the genera of which are without mandibles, and have the inferior wings usually wider than the others, and plaited longitudinally.

PLIERS, pli'urz, *s.* (*plier*, to fold, Fr.) An instrument consisting of two levers revolving on one fulcrum, by which any small thing is seized and bent.

PLIFORM, pli'fawm, *a.* (*pli*, a fold, Fr. and *form*.) In the form of a fold or doubling.

PLIGHT, plite, *r. a.* (*plikan*, to pledge, or to expose to perplexity, Sax.) To pledge; to give as security for the performance of some act;

He *plighted* his right hand
Unto another love, and to another land.—*Spenser.*

to weave; to braid;—(this last is the primary sense of the word, but now obsolete;)—*s.* state; condition;

They in lowliest *plight* repentant stood
Praying.—*Milton.*

pledge; gage;

The Lord whose hand must take my *plight*.—*Shaks.*

garment.—Obsolete in this sense.

Because my wrack
Chanct on his father's shore, he let not lack
My *plight*, or coat, or cloak, or any thing
Might cherish heat in me.—*Chapman.*

PLIGHTER, plite'ur, *s.* A pledger; that which plights.

PLIM—PLOMO.

PLIM, plim, *v. n.* To swell; to increase in bulk.—
Obsolete.

PLINTH, plinth, *s.* (*plinthos*, a brick, Gr.) The square part under a pedestal, forming the lowest member of a column, wall, &c., bearing, as its name indicates, the form of a square brick or tile; in a wall, two or three rows of bricks which project from the face.

PLINTHITE, plinth'ite, *s.* (*plinthos*, a brick, Gr.) A mineral occurring in the county of Antrim in Ireland: colour, brick-red; texture, earthy; fracture, flat conchoidal; opaque. It is composed of silica, 30.88; alumina, 20.76; peroxide of iron, 26.16; lime, 2.60; water, 19.60; hardness, 2.75; sp. gr. 2.342.

PLIOCENE, pli'o-sene, *s.* (*plesion*, more near, and *kainos*, recent, Gr.) The name given by Mr. Lyell to the newest series of tertiary deposition, which he subdivides into the older and the newer; the latter is termed the Pleistocene by other geologists. The newer Pliocene contains from 90 to 95 per cent. of recent species of shells, and the older from 35 to 50 per cent. The mammalia and other organic remains of these deposits, consist of both recent and extinct species.

PLIONE, ple-o-ne, *s.* In Mythology, one of the Oceanides, who married Atlas, king of Mauritania, by whom he had twelve daughters, and a son called Hyas. Seven of the daughters were changed into a constellation called Pleiades, and the rest into another called the Hyades.

PLOA, plo'a, *s.* (*ploion*, a sailing vessel, Gr.) A genus of insects belonging to the Notonectidae, or Boat-flies: Order, Coleoptera.

PLOAS, plo'as, *s.* (Greek, a floating island.) A genus of Dipterous insects: Family, Tanystoma.

PLOCAMA, plok'a-ma, *s.* (*plokamos*, intertwined hair, Gr. on account of its pendulous twisted branches.) A genus of plants: Order, Cinchonaceae.

PLOCEUS, plo'se-us, *s.* (*plokgos*, a braider, Gr.) The Weavers, a genus of birds belonging to the Coccothraustinae, or Hardbills: Family, Fringillidae.

PLOCHIONUS, plo-ki'o-nus, *s.* (*ploos*, sailing, and *chion*, a Chian wine vessel, Gr.) A genus of Coleopterous insects: Family, Carabidae.

PLOD, plod, *v. n.* (*plots*, heavy, dull, Dutch?) To toil; to travel, or work slowly; to drudge; to study heavily, with steady diligence.

PLODDER, plod'dur, *s.* A dull, heavy, laborious person.

PLODDING, plod'ding, *s.* Slow movement; the act of studying slowly and dully; with steadiness and persevering industry;—*a.* industrious; diligent, but slow in contrivance or execution.

PLOIARIA, ploy-a're-a, *s.* (*ploiaron*, a skiff, Gr.) A genus of Hemipterous insects: Family, Geocoridae.

PLOIOTRIBUS, ploy-ot're-bus, *s.* (*ploion*, a floating vessel, and *tribos*, a tract, Gr.) A genus of Coleopterous insects: Family, Xylophagi.

PLOMBGOMME, plom'gom, *s.* Hydrated aluminate of lead, a mineral occurring in small globular and reniform masses, composed of many thin concentric layers. It is found in the French department of Côtes du Nord.

PLOMO, plo'mo, *s.* In Metallurgy, a name given by the Spaniards who have the care of silver mines, to the ore of that metal when found adhering to the surface of stones, and incrusting their cracks in small loose grains. When the ore occurs in this

PLOT—PLOUGHMAN'S SPIKENARD.

manner, it is always a certain indication that there is a rich vein of the metal in the immediate neighbourhood.

PLOT, plot, *s.* A plat, or small spot of ground, as a garden-plot, or flower-plot; a plan or scheme. In Literature, the intrigue or plan of a dramatic composition, novel, or romance; contrivance; deep reach of thought. In Surveying, a plan or horizontal section of any piece of land, country, or works;—*v. a.* to plan; to contrive; to form a scheme of mischief against another. In Surveying, to lay down a plan upon paper.

PLOTFUL, plot'fŭl, *a.* Abounding with plots.

PLOTINIST, plot'i-nist, *s.* A disciple of Plotinus, a celebrated Platonic philosopher, who, in the early ages of Christianity, taught that the human soul emanates from the Divine Being, to whom it is reunited at death.

PLOTOSUS, plo-to'sus, *s.* (*ploutos*, riches, Gr.?) A genus of fishes; dorsal fin single or double, one of them very long, and extending the whole length of the back; caudal rounded; cirri long: Family, Siluridae.

PLOTTER, plot'tur, *s.* One who plots or schemes; a contriver; a conspirator.

PLOTTING, plot'ting, *s.* The act of laying down on paper the lines and angles of a survey by admeasurement from the field-book. *Plotting scale*, a mathematical instrument used in setting off the lengths of lines in surveying. It consists of two graduated scales, one of which is made to slide in a groove which perforates the other through its whole length; the edge of the first is always at right angles to that of the second, so that the position of any point can be readily laid down on the plan.

PLIOTUS, plo'tus, *s.* (*plotos*, sailing, Gr.) The Darters, a genus of swimming-birds, with the neck exceedingly long, belonging to the Pelicanidae: Family, Alcedae.

PLOUGH, plow, *s.* (*ploge*, Sax.) A machine for turning up the soil; a machine used by bookbinders for cutting the edges of books; a kind of plane used by joiners and others who work in wood; figuratively, tillage, as 'speed the plough';—*v. a.* to turn up with the plough; to divide; to run through, as in sailing; to tear; to furrow.

Patient Octavia, plough thy visage up
With her prepared nails.—*Shaks.*

In Scripture, to labour in any calling;

He that ploweth should plow in hope.—1 Cor. ix.

—*v. n.* to practise aration, as to plough for. *Plough alms*, a penny formerly paid to the church by every plough-land. *Plough-bote*, in English Law, an allowance of timber to a tenant, to repair implements of husbandry. *Plough-land*, land suitable for tillage. *Plough-monday*, the Monday next after Twelfth Day, fixed upon, in old times in England, as the period when the labours of the plough and other rustic occupations should commence.

PODENCEPHALUS, po-den-sef'a-lus, *s.* (*pous*, the foot, and *egkephalos*, the brain, Gr.) The term applied by Geoffrey St. Hilaire to a genus of monsters, comprehending those whose brain, situated externally to the cranium, is suspended upon a pedicle.

PODERIS, pod'ur-is, *s.* (*pous*, the foot, Gr.) In Antiquity, a robe hanging down to the feet, worn by the Jewish priests during their attendance in the temple. This was the proper habit of their order, and was made of linen, resembling a shirt, or rather a surplice.

PODESTA, po-des'ta, *s.* A name for one of the chief magistrates in Genoa and Venice.

PODETIA, po-de'she-a, *s.* (*pous*, a foot, Gr.) The stalk-like elongations of the thallus, which, in certain lichens, support the fructification, as in *Cenomyces*.

PODGE, poj, *s.* A puddle; a plash.

PODICEPS, pod'e-seps, *s.* A genus of birds: Family, Colymbidae.

PODICEPSINÆ, po-de-sep'se-ne, *s.* (*podiceps*, one of the genera.) A name given by Gray to his second subfamily of Colymbidae, or Divers.

PODIUM, po-de-um, *s.* (*pous*, a foot, Gr.) A genus of Hymenopterous insects belonging to the section Sphegides of the family Fossorores of Cuvier. In Architecture, a balcony; a continued pedestal; a projection which surrounded the arena of the ancient amphitheatre.

PODOCARPUS, pod-o-kar'pus, *s.* (*pous podos*, a foot, and *karpos*, fruit, Gr.) A genus of Coniferous trees: Order, Taxaceae.

PODOCARYA, pod-o-ka're-a, *s.* (*pous podos*, a foot, and *karyon*, a nob, Gr.) A genus of fossil plants found in secondary strata.

PODOCERUS—PODOTHECA.

PODOCERUS, po-dos'er-us, *s.* (*pous* *podos*, a foot, and *keras*, a horn, Gr.) A genus of Crustaceans, belonging to the order Amphipoda of Cuvier.

PODOLOBIUM, pod-o-lo'be-um, *s.* (*pous* *podos*, a foot, and *lobos*, a lobe, Gr. in allusion to the legume standing on a stalk within the calyx.) A genus of Leguminous plants: Suborder, Papilionaceae.

PODOPHIS, pod'o-fis, *s.* (*pous*, a foot, and *ophis*, a serpent, Gr.) A name given by Weigmann for a genus of Lizards of the family Scinoidae, belonging to the subdivision which has not the auditory apertures visible.

PODOPHYLLACEÆ, pod-o-fil-la'se-e, *s.* (*podophyllum*, one of the genera.) A natural order of Exogenous plants, consisting of herbs with peltate-nerved leaves and white flowers; calyx with three or four sepals; petals six to nine, disposed in two or three series; stamens equal in number, or double that of the petals; filaments filiform; ovary solitary; seeds numerous.

PODOPHYLLUM, pod-o-fil'lum, *s.* (*pous* *podos*, a foot, and *phyllon*, a leaf, Gr. abridged from *anapodophyllum*, compound of *anas*, a duck, and *pous* and *phyllon*.) A genus of plants: Type of the order Podophyllaceae.

PODOPSIS, po-dop'sis, *s.* (*pous*, a foot, and *opsis*, resemblance, Gr.) A genus of fossil Conchifers, placed by Cuvier between Dianchora and Anomia: the valves regularly striated and without operculum, the summit of one of them being more salient, truncated, and adherent, frequently very thick, and forming a sort of pedestal to the shell: Family, Spondyliidae.

PODOPTERUS, po-dop'ter-us, *s.* (*pous* *podos*, a foot, and *pteria*, a fern, Gr.) A genus of plants: Order, Polygonaceae.

PODOPHTHALMA, po-dop-thal'ma, } *s.* A trile
PODOPHTHALMIANS, po-dop-thal'me-ans, } of Crustaceans, which have composite eyes placed at the end of a movable peduncle; no simple eyes; mandibles provided with a palp; jaw-feet always having a palp adhering to their base.

PODOPHTHALMUS, po-dop-thal'mus, *s.* (*pous* *podos*, a foot or pedicle, and *ophthalmos*, the eye, Gr.) A genus of Decapod Crustaceans: Family, Portunidae.

PODOSPERM, pod'o-sperm, *s.* (*pous*, a foot, and *sperma*, seed, Gr.) In Botany, the elongation of the placenta, by which, composed of nutrient vessels, each seed is attached to the parent plant: analogous in function with Funis umbilicalis.

PODOSPERMUM, pod-o-sperm'um, *s.* A genus of Composite plants: Suborder, Tubuliflorae.

PODOSTEMACEÆ, pod-o-ste-ma'se-e, *s.* (*podostemon*, one of the genera.) A natural order of Exogenous plants, consisting of floating herbs, with the habit of liverworts; flowers axillary or terminal; inconspicuous, and usually naked, or with a very imperfect calyx, or with three sepals bursting through an irregularly lacerated spathe; stamens hypogynous; ovary two or three-celled; styles or stigmas two or three, acute or sessile; fruit capsular; seeds numerous and minute.

PODOSTEMON, pod-o-ste'mon, *s.* (*pous* *podos*, a foot, and *stemon*, a stamen, Gr.) A genus of plants, type of the natural order Podostemaceae.

PODOTHECA, pod-o-the'ka, *s.* (*pous*, a foot, and *theka*, a case, Gr. in reference to the stalks of the achenia.) A genus of Composite plants: Sub-

PODURA—POET.

order, Tubuliflorae. In Anatomy, a preparation of the scarf-skin of the foot.

PODURA, po-du'ra, *s.* (*pous*, a foot, and *oura*, a tail, Gr.) A genus of insects belonging to the order Thysanoura, and forming, with Smynturus, the family Podurellae of Cuvier.

PODURELLÆ, pod-u-rel'le, *s.* (*podura*, one of the genera.) A family of the order Thysanoura, having the antennae quadri-articulate; no distinct or salient palpi; abdomen terminated by a forked tail folded under the venter when at rest, and used for leaping.

POECILIA, pe-sil'e-a, *s.* (*poikilos*, varied, Gr.) A genus of fishes, in which the body is ovate; the jaws flattened horizontally, the lower jaw the longer; mouth small, and furnished with a row of small slender teeth; dorsal fin one; ventral halfway between the anal and the pectoral; caudal fin obtuse and truncate; the branchiae three-rayed: Family, Cobitidae. In Pathology, pieballed skin.

POECILINÆ, pe-se-li'ne, *s.* (*poecilia*, one of the genera.) A subfamily of the Cobitidae fishes, having the body thick, oval, and compressed; head small and flattened above; snout sharp; mouth small and transverse; jaws protractile.

POECILOPODA, pe-se-lop'o-da, *s.* (*poikilos*, spotted or variegated, Gr.) The name given by Lamarck for his sixth order of Crustaceans, and placed under his second subclass Entomostraca; head confounded with the trunk; the anterior part of the body in the form of a buckler; mouth in the shape of a beak, or composed of mandibles; antennae short and simple, or null; eyes often distinct and sessile; anterior feet terminated by two claws or hooks; posterior feet destined for swimming.

POECILOPORA, pe-sil-op'o-ra, *s.* (*poikilos*, varied, and *poros*, a pore, Gr.) A genus of Corals: Family, Corticata.

POECILOPTERA, pe-sil-op'ter-a, *s.* (*poikilos*, spotted, and *pteron*, a wing, Gr.) A genus of Hemipterous insects: Family, Cicadidae.

POEM, po'em, *s.* (*poema*, from *poieo*, I make, Gr. and *poema*, Lat.) A metrical composition; a composition in which the verses consist of certain measures, whether in blank verse or in rhyme. The term *poem* is extended to compositions which are not metrical, but abound in the language of excited imagination, as in the poems of Ossian.

POESY, po'e-se, *s.* (*poesis*, Gr. *poesis*, Lat. *poesis*, Fr.) The art or skill of composing poems; poetry; metrical composition; a short conceit, engraved on a ring, or other thing;

A paltry ring, whose *poesy* was,
For all the world, like cutler's poetry
Upon a knife: 'Love me, and leave me not.'—Shaks.

POET, po'et, *s.* (*poeta*, Lat. *poete*, Fr.) Literally, a maker or inventor; the author of a poem, or metrical composition; one skilled in making poetry, or possessed of a genius for metrical composition; one distinguished for poetical talents, not a mere versifier;

The poet's eye, in a fine frenzy rolling,
Doth glance from heaven to earth, from earth to heaven;
And, as imagination bodies forth
The forms of things unknown, the poet's pen
Turns them to shapes, and gives to airy nothing
A local habitation and a name.—Shaks.

Poet's cassia, the plant *Osyris alba*, a native of the south of Europe: Order, Santalaceae. *Poet-laureate*, a poet whose duty it is to compose birth-day odes, and other congratulatory poems, for the

POISED—POKE.

with the steel-yard; a regulating power; that which balances mentally;

Men of an unbounded imagination often want the *poise* of judgment.—*Dryden*.

—*v. a.* (*pyysau*, to throw down or weigh, Welsh.) to balance, or make of equal weight; to place in equilibrium or equiponderance; to oppress; to weigh down.

Lest leaden slumber *poise* me down to-morrow,
When I should mount on wings of victory.—*Shaks.*

POISED, *poiz'ed, a.* Balanced.

The *poised* lark at heaven's gate sings.—*Craig*.

POISON, *poi'zn, s.* (French.) Any agent capable of producing a morbid, noxious, or dangerous effect upon anything possessing vitality, when taken internally, or imbibed into the system from external application; anything infectious or malignant; that which taints or destroys moral health or purity, as the *poison* of evil example;—*v. a.* to infect with anything fatal to life or moral purity; to injure or kill by poison; to taint; to mar; to impair; to corrupt.

To suffer the thoughts to be vitiated, is to *poison* the fountains of morality.—*Rambler*.

Poison-bulb, the plant *Brunsvigia toxicaria*. *Poison-fang*, the superior maxillary teeth of certain species of serpents, which, besides the cavity for the pulp, appear to be perforated with a second longitudinal canal, which is open at both ends, and receives at its bottom end the termination of the duct of the poison-gland. *Poison-gland*, a gland that secretes an acrid or venomous matter, which, in animals or plants, is conveyed along an organ capable of inflicting a wound. *Poison* or *Vomit-nut*, the poisonous fruit of *Strychnos vomica*, used in the cure of paralysis. *Poison-oak* or *sumach*, the tree *Rhus radicans*. *Poison-sumach*, *poison-wood*, or *swamp-sumach*, the tree *Rhus venenata*. *Poison-tree* or *common poison-oak*, the tree *Rhus toxicodendron*, the juice of which poisons when touched.

POISONABLE, *poi'zn-a-bl, a.* That can be poisoned.

POISONED, *poi'znd, a.* Tainted or imbued with venom;

Quivers, and bows, and *poison'd* darts,
Are only used by guilty hearts.—*Boscommon*.

POISONER, *poi'zn-ur, s.* One who poisons or corrupts, physically or mentally.

POISONFUL, *poi'zn-ful, a.* Replete with poison.—*Obsolete*.

The spider, a *poisonful* vermine, yet climbs to the roof of the king's palace.—*Dr. White*.

POISONING, *poi'zn-ing, s.* Act of administering poison.

POISONOUS, *poi'zn-us, a.* Venomous; corrupting; destructive of moral purity.

POISONOUSLY, *poi'zn-us-le, ad.* Venomously; with fatal or injurious effect physically.

POISONOUSNESS, *poi'zn-us-nes, s.* The quality of being poisonous; venomousness.

POITREIL, *po'e-trel, s.* (*poitrail*, the breast-piece, part of a horse's harness, Fr.) Armour of the breast of a horse; a graving tool.

POIVREA, *po-iv're-a, s.* (in honour of N. Poivre, intendant of the Mauritius in 1766.) A genus of plants: Order, Combretaceæ.

POIZE.—See *Poise*.

POKAN, *po'kan, s.* The vulgar name of the plant
POKE, *poke, s.* *Phytolacca decandra*, the root of which acts as a powerful emetic.

POKE—POLARITY.

POKE, *poke, s.* (*pocca*, a bag, Sax.) A provincial term for a bag; as 'to buy a pig in a *poke*;' in Scotland a disease among sheep, consisting of a bag growing under the jaw, indicative of its being rotten;—(this word is also written *pock* in either sense;);—*v. a.* (*pokkia*, to thrust or push, Corn. *pochan*, one who dives or plunges, Armor.) to thrust at with the horns;—*v. n.* to thrust the horns at; to feel in the dark.

POKER, *poke'ur, s.* An iron bar used in stirring the fire. In Navigation, an iron instrument with a flat foot at one end, and a round knob at the other, used in driving hoops on masts.

POKING, *poke'ing, a.* Drudging; servile.

Bred to some *poking* profession, or employed in some office of drudgery.—*Gray to Dr. Wharton*.

Poking-stick, an instrument anciently made use of to adjust the plaits of ruffs.

Pins, and *poking-sticks* of steel.—*Shaks.*

POLACCA, *po-lak'ka, s.* (*polacre*, Fr.) A vessel
POLACRE, *po-lak'er, s.* with three poles or masts, each of one piece, for the ready lowering of the top-sails. This form of vessel is common in the Mediterranean, on account of the suddenness and frequency of the squalls which occur in that sea.

POLAIRE, *po-lare', s.* A peculiar rig of vessel having pole-masts, no tops, and sometimes no cross-trees, whereby the yard and sail are lowered almost close down to the yard next below.

POLANISHEA, *po-la-nish'e-a, s.* (*polys*, many, and *anisos*, unequal, Gr. in reference to the stamens being numerous and unequal.) A genus of plants: Order, Capparidaceæ.

POLAR, *po'lar, a.* (Spanish.) Relating to the poles of the earth, or to those of an artificial globe; found near one of the poles; issuing from the regions near the poles; situated near the poles; relating to the magnetic pole, or to the point to which the needle is directed. In Astronomy, *Polar Bear*, the constellation *Ursus Major*. *Polar circles*, two lesser circles of the sphere, called the Arctic and Antarctic circles, each 23° 28' distant from its respective pole. *Polar dial*, one whose plane is parallel to some great circle passing through the poles. *Polar poles*, in the ancient Astronomy, those points in the heavens which form the axis of the celestial sphere. *Polar projection*, a representation of the earth or the heavens, projected on the plane of one of the polar circles. *Polar seas*, in Geography, those portions of the ocean which extend from the polar circles to the poles themselves. In Zoology, the *polar*, *white*, or *sea bear*, the *Ursus maritimus* of Linnæus, and *L'Ours blanc* of Buffon, an inhabitant of those floating fields of ice which stretch to the Northern Pole, where he carries on an almost incessant warfare with fish, seals, foxes, and is known even to attack the formidable walrus.

POLARCHY.—See *Polyarchy*.

POLARISCOPE, *po-lar'e-scope, s.* (*polos*, a pole, and *scopeo*, I view, Gr.) An apparatus for showing the phenomena of polarized light. *Oxy-hydro polariscope*, an instrument for exhibiting polarized light to a number of people at once, in which the light to be decomposed is produced by the action of oxy-hydrogen on lime.

POLARITY, *po-lar'e-te, s.* In Physics, that property of bodies, in consequence of which, when at liberty to move freely, they arrange themselves in certain determinate directions, or point, as it were, to poles.

POLARIZATION—POLEIN.

Thus, an iron bar acquires polarity by magnetism, and, when suspended by a single point, arranges itself in the direction of the magnetic meridian, or points to the magnetic poles of the earth.

POLARIZATION, po-lar-e-za'shun, *s.* The communication of polarity. *Polarization of light* is the effect of an attraction exercised by the particles of what are called doubly-refracting crystals, or of certain reflecting surfaces, upon the particles of light, when these pass through the former, or are incident upon the latter at a particular angle.

POLARIZE, po-lar-ize', *v. a.* To communicate polarity to.

POLARIZED, po-lar-izde, *part. a.* Having polarity communicated to; possessing the property of polarity, as *polarized light*.

POLARY, po-lar-e, *a.* Tending to a pole; having a direction to a pole.

POLE, pole, *s.* (*pol*, *pal*, Sax. *palus*, Lat.) A long staff, or the stem of a tree deprived of its branches; a tall piece of timber erected; a rod; a perch or measure of length containing five and a half yards; an instrument for measuring. In Geography, a native of Poland. In Architecture, a *pole-plate* is a board of wood laid on the top of the walls of a building for the purpose of supporting a particular kind of roof, called the Mansard-roof. It is so called from its being the uppermost plate of a building. In Marine affairs, a *pole-mast* is one formed of a single tree, in contradistinction to one composed of several pieces;—(French, *polos*, from *poleo*, I turn, Gr.) the extremity of the axis on which the sphere revolves. In Astronomy, the *altitude of the pole* is an arch of the meridian intercepted between the pole and the horizon of any place, and is equal to the latitude of that place. *Poles of the ecliptic* are points in the solstitial colure, 23° 30' distant from the poles of the world. *Poles of the horizon* are the two points of the meridian called the zenith and nadir, the one of which is exactly over our heads, and the other as exactly under our feet. *The poles* are the extremities of the earth's axis, or the points on the surface of the sphere through which the axis passes. *Poles of a magnet* are the two points of a magnet corresponding to the poles of the world, the one pointing to the north and the other to the south. In Mathematics, any point 90° from the plane of any circle, and in the axis or line raised perpendicularly in its centre;—*v. a.* (from the former noun) to bear or convey on poles; to impel by poles, as a boat.

POLE-AXE, pole-aks, *s.* A kind of hatchet with a handle about fifteen inches long, used principally in cutting away the rigging of an enemy in attempting to board. It is sometimes called a boarding-axe.

POLECAT, pole'kat, *s.* The Fomart, or Fitchet Weasel, the *Mustela putorius* of zoologists. The name is supposed to be a corruption of Polish-cat. It is very destructive to poultry, being greedy of blood, voracious, and insatiable. When pursued, it emits a most fetid vapour: hence its scientific name.

POLEDNAVY, pole-da've, *s.* A sort of coarse cloth. Your *polednavy* wares will not do for me.—Howell.

POLEIN, po-leen', *s.* In Archaeology, a sort of shoe, sharp or piked at the point. This fashion took its rise in the time of William Rufus; and the pikes were so long, that they were tied up to the

knees with silver or golden chains. They were forbidden by statute 4 Edward IV. cap. 7.

POLEMARCH, pol-e-märk, *s.* (*polis*, a city, and *archon*, a chief, Gr.) A magistrate at Athens, who had under his care all the strangers and sojourners in the city, over whom he had the same jurisdiction as the archon had over the citizens; a military officer in Lacedæmon.

POLEMBRYUM, po-lem'bre-um, *s.* (*polys*, many, *embryo*, an embryo, Gr. from the embryos being numerous.) A genus of plants: Order, Rutaceæ.

POLEMIC, po-lem'ik, *s.* A disputant; a controversialist.

Each staunch *polemick*, stubborn as a rock,
Came whip and spur.—Pope.

POLEMIC, po-lem'ik, } *a.* (*polemikos*, from
POLEMICAL, po-lem'e-kal, } *polemos*, war, Gr.)
Controversial; disputative.

POLEMONIACEÆ, pol-e-mo-ne-a'se-e, *s.* (*polemonium*, one of the genera.) A natural order of Exogens, consisting of beautiful shrubs or herbs, usually branched; leaves usually alternate, more rarely opposite, extipulate, undivided, pinnatifid, or pinnate; flowers showy, blue, red, or white; calyx tubular, five-cleft or five-toothed; corolla rotate, salver-shaped or funnel-shaped; stamens inserted sometimes above, and sometimes beneath the middle of the tube; anthers sagittate, incumbent, and two-celled; ovary simple and three-celled, three-valved; seeds convex, angular, and naked.

POLEMONIUM, pol-e-mo'ne-um, *s.* (*polemonion* of Dioscorides, from *polemos*, war, Gr.) A genus of erect herbaceous plants: Type of the order Polemoniaceæ.

POLESCOPE, po-lem'o-skope, *s.* (*polemos*, war, and *skopeo*, I view, Gr.) An optical instrument, acting somewhat on the principle of the camera obscura, for seeing objects which are out of the reach of direct vision. Although little better than a toy, it was at one time proposed as a means of perceiving an enemy's motions without danger to the spectator—hence its name.

POLESTAR, pole'stär, *s.* A star in Ursa Minor, being that nearly opposite the north terrestrial pole, and round which all the other stars of the northern hemisphere seem to revolve; cynosure; load-star; any guide or director, from the use of the polestar to navigators in computing northern latitudes.

She is their stern, *poletstar*, and guide.—Burton.

POLETÆ, po-le'te, *s.* (Greek.) In Antiquity, a board of ten magistrates at Athens, who had the management of the money allowed for the public shows, were empowered to let out the public revenues, and to sell confiscated estates.

POLEY.—See Poly.

POLIA, po'le-a, *s.* (*polios*, grey or hoary, Gr.) A genus of Moth-butterflies: Family, Noctuidæ.

POLIANTHES, pol-e-an'this, *s.* (*polis*, a city, and *anthos*, a flower, from being much cultivated in city garden-plots, or, according to Loudon, from *polys*, many, and *anthos*, Gr. from the abundance of its flowers.) The Tuberose, a genus of plants: Order, Hemerocallidaceæ.

POLICE, po-lis', *s.* (French, from *politia*, Lat. or *poletia*, from *polis*, a city, Gr.) The government of a city or town. It embraces the administration of the laws and regulations by which order, cleanliness, and health are preserved; the internal regulation and government of a kingdom or state; the corporation or body of men governing a city;

POLICED—POLISHER.

the municipal force under the control of the magistracy.

POLICED, pol'ist, } *a.* Regulated by laws; furnished with a regular system of laws and administration.

From wilds she came
To *police'd* cities and protected plains.—*Thomson*.

This populous, well-*policed*,
Though boundless habitation, built by Thee.—*Young*.

POLICEMAN, po-lis'man, *s.* An officer employed by the authorities of a city, town, or district, to preserve order and protect property; a watchman.

POLICY, pol'e-se, *s.* The art or manner of governing a nation, or that system of measures which the sovereign or administration of a country adopts in the management of public affairs. Policy is denominated domestic, foreign, commercial, or ecclesiastical, according to the particular branch to which it relates;—art, prudence, wisdom, or dexterity in the management of public or private affairs; stratagem; cunning or dexterity of management.

If it be honour in your wars to seem
The same you are not, which for your best ends
You call your *policy*.—*Shaks*.

In Insurance, the instrument by which a contract of indemnity is effected between the insurer and the insured; the writing containing the terms or conditions of a contract of insurance. In Marine Insurance, the following are the requisites into which a policy is commonly divided:—The name of the insured—the name of the ship and of the master—the matter insured—the commencement and termination of the voyage, and the consequent duration of the risk—the perils insured against—the premium or consideration—the common memorandum, inserted to protect the underwriter from small losses or perishable commodities—the date and subscription—the stamp. In Scotland, the word *policy* is used to denote the pleasure-grounds about a gentleman's mansion.

POLIEIA, pol-e-e'ya, *s.* In Antiquity, a festival at Thebes in honour of Apollo, who was represented there with grey hair, contrary to the practice of all other places.

POLISH, pol'ish, *v. a.* (*polier*, Fr. and Span. from *polio*, I make smooth, Lat.) To make smooth and brighten by attrition; to make glossy; to refine the manners; to make elegant and polite; to wear off rudeness, rusticity, and coarseness of manners;

In the Manege, *poll-evil*, a disease which often happens among horses, generally arising from a blow on the head. It exhibits itself in the form of a swelling or aposteme on the head, or on the nape of the neck between the ears;—*v. a.* to lop or cut off the tops of trees; to clip; to cut the hair off the head; to take a list or register of persons; to enter one's name in a list or register; to insert into a number as a voter.—The word is obsolete in the following senses,—to mow; to plunder; to strip; to peel.

POLLACK, pol'lak, *s.* A species of cod-fish, the *Gadus pollachius* of Linnaeus, which inhabits the rocky coasts of Europe, and migrates in great shoals.

POLLARD, pol'lard, *s.* (from *poll*.) A tree which has been frequently lopped or polled of its branches; bran mixed with meal; a clipped coin; a sort of base money current in Ireland in the time of Edward I., called also *crocard*; the chub-fish; a stag that has cast his horns;—*v. a.* to lop the tops of trees.

POLLEN, pol'len, *s.* (Latin, fine flour.) Powder produced on the anthers of flowers, composed of globules, containing the fecundating matter; farin or farina.

The *farina* of beans and peas.—Burns.

POLLENARIOUS, pol-le-na're-us, *a.* (*pollen*, Lat.) Consisting of meal.

POLLINGER, pol'len-jur, *s.* (from *pollard*.) Brushwood.—Obsolete.

Lep for the fuel old *pollenger* grown,
That hinders the corn or the grasse to be mown.—Tusser.

POLLENIFEROUS, pol-le-nif'er-us, *a.* (*pollen*, and *fero*, I carry, Lat.) Producing pollen.

POLLENINE, pol'len-ine, *s.* A peculiar substance obtained from the pollen of plants. It is insoluble in alcohol, ether, water, oil of turpentine, naphtha, and the alkalies, extremely combustible, and burns with great rapidity and flame.

POLLER, pol'lur, *s.* One who lops or polls trees; one who registers voters; one who enters his name as a voter.—Obsolete in the following significations:

POLLIA—POLTROON.

a barber; a pillager; a plunderer; one who fleeces by exactions.

POLLIA, pol'le-a, *s.* A name given by J. E. Gray to a certain species of the *Caulifera* of Lamarck, comprehending as a genus those species which differ from *Triton*, in the absence of external varices; and from *Purpura*, in the presence of crenulations on the columella and outer lip.

POLLICHA, pol-lik'e-a, *s.* (in honour of J. A. Pollich, M.D.) A genus of herbaceous plants, natives of the Cape of Good Hope: Order, *Paronychiaceae*.

POLLICIPES, pol-lis'e-pes, *s.* A genus of Cirripeds, separated from the genus *Lepas*. The shell is pedunculated, and formed of thirteen or more sub-contiguous unequal valves, the lowest at the sides being smallest.

POLLICITATION, pol-lis-e-ta'shun, *s.* (*pollicitatio*, Lat.) A promise; a voluntary engagement, or the paper containing it.

POLLINCTOR, pol-lingk'tur, *s.* (Latin.) One who prepares materials for embalming the dead; a kind of undertaker.

POLLINTIA, pol-lin'e-a, *s.* (in honour of Professor Cyrus Pollini of Verona.) A genus of plants: Order, *Graminaceae*.

POLLOCK.—See Pollack.

POLLUTE, pol-lute, *v. a.* (*polluo*, Lat.) To defile, to make foul or unclean; to taint with guilt; to corrupt; to profane; to use for carnal or idolatrous purposes; to corrupt by admixture of ill, moral or physical; to violate by illegal sexual intercourse; to pervert through pollution;

Polluted from the end of his creation.—Milton.

—*part. a.* polluted.—Obsolete.

Unchaste and *pollute*.—Martin.

Pollute with sinful blame.—Milton.

POLLUTEDNESS, pol-lu'ted-nes, *s.* Defilement; the state of being polluted.

POLLUTER, pol-lu'tur, *s.* Defiler; corrupter; the person or thing that pollutes.

POLLUTION, pol-lu'shun, *s.* (French, from *pollutio*, Lat.) The act of polluting; defilement; uncleanness; impurity; the state of being polluted; sin; idolatry.

POLLEX, pol'laks, *s.* In Mythology, the twin brother of Castor, the son of Leda. In Astronomy, a star of the second magnitude in the constellation Gemini, or the Twins.

POLONAISE, pol-o-naze', *s.* A robe or dress, after the fashion of the Poles, worn by ladies.

POLONESE, pol-o-neze', *s.* The language spoken by the natives of Poland.

POLONOISE, pol'o-noys, *s.* In Music, a movement of three crotchets in a bar, with the rhythmical caesura on the last.

POLTFOOT, pol'fut, *s.* A distorted foot;—*a.* having a distorted foot.

What's become of Venus and the *poltfoot* stinkard her husband?—Ben Jonson.

POLTFOOTED, pol-fut'ed, *a.* Having distorted feet; club-footed.—Obsolete.

I will stand up anywhere to escape this *poltfooted* philosopher, old Smug here, of Lemnos.—Ben Jonson.

POLTRON.—See Poltroon.

POLTRONRY.—See Poltroonery.

POLTROON, pol-troon', *s.* (*poltroné*, Fr. *poltrone*, a coward, an idle fellow, from *poltrire*, to sleep, to loiter, to be idle, Ital. Horne Tooke considers the word to be derived from the Latin *pollice truncata*, with the thumb cut off, it being once a

practice among cowards to cut off the thumb that they might not serve in war.) An arrant coward; a dastard; a wretch without spirit or courage. In Falconry, any bird of prey, the hind toes of which have been deprived of their nails and talons. —This word used formerly to be spelled *poltron*.

Patience is for *poltrons*.—*Shaks.*

—a. base; vile; contemptible.

He is like to be mistaken who makes choice of a covetous man for a friend, or relieth upon the reed of narrow and *poltron* friendship.—*Brown's Christ. Mor.*

POLTROONERY, pol-troon'er-e, *s.* (*poltroneria*, Ital. *poltronnerie*, Fr.) Cowardice; baseness.

POLY, pol'e, } *s.* A common name given to cer-

POLEY, pol'e, } tain labiate plants of the genus *Teucrium*. *Poley-grass*, a plant of the genus *Lythrum*. *Poly* is used in compound words derived from the Greek, to signify many or much.

POLYACANTHUS.—See *Polycanthus*.

POLYACUSTIC, pol-e-ak-ows'tik, *s.* (*polys*, many, and *akouo*, I hear, Gr.) An instrument for multiplying sounds;—a. that multiplies or magnifies sound.

POLYADELPHI, pol'e-a-delf, *s.* A plant belonging to the Linnean class Polyadelphia,—which see.

POLYADELPHIA, pol-e-a-del'fe-a, *s.* (*polys*, many, and *delphos*, a brother, Gr.) The eighteenth class in the Linnean sexual system of Botany. It is so called from the stamens being collected into several parcels.

POLYADELPHIAN, pol-e-a-del'fe-an, } *a.* Many-
POLYADELPHOUS, pol-e-a-del'fus, } brothered;
having the stamens combined into more than two parcels.

POLYEMIA, pol-e-e'me-a, *s.* (*polys*, much, and *haimia*, blood, Gr.) In Pathology, excess of blood.—See *Plethora*.

POLYANDER, pol-e-an'dur, *s.* A plant belonging to the Linnean class Polyandria.

POLYANDRIA, pol-e-an'dre-a, *s.* (*polys*, and *aner*, a male, Gr.) The name given by Linnæus to the fourteenth class of his sexual system. Although the name means literally many stamens or males, yet, in a restricted sense, it is applied to those plants only which have many stamens arising immediately from below the ovary.

POLYANDRIAN, pol-e-an'dre-an, } *a.* Belonging to
POLYANDROUS, pol-e-an'drus, } the class Polyandria.

POLYANDRY, pol-e-an'dre, *s.* Plurality of husbands; the practice of having more than one husband at the same time.

POLYANGIUM, pol-e-an'je-um, *s.* (*polys*, many, and *aggion*, a capsule, Gr.) A genus of Fungi: Tribe, *Gasteromycetes*.

POLYANTH, pol'e-anth, } *s.* (*polys*, many, and
POLYANTHUS, pol-e-an'thus, } *anthos*, a flower,
Gr.) The plant *Narcissus tazetta*.

POLYARCHY, pol-e-är'ke, *s.* (*polys*, many, and *archo*, I rule, Gr.) The government of the many as opposed to monarchy, signifying the rule either of a privileged class (aristocracy), or of the people at large (democracy).

POLYARTHRON, pol-e-ärth'ron, *s.* (*polys*, many, and *arthron*, a joint, Gr.) A genus of Lamellicorn Beetles: Family, *Prionidæ*.

POLYAUTOGRAPHY, pol-e-aw-tog'ra-fe, *s.* (*polys*, many, *autos*, he himself, and *grapho*, I write, Gr.) The art or practice of multiplying copies of one's own hand-writing, or of manuscripts, by engraving on stone; a species of lithography.

POLYBASITE, pol-e-ba'site, *s.* (*polys*, many, and *basis*, a base, Gr. from its numerous bases.) A mineral occurring in tabular-shaped six-sided prisms. Primary form, a rhomboid; colour, iron-black; opaque; lustre, metallic; streak, black; cleavage, not observable; fracture, uneven; susceptible of being cut with a knife. From Guari-samay in Mexico. It is composed of silver, 64.29; sulphur, 17.04; antimony, 5.09; arsenic, 3.74; copper, 9.93; iron, 0.06: sp. gr. 6.214; hardness = 2.0 to 3.0.

POLYBIUS, po-lib'e-us, *s.* (*polys*, many, and *bios*, life, Gr.) A genus of Decapod Crustaceans, natives of the British Channel: Family, *Portunidae*.

POLYBETES, pol-e-be'tes, *s.* In Mythology, one of the giants who made war against Jupiter. He was killed by Neptune, who crushed him under a part of the island of Cos, as he was walking across the Ægean Sea.

POLYBORUS, po-lib'o-rus, *s.* (*polyboros*, much devouring, Gr.) A genus of Kites, natives of Brazil: Family, *Falconidae*.

POLYBOTRYA, pol-e-bot're-a, *s.* (*polys*, many, and *botrys*, a bunch, Gr.) A genus of Ferns: Order, *Polypodiaceæ*.

POLYBRANCHIATA, pol-e-brang-ke-a'ta, } *s.* (*polys*,
POLYBRANCHIA, pol-e-brang'ke-a, } many,
POLYBRANCHIANS, pol-e-brang'ke-ans, } *branchia*,
branchia, gills, Gr.) The second order of Pora-cephalophora of De Blainville, consisting of the family Tetracerata and Dicerata.

POLYCANTHUS, pol-e-kan'thus, *s.* (*polys*, many, and *akantha*, a spine, Gr.) A genus of fishes with a slender, linear, pentangular body; jaws lengthened; mouth small and obliquely vertical; lateral line carinated; dorsal and anal fins central; tail slender; ventral fins represented by spines: Family, *Zeidae*.

POLYCARDIA, pol-e-kär'de-a, *s.* (*polys*, many, and *kardia*, the heart, Gr. in allusion to the petioles being furnished with numerous heart-shaped wings.) A genus of plants: Order, *Celastraceæ*.

POLYCARENA, pol-e-ka-re'na, *s.* (*polys*, many, and *karenon*, a head, Gr. in reference to the heads of the flowers.) A genus of plants, consisting of small annual herbs, natives of South Africa: Order, *Scrophulariaceæ*.

POLYCARPÆA, po-le-kär'pe-a, *s.* (*polys*, many, and *karpos*, a seed, Gr. the name, however, only indicates its affinity with *Polycarpon*.) A genus of plants: Order, *Paronychiaceæ*.

POLYCARPON, pol-e-kär'pon, *s.* (*polys*, many, and *karpos*, a seed, Gr.) A genus of plants: Order, *Paronychiaceæ*.

POLYCERA, po-lis'er-a, *s.* (*polys*, many, and *keras*, a horn, Gr.) A genus of Cyclobranchians, the species of which have the mantle divided into many strap-like portions, symmetrically disposed.

POLYCHLENA, po-le-kle'na, *s.* (*polys*, many, and *chlaina*, a cloak, Gr. in allusion to the many-leaved involucre.) A genus of plants, natives of Guiana.

POLYCHOLIA, pol-e-ko'le-a, *s.* (*polys*, much, and *chole*, bile, Gr.) In Pathology, an exuberant secretion of bile.

POLYCHORD, pol'e-kawrd, *s.* (*polys*, many, and *chorde*, a chord, Gr.) A bow instrument resembling the double-bass, but smaller. It had ten strings, and a compass from C, the second space in the bass clef, to C, the third space in the treble clef. Its finger-board could be lengthened or

POLYCHREST—POLYDACRIA.

shortened at pleasure, for the purpose of tuning the instrument;—*a.* having many strings.

POLYCHREST, pol'e-krest, *s.* (*polys*, many, and *chrestos*, useful, Gr.) A term applied by the old chemists to certain preparations, to which they attributed multifarious virtues. *Polychrest salt* was the sulphate of potash.

POLYCHROITE, pol'e-kro'ite, *s.* (*polys*, many, and *chroizo*, I colour, Gr.) The colouring matter of saffron, applied to it in consequence of the variety of colours which it assumes when operated upon by different re-agents.

POLYCHROMATIC, pol'e-kro-mat'ik, } *a.* (*polys*, many, and *chroma*, a colour, Gr.) Exhibiting many colours.

POLYCHROME, pol'e-krome, } *a.* (*polys*, many, and *chroma*, a colour, Gr.) A colouring matter found in the bark of the horse-chesnut and some other plants. It appears colourless by transmitted light, but blue by reflected light, and exhibits a curious play of colours when one part of it is dissolved in 1,500,000 parts of water. Acids destroy this play of colours; alkalis increase it. Formula, C₁₆ H₉ O₁₀.

POLYCHROMIC, pol'e-krom'ik, *a.* (*polys*, many, and *chroma*, a colour, Gr.) Many-coloured. *Polychromic acid*, artificial bitter principle of aloes. When pure it forms a yellow or brown powder, slightly soluble in water, of a bitter astringent taste. With different mordants it will dye silk all shades of brown, blue, violet, green, and yellow. These colours resist the action of soap, but are bleached sooner or later by the action of light.

POLYCHROMY, pol'e-kro-me, *s.* A modern term to express the ancient practice of colouring statues and the exterior of buildings.

POLYCHROM, pol'e-krom, *s.* (*polys*, many, and *chroma*, a colour, Gr.) A genus of Hymenopterous insects: Family, Sphecidae.

POLYCHROS, pol'e-kros, *s.* (*polychroos*, many-coloured, Gr.) A genus of Saurian reptiles: Family, Iguanidae.

POLYCHYLIA, pol'e-kil'e-a, *s.* (*polys*, much, and *chylus*, chyle, Gr.) In Pathology, excess of chyle.

POLYCLISUM, pol'e-kl'ium, *s.* (*polys*, many, and *klino*, a bed, Gr.) A genus of Mollusca allied to Ascidia: Family, Aggregata.

POLYCNEMUM, pol'ik-nie'mum, *s.* (*polys*, many, and *knema*, a knee, Gr. on account of the number of joints of the stem.) A genus of annual plants: Order, Chenopodiaceae.

POLYCOPIA, pol'e-kop're-a, *s.* (*polys*, much, and *kopros*, excrement, Gr.) Excessive evacuation of feces.

POLYCOTYLEDON, pol'e-ko-te-le'don, *s.* (*polys*, many, and *kotyledon*, a cotyledon or seed-lobe, Gr.) A plant which has more than two cotyledons.

POLYCOTYLEDONOUS, pol'e-ko-te-le'do-nus, *a.* Having more than two cotyledons.

POLYCRACY, po-lik'ra-se, *s.* (*polys*, many, and *kratos*, power, might, Gr.) Government by the many; polyarchy.

POLYCROTA, pol'e-kro'ta, *s.* In the naval architecture of the ancients, a term for such of their galleys as had three or more tiers of benches, seated at different heights. They were distinguished by this term from the monocrota, which had only single rows of oars.

POLYDACRIA, pol'e-dak're-a, *s.* (*polys*, much, and

POLYDACTYLOUS—POLYGAMOUS.

dakrion, a tear, Gr.) In Pathology, excessive secretion of tears.

POLYDACTYLOUS, pol'e-dak'til-us, *a.* (*polydaktylos*, Gr.) Many-fingered, applied to creatures who have more than the natural number of fingers.

POLYDECTUS, pol'e-dek'tus, *s.* (*polydektes*, containing much, Gr.) A genus of Decapod Crustaceans, placed by M. Milne Edwards in his tribe Corystians, which tribe, in his opinion, forms the connecting link between the Cancrarians and the Calappians on one side, and the anurous Decapods on the other.

POLYDESMUS, pol'e-des'mus, *s.* (*polys*, many, and *desme*, a bundle, Gr.) A genus of Myriapods, or Centipedes: Family, Chilognatha.

POLYDIPSIA, pol'e-dip'se-a, *s.* (*polys*, much, and *dipso*, thirst, Gr.) In Pathology, excessive thirst.

POLYDONTES, pol'e-don'tis, *s.* (*polys*, many, and *odon*, a tooth, Gr.) A genus of Mollusca belonging to the Lucerninae, or Land-volutes, the shell of which has the aperture nearly circular, and surrounded with obtuse tubercular teeth: Family, Helicidae.

POLYDONTIA, pol'e-don'she-a, *s.* (*polys*, many, and *odon*, a tooth, Gr. the calyx having more teeth than the other genera of the same order.) A genus of plants: Order, Amygdalaceae.

POLYERGUS, pol'e-er'gus, *s.* (*polys*, much, and *ergo*, I work, Gr.) A genus of ants: Family, Formicidae.

POLYGALA, po-lig'a-la, *s.* (*polys*, many, and *gala*, milk, Gr. from its reputed effects on cattle that feed on it.) A genus of plants: Type of the order Polygalaceae.

POLYGALACEAE, pol'e-ga-la'se-e, } *s.* (*polygala*, *POLEGALAE*, pol'e-ga'le-e, } one of the

genera.) A natural order of Exogenous plants, consisting of herbs or subshrubs, sometimes abounding in cream-coloured juice, but more especially in the roots; leaves entire, for the most part alternate, and articulated with the stem; calyx with five sepals; petals three or five, and hypogynous; filaments united with the petals, and monodelphous; anthers one-celled, inserted at the base and opening at the top; style one and incurved; stigma funnel-shaped or two-lobed; pericarp capsular or drupaceous; seeds solitary.

POLYGALIC ACID, pol'e-gal'ik as'id, *s.* An acid found in the Polygala senega, and other species of the same genus.

POLYGALINE, po-lig'a-line, *s.* A bitter alkaline principle, found in several species of polygala.

POLYGAMIA, pol'e-ga'me-a, *s.* (*polys*, many, and *gamis*, marriage, Gr.) The twenty-third class in the Linnæan system of Botany, consisting of those plants which have flowers, either male, female, or hermaphrodite, upon the same or different plants.

POLYGAMIAN, pol'e-ga'me-an, *s.* A plant belonging to the class Polygamia;—*a.* belonging to the class. Polygamian, as a noun, is sometimes written Polygam.

POLYGAMIST, po-lig'a-mist, *s.* One who practises polygamy; one who maintains the lawfulness of polygamy.

POLYGAMOUS, po-lig'a-mus, *a.* (*polys*, many, and *gamia*, marriage, Gr.) In Botany, plants which have male and hermaphrodite, or female and hermaphrodite, or male, female, and hermaphrodite flowers on the same or on different individuals.

POLYGAMY—POLYGONATUM.

POLYGAMY, pol-ig'a-me, *s.* The practice of having a plurality of wives or husbands at the same time, according to the sex of the individual.

POLYGASTRIC, pol-e-gas'trik, *s.* (*polys*, many, and *gaster*, a stomach, Gr.) An Infusorial animalcule, belonging to the class Polygastrica;—*a.* having many stomachs.

POLYGASTRICA, pol-e-gas'tre-ka, } *s.* One of the
POLYGASTRIANS, pol-e-gas'tre-ans, } two great divisions of the Infusorial animalculæ. The class Phytozoaria Polygastrica is thus described:—Swimming animals, without vertebrae, apodal; having sometimes a tail, and very often scattered vibratory cilii; having no heart, but vessels extremely delicate, reticulated, transparent, and deprived of proper movement; often rudimentary eyes, with red pigmentum, indicating a nervous system, which however is but apparent; mouth under or surrounded by vibratory cilii, and communicating with several ventricles; the phalanx apparent, and generally unarmed; no branchiæ; organs of generation filiform, reticulated, and granular; no distinct male organ; gifted with power of reproduction by spontaneous division.

POLYGENOUS, pol-lif'e-nus, *a.* (*polys*, many, and *genos*, kind, Gr.) Consisting of many kinds.

POLYGLOTT, pol'e-glôt, *s.* (*polys*, many, and *glotta*, tongue, Gr.) A book written in several languages.

POLYGLYPHA, pol-e-glîp'ta, *s.* (*polys*, much, and *glyptos*, carved, Gr.) A genus of Hemipterous insects: Family, Centronotidae.

POLYGNOMETRY, pol-lig-nom'e-tre, *s.* (*polys*, many, *gonia*, an angle, and *metron*, a measure, Gr.) The doctrine of polygons, as trigonometry is that of triangles.

POLYGON, pol'e-gon, *s.* (*polys*, many, and *gonia*, an angle, Gr.) A geometrical figure of more than four sides. In Fortification, *exterior polygon*, the figure formed by lines connecting the points of the bastions of a fortress with one another, quite round the work. *Interior polygon*, the figure formed by lines connecting the centres of the bastions with one another, quite round.

POLYGONACEÆ, pol-go-na'se-e, } *s.* (*polygonum*,
POLYGONEÆ, pol-e-go'ne-e, } one of the genera.) A natural order of Exogenous plants, consisting of herbs or rarely shrubs, with alternate leaves, with stipules cohering round the stem; no corolla, but a calyx usually coloured; stamens rarely perigynous, usually definite, and inserted in the bottom of the calyx; anthers dehiscing lengthwise; ovary free, and usually formed by the adhesion of three one-celled carpels; ovule orthotropal; styles or stigmas of the same number as the carpels of the ovary; nut usually triangular, naked, or protected by the calyx. Lindley proposes the name Buckwheats for the plants of this order.

POLYGONAL, pol-ig'on-al, } *a.* Having many

POLYGONOUS, pol-ig'on-us, } angles. In Arithmetic, *polygonal numbers* are such that the number of points in them can be arranged in the form of one of the geometrical polygons; they are divided into various classes, according to the form of the figure into which they could be arranged, as triangular, quadrilateral, &c.

POLYGONATUM, pol-e-gon'a-tum, *s.* (*polys*, many, and *gonia*, an angle, or *gony*, a knee or joint of grasses, Gr. on account of the numerous articulations of the stem.) Solomon's-seal, a genus of plants: Order, Smilacæ.

POLYGONUM—POLYLOGY.

POLYGONUM, pol-lig'o-num, *s.* (*polys*, many, and *gony*, a knee or joint of grasses, Gr. on account of the number of joints of the stem.) Buckwheat, a genus of plants: Type of the order Polygonacæ.

POLYGRAM, pol'e-gram, *s.* (*polys*, many, and *gramma*, a writing, Gr.) A figure consisting of many lines.

POLYGRAPH, pol'e-graf, *s.* (*polys*, many, and *grapho*, I write, Gr.) An instrument for multiplying copies of a writing with ease and expedition.

POLYGRAPHIC, pol-e-graf-ik, } *a.* Relating to

POLYGRAPHICAL, pol-e-graf-e-kal, } polygraphy; done with a polygraph.

POLYGRAPHY, pol-lig'ra-fe, *s.* The art of writing in various unusual manners or ciphers; and also that of deciphering the same.

POLYURIA, pol-e-gu're-a, } *s.* (*polys*, much, and
POLYURIA, pol-e-u-re-a, } *ouron*, urine, Gr.) Excessive excretion of urine.

POLYGYNIA, pol-e-jin'e-a, *s.* (*polys*, many, and *gynæ*, a female, Gr.) One of the orders in the fifth, sixth, twelfth, and thirteenth classes of Linnæus, comprehending those plants which have flowers with many pistils.

POLYGYNIAN, pol-e-jin'e-an, *s.* A plant belonging to the Linnæan order Polyginia, sometimes written Polygin;—*a.* belonging to the order Polyginia.

POLYGYNY, pol-lif'e-ne, *s.* The practice of having a plurality of wives at the same time.

POLYGYRA, pol-e-jî'ra, *s.* (*polys*, much, and *gyros*, round, Gr.) A genus of Land-snails, the shell of which is completely discoid, and without a pillar; the aperture angulated and margined, with a small tooth on the inner lip: Family, Helicidæ.

POLYHALLITE, pol-e-hal'ite, *s.* (*polys*, many, *ala*, salt, Gr.) A mineral of a brick-red, or pale flesh-red colour; occurs crystallized and massive; primary form of the crystal, right rhombic prisms; lustre resinous; opaque. It consists of sulphate of lime, 44.74; sulphate of potash, 27.70; sulphate of magnesia, 20.04; chloride of sodium, 0.19; peroxide of iron, 0.34; water, 5.95; sufficiently hard to scratch carbonate of lime: sp. gr. 2.769.

POLYHEDRAL, pol-e-he'dral, } *a.* (*polys*, many,
POLYHEDROUS, pol-e-he'drus, } and *hedra*, a base, Gr.) Having many sides or planes.

POLYHEDRON, pol-e-he'dron, *s.* (*polys*, many, and *hedra*, a base side, Gr.) A geometrical solid contained under many planes or sides. In Optics, a lens consisting of many plane surfaces disposed in a convex form: usually called a multiplying-glass.

POLYHYMNIA, pol-e-him'ne-a, } *s.* In Mythology,

POLYMNIA, pol-lim'ne-a, } one of the Muses, daughter of Jupiter and Mnemosyne. She presided over music and rhetoric, and was deemed the inventress of harmony.

POLYIDES, pol-e-i'des, *s.* (*polyeides*, multiform, from *polys*, many, and *eidōs*, a form, Gr. on account of the diversity of its appearance.) A genus of Algae: Order, Confervacæ.

POLYIDRIA, pol-e-id're-a, *s.* (*polys*, much, and *idros*, sweat, Gr.) Excessive perspiration.

POLYLEPAS, pol-lî'e-pas, *s.* (*polys*, many, and *lepas*, a limpet, Gr.) A genus of Cirripeds, formed by De Blainville from the Scalpellum of other conchologists.

POLYLEPIS, pol-lî'e-pis, *s.* (*polys*, many, and *lepis*, a scale, Gr. in allusion to the scales on the calyx.) A genus of plants: Order, Sanguisorbacæ.

POLYLOGY, pol-îl'o-je, *s.* (*polys*, many, and *logos*,

POLYMATHIC—POLYODON.

a discourse, Gr.) Talkativeness; garrulity.—Obsoleto.

Many words (battology or *polylogy*) are signs of a fool.—*Granger on Eccles.* (1621.)

POLYMATHIC, pol-e-math'ik, *a.* (from *polymathy*.) Pertaining to polymathy.

POLYMATHY, po-lim'ath-e, *s.* (*polys*, many, and *mathano*, I learn, Gr.) The knowledge of many arts and sciences; acquaintance with many branches of learning, or with various subjects.

POLYMELA, pol-e-me-la, *s.* In Mythology, one of the companions of Diana, who had a daughter by Mercury; also, a daughter of Æolus, seduced by Ulysses.

POLYMERA, po-lim'e-ra, *s.* (*polys*, many, and *meros*, a part, Gr.) A genus of Dipterous insects, the antennæ of which consist of twenty-eight joints: Family, Nemocera.

POLYMERIA, pol-e-me-re-a, *s.* (*polys*, many, and *meros*, a part, Gr. in allusion to the stigma being divided into many parts.) A genus of herbaceous plants, natives of Australia: Order, Convolvulaceæ.

POLYMERISM, pol-im'er-izm, *s.* (*polys*, many, and *meros*, a part, Gr.) The state of monstrosity in which an animal or plant is characterized by the presence of a multiplicity of parts.

POLYMIGNITE, pol-e-mig'nite, *s.* (*polymiges*, much mixed, Gr.) A mineral, the titanate of iron, zircon, &c.; occurs crystalized; primary form a right rhombic prism; fracture conchoidal; colour black; lustre nearly metallic; opaque. Its constituents are—titanic acid, 49.3; oxide of iron, 12.2; oxide of cerium, 5.0; oxide of manganese, 2.7; zirconia, 14.4; yttria, 11.5; lime, 4.2; traces of magnesia, potash, silica, and oxide of tin: sp. gr. 4.806: Hardness, scratches phosphate of lime, and is scratched by felspar.

POLYMNIA, po-lim'ne-a, *s.* (the name of one of the Muses.) A genus of Composite plants: Suborder, Tubulifloræ.

POLYMORPHINA, pol-e-mawr-fi'na, *s.* (*polys*, many, and *morphe*, form, Gr.) A genus of microscopic Foraminifera.

POLYMORPHOUS, pol-e-mawr'fus, *a.* (*polys*, many, and *morphe*, a form, Gr.) Exhibiting many varieties of figure; having many forms.

POLYNEMUS, pol-e-ne'mus, *s.* (*polys*, many, and *nema*, a thread, Gr.) A genus of fishes, distinguished by the ventral fins being inserted farther back than the pectoral, and by having several long filaments beneath the pectoral fin: Family, Percidæ.

POLYNESIAN, pol-e-ne'zhe-an, *a.* (*polys*, many, and *nesos*, an island, Gr.) Pertaining to Polynesia, the name given to designate, as a whole, those islands in the Pacific Ocean known as the Pelew, Landrone, Caroline, Sandwich, Marquesa, Society, and Friendly isles.

POLYNOE, pol-e-no'e, *s.* (*polys*, much, and *noeo*, I see, Gr.) A genus of Annelides: Family, Amphroditidæ.

POLYNOME, pol'e-nome, *s.* (*polys*, many, and *onoma*, a name, Gr.) In Algebra, a quantity consisting of many terms.

POLYNOMIAL, pol-e-nom'e-al, *a.* Containing **POLYNOMOUS**, pol-e-on'o-mus, *a.* many terms or names. *Polynomial theorem*, the theorem by which a polynome is raised to its several powers.

POLYODON, pol-e-o'don, *s.* (*polys*, many, and *odus*, a tooth, Gr.) A genus of fishes, placed by Cuvier between the Sturgeons and the Chimaeras.

POLYODONTA—POLYPE.

POLYODONTA, pol-e-o-don'ta, *s.* (*polys*, many, **POLYODONTES**, pol-e-o-don'tis, *s.* and *odus*, a tooth, Gr.) A family of Conchifera, consisting of the Ark-shells of collectors, embracing the genera Arca, Cucullea, Pectunculus, and Nucula.

POLYOMMATOUS, pol-e-om'ma-tus, *a.* (*polys*, many, and *ommaton*, a little eye, Gr.) Many-eyed; belonging to the genus *Polyommatus*.

POLYOMMATUS, pol-e-om'ma-tus, *s.* (*polys*, many, and *ommaton*, a little eye, Gr.) A genus of Lepidopterous insects: Family, Erycinidæ.

POLYONOMY, pol-e-on'o-me, *s.* (*polys*, many, and *onoma*, a name, Gr.) Variety of different names.

POLYOPTRUM, pol-e-op'trum, *s.* (*polys*, many, and *optomai*, Gr.) A glass through which objects appear multiplied; a multiplying-glass.

POLYORAMA, pol-e-o-ra'ma, *s.* (*polys*, many, and *orao*, I see, Gr.) A view of many objects.

POLYOREXIA, pol-e-o-reks'e-a, *s.* (*polys*, much, and *orexis*, appetite, Gr.) Excessive hunger, constituting the first genus of Gastroses in the Natural Nosology of Alibert.

POLYOSMA, pol-e-os'ma, *s.* (*polys*, much, and *osme*, smell, Gr. from the odour of the flowers.) A genus of plants: Order, Cornaceæ.

POLYOTUS, pol-e-o'tus, *s.* (*polys*, many, and *otos*, an ear, Gr. the leaflets of the corona being articulate at the base.) A genus of erect herbaceous plants, natives of North America: Order, Asclepiadaceæ.

POLYOZUS, pol-e-o'zus, *s.* (*polys*, many, and *ozos*, a branch, Gr.) A genus of Asiatic small glabrous trees: Order, Cinchonaceæ.

POLYPARIA, pol-e-pa're-a, *s.* (*polypus*, and **POLYPIARIA**, pol-e-pi-a're-a, *s.* *pario*, I bring forth, Lat.) A class of Zoophytes, the active animal parts of which are generally of slender figure, provided with filiform tentacula in one row, and either nude or contained in cells of various form and substance; agglomerated together, but never lamelliferous. The subclasses are—*Polyparia solida*, the animals of which are contained in small calcareous cells with a terminal opening, accumulated into a solid fixed polyparium. It contains the families Milleporidæ and Tubuliporidæ. *Polyparia membranacea*, animals very short; urceolated; provided with many tentacula (often ciliated) in one row, contained in membranous, rarely calcareous, adherent cells, with a more or less bilateral opening. It contains the families, *P. operculifera*, *P. cellariæ*, *P. sertulariæ*. *Polyparia dubia*, animals provided with long (often ciliated) tentacula, arranged in a curvilinear form above and around the opening of the mouth, and springing from a common membranous basis: Family, Limniadæ. *Polyparia nuda*, the body of which is gelatinous; very contractile; free; excavated into a gastric cavity of simple form, provided at its entrance with cirrhus tentacula; no trace of viscera; reproduction by external germs.

POLYPAROUS, pol-lip'a-rus, *a.* Belonging to **POLYPIARIAN**, pol-e-pi-a're-an, *a.* the *Polyparia*, or *Polypi*.

POLYPARY, pol-lip'a-re, *s.* —See *Polyparia*, or **POLYPARIES**, pol-lip'a-ris, *s.* *Polypi*.

POLYPE, pol'e-pe, *s.* (*polys*, many, and *pous*, a foot, Gr. in reference to the many tentacula which surround the mouth.) The name given to each tube, surrounded with its tentacula, of the polypus: polypus designating the entire animal

POLYPEDE—POLYPLECTRON.

- mass, composed of an aggregation of *polypes*.—See *Polypi*.
- POLYPEDE**, pol'e-pede, *s.* Same as Centipede, or Multipede,—which see.
- POLYPETALOUS**, pol-e-pet'a-lus, *a.* (*polys*, many, and *petalon*, a petal, Gr.) In Botany, having many petals.
- POLYPHAGOUS**, pol-lif'a-gus, *a.* (*polys*, many, and *phago*, I eat, Gr.) Devouring indiscriminately all sorts of food; exhibiting voracity.
- POLYPHARMACY**, pol-e-far'ma-se, *s.* (*polys*, many, and *pharmakon*, a drug, Gr.) The prescription of many drugs in one compound.
- POLYPHARMIC**, pol-e-far'm'ik, *s.* One who practises polypharmacy;—*a.* pertaining to the practice of polypharmacy.
- POLYPHEMAS**, pol-e-fe'mus, *s.* In Mythology, king of all the Cyclops in Sicily, and son of Neptune and Thoosa. He is represented as a monster of immense strength, with one eye in the middle of his forehead, and as feeding on human flesh.
- POLYPHONIC**, pol-e-fon'ik, *a.* (*polys*, many, and *phone*, sound, Gr.) Having or consisting of many sounds or voices.
- POLYPHONISM**, pol-lifo-nizm, } *s.* Multiplicity of
- POLYPHONIE**, pol-lifo-ne, } sounds, as the reverberations of an echo.
- POLYPHORE**, pol'e-fore, *s.* (*polys*, many, and *phoreo*, I bear, Gr.) In Botany, an elongated receptacle which bears many ovaries, but not the petals or stamens.
- POLYPHRAGMON**, pol-e-frag'mon, *s.* (*polys*, many, and *phragmos*, a dissepiment, from there being a small dissepiment: there is a small transverse septum separating each seed.) A genus of shrubs: Order, Cinchonaceæ.
- POLYPHYLLOUS**, pol-e-fil'lus, *a.* (*polys*, many, and *phylon*, a leaf, Gr.) In Botany, many-leaved.
- POLYPHYSA**, pol-e-fi'sa, *s.* (*polys*, many, and *physa*, a bladder, Gr.) A genus of Corals belonging to the order Coralliferi, and family Cellulari of Cuvier.
- POLYPI**, pol'e-pi, } *s.* (*polypus*, the name given
- POLYPIES**, pol'e-pes, } by the ancients to the cuttle-fish, from *polys*, many, and *pous*, a foot, Gr.) The fourth class of the Radiata of Cuvier, so named from their tentacula resembling, in some degree, those of the cuttle-fish. The tentacula are arranged generally in a circle round the mouth, and vary considerably in form and number; the body cylindrical or conical, and often without any other viscous than its cavity; some have a visible stomach, to which the intestines or vessels situated in the substance of the body adhere, like those of the Medusæ. Most of the animals are capable of forming compound beings, by shooting out new individuals, like buds, many of which are ornamented with bright colours. Cuvier divides the Polypi into three orders—the Carnosi, or fleshy Polypi; the Gelatinosi, or gelatinous Polypi; and the Coralliferi, or coral-producing Polypi.—See *Polyparia*.
- POLYPIER**, pol'e-pere, } *s.* The habitation con-
- POLYPARY**, pol'e-pa-re, } structed by polypi, as coral, sponge, &c.
- POLYPIFEROUS**, pol-e-pif'er-us, *a.* (*polypus*, and *fero*, I bear, Lat.) Bearing polypi; producing polypi.
- POLYPITE**, pol'e-pite, *s.* A fossil coral or coralline.
- POLYPLECTRON**, pol-e-plek'tron, *s.* (*polys*, many,

POLYPODIACEÆ—POLYSCIAS.

- and *plektron*, an instrument to strike the lyre with, Gr.) A musical instrument, so called from its tones being produced by the friction of numerous slips of leather acting upon strings, as they were set in motion by pressing or striking down the different keys, as is done in a piano-forte.
- POLYPODIACEÆ**, pol-e-po-de-a'se-e, *s.* (*polypodium*, one of the genera.) An order of the Filices, or Ferns, with ringed spore-cases growing on the back or edge of the leaves, distinct, and splitting irregularly.
- POLYPODITES**, pol-e-po-di'tes, *s.* (*polys*, many, and *pous*, a foot, Gr.) A genus of fossil Ferns, found in the Coal formation.
- POLYPODIUM**, pol-e-po-de-um, *s.* (*polys*, many, and *pous*, a foot, Gr. from the multitude of the roots which form entangled patches.) Polypody, a genus of Ferns: Type of the order or tribe Polypodiaceæ.
- POLYPODY**, pol'e-pod-e, *s.* The vulgar name for the genus of Ferns, Polypodium,—which see.
- POLYPOGON**, pol-e-po'gon, *s.* (*polys*, much, and *pogon*, a beard, Gr. in allusion to its bearded heads.) A genus of plants: Order, Graminaceæ.
- POLYPORUS**, pol-lip'o-rus, *s.* (*polys*, many, and *poros*, a pore, Gr. on account of the multitude of pores which constitute its hymenium.) A genus of Fungi: Tribe, Hymenomycetes.
- POLYPTHECIA**, pol-e-po-the'she-a, *s.* A genus of spongy Zoophytes, found in flints. Miss Bennet, in her catalogue of the organic remains of Wiltshire, has described seven species.
- POLYPOUS**, pol'e-pus, *a.* Pertaining to the polypi; having many roots or feet.
- POLYPREMON**, pol-e-pre'mon, *s.* (*polys*, many, and *premon*, a trunk, Gr.) A genus of herbaceous plants: Order, Cinchonaceæ.
- POLYPRION**, pol-e-pr'ion, *s.* (*polys*, many, and *prion*, a saw, Gr.) A genus of fishes, having the body broad, compressed, and triangular; the mouth oblique; the orbits elevated over the eyes: Family, Percidæ.
- POLYPRISMATIC**, pol-e-priz-mat'ik, *a.* (*polys*, many, Gr. and *prismatic*.) In Crystallography, presenting numerous prisms.
- POLYPTERIS**, pol-ip'ter-is, *s.* (*polys*, many, and *pteron*, a wing, Gr.) A genus of Composite plants: Suborder, Tubulifloræ.
- POLYPTERUS**, pol-lip'ter-us, *s.* (*polys*, many, and *pteron*, a wing, Gr.) A genus of fishes, the body oblong-oval; a ridged and spined process over the orbits, and other short spines on the preoperculum and gill-covers; scales small; the ventral fin serrated: Family, Percidæ.
- POLYPUS**, pol'e-pus, *s.* (*polys*, many, and *pous*, a foot, Gr.) Something that has many feet or roots. In Pathology, a tumour generally of a pyriform shape, occurring in the nose, uterus, &c., and named from an erroneous idea that it has several feet or roots like a polypus. In Zoology, the ancient name of the Octopus, or Cuttle-fish.
- POLYRACHIS**, pol-e-ra'kis, *s.* (*polys*, many, and *rhachis*, a ridge or back-bone, Gr.) A genus of Ants: Family, Formicidæ.
- POLYSARCIA**, pol-e-sar'she-a, *s.* (*polys*, much, and *sarks*, flesh, Gr.) Corpulency; obesity; bulkiness of the body.
- POLYSCIAS**, pol-lis'h'e-as, *s.* (*polys*, many, and *skia*, a shadow, Gr. in reference to the numerous umbels.) A genus of plants: Order, Aralaceæ.

POLYSCOPE—POLYTENIA.

POLYSCOPE, pol'e-sko-pe, *s.* (*polys*, many, and *skopeo*, I see, Gr.) A glass which makes a single object appear as many; a multiplying-glass.

POLYSEMASIA, pol-e-se-ma'she-a, *s.* (Greek.) In Music, such intervals and chords in harmony as produce upon the ear the same effect, although they may differ from each other in notation.

POLYSEPALOUS, pol-e-sep'a-lus, *a.* In Botany, applied to a calyx which has more than one sepal.

POLYSIALIA, pol-e-si-a'le-a, *s.* (*polys*, much, and *sialon*, saliva, Gr.) Excessive secretion of saliva.

POLYSIPHONIA, pol-e-si-fo'ne-a, *s.* (*polys*, many, and *syphon*, a syphon, Gr. in reference to the numerous little canals by which the coloured matter is carried from one end of the plant to the other.) A genus of Algae: Order, Confervaceae.

POLYSPAST, pol'e-spast, *s.* (*polys*, many, and *spastum*, I draw, Gr.) A machine, consisting of many pulleys, for reducing luxations by force.

POLYSPERM, pol'e-sperm, *s.* (*polys*, many, and *sperma*, a seed, Gr.) A plant whose fruit contains many seeds.

POLYSPERMIOUS, pol-e-sperm'us, *a.* Containing many seeds.

POLYSPHERAL, pol-e-sperm'al, *a.* many seeds.

POLYSPHARITE, pol-is-fa'rite, *s.* (*polys*, many, and *sphaira*, a sphere, Gr.) A mineral occurring in roundish masses, having internally a radiated structure; colour, brown or yellow; lustre, greasy; fracture, conchoidal. It scratches mica, but is scratched by fluor spar. It contains oxide of lead, phosphoric acid, and magnesia. From the mines of Freyberg in Saxony, where it accompanies blende, galena, quartz, and iron pyrites: sp. gr. 5.83 to 5.89.

POLYSPORA, po-lis-po-ra, *s.* (*polys*, many, and *spora*, a seed, Gr. in reference to the many seeds in the capsule.) A genus of plants, natives of Java: Order, Ternstroemiaceae.

POLYSTACHIA, pol-is-tak'e-a, *s.* (*polys*, many, and *stachys*, a spike, Gr. on account of the compound nature of the inflorescence.) A genus of plants: Order, Orchidaceae.

POLYSTICHITES, pol-o-ste-ki'tes, *s.* (*polys*, many, and *stichos*, a row, Gr.) A genus of fossil plants, found in the secondary formations.

POLYSTOMA, po-lis-to-ma, *s.* (*polys*, many, and *stoma*, a mouth, Gr.) A genus of Entozoa, belonging to the order Nematodea, and family Trematodea of Cuvier.

POLYSTOMELLA, pol-e-sto-mel'la, *s.* A genus of microscopic Foraminifera.

POLYSTYLE, pol'e-stile, *s.* (*polys*, many, and *stylos*, a pillar, Gr.) In Architecture, an edifice containing numerous pillars.

POLYSYLLABIC, pol-e-sil-lab'ik, *a.* Having many syllables; applied to words having more than three syllables.

POLYSYLLABLE, pol'e-sil-a-bl, *s.* A word of more than three syllables.

POLYSYNDETON, pol-e-sin-de-ton, *s.* (*polys*, many, and *syndeton*, connecting, Gr.) In Rhetoric, a figure by which the copulative is often repeated, as, 'For days, and years, and ages past; we have ships, and men, and money, and stores.'

POLYTENIA, pol-e-te'ne-a, *s.* (*polys*, many, and *tainia*, a vitta, or fillet, Gr. the mericarps being furnished with many vittae.) A genus of umbelliferous plants: Suborder, Orthospermae.

POLYTECHNIC—POMACEÆ.

POLYTECHNIC, pol-e-tek'nik, *a.* (*polys*, many, and *techné*, art, Gr.) Denoting or comprehending many arts.

POLYTHALAMOUS, pol-e-thal'am-us, *a.* (*polys*, many, and *thalamos*, a chamber, Gr.) Having many cells or chambers, as *polythalamous* shells; multilocular; camerated.

POLYTHALMACEA, pol-e-thal-ma'se-a, *s.* A name given to an order of polythalamaceous Cephalopods, embracing many recent and extinct genera, allied to Nautilus, Spirula, and Sepia. It embraces the families Nautilidae, Ammonitidae, Spirulidae, and Belemnitidae.

POLYTHEISM, pol-e-the'izm, *s.* (*polys*, many, and *theos*, god, Gr.) The doctrine of a plurality of gods, or invisible beings superior to man, who have an agency in the government of the world.

POLYTHEIST, pol'e-the-ist, *s.* One who maintains the doctrine of a plurality of gods.

POLYTHEISTIC, pol-e-the-is'tik, *a.* Believing in, or holding the doctrine of, a plurality of gods.

POLYTHEISTICAL, pol-e-the-is'te-kal, *in, or holding the doctrine of, a plurality of gods.*

POLYTHEISTICALLY, pol-e-the-is'te-kal-e, *ad.* In the manner of polytheism.

POLYTHRINCUM, pol-e-thrin'she-um, *s.* (*polys*, many, and *thrinchos*, a little division, Gr.) A genus of Fungi, which appears in the form of numerous black dots of an equal size: Tribe, Coniomycetes.

POLYTOMA, po-lit'o-ma, *s.* (*polys*, many, and *tome*, an incision, Gr.) A genus of the Polygastrica, in which the mouth is direct, truncate, and turned different ways in the animal's movements.

POLYTRICHUM, po-lit're-kum, *s.* (*polys*, many, and *thrix trichos*, hair, Gr. on account of the numerous hairs of the calyptra.) A genus of Urn-mosses: Order, Bryaceae.

POLYTROPA, po-lit'ro-pa, *s.* (*polys*, many, and *tropa*, turning, Gr.) A genus of Mollusca belonging to the Scolyminae, the shell of which is bucciniform, but having the base narrowed, and ending in a straight and contracted, but rather short channel; spire longer, or as long as the aperture; the exterior foliculated or tuberculated; the inner lip flattened; basal notch small and oblique; no internal channel: Family, Turbellinidae.

POLYTROPHIA, pol-e-trof'e-a, *s.* (*polys*, much, and *trophe*, nourishment, food, Gr.) In Pathology, abundant supply of nourishment; excessive activity of the process of nutrition.

POLYZONAL, po-le-zo'nal, *a.* (*poly*, many, *zone*, a belt, Gr.) Composed of many zones or belts. The term is particularly applied to certain lenses, which are of such large dimensions that they cannot be cast in a single piece.

POLYZOON, pol-e-zo'on, *s.* (*polys*, many, and *zoon*, an animal, Gr.) A compound animal, or a system in which many animals are united in one structure.

POMACANTHUS, pom-a-kan'thus, *s.* (*poma*, a lid, and *akantha*, a spine, Gr.) A genus of fishes: Family, Chetodonidae.

POMACE, po-mase', *s.* (*pomum*, an apple, Lat.) The substance of apples or similar fruit, after being crushed in the manufacture of cyder.

POMACEÆ, po-ma'se-e, *s.* (*pomum*, an apple, Lat.) A natural order of Exogenous plants, consisting of trees or shrubs, with alternate, stipulate, simple, or compound leaves; flowers white or pink; calyx adherent and five-toothed; petals five, and inserted in the throat of the calyx; the odd one anterior,

POMACENTRUS—POMEROYAL.

- while that of the calyx is posterior; stamens indefinite, and inserted into a ring in the throat of the calyx; ovaries one to five; fruit a pome. The order is nearly allied to Rosaceæ, and has been by some botanists classed with it. The pear and apple are familiar examples.
- POMACENTRUS**, po-ma-sen'trus, *s.* (*poma*, a lid, and *kentron*, a prickle, Gr.) A genus of fishes: Family, Chaetodonidae.
- POMACEOUS**, po-ma'shus, *a.* (*pomum*, an apple, Lat.) Consisting of apples; like pomace.
- POMADA**, po-ma'da, *s.* In the Manege, an exercise of vaulting the wooden horse, laying only one hand over the saddle.
- POMADE**, po-mad'e, *s.* (French, *pommade*.) In Pharmacy, a soft and unctuous compound for external applications, usually aromatized and coloured.
- POMADERRIS**, pom-a-der'ris, *s.* (*poma*, a lid, and *derris*, a skin, Gr. in allusion to the peculiar membranous covering to the capsule.) A genus of plants: Order, Rhamnaceæ.
- POMANDER**, po-man'der, *s.* (*pomme d'ambre*, the amber apple, Fr.) A little ball made of several perfumes.
- POMARIA**, po-ma're-a, *s.* (in honour of a gentleman of the name of Pomar, physician to Phillip III. of Spain.) A genus of Leguminous plants: Suborder, Cæsalpinieæ.
- POMATUM**, po-ma'she-um, *s.* (*pomum*, an apple, Lat. from the shape of the fruit.) A genus of African shrubs: Family, Cinchonaceæ.
- POMATOMUS**, po-mat'o-mus, *s.* (*poma*, a lid, and *tome*, an incision, Gr.) A genus of fishes, in which the head and body are thick: Family, Percideæ.
- POMATORHINUS**, po-mat-o-r'i-nus, *s.* (*poma*, a lid, *rhin*, the snout, Gr.) A genus of birds: Family, Crateropodinae.
- POMATUM**, po-ma'tum, *s.* (*pomata*, Ital.) An ointment; an unguent for the hair;—*v. a.* to apply pomatum to the hair.
- POMAX**, po-maks, *s.* (*pomum*, an apple, Lat.) A genus of herbaceous plants, natives of Australia: Order, Cinchonaceæ.
- POMBALIA**, pom-ba'le-a, *s.* (in honour of the Marquis de Pombal, a Portuguese statesman.) A genus of annual herbs, with large drooping flowers: Order, Violaceæ.
- POME**, pome, *s.* (*pomme*, Fr. *pomum*, an apple, Lat.) In Botany, a fleshy, pulpy, solid pericarp, containing a membranous capsule in which the seeds are lodged, as the edible fruit of the apple or pear-trees;—*v. n.* to grow to a round head like an apple.—Obsolete.
- POMECITRON**, pome-sit'run, *s.* A citron apple; the citron.—Obsolete.
- Limons, *pomecitrons*, and such like.—*Ben Jonson.*
- POMEGRANATE**, pome-gran'ate, *s.* (*pomum*, an apple, and *granatum*, grained, Lat.) The common name of the plants of the genus *Punica*, of which there are two species: the common, *P. granatum*, and the dwarf, *P. nana*; the former a native of the warmer parts of Europe, and the latter of the West Indies. In Persia, the pomegranate forms entire woods; the fruit, which is also called pomegranate, has been long celebrated in medicine; an ornament like a pomegranate.
- POMEROY**, pome-roy', } *s.* Royal-apple, a variety of the apple.—
- POMEROYAL**, pome-roy'al, } *s.* Obsolete.

POMEWATER—POMPONA.

- POMEWATER**, pome'waw-tur, *s.* A kind of apple.—Obsolete.
- Ripe as a *pome-water*.—*Shaks.*
- POMEY**, pom'e, *s.* In Heraldry, the figure of an apple or a ball, always of a green colour. *Plur.* Pomes.
- POMIFEROUS**, po-mif'er-us, *a.* (*pomum*, an apple, and *fero*, I bear, Lat.) Apple-bearing.
- POMME**, pom, } *s.* In Heraldry, a device,
- POMMETTE**, pom-met', } or part of a device, like an apple.
- POMMEE**, pom-me', *s.* In Heraldry, an epithet for a cross which has but one ball at each end.
- POMMEL**, pum'mil, *s.* (*pomum*, an apple, Lat.) A knob or ball, from its resemblance to an apple; the knob on the hilt of a sword; a round knob terminating a pinnacle; in the Manege, a protuberance at the top and in the middle of the saddle-bow, sometimes written pummel;—*v. a.* to beat as with a pommel; to bruise.
- POMMELION**, pom-me'le-on, *s.* (from *pommel*.) The cascabel, or hindmost knob of a cannon.
- POMMELLED**, pom'meld, *a.* (*pomillee* or *pomettee*, Fr.) In Heraldry, applied to a cross with round knobs on the ends, in the shape of an apple.
- POMERIUM**, po-me're-um, *s.* (*post*, behind, and *mur*, a wall, Lat.) In Roman Antiquity, the space of ground both within and without the walls, which the augurs, at the first building of cities, solemnly consecrated, and on which no edifices were suffered to be raised.
- POMOTIS**, po-mo'tis, *s.* (*poma*, a lid, and *ous otos*, an ear, Gr.) A genus of fishes belonging to the Datniæ, characterized by the body being broad, and having a membranous flap on the operculum: Family, Percideæ.
- POMP**, pomp, *s.* (*pompe*, Fr. *pompa*, Lat.) A splendid and ostentatious procession; show of magnificence; splendour; parade.
- POMPATIC**, pom-pat'ik, *a.* Pompous; splendid; ostentatious.—Not in use.
- These *pompatick* words.—*Barrow.*
- POMPET**, pom'pet, *s.* The ball used by printers to ink the types.
- POMPHOLYX**, pom'fo-lyks, *s.* (Greek, a water-bubble.) In Pathology, water-blebs, an eruption of bulbæ or blebs without any inflammation round them, and unaccompanied with fever, breaking and healing without scale or crust. The species of this disease are—*P. benignus*, mild water-blebs; *P. dritinus*, chronic water-blebs; and *P. solitarius*, solitary water-blebs;—the white oxide which sublimes during the combustion of zinc, called also flowers of zinc.
- POMPIDIDÆ**, pom-pil'e-de, *s.* A family of Hymenopterous insects, of which *Pompilus* is the type.
- POMPILUS**, pom'pil-us, *s.* A genus of Hymenopterous insects: Type of the family Pompilidæ.
- POMPION**, pump'yun, *s.* (*pompone*, Ital.) One of the English names of the pumpkin, a species of gourds, the *Cucurbita pepo* of Linnæus.
- POMPIRE**, pom'pire, *s.* (*pomum*, an apple, and *pyrus*, near, Gr.) A sort of pearmain, a variety of the apple.
- POMPONA**, pom-po'na, *s.* (*pomum*, an apple, a fruit-tree, Lat.) In Mythology, a nymph at Rome, who was supposed to preside over gardens, and to be the goddess of all sorts of fruit-trees. She was generally represented as sitting on a basket, full of flowers and fruit, holding a bough in one hand and apples in the other.

POMPOSITY—PONDEROUSLY.

POMPOSITY, pom-pos'e-te, *s.* (*pompositus*, Ital.) Pompousness; ostentation; boastfulness.

POMPOUS, pom'pus, *a.* (*pompeur*, Fr. *pomposo*, Ital.) Splendid; magnificent; grand; showy; ostentatious; boastful.

POMPOUSLY, pom'pus-le, *ad.* Magnificently; splendidly; with great parade; ostentatiously.

POMPOUSNESS, pom'pus-nes, *s.* Magnificence; splendour; ostentatiousness; the state of being pompous.

POMUM ADAMI, po'mum a-da'mi, *s.* (*pomum*, an apple, Lat. and *Adam*.) Adam's-apple, the protuberance in front of the neck formed by the thyroid gland, fancifully supposed to represent the forbidden apple eaten by Adam.

PONCELLETTA, pon-sel-le'she-a, *s.* (in honour of Mr. Poncellet, author of a treatise on Wheat, *Triticum*.) A genus of plants, natives of Australia: Order, Epacridaceæ.

POND, pond, *s.* (supposed, like *pound*, an enclosure in which cattle are impounded, to be derived from *pyndan*, to enclose, in reference to its being enclosed on all sides by land.) A body of stagnant water without an outlet, larger than a puddle, and smaller than a lake, or a like body of water with a small outlet; a collection of water raised in a river by a dam for propelling water-wheels;—*v. a.* to make a pond; to collect water in a pond by stopping the current of a river.

PONDER, pon'dur, *v. a.* (*pondero*, Lat.) To weigh mentally; to view with deliberation; to examine as to consequences.

PONDERABILITY, pon-dur-a-bil'e-te, *s.* Weight; the state of being ponderable.

POSITED, poz'e-ted, *a.* (*positus*, Lat.) Put; set; placed;

The modification of matter thus *posited* or disposed.—*Hale's Origin of Mankind*.

POSITION, po-zish'un, *s.* (*positio*, Lat.) State of being placed; situation; attitude; principle laid down; proposition advanced or affirmed as a fixed principle, as a ground of reasoning, or to be proved; advancement of any principle; state; condition. In Arithmetic, a rule which, in solving a question, supposes any number to be the true one, and makes this a *position* whence to proceed in the required calculation. As this number is assumed at random, it will probably be erroneous; the rule, on this account, has been called the rule of false. It is divided into single and double position. In Geometry, a line is said to be *given in position* when its direction is known; in magnitude, when its length is known. The *geometry of position* is the investigation of the relations which exist between the positions of the different parts of a geometrical figure with regard to each other. In Painting, the placing of the model in the manner best calculated for the end which the painter has in view.

POSITIONAL, po-zish'un-al, *a.* Respecting position.—Obsolete.

In nature's sanction, and her first decree.—*Dryden*.

having the power to act.

What is this but to claim a *positive* voice, as well as a negative?—*Swift*.

In Algebra, a *positive quantity* is an affirmative or additive quantity, and is preceded by the sign +; it is the opposite of a negative quantity, which is indicated by the sign —. If no sign precedes a quantity, + is understood, and the quantity taken as *positive* in accordance. These signs, + and —, are called respectively the *positive* and *negative* signs. In Electricity, *positive electricity*, according to Dr. Franklin's theory, denotes the presence of a superabundance of the electric fluid. It is called by others vitreous electricity, as being produced by rubbing glass; that which is produced by rubbing amber or resin is called resinous, answering to the negative electricity of Dr. Franklin. Bodies in the former condition is said to be

positively, and in the latter, negatively electrified. In Grammar, *positive degree* is the state of an adjective which denotes simple or absolute quality, without comparison or relation to increase or diminution, as good, just, powerful;—*a.* what is capable of being affirmed; reality; not what settles by *absolute* appointment; a word that affirms or denies existence.

POSITIVELY, poz'e-tiv-le, *ad.* Absolutely; by itself; independent of anything else; not comparatively; not negatively; really; in its own nature; inherently; certainly; directly; explicitly; expressly; peremptorily; confidently; with full assurance.

POSPOLITE, pos'po-lite, *s.* (*posse*, to be in power, Lat. *polis*, a city, Gr.) A name given in Poland to a militia or national guard, consisting of the gentry, who in case of invasion are summoned to arms.

POSSE, pos'se, *s.* (Latin, to be able.) In Law, a possibility, or that which may be possible, in contradistinction to that which is actually in existence, and which is said to be in *esse*. *Posse-comitatus*, literally, power of the county. It was given to the sheriff and other officers of the crown by act of parliament, to compel the attendance of the inhabitants of the county (with some exceptions) to assist him in preserving the peace, in pursuing and arresting offenders, and in such like acts where assistance was required.—*Lambard's Eirenarcha.* In low language, a crowd or rabble.

POSSESS, poz-zes', *v. a.* (*posideo*, *possessus*, Lat. *besiden*, Sax.) To have wholly as a proprietor; to own or hold title to; to occupy; to seize or obtain, as they *possessed* themselves of the citadel; to have power over, as an unclean spirit; to affect by some power;

Possess with rumours, full of idle dreams.

Not knowing what they fear, yet full of fear.—*Shaks.*

To *possess* of, to give possession, command, or occupancy; to *possess one's self of*, to take or gain possession of; to *possess with*, to furnish or fill with something permanent, or to be retained.

POSSESSION, poz-zesh'un, *s.* (French, from *possessio*, Lat.) The condition of holding, owning, or possessing property; property; the thing possessed; the state of being under demoniacal power; madness; lunacy. In Law, *possession* is twofold—*actual*, and in *law*. *Actual possession* is when a man actually enters into lands and tenements to him descended. *Possession in law* is

when the lands or tenements are descended to a man, and he has not as yet actually possessed them. In Bailment, the bailee who receives goods to convey or to keep for a time, has the possession of the goods, and a temporary right over them, but not the property. *Property in possession* includes both the right and the occupation. *Possessio fratris*, literally, possession of a brother. It is a legal maxim that the possession or seisin of a brother will make his sister of the whole blood his heir, in preference to a brother of the half blood.—2 *Bl.* 228. *Possession money*, a certain sum per day, paid to the man whom the sheriff puts in possession of goods taken under a writ of *fiat facias*. The amount is 3s. 6d. per day if he is boarded, and 5s. per day if not boarded. *Writ of possession*, a precept directing the sheriff to put a person in peaceable possession of property recovered in ejectment.

POSSESSIONER, poz-zesh'un-ur, *s.* A possessor.—Obsolete.

Old freemen and *possessioners*.—*Sidney.*

POSSESSIVE, poz-zes'iv, *a.* Having possession; denoting possession, as the possessive or genitive case of nouns and pronouns in grammar; the possessive case of nouns is marked by an apostrophe, thus, *man's*; plural, *men's*. A *possessive pronoun* is a pronoun joined to a noun as an adjective to express belonging to, as *my*, *thy*, *his*, *her*, *our*, *your*, *their*, *its*, *own*.

POSSESSOR, poz-zes'sur, *s.* (Latin.) Owner; master; proprietor; occupant.

POSSESSORY, poz-zes'sur-e, *a.* Having possession. In Law, a possessory action is one which has for its object the regaining possession of a freehold, of which the defendant or his ancestors have been unjustly deprived by the present tenant or possessor.—*Atk. Sheriff Law.*

POSSET, pos'sit, *s.* (*posel*, from *posiaw*, together, Welsh, *posca*, acidulated water, Lat.) Milk curdled with wine, or any other acid;—*e. a.* to curdle; to turn;

It doth *posset*

And curd, like eager droppings into milk,

The thin and wholesome blood.—*Shaks.*

POSSIBILITY, pos-e-bil'e-te, *s.* (*possibilité*, Fr.)

The power of being or existing; the power of happening; the state of being possible. It often implies great uncertainty and doubt;

A bare *possibility* that a thing may be, or not be.—

Tilletson.

POSSIBLE, pos'e-bl, *a.* (French, *possibilis*, Lat.)

That may be or exist; that may be now, or may occur at some future time; that may be done; not contrary to the order of things.

POSSIBLY, pos'e-ble, *ad.* By any power really existing; perhaps; without absurdity.

POST, poste, *s.* (Dan. and Swed. *päst*, Welsh, *poste*,

Fr. *postis*, from *pono*, I place or set, Lat.) A piece of timber set erect, usually larger than a stake, to support something, as the *posts* of a house or a door; a military station; the troops stationed at a particular place, or the ground they occupy; place; employment; office; a seat or situation; a kind of writing paper; a messenger or a carrier of letters and papers;

POTASH, pot'ash, s. Impure carbonate of potassa, obtained by burning the ashes of land plants, lixiviating their ashes, and evaporating the solution to dryness, a process performed on a large scale in Russia and America. The carbonate thus obtained is known in commerce by the names of *potash* and *pearlash*, and is much employed in the arts, particularly in the formation of soap and the manufacture of glass. *Potash bisilicate of magnesia*, a mineral occurring in both a crystalized and an earthy state; colour yellowish white; the crystals resemble those of tremolite; cleavage parallel to the base, indistinct; friable and easily reduced to soft powder. Composition of the crystals—silica, 58.16; magnesia, 26.48; potash, 6.32; peroxide of iron, 7.60; alumina, 0.40; lime, 0.64; water, 0.40: sp. gr. 2.87.

POTASSA, pot-as'sa, s. Protoxide of potassium, a white solid substance, highly caustic, which fuses at a heat above that of redness, and bears the strongest heat of a wind furnace without being decomposed or volatilized. It has a powerful affinity for water, and intense heat is disengaged during the act of combination. Solution of potassa is highly caustic, and its taste intensely acid. It possesses alkaline properties in an eminent degree, converting the vegetable blue colours into green, and neutralizing the strongest acids. Its equivalent is 47.15; symb. K + O or KO. The following are the chief preparations of this substance used in medicine:—*Acetas potassæ*, acetate of potassa; *arsenias potassæ*, arseniate of potassa; *bicarbonas potassæ*, bicarbonate of potassa; *bisulphas potassæ*, bisulphate of potassa; *bitartras potassæ*, bitartrate of potassa; *carbonas potassæ*, carbonate of potassa; *chloras potassæ*, chlorate of potassa; *chloridum potassæ*, chloride of potassa; *citras potassæ*, citrate of potassa; *hydras potassæ*, hydrate of potassa, called also *potassa fusa*, or the stronger caustic; *hydroides potassæ*, hydroide of potassa; *liquor potassæ*, solution of potassa; *potassa cum calce*, potassa with lime or the milder caustic; *sulphas potassæ*, sulphate of potassa; *sulphuretum potassæ*, sulphuret of potassa; *tartras potassæ*, tartrate of potassa.

POTASSIUM—POTENTATE.

POTASSIUM, po-tas'e-nm, *s.* A metal, the base of the alkali potash, in which it exists combined with oxygen. It was discovered by Sir H. Davy in 1807; in colour and lustre it strongly resembles mercury; it is solid at the usual temperature of the air; at 50° it becomes soft and malleable, and yields like wax to moderate pressure; at 32° it becomes brittle; at 70° it becomes somewhat fluid, but not perfectly so till the temperature reaches 150°; if heated to low redness, out of the contact of the air, it sublimes, and condenses on cooling, unchanged; its texture, when brittle, is crystalline; opaque; a good conductor of heat and electricity: Sp. gr. at 60°—0.865. It is the lightest known solid.

POTATION, po-ta'shun, *s.* (*potatio*, Lat.) A drinking, or drinking bout; a draught.

POTATO, po-ta'to, *s.* (*batatos*, Span. or Indian, from *papa*, the Peruvian name.) The plant *Solanum tuberosum*, a native of South America, whence it is considered to have been brought to Spain in the early part of the sixteenth century. It found its way to England from Virginia, by the colonists sent out by Sir Walter Raleigh in 1584, and who returned in July, 1586. *Potatoes* forms a subsection of the genus *Solanum*, in which the leaves are imparipinnate, pinnatifid, ternate, or entire; flowers corymbose or racemose, terminal, lateral, and axillary. *Potato-oat*, a variety of the oat *Avena sativa*. In Chemistry, *oil of potato spirit*, a colourless substance obtained from spirits made from potatoes. It is somewhat oily in appearance; it has a strong smell, at first pleasant, afterwards nauseous; taste, very acrid; when its vapour is inhaled it causes asthmatic pains, cough, and even vomiting. Formula, C₁₀ H₁₂ O₂: sp. gr. at 60°—0.8124.

Never such a *power*
For any foreign preparation
Was levied in the body of a land.—*Shaks.*

Who leads his *power*?

Under whose government come they along?—*Shaks.*

In Law, *power*, or *power of attorney*, an authority which one person gives to another to act for him and in his stead, which must always be granted on stamped paper. In Mathematics, the product which arises from the continued multiplication of a number or quantity into itself; thus, 64 is the second power of 8, as it arises from 8×8 ; it is also the third power of 4, and the sixth power of 2, on account of its arising from $4 \times 4 \times 4$ in the one case, and $2 \times 2 \times 2 \times 2 \times 2 \times 2$ in the other. The *power* of a quantity is generally indicated by a small number called the exponent, written at the upper right-hand corner, as 2^6 , x^3 , denoting the sixth power of 2, and the third power of x , respectively. In Mechanics, the exertion of strength, gravitation, impulse, or pressure, so as to produce motion in what was previously at rest, and therefore called a *moving power*; or else to retard the motion of such things as are acted upon by the moving power, and called a *sustaining* or *restraining power*: the aggregate capabilities of a

machine, as an engine of two hundred horse-power. A *mechanical power* is one of the six simple machines—the lever, the inclined plane, the screw, the wheel and axle, the wedge and the pulley. Some reduce the number of these simple machines to two, the lever and the inclined plane. In Optics, *power* generally expresses the effect producible by a lens, or other optical instrument, as magnifying power, illuminating power, &c. *Refractive power*, the effect produced by a medium in changing the direction of a ray of light, which enters it from a medium of a different density; it is expressed by a number indicating the ratio which exists between the sines of the angles of incidence and refraction. Tables of such numbers are found in the greater number of optical treatises, showing the refractive powers of the most of those substances which permit the passage of light. *Power-loom*, a loom worked by steam or water.

POWERABLE, pow'ur-a-bl, *a.* Capable of performing anything.—Not in use.

POWERFUL, pow'ur-fal, *a.* Full of power; invested with command or authority; potent; forcible; mighty; efficacious, as a *powerful* medicine. **POWERFULLY**, pow'ur-fal-le, *ad.* Potently; mightily; efficaciously; forcibly.

POWERFULNESS, pow'ur-fal-nes, *s.* Power; efficacy; might; force.

PRACTICABLY, prak'te-ka-ble, *ad.* In such a manner as may be performed.

PRACTICAL, prak'te-kal, *a.* (*practicus*, Lat.) Relating to action, not merely speculative; capable of practice or active use; that may be applied to use, as *practical* knowledge; that reduces knowledge or theory to actual use, as a *practical* man; derived from practice or experience, as *practical* skill.

PRACTICALLY, prak'te-kal-le, *adv.* In relation to practice or action; by means of practice or use; by experiment; in practice or use.

PRACTICALNESS, prak'te-kal-nes, *s.* The quality of being practical.

PRACTICE, prak'tis, *s.* (*praktike*, from *prasso* or *pratto*, I act, Gr. *practico*, Span. *pratique*, Fr.) The frequent or repeated performance of the same or similar actions; use; customary use; dexterity acquired by frequent performance;

I'll prove it on his body, if he dare;

Despite his nice fence and active practice.—*Shaks.*

actual performance, distinguished from theory; the exercise of any profession; the medical treatment of disease; employment, particularly as a medical practitioner. In Arithmetic, a rule for abridging labour in numerous cases of mercantile calculation. It is so named because it hardly involves any new principle, but depends for its application upon the memory and dexterity which the operator acquires from practice. In Law, *Practice Court*, a court attached to the Court of Queen's Bench, and presided over by one of its judges, in which points of practice and pleading are discussed and decided. Though frequently and properly termed the 'Practice Court of the Queen's Bench,' it is now generally called, from its origin, the 'Bail Court;'—(*prætig*, crafty, or *præti*, craft or subtilty, Sax. from *pretta*, to deceive, Icel.) cunning; wicked stratagem; artifice.

Shall we thus permit

A blasting and a scandalous breath to fall

On him so near us? This must needs be practice;

Who knew of your intent, and coming hither?—*Shaks.*

PRACTISANT, prak'te-zant, *s.* An agent.—Not used.

trates and courts of justice, and payable to the state.

PRÆ, pre. A Latin preposition, signifying before, or expressing antecedence: commonly written *pre* in English composition.

PRECEPTORY.—See Preceptory.

PRÆCINCTIO, pre-sing'she-o, *s.* (Latin, a wider place in stairs, a landing-place.) In Architecture, a wide seat, or rather step, round the audience part of the ancient theatres and amphitheatres. It was called *diazoma* by the Greeks.

PRÆCIPE, pre'se-pe, *s.* (*præceptum*, a precept, an order, Lat.) In Law, an original writ in the alternative, commanding the defendant to do the thing required, or to show the reason for not doing it. The word is now commonly used for a sort of abstract of a writ or capias, delivered to the signer of the writs at the time of issuing them, and from which he makes his entry in a book kept for that purpose. *Præcipe in capite*, a writ issuing out of the Court of Chancery, for a tenant who held of the king in chief, as of his crown, and not as of any honour, castle, or manor. *Præcipe quod reddat*, a writ of great diversity, both in its form and use, extending as well to a writ of right as to others of possession.

PRÆCLAMITORES, pre-klam-e-to-res, *s.* (Latin.) In Antiquity, certain officers or criers who went along the streets of ancient Rome, before the flamen dialis, to cause all people to give over their work on holidays; for, if they saw any one at work, the service of the gods could not be performed.

PRÆCOGNITA, pre-kog'ne-ta, *s.* (*plu.* of *præcognitum*, before known, Lat.) A word sometimes used in order to denote things previously known, or required to be known, in order to understand something else; as, 'Anatomy is one of the *præcognita* of medical science.'

PRÆCONES, pre-ko'nes, *s.* (Latin.) Heralds or public criers, who, in ancient Rome, were employed in calling the tribes and centuries to give their votes, in preserving order and silence in public assemblies and games, and in summoning witnesses and other parties to attend at trials.

used; to give law; to influence arbitrarily; to influence by long custom. In Law, to claim by prescription; to claim a title to a thing by im-memorial use and enjoyment. A man may be allowed to *prescribe* for a right of way, a common, or the like; a man can not *prescribe* for a castle; he can prescribe only for uncorporeal hereditaments.—*Blackstone*.

PRESCRIBER, pre-scribe'ur, *s.* One who prescribes

PRESCRIPT, pre'skript, *a.* (*prescriptus*, Lat.) Directed; prescribed;—*s.* (*prescriptum*, Lat.) a direction; an order for the use of medicine; a pre-scription.

PRESCRIPTIBLE, pre-skrip'te-bl, *a.* That may be prescribed for.

PRESCRIPTION, pre-skrip'shun, *s.* (French, *prescriptio*, Lat.) The act of prescribing or directing by rules; that which is prescribed; a medical direction of remedies for a disease, and the man-ner of using them; a recipe. In Law, a prescrib-ing for title; the claim of title to a thing by vir-tue of immemorial use and enjoyment; the right to a thing derived from such use. *Prescription* differs from custom, which is a local usage; *pre-scription* is a personal usage, usage annexed to the person. In Scottish Law, *prescription* is employed in the sense in which *limitation* is used in England, viz. to express that operation of the lapse of time by which obligations are extinguished, or titles protected. There are various kinds of prescrip-tions:—*The long prescription*, as it is termed, viz. the lapse of forty years, sweeps away all un-implemented obligations.—*Act 1617, c. 12.* *The vicennial or twenty years' prescription*, protects parties from actions on obligations holograph, or in the hand-writing of the granter, unattested, and on books of accounts; but the verity of the document may be referred to the writer's oath.—*Act 1669, c. 9.* *The septennial prescription* re-lieves cautioners after the lapse of seven years from the date of their undertaking. If the cau-tioner appear on the bond as a principal, he has the benefit of the act only if there be a clause of relief in the bond, or a bond of relief intimated to the creditor.—*Act 1695, c. 5.* *The sexen-nial prescription* protects parties from action on bills of exchange and promissory notes, after the lapse of six years from the day of payment. Bank-notes and post-bills are excepted. Though the document is thus rendered unavailing, the original debt may still be proved by the writ or oath of the debtor.—*23 Geo. III. c. 18, s. 55.* *The quinquennial or five years' prescription* pre-cludes action on bargains as to sale, letting, and hiring, and such like contracts as to movables, not constituted by writing.—*Act 1669, c. 9.* *The triennial or three years' prescription* applies to tradesmen's accounts, and servants' and artificers' wages, and has been stretched to include profes-sional remuneration, and the salaries of persons acting as mandatories or agents. In the case of salary or wages, the amount due at each term runs a separate prescription. In the case of ac-counts, the prescription runs from the last article of the account. The presumption on which it proceeds is, that the debt has been paid within the three years; but the creditor retains his right, if he prove, by the oath of the debtor, or by a docu-ment under his hand, that the debt is unpaid.—*Act 1579, c. 83.*

PRETERPLUPERFECT—PREVAIL.

yond, and *perfectus*, perfect, Lat.) In Grammar, a term applied to that tense of verbs which expresses action or being actually past. It is equivalent to the preterit or perfect tense.

PREVARICATE, pre-var'e-kate, *v. n.* (*prævaricor*,
from *præ*, before, and *varicor*, I straddle or walk
wide, Lat.) To shuffle; to quibble; to shift or
turn from one side to the other, or from the
straight line of truth; to use foul play. In the
Civil Law, to collude, as when an informer colludes
with the defendant, and makes a sham prosecu-
tion. In English Law, to undertake a thing
falsely and deceitfully, with the purpose of defeat-
ing or destroying it.—*Cowel*;—*v. a.* to pervert;
to corrupt; to turn from the right; to evade by a
quibble.—Obsolete as an active verb.

PRIMING, pri'ming, *s.* The powder used to prime a gun, or lay along the channel of a cannon for conveying fire to the charge. In Painters' work, the first colouring of the work, which forms a ground for the succeeding coats. In Steam-engines, the hot water which passes along with the steam from the boiler into the cylinder. *Priming-powder*, the powder used in priming.

Hang him, squib;
Now I could grind him into *priming-powder*.—
Beau. and Flot.

Priming-wire, a pointed wire for inserting into the vent of a musket, in order to examine the powder or to pierce the cartridge.

PRIMIPILAR, pri-mip'e-lar, *a.* (*primipilus*, the centurion of the first cohort of a Roman legion, Lat.) Pertaining to the captain of the vanguard.

PRIMIPILUS, pri-mip'e-lus, *s.* In Ancient History, the name of the centurion of the first cohort of a legion, who had charge of the Roman eagle. This office was one of considerable dignity; on quitting it, the *primipilus* assumed his place among the members of the equestrian order, with the title *primipilarius*.

PRIMITIÆ, prim-ish'e-e, *s.* (the first fruits, Lat.) The first fruits of any production of the earth, which were uniformly consecrated to the Deity by all the nations of antiquity. In Ecclesiastical Law, all the profits for one year of every church-living, belonging to the crown.

PRIMITIAL, pri-mish'al, *a.* Being of the first production.

PRIMITIVE, prim'e-tiv, *a.* (*primitif*, Fr. *primitiens*, Lat.) Ancient; original; established from the beginning; formal; affectedly solemn; imitating the supposed gravity of old times; primary; not derivative. In Painting, the *primitive colours* are red, yellow, and blue, from the mixtures of which all other colours are obtainable. *Primitive form of a crystal*, one of the regular geometrical solids, which a crystal presents on its being split as much as possible in its cleavage. In Grammar, a word neither derived from any other language, nor compounded from any other words of the same, as *horse*, *man*.

PRIMITIVELY, prim'e-tiv-le, *ad.* Originally; at first;

PRIMITIVENESS—PRINCE.

primarily; not derivatively; according to the original rule; according to the ancient practice.

PRIMITIVENESS, prim'e-tiv-nes, *s.* State of being original; antiquity; conformity to antiquity.

PRIMITY, pri'me-te, *s.* The state of being first or original;

This *primity* God requires to be attributed to himself.
—*Pearson on the Creed.*

PRIMNESS, prim'nes, *s.* Affected niceness or formality.

PRIMO, pri'mo, *a.* (Ital. first.) In Music, first; as *primo canto*, the first treble; *alto primo*, the first counter-tenor, &c.

PRIMOGENIAL, pri-mo-je'ne-al, *a.* (*primogenius*, Lat.) First-born; original; primary; constituent; elemental.

PRIMOGENITOR, pri-mo-jen'e-tur, *s.* A forefather.

PRIMOGENITURE, pri-mo-jen'e-ture, *s.* (French, from *primus*, first, and *genitus*, begotten, Lat.) Seniority; eldership; state of being first-born; the right of the eldest son, and those who derive through him the right to succeed to the property of the ancestor. Among the ancient nations, the Jews alone seemed to have recognized this usage in their institutions.

PRIMOGENITORSHIP, pri-mo-jen'e-tur-ship, *s.* Right of eldership.

PRIMORDIAL, pri-mawr'de-al, *a.* (French, *primordium*, Lat.) Original; existing from the beginning;—*s.* origin; first principle.

PRIMORDIAN, pri-mawr'de-an, *s.* A kind of plum.

PRIMORDIATE, pri-mawr'de-ate, *s.* (*primordium*, Lat.) Original; existing from the first.

PRIMROSE, prim'roze, *s.* (prime and rose, from its flowering early in spring.) The *Primula vulgaris* of Linnaeus.

Pale *primroses*,
That die unmarried ere they can behold
Bright Phoebus in his strength.—*Shaks.*

PRIMULA, prim'u-la, *s.* (Latin.) The Primroses, a genus of plants, type of the natural order Primulaceæ. The more common species are—the Primrose, *P. vulgaris*; the Cowslip, *P. veris*; the Oxlip, *P. selator*, and the Auricula, *P. auricula*.

PRIMULACEÆ, prim-u-la'se-e, *s.* (*primula*, one of the genera.) A natural order consisting of annual or perennial herbaceous plants; leaves usually radical; flowers either on radicle scapes and in umbels, or variously arranged in the axils of the leaves; calyx five-cleft, seldom four-cleft, inferior, or half superior, regular, persistent; stamens inserted upon the corolla, equal in number to its segments, and opposite them; ovary one-celled; style one; stigma capitate; capsule opening with valves; placenta central, distinct; seeds numerous and peltate.

PRIMUM, pri'mum, *a.* A Latin word signifying *first*, used in the expression *primum mobile* (the first mover); a phrase, in ancient Astronomy, denoting the outermost sphere of the heavens, which includes and gives motion to all the others, carrying them round with it in its diurnal revolution. Its centre is that of the earth.

A violet in the youth of *primy* nature.—*Shaks.*

PRINCE, prins, *s.* (French, from *princeps*, Lat.) A sovereign; the chief and independent ruler of a state; a sovereign in a certain territory, but who holds his rank off a superior to whom he owes particular services; the son of a king or emperor, or the issue of a royal family, as *princes* of the blood;

PRINCEDOM—PRINCIPAL.

the chief of any body of men. This word has been improperly employed by Camden and Atterbury to designate the female sovereigns Elizabeth and Anne. In Scripture, this name is given to God; He shall stand up against the *Prince of princes*.—Dan. viii. 25.

to Christ, who is called the *Prince of Peace* (Isa. ix. 6); the *Prince of Life* (Acts iii. 15); to men of superior worth and intelligence (Eccles. x. 7); to the nobles, counsellors, and officers of a kingdom (Isa. x. 8); to Satan, who is called the *prince of darkness*, the *prince of the world*, &c. *Prince's-feather*, the plant *Amarantus hypochondriacus*. *Prince's metal*, an alloy of three parts of copper to one of zinc, forming one of the many varieties of brass; called also *Prince Rupert's metal*. *Prince Rupert's drops*, drops of green glass suddenly cooled by letting them fall into water: when their small ends are broken off, they instantly fall into powder with explosion. *Princeps senatus*, (Latin,) *prince* or first of the senate. In ancient Rome, the citizen whose name was inscribed first on the list of the senate. This high dignity was not connected with any office, and, in later times, was conferred only on those who were recognized as the most considerable citizens of the state. *Prince of Wales*, the title bestowed by patent to the heir-apparent (being the eldest son of the sovereign) to the crown of England. The origin of this title is—Edward I. promised the people of Wales, that on their submission to his victorious arms, he would give them a prince who was born among them, and who could speak no other language. In fulfilment of this jesuitical promise, he conferred the principality on his second son Edward, born within the principality, and, as yet, unable to speak any language at all. Edward became heir to the crown through the death of his elder brother Alfonso, and from that time this honour has been appropriated to the eldest sons of the sovereigns of England;—*v. n.* to play the prince; to assume state;

Nature prompts them,
In simple and low things, to *prince* it, much
Beyond the trick of others.—Shaks.

PRINCEDOM, prin's-dum, *s.* The jurisdiction, sovereignty, rank, or estate of a prince.

PRINCELIKE, prin's-like, *a.* Becoming a prince.

PRINCELINESS, prin's-le-nes, *a.* The state, manner, or dignity of a prince.

PRINCELY, prin's-le, *a.* Resembling a prince; having the appearance of one high born; stately; dignified; having the rank of princes, as a man of *princely* birth; becoming a prince; royal; grand; august; very large, as a *princely* fortune; magnificent; rich, as a *princely* entertainment.

PRINCESS, prin'ses, *s.* A female sovereign; a sovereign lady, of rank next to that of a queen; the daughter of a sovereign; the consort of a prince.

larger than those of the common rafters, and which are framed in such a manner as to bear the principal weight of the others. In Law, *principal challenge*, a species of challenge to jurors for suspicion of partiality. It takes place when the cause assigned carries with it *primâ facie* evident marks of suspicion, either of malice or favour. In Perspective, *principal point*, a point in the perspective plane upon which a line will fall, drawn from the eye perpendicular to that plane. It is the intersection of the horizontal planes, or the *point of sight*, or *of the eye*. *Principal ray*, the line passing from the eye to the principal point on the perspective plane;—*s.* a chief or head; one who takes the lead; a president or governor; one primarily or originally engaged; not an auxiliary. In Architecture, a main timber in an assemblage of carpentry. In Commerce, a sum lent out at interest, due as a debt, or used as a fund, distinguished from *interest* or *profits*. In the Fine Arts, the chief circumstance in a work of art, to which the rest are to be subordinate. In Law, the absolute perpetrator of a crime, or an abettor; a *principal* in the first degree, is the absolute perpetrator of the crime; a *principal* in the second degree, is one who is present, aiding and abetting the fact to be done; distinguished from an accessory. In Treason, all persons concerned are *principals*.—Blackstone. In Music, the name of a stop or row of metal pipes in an organ, tuned an octave higher than the diapason, an octave lower than the fifteenth, and serving to blend the two, as well as to augment the volume of sound. In the Scottish Universities, the *principal* has the ordinary superintendence of the department, of all members of the college, and is *primarius* professor of divinity; consequently he is always a clergyman of the Church of Scotland.

PRINCIPALITY, prin-se-pal'e-te, *s.* (*principalité*, Fr.) Sovereignty; supreme power; a prince; one invested with sovereign power;

Let her be a *principality*,
Sovereign to all the creatures on the earth.—Shaks.
the territory of a prince; the country which gives title to a prince; superiority; predominance.—Little used in the two last significations.

Having the prerogative and *principality* above every thing else.—Bp. Taylor.

In Scripture, royal state or attire, (Jer. xiii. 18.)

PRINCIPALLY, prin'se-pal-le, *ad.* Chiefly; above all.

PRINCIPALNESS, prin'se-pal-nes, *s.* The state of being principal or chief.

PRINCIPATE, prin'se-pate, *s.* Principality; supreme rule.—Obsolete.

The *principate* of the whole church.—Barrow.

PRINCIPES, prin'se-pis, *s.* (Latin.) One of the four grand divisions of the ancient Roman infantry. It is said they owe their name to the circumstance of being the choice men of the Roman army, and to them was appointed the honourable post of assuming the initiative in an engagement. The other three bodies were the *velites*, the *hastati*, and the *triarii*.

PRINCIPIA, prin-sip'e-a, *s.* (Latin.) In Antiquity, a spot of ground about 100 feet in length, included between the two partitions of the Roman camp, in which were erected altars and statues of the gods, and in which the standards and insignia were lodged; the contracted title of the 'Philosophia

Naturalis Principia Mathematica, 'the great work of Sir Isaac Newton, the publication of which marks the most important epoch in the history of science.

PRINCIPIANT, prin-sip'e-ant, *a.* (*principium*, a beginning, Lat.) Beginning; taking first.

PRINCIPIATION, prin-sip'e-a-shun, *s.* Analysis into constituent or elemental parts.—Not used.

The separating of any metal into its original element, we call *precipitation*.—Bacon.

PRINCIPLE, prin'se-pl, *s.* (*principé*, Fr. *principium*, Lat.) The cause, source, or origin of anything; that from which a thing proceeds, as the *principles* of motion or action; (this is the general sense;) element; constituent part; primordial substance; ground; foundation; that which supports an assertion, an action, or a series of actions or reasoning, as, 'on what *principle* do you assert or deny this?' 'this man reasons on curious *principles*;' a general truth; a law comprehending many subordinate truths, as the *principles* of morality;

I'll try
If yet I can subdue those stubborn *principles*
Of faith, of honour.—Addison.

tenet; that which is believed, whether true or false, but which serves as the basis of a system, or a rule of action, as, the *principles* of Christianity, the *principles* of the Stoics. In Chemistry, formerly, and to some extent still, somewhat vaguely used. Sometimes it means an elementary substance, as when we speak of the *constituent principles* of bodies; sometimes a substance, on the presence of which certain qualities, which are common to a number of bodies, depend, as the *acidifying principle*; and sometimes those substances, which are the peculiar results of the combination of organized with inorganic matter, are called *proximate principles*. In Science generally, a truth admitted either without proof, or as having been already proved: in the former sense it is synonymous with *axiom*, in the latter, with the phrase *established principle*. A *principle of human nature*, is a law of action among human beings; a constitutional tendency common to the human race; thus, it is a *principle of human nature* to resent injury and repel insult;—*v. n.* to establish or fix in any tenet; to impress with any tenet.—Chiefly used in the participle.

With goodness *principled* not to reject
The penitent.—Milton.

to establish firmly in the mind.

PRINCOCK, prin'kok, } *s.* (pink and cock.) A cox-
PRINCOX, prin'koks, } comb; a conceited person; a pert young rogue; a child made saucy through too much indulgence. Dr. Johnson pronounces this word ludicrous and obsolete, but it still seems to be used in the last form, particularly in the north of England.

You are a saucy boy;
This trick may chance to scathe you; I know what;
You must not contrary me!—you are a *prince*, go.—
Shaks.

It is a *prince* boy, who, in his school, knows not how far one proceeds against all order.—Florio, Tr. of Montaigne.

PRINIA, prin'e-a, *s.* (*prinos*, the ilex, Gr.?) A genus of birds: Family, Sylviadae.

PRINK, prink, *v. a.* (*pronken*, to shine, to strut, Dutch, *proncken*, to adorn, Teut.) To prink; to dress for show; to put on stately airs; to strut.

PROFITOUS, pro-pish'us, *a.* (*propitius*, Lat.) Favourable; kind, applied to men; ready to forgive sins and bestow blessings, applied to God; favourable, as a *propitious* season.

PROFITIOUSLY—PROPORTIONAL.

PROFITIOUSLY, pro-pish'us-le, *ad.* Favourably; kindly; graciously.

PROFITIOUSNESS, pro-pish'us-nes, *s.* Kindness; disposition to treat another kindly; disposition to forgive; favourableness, as the *profitiousness* of the season.

PROPLASM, pro'plazm, *s.* (*pro*, before, and *plasma*, a device, Gr.) A mould or matrix in which casts are made.

PROPLASTICE, pro-plas'tis, *s.* The art of making moulds for casting.

PROPOLIS, pro-po-lis, *s.* (*pro*, before, and *polis*, a city, Gr.) The resinous, reddish, and odorous substance with which the bee closes crevices in his hive, and covers exteriorly the cells of the comb.

PROPONENT, pro-po'nent, *s.* (*pro*, before, and *pono*, I place, Lat.) One who makes a proposal; one who lays down a position.

PROPORTION, pro-pore'shun, *s.* (*proportio*, from *pro*, before, and *portio*, a part or share, Lat.) The comparative relation of one thing to another; symmetry; suitable adaptation of one part or thing to another; equal or just share, as, I expect my *proportion* of the profits; form; size;—(little used in the last two senses;)

All things receiv'd, do such *proportions* take,
As those things have wherein they are received;
So little glasses little faces make,
And narrow webs on narrow frames are wear'd.—
Davies.

In Chemistry, *definite proportions* are the limited proportions in which elementary substances combine, so as to form compound bodies. In Mathematics, the equality of ratios; four numbers or quantities are said to be in proportion, when the ratio of the first to the second is the same as that of the third to the fourth, as 2, 6, 3, 9, in which the equal ratios of 2 to 6 and 3 to 9 may be expressed $\frac{2}{6} = \frac{3}{9}$, and the proportion is written, 2 : 6 :: 3 : 9, which may be called *direct proportion*; but these quantities are proportionals when their order is inverted, as 6 : 2 :: 9 : 3, for $\frac{6}{2} = \frac{9}{3}$, in which case they are said to be in *inverse proportion*: they are also proportionals when alternated, as, 2 : 3 :: 6 : 9, for $\frac{2}{3} = \frac{6}{9}$, which is called *alternate proportion*.—For other kinds of proportion, see Arithmetical, Geometrical, and Harmonical. *Proportion* is also the name given to the arithmetical rule, by which, any three of four numbers so circumstanced being given, the fourth may be found. *Compass of proportion*, a name given to the sector by some French and English mathematicians;—*v. a.* to adjust the comparative relation of one thing or part to another; to form symmetrically.

PROPORTIONABLE, pro-pore'shun-a-bl, *a.* Capable of being proportioned or made proportional. This is the true sense of the word, although it is most frequently used in the sense of proportional, being in proportion; having a due comparative relation, as infantry, with a *proportionable* number of horse.

PROPORTIONABLENESS, pro-pore'shun-a-bl-nes, *s.* The state or quality of being proportionable.

PROPORTIONABLY, pro-pore'shun-ab-le, *ad.* According to proportion; agreeable to comparative relation.

PROPORTIONAL, pro-pore'shun-al, *a.* (*proportionnel*, Fr.) Having a due comparative relation; being in suitable proportion or degree;—*s.* in Chemistry, the weight of an atom, the same as *equivalent*. In Mathematics, one of the terms of a proportion.

PROPORTIONALITY—PROPREFECT.

Proportional compasses have two pair of points moveable on a shifting centre, which slides in a groove, and thereby regulates the proportion that the opening at one end bears to that of the other. They are useful in enlarging or diminishing drawings. *Proportional parts*, a name given in logarithmic and other tables, to small tables which are annexed to the differences of the tabular number, and which consist merely in setting down the several tenths of the differences, or the nearest whole numbers to them.

PROPORTIONALITY, pro-pore-shun-al'e-te, *s.* The quality of being in proportion.

PROPORTIONALLY, pro-pore-shun-al-le, *ad.* In proportion; in due degree; with suitable comparative relation.

PROPORTIONATE, pro-pore-shun-ate, *a.* Adjusted to something else, according to a certain rate or comparative relation; proportional;—*v. a.* to proportion; to make proportional; to adjust according to a settled rate, or according to comparative relation.

PROPORTIONATELY, pro-pore-shun-ate-le, *ad.* With due proportion; in a manner adjusted to something else; according to a certain rate or comparative relation.

PROPORTIONATENESS, pro-pore-shun-ate-ness, *s.* The state of being adjusted by due proportion or comparative relation; suitableness of proportions.

PROPORTIONLESS, pro-pore-shun-less, *a.* Without proportion; without symmetry of parts.

PROPOSAL, pro-po-zal, *s.* (from *propose*.) That which is offered for consideration or acceptance; a scheme or design; terms or conditions proposed; an offer to the mind.

PROPOSE, pro-po-ze, *v. a.* (*proposer*, Fr. *propono*, from *pro*, forward, and *pono*, I put, Lat.) To offer for consideration, discussion, or acceptance; *v. n.* to converse;—(obsolete;)

My cousin Beatrice
Proposing with the prince and Claudio.—*Shaks.*

propose is often used for *purpose* (which is a different form of the same word), as, I *propose* to call on him to-morrow;—*s.* talk; discourse.—Obsolete.

There will she hide her,
To listen our *propose*.—*Shaks.*

PROPOSER, pro-po-zer, *s.* One who offers anything for consideration, discussion, or adoption.

PROPOSITION, prop-o-zish'un, *s.* (French, *propositio*, Lat.) That which is proposed; that which is offered for consideration or acceptance; a proposal; an offer of terms. In Logic, one of the three parts of a regular argument; that part of an argument in which some quality is affirmed or denied of its subject, as, snow is white; intemperance is not commendable. In Mathematics, it is either a *theorem* proposed to be demonstrated, or a *problem* in which something is proposed to be done. In Oratory, that which is offered or affirmed as the subject of the discourse. In Poetry, the first part of a poem, in which the author states the subject or matter of it.

PROPOSITIONAL, prop-o-zish'un-al, *a.* Pertaining to a proposition; considered as a proposition.

PROFOUND, pro-pownd', *v. a.* (*pro* and *pono*, Lat.—see *Propose*.) To offer to consideration; to propose; to offer; to exhibit.

PROPUNDER, pro-pownd'ur, *s.* One who proposes or offers for consideration.

PROPREFECT, pro-pre-fekt, *s.* (from *pro* and *præ-*

PROPRÆTOR—PROPYLON.

fectus, Lat.) Among the Romans, a præfect's lieutenant, commissioned to do a part of the duty of the præfect.

In Antiquity, a court of law at Athens, which investigated into the causes of deaths produced accidentally by violence, and adjudicated on the inanimate objects by whose means such accidents took place. It had also cognizance of certain cases of murder. In this court was kept the sacred lamp, attended to by the Prytanides.

PSALIDIUM, *sa-lid'e-um*, *s.* (*psalido*, I clip with shears, Gr.) A genus of Coleopterous insects: Family, Curculionidæ.

PSALIODUS, *sa-li-o-dus*, *s.* (*psalis*, a pair of shears, and *odus*, a tooth, Gr.) A genus of fossil fishes from Sheppey.

PSALM, *salm*, *s.* (*psalmus*, Lat. *psalmos*, from *psallo*, I touch lightly, I beat, I sing, Gr.) A sacred song or hymn; a song composed on a divine subject, and in praise of God; *Psalms*, a book in the Old Testament, consisting of sacred songs, composed chiefly by David.

PSALMIST, *sal'mist*, or *sā'mist*, *s.* A writer or composer of sacred songs; a title particularly applied to David and the other authors of the scriptural psalms. In the Greek Church, a clerk, or leader of music in the church.

PSALMODIC, *sal-mod'ik*, *a.* Relating to PSALMODICAL, *sal-mod'e-kal*, *s.* psalmody.

PSALMODIST, *sal'mo-dist*, *s.* One who sings sacred songs.

PSALMODY, *sal'mo-de*, *s.* The act, art, or practice of singing sacred songs.

PSALMOGRAPHER, *sal-mog'ra-fur*, *s.* (see Psal-PSALMOGRAPHIST, *sal-mog'ra-fist*, *s.* (see Psal-*mography*.) A writer of psalms, or divine songs and hymns.

PSALMOGRAPHY, *sal-mog'ra-fe*, *s.* (*psalmos*, a psalm, and *grapto*, I write, Gr.) The act or practice of writing psalms, or sacred songs and hymns.

PSALTER, *saw'l-tur*, *s.* (*psalterium*, Lat.) The book of Psalms; commonly applied to a book containing the Psalms separately printed. In Roman Catholic countries, a large chaplet or rosary, consisting of 150 beads—the number of the Psalms.

PSILOPUS—PSORIC.

PSILOPUS, sil'o-pus, *s.* (*psilos*, smooth, and *pous*, a foot, Gr.) A genus of Dipterous insects: Family, Tanyosoma.

PSILOSOMUS, sil-o-so'mus, *s.* (*psilos*, smooth or naked, and *soma*, the body, Gr.) A genus of fishes, the body of which is ribbon-shaped, with the dorsal, caudal, and anal fins united: Family, Gobidae.

PSILOSTOMATA, sil-o-sto-ma'ta, *s.* (*psilos*, bare, and *stoma*, a mouth, Gr.) A name given by Blainville for the third family of his order Aporo-branchiata, formed of the genus *Phyllirhœ*.

PSILOTUM, si-lo'tum, *s.* (*psilos*, naked, Gr.) A genus of plants: Order, Lycopodaceae.

PSITHYRUS, sith'e-rus, *s.* (*psithyros*, whispering, Gr.) A genus of Hymenopterous insects: Family, Apidae, and section Anthophila.

PSITTACANTHUS, sit-ta-kan'thus, *s.* (*psittakos*, a parrot, and *anthos*, a flower, Gr. perhaps from the bright colour of the flowers.) A genus of plants: Order, Loranthaceae.

PSITTACARA, sit-tak'a-ra, *s.* (*psittakos*, a parrot, Gr.) A genus of parrots, placed between the Macaws and the Paroquets.

PSITTACIDÆ, sit-tas'e-de, *s.* (*psittacus*, one of the genera.) An extensive and highly interesting family of Scansorial birds, remarkable for their beauty of plumage, powerful bill, fleshy tongue, and their power of imitating the human voice.

PSITTACINÆ, sit-ta-si'ne, *s.* The true Parrots, a subfamily of the Psittacidae, of which *Psittacus* is the type.

PSITTACULA, sit-tak'u-la, *s.* (dim. of *psittacus*.) A genus of Paroquets: Family, Psittacidae.

PSITTIROSTRA, sit-te-ro's-tra, *s.* (*psittacus*, a parrot, and *rostrum*, a bill, Lat.) A genus of Granivorous birds, placed by Temminck between the Crossbills (*Loxia*), and the Bullfinches (*Pyrrhula*).

PSOAS, so'as, *s.* (*psaoi*, the loins, Gr.) In Anatomy, the name of two muscles of the loins:—*Psos magnus*, arising from the last dorsal and the four superior lumbar vertebrae, and inserted into the lesser trochanter of the os femoris: it moves the thigh forwards. *Psos parvus*, arising from the last dorsal vertebra, and inserted into the brim of the pelvis: it is very often wanting: it bends the spine upon the pelvis.

PSOPHIA, sof'e-a, *s.* (*psopheo*, I make a noise, Gr.) A genus of birds, placed by Swainson in his subfamily Megapodinae, and by Gray in his family Ardeidae, and subfamily Psophinae, which consists of that genus and *Cariama*.

PSOPHOCARPUS, sof-o-kar'pus, *s.* (*psophos*, a sound, and *karpus*, a fruit, Gr. in reference to the seeds rattling in the pods when ripe, on being shaken.) A genus of Leguminous plants, natives of the Mauritius: Suborder, Papilionaceae.

PSORA, so'ra, *s.* (Greek.) The itch, or any disease resembling the itch.

PSORALEA, so-ra'le-a, *s.* (*psoraleos*, scurfy, Gr. in reference to the scurfy appearance of the calyx, and most part of the plants, from tubercles.) A genus of Leguminous plants: Suborder, Papilionaceae.

PSORIASIS, so-re-a'sis, *s.* (from *psora*.) In Pathology, dry scall, or scaly tetter; a disease of the order Squamæ, consisting of patches of dry amor-phous scales, continuous, or of intermediate outline; skin often chappy.

PSORIC, so'rik, *a.* Pertaining to the itch.

PSOROPHTHALMIA—PTARMIGAN.

PSOROPHTHALMIA, so-rof-thal'me-a, *s.* (*psora*, the itch, *ophthalmia*, inflammation of the eye, Gr.) In Pathology, inflammation of the eyelids with ulceration, tinea of the eyelids, &c.; itch of the eyelids.

PSYCHE, si'ke, *s.* (Greek.) In Mythology, a nymph whom Cupid married, after she had been persecuted by Venus. The word signifies the soul, of which *Psyche* was considered the personification. In Entomology, a genus of Lepidopterous insects: Family, Bombycidae. In Malacology, a subgenus of the Pteropoda, allied to *Cleodora*, furnished with a globular shell.

PSYCHICAL, si'ke-kal, *a.* Pertaining to psychology.

PSYCHINE, si-ki'ne, *s.* (*psyche*, a butterfly, seeds being furnished with wings like the butterfly.) A genus of Cruciferous plants: Suborder, Orthospermae.

PSYCHODA, si'ko-do, *s.* (*psychoeides*, spiritual or full of life, Gr.) A genus of Dipterous insects: Family, Nemocera.

PSYCHOLOGIC, si-ko-loj'ik, *a.* Pertaining to psychology.

PSYCHOLOGICAL, si-ko-loje-kal, *a.* psychology.

PSYCHOLOGIST, si-kol'o-jist, *s.* One who is versed in psychology.

PSYCHOLOGY, si-kol'o-je, *s.* (*psyche*, the soul, and *logos*, a discourse, Gr.) A discourse or treatise on the human soul; the doctrine of the nature and properties of the soul.

PSYCHOMACHY, si-kom'a-ke, *s.* (*psyche*, the soul, and *mache*, a fight, Gr.) A conflict of the soul with the body.

PSYCHOMANCY, si'ko-man-se, *s.* (*psyche*, the soul, and *manteia*, prophecy, Gr.) A species of necromancy, in which the dead were said to appear as spirits to give the information required of them.

PSYCHOMYIA, si-ko-mi'ya, *s.* (*psyche*, a butterfly, and *myia*, a fly, Gr.) A genus of Neuropterous insects: Family, Phryganidae.

PSYCHOTRIA, si-kot're-a, *s.* (said to be from *psyche*, life, Gr. from the powerful emetic properties of *P. emetica*.) A genus of plants: Order, Cinchonaceae.

PSYCHROMETER, si-krom'e-ter, *s.* (*psychros*, cold, and *metron*, a measure, Gr.) An instrument for ascertaining the degree of cold.

PSYDRACIUM, si-dra'she-um, *s.* (*psydraz*, a white blister on the tip of the tongue, Gr.) In Pathology, a small pustule producing but a slight elevation of the cuticle, and terminating in a lamellated scab.

PSYDRAX, si'draks, *s.* (Greek, a white blister, from the warted fruit.) A genus of plants: Order, Cinchonaceae.

PSYLLA, sil'la, *s.* (Greek, a flea.) A genus of minute Hemipterous insects, allied to the Aphidae, or Plant-lice. They live upon trees and plants, from which they derive their food by suction: Family, Aphidae.

PSYLLOCARPUS, sil-lo-kar'pus, *s.* (*psyllon*, a flea, and *karpus*, a fruit, Gr. in allusion to the colour and shape of the seeds.) A genus of plants, consisting of Brazilian shrubs: Order, Cinchonaceae.

PSYTHIRUS, sith'e-rus, *s.* (*pythizo*, I whisper, Gr.) A genus of Hymenopterous insects: Family, Aphidae.

PTARMIGAN, tar'me-gan, *s.* The bird Tetra-lopus, a species of grouse which inhabits the Alpine parts of Europe; is stupid, burrows under the snow, runs swiftly, and lays pale rufous eggs.

PTELEA—PTERODACTYLUS.

PTELEA, te'le-a, *s.* (the Greek name of the elm, from *ptao*, I fly, Gr. in allusion to the winged fruit.) A genus of plants: Order, Rutaceae.

PTERACLES, ter-ak'les, *s.* (*pteron*, a wing or fin, Gr.) A genus of Riband-fishes, in which the dorsal and anal fins are enormously developed, the former commencing on the crown, and the latter just behind the eye; eyes and mouth very large: Tribe, Gymnetres.

PTERICHTHYS, ter-ik'this, *s.* (*pteron*, a wing, and *ichthys*, a fish, Gr.) A genus of fishes, the pectorals of which are long, reaching to the base of the caudal, with a detached ray at the base, and a cirrus on the lower jaw. The name also given by Agassiz to a singular genus of fossil ganoid fishes, from the old red sandstone of Scotland and Orkney.

PTERIDIUM, ter-id'e-um, *s.* (*pteron*, a wing, and *eidos*, resemblance, Gr.) A genus of fishes, the body of which is anguilliform; dorsal, caudal, and anal fins united; ventral fin of a long, single, undivided ray; no cirri; tail pointed: Family, Gadidae.

PTERINIA, ter-in'e-a, *s.* (*pteron*, a wing, Gr.) A genus of fossil Conchifera, allied to *Avicula*, found chiefly in the Devonian strata.

PTERIS, ter'is, *s.* (Greek, a fern.) Brake, a genus of ferns of the order Polypodiaceae; *P. aquilina* is a well-known British species.

PTERISANTHES, ter-e-san'this, *s.* (*pteron*, a wing, and *anthos*, a flower, Gr. from its winged flowers.) A genus of plants: Order, Vitaceae.

PTEROCARPUS, ter-o-kar'pus, *s.* (*pteron*, a wing, and *karpos*, a fruit, Gr.) A genus of Leguminous plants: Suborder, Papilionaceae.

PTEROCARYA, ter-o-ka-re-a, *s.* (*pteron*, a wing, and *karya*, common walnut, Gr.) A genus of plants: Order, Juglandaceae.

PTEROCEPHALINÆ, ter-o-sef-a-li'ne, *s.* A subfamily of the Raideæ, or Flat-fishes, of which *Pterocephalus* is the type. The pectoral fins are distinct from the head and snout, which do not surround, as in the Trygoninae, or Sting-rays; body broader than long; caudal spine small or wanting; a small dorsal fin at the base of the tail, which is always long and naked.

PTEROCEPHALUS, ter-o-sef-a-lus, *s.* (*pteron*, a wing, and *kephale*, a head, Gr. in reference to the receptacle of the flowers being villous and chaffy.) A genus of plants: Order, Dipsacae. In Ichthyology, the Eagle-ray, a genus of flat fishes, type of the subfamily Pteroccephalinae.

PTEROCERAS, ter-os'e-ras, *s.* (*pteron*, a wing, and *keras*, a horn, Gr.) The Scorpion-shells, a genus of Mollusca; the shells of which have the spire short, the outer lip considerably dilated, ascending and attached to the spire; in general divided into linear processes; basal lobe inflexed and toothed; the channel long: Family, Strombidae.

PTEROCHILE, ter-ok'e-le, *s.* (*pteron*, a wing, and *cheilos*, a lip, Gr.) A genus of Hymenopterous insects: Family, Vespidae.

PTEROCLES, ter-ok'les, *s.* (*pteron*, a wing, and *oklazo*, I crouch down with bended knees, Gr.?) The pin-tailed Sand-grouse, a genus of birds, chiefly natives of Africa: Family, Tetraonidae.

PTERODACTYLE, ter-o-dak'tile, *s.* (*pteron*, a wing, and *daktylos*, a finger, Gr.) An extinct genus of winged reptiles: Family, Iguanidae. It is found

PTEROGLOSSUS—PTERONOTUS.

in the Jura limestone formation, in the lias at Lyme Regis, and in the oolitic slate of Stonefield. Eight species have been discovered, of sizes varying from that of a snipe to that of a cormorant. They had a short tail, an extremely long neck, and a very large head; their eyes were of enormous size, apparently enabling them to fly by night; the snout was long, like that of a crocodile; the jaws furnished with sixty sharp-pointed teeth. Their most remarkable characteristic consisted in the excessive elongation of the second toe of the fore-foot, which was more than double the length of the trunk; and, in all probability, served the purpose of supporting some membrane which enabled the animal to fly. The fingers terminated in long hooks, like the curved claws of the bat. The form and size of the foot, leg, and thigh, show that this extraordinary animal was capable either of standing firmly on the ground, or of perching upon the branches of trees. It is deemed probable that the Pterodactyle had the power of swimming.

PTEROGLOSSUS, ter-o-glos'sus, *s.* (*pteron*, a wing, and *glossa*, a tongue, Gr.) A genus of the Toucans: Family, Ramphistidae.

PTEROGODIUM, ter-o-go'de-um, *s.* (*pterogodes*, wing-like, Gr. from the winged sepals.) A genus of plants: Order, Orchidaceae.

PTEROGONIUM, ter-o-go'ne-um, *s.* (a name altered by Swartz from the Pterogonium of Hedwig, which was contrived to express that the male and female flowers of this genus of mosses are both present on a pinnated stem.) A genus of plants: Order, Bryaceae.

PTEROIS, ter'oys, *s.* (*pteron*, a wing or fin, Gr.) A genus of fishes, in which the dorsal fins are very high, and the pectoral fins as long as the body, or reaching to the base of the caudal fin: Family, Scorpénidae.

PTEROLEPTUS, ter-o-lep'tus, *s.* (*pteron*, a wing, and *leptos*, thin, Gr.) A genus of fishes, in which the pectoral fins are very long, reaching to the base of the caudal; first dorsal fin with the rays very high, and only connected by a membrane at their base; the mouth oblique: Family, Scorpénidae.

PTEROMA, ter-o'ma, *s.* (*pteron*, a wing, Gr.) In Architecture, the space between the wall of the cell of a temple and the columns of the peristyle, called also *ambulatio*.

PTEROMALUS, ter-o-ma'lus, *s.* (*pteron*, a wing, and *malos*, white, Gr.) A genus of Hymenopterous insects: Family, Chalcididae.

PTEROMYS, ter-o-mis, *s.* (*pteron*, a wing, and *mys*, a rat, Gr.) The Flying-squirrels, a genus of Rodents, which have the skin dilated on the side of the body, and extending from the anterior to the posterior extremities, by which the animal is sustained a few moments in the air.

PTERONEURON, ter-o-ne'ron, *s.* (*pteron*, a wing, and *neuron*, a nerve, Gr. in allusion to the winged placentas.) A genus of Cruciferous plants: Order, Pleurorhizae.

PTERONIA, ter-o'ne-a, *s.* (*pteron*, a wing, Gr. in allusion, it is supposed, to the feathery scales of the receptacle.) A genus of Composite plants: Suborder, Tubuliflorae.

PTERONOTUS, ter-o-no'tus, *s.* (*pteron*, a wing, and *notos*, the back, Gr.) A genus of Mollusca, allied to *Murex*: shells with three varices, compressed,

PTEROPHORUS—PTEROSTYLIS.

- and fin-shaped; canal moderate, and generally closed by the union of the two lips at their base.
- PTEROPHORUS**, ter-of'er-us, *s.* (*pteron*, a wing, and *phero*, or *phoreo*, I bear, Gr.) A genus of Lepidopterous insects: Family, Nocturna.
- PTEROPHYLLUM**, ter-o-fil'um, *s.* (*pteron*, a wing, and *phyllon*, a leaf, Gr.) A genus of fossil cycadeous plants from the oolite of Yorkshire, and beds of the same age in Scania.
- PTEROPLATEA**, ter-o-pla-te'a, *s.* (*pteron*, a wing, and *plateia*, flat or broad, Gr.) A genus of flat fishes, in which the breadth of the body and pectorals is greater than the length; the tail short; with or without spines, but always without fins: Family, Raïdæ.
- PTEROPLEURA**, ter-o-plu'ra, *s.* (*pteron*, a wing, and *pleura*, the side, Gr.) A genus of reptiles, belonging to the Geckoidian family.
- PTEROPODUS**, ter-op'o-dous, *a.* (see Pteropods.) Belonging to the class Pteropoda; wing-footed.
- PTEROPODS**, ter'o-pods, } *s.* (*pteron*, a wing, and
PTEROPODA, ter-op'o-da, } *pous* *podos*, a foot, Gr.) A class of Mollusca, possessing organs adapted either for swimming or sailing. The genera belonging to this class have the sac formed by the mantle closed on every side; a structure rendering it necessary that the gills should be placed externally as regards the sac, and they are found spreading out like a pair of wings on each side of the neck. The position of the gills, causing them to resemble the wings of an insect, suggested to Cuvier the name which he assigned to the class. Four genera only are known, viz., *Clio*, *Cymbulia*, *Pneumodermion*, and *Limacina*. These molluscs abound in the colder regions of the ocean, and the *Clio borealis* is considered to form the chief source of food for the whale.
- PTEROPTERUS**, ter-op'ter-us, *s.* (*pteron*, a wing, and *pteryx*, a fin.) A genus of fishes, the general structure of which is that of Pterois, but the dorsal fin is very low: Family, Scorpenidæ.
- PTEROTOCUS**, ter-op'to-kus, *s.* (*pteron*, a wing, and *ptochos*, poor, Gr.) A genus of birds.
- PTEROPUS**, ter'o-pus, *s.* (*pteron*, a wing, and *pous*, a foot, Gr.) A genus of Mammalia of the bat kind: Order, Chiroptera.
- PTEROSOMATIDÆ**, ter-o-so-mat'e-de, *s.* (*pteron*, a wing, and *soma*, a body, Gr.) A family of Mollusca: Order, Nudibranchiata.
- PTEROSPERMUM**, ter-o-sper'mum, *s.* (*pteron*, a wing, and *sperma*, a seed, Gr.) A genus of plants: Order, Byttneriaceæ.
- PTEROSPORIA**, ter-os'po-ra, *s.* (*pteron*, a wing, and *spora*, a seed, Gr. the seed being surrounded by a membrane or wing.) A genus of plants: Order, Ericaceæ.
- PTEROSTEGIA**, ter-o-ste'je-a, *s.* (*pteron*, a wing, and *stegos*, covering, Gr. in reference to the winged involucre.) A genus of plants: Order, Polygonaceæ.
- PTEROSTELMA**, ter-o-stel'ma, *s.* (*pteron*, a wing, and *stelma*, a crown, Gr. the leaflets of the corona being membranous.) A genus of plants: Order, Asclepiadaceæ.
- PTEROSTIGMA**, ter-o-stig'ma, *s.* (*pteron*, a wing, and *stigma*, a stigma, Gr. in reference to the stigma being generally girded by a wing.) A genus of plants: Order, Scrophulariaceæ.
- PTEROSTYLIS**, ter-os'te-lis, *s.* (*pteron*, a wing, and *stylos*, a style, Gr. the column being winged at

PTERURUS—PTILOSTEPHIUM.

- the top.) A genus of plants: Order, Orchidaceæ.
- PTERURUS**, ter-u'rus, *s.* (*pteron*, a wing, and *oura*, a tail, Gr.) A genus of plants: Order, Muricidæ.
- PTERYGIUM**, ter-ij'e-um, *s.* (*pteryx*, a wing, Gr.) In Pathology, a triangular wing-shaped excrescence of the conjunctiva oculi, with its base directed towards the sclerotica, and its apex to the cornea, resulting from varicose dilatation of the vessels of the conjunctiva.
- PTERYGO**, ter'e-go, (*pteryx*, a wing, Gr.) In Anatomy, a word used in composition, to denote muscles which are connected with the pterygoid processes, as, *Pterygo-staphylini*, muscles arising from the pterygoid process of the sphenoid bone, and inserted into the uvula.
- PTERYGOID**, ter'e-goyd, *a.* (*pteryx*, a wing, and *eidos*, a form, Gr.) Wing-like; applied in Anatomy to two processes, which, proceeding from the interior surface of the sphenoid bone, are distinguished as the external and the internal; it is also applied to the hollow between these processes.
- PTERYGOPHORUS**, ter-e-gof'ar-us, *s.* (*pterygophoros*, bearing wings or feathers, Gr.) A genus of Hymenopterous insects: Family, Securiferæ.
- PTILIDIUM**, til-id'e-um, *s.* (from its similarity to *ptelea*.) A genus of plants: Order, Celastraceæ.
- PTILOCHLORIS**, til-o-klo'ris, *s.* (*ptilon*, a plume, and *chloros*, pale-green, Gr.) A genus of birds belonging to the Vironine, or Greenlets: Family, Ampelidæ.
- PTILODACTYLUS**, til-o-dak'te-lus, *s.* (*ptilon*, a feather, and *dactylon*, a finger, Gr.) A genus of Dipterous insects: Family, Notacantha.
- PTILODICTYA**, til-o-dik'te-a, *s.* (*ptilon*, a feather, and *diktyon*, a net, Gr.) A genus of fossil corals, from the Silurian strata of Salop.
- PTILOGONYTS**, til-og'o-nis, *s.* (*ptilon*, a plume or feather, and *gonys*, the knee, Gr. from the legs being feathered below the knee.) A genus of birds belonging to the Tyrannine, or Tyrant-shrikes: Family, Laniidæ.
- PTILOLEPTUS**, til-o-lep'tus, *s.* (*ptilon*, a feather, and *leptos*, fine, delicate, Gr.) A genus of birds belonging to the Coccyzine, or hook-billed Cuckoos: Family, Cuculidæ.
- PTILONOPUS**, til-on'o-pus, *s.* (*ptilon*, a feather, and *pous*, a foot, Gr.) A genus of birds belonging to the Columbina, or true Pigeons: Family, Columbida.
- PTILONORYNCHUS**, til-on-o-ring'kus, *s.* (*ptilon*, a feather, and *rhynchos*, a bill, Gr.) A genus of birds belonging to the Lamprotornine, or Grakles: Family, Sturnidæ.
- PTILOPACHUS**, til-o-pak'us, *s.* (*ptilon*, a feather, and *pachys*, thick, large, Gr.) A genus of birds: Family, Tetraonidæ.
- PTILOPHYRUS**, til-of'er-us, *s.* (*ptilon*, a feather, and *phyro*, I mix, Gr.) Crown-bird, a genus of birds belonging to the Columbina, or true Pigeons: Family, Columbida.
- PTILONIS**, til-o'ris, *s.* (*ptilon*, a feather, Gr. and *os*, *oris*, the mouth, Lat.) A genus of birds belonging to the Paradisiadæ, or Paradise-birds: Family, Trochilidæ.
- PTILOSIS**, til-o'sis, *s.* (Greek, the moulting of birds.) In Pathology, the falling off of the eyelashes, from chronic inflammation of the eyelids.
- PTILOSTEPHIUM**, til-o-ste'fe-um, *s.* (*ptilon*, a

PTILOSTOMUS—PTYCHODUS.

- feather, and *stephos*, a crown, Gr.) A genus of Composite plants: Order, Tubuliflorae.
- PTILOSTOMUS**, til-os-to-mus, *s.* (*ptilon*, a feather, and *stoma*, a mouth, Gr.) A genus of birds belonging to the Glaucopinae, or Wattle-crows: Family, Corvidae.
- PTILOTA**, til-o'ta, *s.* (*ptilotos*, pinnated, Gr.) A genus of Algae: Order, Confervaceae. In Entomology, a name given to embrace as a class the winged or flying insects, embracing the Lepidoptera, Hemiptera, Neuroptera, Coleoptera, and the Hymenoptera.
- PTILOTIS**, til-o'tis, *s.* (*ptilon*, a feather, and *otos*, an ear, Gr.) A genus of birds: Family, Melaphagidae.
- PTILOTOPUS**, til-o'to-pus, *s.* (*ptilotos*, feathered, and *pous*, the foot, Gr.) A genus of Hymenopterous insects: Family, Apidae.
- PTILOTURUS**, til-o'tu-rus, *s.* (*ptilon*, a feather, and *oura*, a tail, Gr. from the long feathers of its tail.) A genus of birds: Family, Melaphagidae.
- PTINUS**, ti'nus, *s.* (Latin.) A genus of Coleopterous insects, the larvæ of which are very destructive to our herbaria and dessicated specimens of animals: Family, Clavicornes.
- PTISAN**, ti'san, *s.* (*ptisane*, peeled barley, or a drink made therefrom, Gr.) Barley-water, or other mucilaginous decoction.
- PTOLEMAIC**, tol-e-ma'ik, *a.* Pertaining to Ptolemy, or to the system of philosophy founded by Ptolemy. In ancient Astronomy, the *Ptolemaic system* supposed that the earth was the centre of the universe—that there revolved round it in rotation as to distance, the Moon, the Sun, Mercury, Venus, Mars, Jupiter, and Saturn; outside of these were the starry heavens; beyond this, three different strata, or hollow spheres within each other, called the first, second, and third crystalline heavens; and to bound the whole, was the *Primum Mobile*, first mover, or great first cause. This system was received for ages, till superseded by the theory proposed by Copernicus, and since so clearly established by Newton.
- PTOLEMAITES**, tol-e-ma'it-se, *s.* A sect of ancient heretics among the Gnostics, who maintained that the Mosaic law came partly from God, partly from Moses, and partly from the traditions of the Jewish doctors.
- PTOSIS**, to'sis, *s.* (Greek, a falling.) In Pathology, a falling of the upper eyelid, with a partial or complete want of power to elevate it. Paralysis of the eyelids, or at least of the levator muscle, frequently resulting from cerebral lesion, is the ordinary cause of this accident. It is sometimes called *Blepharoptosis*.
- PTYLAGOGUE**, ti-al'a-gog, *s.* (*ptyalon*, a spittle, and *ago*, I excite, Gr.) In Pharmacy, any medicine which promotes salivation, or the discharge of saliva.
- PTYALISM**, ti'a-lizm, *s.* (*ptyalio*, I spit, Gr.) In Pathology, excessive secretion of saliva.
- PTYALUM**, ti'a-lum, *s.* (*ptyo*, I spit up, Gr.) In Pathology, the mucus ejected from the bronchia.
- PTYCACANTHUS**, ti-ka-kan'thus, *s.* (*ptychos*, folding or doubled, and *akantha*, a spine, Gr.) A genus of Placoid fossil fishes from the mountain limestone, and old red sandstone of Tyrone, Ireland.
- PTYCHODUS**, ti'ko-dus, *s.* (*ptychos*, doubled, and *odus*, a tooth, Gr.) A genus of fossil fishes from the English chalk formation.

PTYCHOGENS—PUBLIC.

- PTYCHOGENS**, ti'ko-jens, *s.* (*ptychos*, folding, and *gennao*, I produce, Gr.) A name given to those Endogenous plants, whose leaves are occupied by veins running side by side from the base to the apex, without irregular division, as in grasses, lilies, &c. The name is given in contradistinction to Dictyogens, which are those Endogens that, like Smilax, have the reticulated veins of Exogens.
- PTYCHOLEPIS**, ti-kol'e-pis, *s.* (*ptychos*, doubled, and *lepis*, a scale, Gr.) A genus of fossil ganoid fishes, from the lias of England.
- PTYCHOPLEURES**, ti-ko-plu'ris, *s.* (*ptychos*, folding, and *pleuron*, a side, Gr.) A subfamily of Saurians, which have the body covered with true scales, that are little or not at all imbricated, and distributed regularly in rings around the body: Family, Chalcidians, or Cyclauri of M.M. Duméril and Bibron.
- PTYCHOPTERA**, ti-kop'ter-a, *s.* (*ptychos*, poor, and *pteron*, a wing, Gr.) A genus of Dipterous insects: Family, Nemocera.
- PSYCHOTIS**, ti-ko'tis, *s.* (*psyche*, a plait, and *otos*, an ear, Gr. in allusion to the petals having a plait in the middle, emitting a little ear or segment.) A genus of annual or biennial umbelliferous herbs: Suborder, Orthospermeae.
- PTYCHOZOOON**, ti-ko-zo'on, *s.* (*ptychos*, folding, *zoon*, an animal, Gr.) A genus of reptiles belonging to the Geckoidian family.
- PUBERAL**, pu'ber-al, *a.* Pertaining to puberty.
- PUBERTY**, pu'ber-te, *s.* (*pubertas*, from *pubes*, Lat.) The state of transition from youth to adolescence; the time of life when the sexes begin first to be acquainted. In Law, *puberty* is fixed at the age of 12 in females, and 14 in males, after which they are reckoned fit for marriage. To press against with force; to drive or impel by pressure; to butt or strike with the horns; to press or urge forward; to urge; to drive; to press or drive to a conclusion, as, we are *pushed* for an answer; to importune; to tease;—*v. n.* to make a thrust; to make an effort; to make an attack; to burst out;—*s.* a thrust; the act of striking with a pointed instrument;

By dint of sword or *push* of pointed spear.—*Spenser*.

impulse; force impressed; an assault; exigence; trial; extremity. In Pathology, (*pustula*, Lat.) a common phlegmon, differing from a boil or furunculus, in containing uniform and mature pus; that of a boil always contains a core.

PUSHER, *pūsh'ur*, *s.* One who pushes.

PUSHING, *pūsh'ing*, *a.* Pressing forward in business; enterprising; driving vigorously.

PUSHPIN, *pūsh'pin*, *s.* A child's play, in which pins are pushed alternately.

PUSLA, *pu'se-a*, *s.* (*pusa*, a little girl, Lak.) A genus of mitre shells; size very small; spire thick and obtuse; outer lip thickened and often reflected; aperture striated with an internal canal: Family, Volutidae.

PUSICHTHYS, *pu-sik'this*, *s.* (*pusillus*, small, Lat. and *ichthys*, a fish, Gr.) A genus of fishes: Family, Siluridae.

PUSILLANIMITY, *pu-sil-lan-im'e-te*, } *s.*
PUSILLANIMOUSNESS, *pu-sil-lan'e-mus-nes*, } (*pusillanimité*, Fr. *pusillanimitas*, from *pusillus*, small, weak, and *animus*, courage, Lat.) Meanness of spirit; cowardice.

PUSILLANIMOUS, *pu-sil-lan'e-mus*, *a.* Mean-spirited; cowardly; narrow-minded.

PUSILLANIMOUSLY, *pu-sil-lan'e-mus-le*, *ad.* In a mean-spirited or cowardly manner.

PUSIODON, *pu-si'o-don*, *s.* (*pusillus*, small, Lat. and *odon*, a tooth, Gr.) A genus of the Lucerninae, or Land-volutes, the shell of which is flattened and smooth; the body-whorl large, and much dilated at the aperture; spire flat and small; aperture very oblique; umbilicus open.

PUSIOSTOMA, *pu-ze-os'to-ma*, *s.* (*pusillus*, small, Lat. and *stoma*, a mouth, Gr.) A genus of Gastropods, the shell of which has the general form of Columbella, but the outer lip is only toothed in the middle, where it is greatly thickened; inner lip convex between the granular teeth: Family, Strombidae.

PUSS, *pās*, *s.* (Irish word for cat, and the lip, *poes*, a fur tippet, and a kiss, Dutch.) The fondling name given to a cat; a name given by sportsmen to a hare.

PUSSY, *pus'se*, *a.* This and pussiness are given by Webster, but without authority, as the proper spellings of pury and pursiness.

PUSTULARIA, *pus-tu-lā're-a*, *s.* A genus of Mol-

PUSTULE—PUT.

lusca, so named from the shells being marked by elevated pustules; aperture narrow and linear; extremities more or less produced: the teeth continuing beyond, and frequently forming elevated striae across the lips: Family, Cypræidae.

PUSTULE, *pus'tule*, *s.* (*pustula*, Lat.) In Pathology, an elevation of the cuticle, with an inflamed base, containing pus. Its varieties are, Achor, Favus, Phlyzadium, Psyracium,—which terms see.

PUSTULATE, *pus'tu-late*, *s.* (*pustulatus*, Lat.) To form into pustules or blisters.

PUSTULOUS, *pus'tu-lus*, *a.* Full of pustules; pimply.

PUT, *pūt*, *v. a.* (*put*, or *putt*, a thrust, a push, Scotch, *pietaw*, to poke, to thrust, Welsh, *pooten*, to set or plant, Dutch.) To push into action;

Thank him who *puts* me loth to this revenge.—*Milton*.

to lay or place in any situation, state, or condition; to repose, as, to *put* trust in; to apply; to cause or produce; to reduce to any state; to oblige; to incite or urge, as, being *put* to prove things; to propose; to state; to hand to or offer; Woe unto him that giveth his neighbour drink; that

puttest thy bottle to him, and makest him drunken.—*Hab. ii. 15.*

to bring, applied to mental operations, as to be *put* in mind; to pawn or pass; to impose;

I am as much ashamed to *put* a loose, indigested play upon the public, as I should be to offer brass money in a payment.—*Dryden*.

to *put about*, to turn; to change the course of; to *put by*, to thrust aside; to turn off; to divert; to *put down*, to degrade; to baffle; to repress; to crush; to bring into disuse; to confute or silence; to *put forth*, to propose or offer to notice; to extend; to shoot out; to exert; to publish; to *put in*, to interpose; to conduct into a harbour; to *put in practice*, to use; to exercise; to *put off*, to divest; to lay aside; to defeat or delay with some artifice or excuse; to procrastinate; to pass off fallaciously; to discard; to vend; to sell; to push from land, as, *put off* the boat; to *put on*, to invest with; to forward; to promote; to incite;

Say, you ne'er had don't,

But by our *putting on*.—*Shaks.*

to assume; to take; to *put on* or *upon*, to impute; to charge; to inflict; to impose; to *be put upon*, to be deceived; to *put over*, to refer; to defer or postpone; to *put out*, to place at interest; to extinguish; to shoot, as a bud; to extend; to expel; to make public—a vulgar phrase; to confuse or disconcert; to interrupt; to *put out the eyes*, to destroy the power of sight; to *put to*, to kill by; to punish by; to refer to; to expose, as to *put to hazard*; to assist with, as to *put to a helping hand*; to *put to death*, to kill; to *put to it*, to distress; to perplex; to press hard;

What would'st thou write of me, if thou should'st praise me?—

Oh, gentle lady, do not *put* me to't,
For I am nothing, if not critical.—*Shaks.*

to *put up*, to germinate; to expose publicly; to start from a cover;—(obsolete.)

In town * * * I * * * *put up* such a variety of odd creatures in both sexes, that they fill the scent of one another, and puzzle the chase.—*Addison*.

to hoard; to hide; to place in its usual position when out of use, as, *put up* your sword, *put up* your purse; to deposit for safety or preservation, as, to *put up* apples for winter;—*v. n.* to go or

move;—(obsolete);—to shoot; to germinate; to put forth, to leave a port; to germinate; to bud; to put in, to enter a haven; to offer a claim; to put off, to leave land; to put over, to sail across; to put to sea, to set sail; to put up, to lodge; to advance to; to put up with, to suffer without resentment; to take without dissatisfaction;—s. an action of distress;

The stag's was a forced put, and a chance rather than a choice.—*L'Estrange*.

put-off, an evasion; an excuse.

PUT, put, s. (*put*, a short, thick person, Welsh?)

A rustic; a clown; a strumpet; a game at cards.

PUTAGE, pu'taj, s. (from *put*, a prostitute.) In Law, female prostitution.

PUTAMEN, pu-ta'men, s. (Latin, a shell.) In Botany, the inner coat, or stone, or shell of a fruit: commonly called the endocarpium.

PUTANISM, pu-tan-izm, s. (*putanisme*, Fr.) The crime of female prostitution.

PUTATIVE, pu-ta-tiv, a. (*putatif*, French, from *puto*, I suppose, Lat.) Supposed; reputed, as, the putative father of a child.

PUTCHUCK, put'tshuk, } s. The fleshy root of a
PUTCHUCK, put'tshuk, } plant growing in Gujerat.
It is largely exported from Bombay and other ports of the north-west of India to China, where it is used as incense.

PUTICULA, pu-tik'u-la, s. (Latin.) In Roman Antiquity, public burying-places for the poor, without the city.

PUTID, pu'tid, a. (*putidus*, shabby, Lat.) Mean; base; worthless.

PUTIDNESS, pu'tid-ness, s. Meanness; vileness.

PUTLOG, put'log, s. In Building, one of the cross-pieces of timber reaching from the standards of a scaffold to the wall of the erection, and resting at one end on the ledgers. They support the planks on which the builders stand. Putlog-holes are small holes left in a wall for the insertion of the ends of the putlogs.

PUTORIA, pu-to're-a, s. (*putor*, rankness in smell, Lat. in reference to the smell of the leaves when bruised.) A genus of plants: Order, Cinchonaceæ.

PUTORIUS, pu-to're-us, s. (*putor*, stench, Lat.) A genus of Feræ, including the polecat, weasel, &c.: Family, Mustelidæ.

PUTREINIOUS, pu-tred'e-nus, a. (*putredo*, rottenness, Lat.) Proceeding from putrefaction; rotten; having an offensive smell.

PUTREFACTION, pu-tre-fak'shun, s. (French, from *putris*, putrid, and *facio*, I make, Lat.) The spontaneous decomposition of animal or vegetable matter, attended with fætor; a species of fermentation.

PUTREFACTIVE, pu-tre-fak'tiv, a. Pertaining to putrefaction; producing or tending to promote putrefaction.

PUTREFY, pu'tre-fi, v. a. (*putrefier*, Fr. *putrefacio*, from *putris*, putrid, and *facio*, I make, Lat.) To put into a state of spontaneous decomposition; to cause to rot; to corrupt or make foul; to make morbid;—v. n. to rot; to undergo putrefaction.

PUTRESCENCE, pu-tres'sens, } s. The state of
PUTRESCENCY, pu-tres'sen-se, } decomposing, as
in animal or vegetable substances; a putrid state.

PUTRESCENT, pu-tres'sent, a. Becoming putrid; pertaining to putrefaction.

PUTRESCIBLE, pu-tres'se-bl, a. Liable to become putrid.

PUTRID—PYCHNOSTACHYS.

PUTRID, pu'trid, a. (*putride*, Fr. *putridus*, Lat.) In a state of putrefaction; corrupt; rotten; indicating putrefaction; proceeding from or pertaining to putrefaction. In Pathology, *putrid fever* is a name given to typhus, from its symptoms of putrescency. It has been called *spotted fever*, from its being attended with petechia, or flea-bite spots; and by the Spaniards *tavardillo*, from *tavardo*, a spotted cloak.

PUTRIDNESS, pu'trid-ness, } s. The state of being
PUTRIDITY, pu-trid'e-te, } putrid; rottenness;
corruption.

PUTRY, pu'tre, a. Rotten.—Obsolete.

How! not, thou putry mould; groan not, ye graves;
Be dumb, all breath!—*Marsden*.

PUTTER, put'tur, s. One who puts or places. *Put-ter-on*, an inciter or instigator.

PUTTING-STONE, put'ting-stone, s. (from *put*, to throw with the hand.) In Scotland, a large stone thrown from the uplifted hand, as a trial of strength: commonly pronounced *puttin-stane*.

PUTTOCK, put'tok, s. In ships, a small shroud which goes from the main, fore, or mizen mast to its round top, for the men to get into the top or cap: it also signifies a kite.

Who finds the partridge in the puttock's nest,
But may imagine how the bird was dead,
Although the kite soar with unbloodyed beak?—
Shaks.

PUTTY, put'te, s. A paste or cement used in fastening glass in windows, and filling up crevices; the peroxide of tin, generally used for polishing mirrors and lenses, for rendering glass white and opaque, for converting it into enamel, and for other purposes in the arts.

PUTURA, pu-tu'ra, s. A custom, in the feudal ages, claimed by keepers in forests, and sometimes by bailiffs of hundreds, to take man's meat, horse meat, and dog's meat, of the tenants and inhabitants within the perambulation of the forest, hundred, &c.

PUZZLE, puz'zl, v. a. (from the root of *pose*,—which see; or, according to Dr. Jamieson, from the Sueso-Goth. and Icel. *putsa*, *pusso*, to deceive.) To perplex; to confound; to embarrass; to entangle; to put to a stand; to make intricate;—v. n. to be bewildered;—s. perplexity; embarrassment; anything which, from its intricacy, causes embarrassment or difficulty of solution. *Puzzle-headed*, having the head full of confused notions.

PUZZLER, puz'zler, s. The person or thing that puzzles.

PUZZOLANA, pûts-zo-la'na, s. A substance formed of volcanic ashes more or less compacted together. When mixed with a small portion of lime, and water is added, it forms a mortar, which becomes extremely hard under water; consequently, puzzolana is valuable for the foundation of lighthouses and other marine erections. It derives its name from Puzzuoli, whence it was originally brought.

PYANEPSIA, pi-an-ep'she-a, s. (Greek.) In Antiquity, a festival celebrated every year at Athens, on the 7th of *Pyaneption*, in honour of Apollo. Both the festival and the month in which it took place, are said to have derived their names from *pyamos*, another form for *kyamos*, pulse or beans, which were cooked at this season, and carried about.

PYCHNOSTACHYS, pik-nos'ta-kis, s. (*pykno*, dense,

PYCNANTHEMUM—PYGOTHRIX.

and *stachys*, a spike, Gr. the spikes being densely flowered.) A genus of plants: Order, Lamiaceae.

PYCNANTHEMUM, pik-nan'the-mum, *s.* (*pyknos*, dense, and *anthos*, a flower, Gr. the flowers being disposed in dense whorls.) A genus of plants: Order, Lamiaceae.

PYCNITE, pik'nite, *s.* (*pyknos*, thick, Gr. in allusion to its being closely aggregated.) A variety of topaz occurring in long hexagonal prisms; deeply striated longitudinally; often closely aggregated laterally. Its constituents are—alumina, 51.00; silica, 38.43; fluoric acid, 8.84: sp. gr. 3.51.

PYCNODONTES, pik'no-donts, } *s.* (*pyknos*, thick, and *odontos*, a tooth, Gr.) An extinct family of fishes, which prevailed extensively during the middle ages of geological history. Their leading character consists in a peculiar armature of all parts of the mouth with a pavement of thick, round, flat teeth, the remains of which, under the name of bufonites, occur most abundantly throughout the Oolitic formation.

PYCNODUS, pik'no-dus, *s.* A genus of fossil fishes: Family, Pycnodontes.

PYCNOGONIDÆ, pik-no-gon'e-de, *s.* (*pycnogonon*, one of the genera.) A family of Entomostraca, consisting of spider-looking creatures, with eight very long unguiculated legs, in addition to which the females have two pseudo-legs for carrying their eggs. They are occasionally found on the Cetacea, also on marine plants, and under stones on the sea-shore.

PYCNOGONON, pik-nog'o-non, *s.* (*pyknos*, thick, and *gonon*, offspring or race, Gr.) A genus of Entomostraca, type of the family Pycnogonidæ.

PYCNOSTYLE, pik'no-stile, *s.* (*pyknos*, thick, and *stylos*, a column, Gr.) In ancient Architecture, a building in which the columns stood very close to each other, only one diameter and a half of the column being allowed to each intercolumniation.

PYE, pi, *s.* (probably the same as *pie*,—which see.) A confused mass; the state of printing types when the sorts are mixed; a bird.

PYEMESIS, pi-em'e-sis, } *s.* (*pyon*, pus, and *eme-*
PYOEMESIS, pi-o-em'e-sis, } *sis*, vomiting, Gr.) In Pathology, vomiting of pus.

PYGMEAN, pig-me'an, *a.* Pertaining to a pigmy or dwarf; dwarfish.

PYGMY, pig'me, *s.* (*pygme*, Fr. *pigmaioi*, the pigmies, Gr.) A dwarf; a person not exceeding a cubit in height. The pigmies were a fabulous race of beings inhabiting Thrace, who are said to have waged war with the cranes, and were destroyed;—a dwarfish.

PYGOPODS, pig'o-pods, *s.* (*pyge*, buttocks, and *pous*, a foot, Gr.) A name given by Illiger for those natorial birds which have the wings well developed, and whose feet are placed very far back, so as to facilitate their diving, as in the genera *Colymbus*, *Alca*, &c.

PYGOPUS, pig'o-pus, *s.* (*pygchos*, a snout, and *pous*, a foot, Gr.) A subgenus of Lizard-serpents, being a subdivision of *Bipes*. It is distinguished by having a range of pores in front of the vent: Family, Scincoidæ.

PYGOTHRIX, pi'go-thriks, *s.* (*pyge*, the buttocks, and *thrix*, hair, Gr. the buttocks being fringed with long hair.) The Douc, or Cochin-China Monkey, the *Lania nemæus* of Linnaeus, a genus of long-tailed monkeys, established by M. Geoffroy.

PYKAR—PYRALLOLITE.

PYKAR, pik'ar or pe-kür, *s.* A broker in India who transacts the business at first hand with the manufacturer, and sometimes carries goods about for sale.

PYLAGORE, pil'a-gore, *s.* (*pylagoras*, Gr.) In ancient Greece, a delegate from a city, representing it in the Amphictyonic council.

PYLORIC, pi-lor'ik, *a.* (see *Pylorus*.) Pertaining to the pylorus.

PYLORIDIANS, pi-lo-rid'e-ans, } *s.* (*pyloros*, a gate-keeper, Gr.) The name given by Blainville to his ninth family of Lamellibranchiata. The shells of this family are thus characterized:—regular, rarely irregular; nearly always equivalve, and gaping at two extremities; hinge incomplete; the teeth gradually vanishing; two distinct muscular impressions, united by an impression which is very flexuous backwards. It contains the genera, *Pandora*, *Mya*, *Anatina*, *Latricola*, *Solen*, &c.

PYLORUS, pi-lo'rus, *s.* (*pyle*, a gate, and *ouros*, a watcher, a warder, Gr.) Literally, a gatekeeper. In Anatomy, the lower orifice of the stomach, guarding the entrance into the bowels.

PYOCHEZIA, pi-o-ke'zhe-a, *s.* (*pyon*, pus, and *chezo*, I go to stool, Gr.) In Pathology, purulent diarrhoea.

PYOCELIA, pi-o-se'le-a, *s.* (*pyon*, pus, and *koilia*, the belly, Gr.) An accumulation of pus in the abdominal cavity.

PYOCYSTIS, pi-o-sis'tis, *s.* (*pyon*, pus, and *kystis*, a cyst, Gr.) A purulent cyst, especially in the lungs.

PYOGINIA, pi-o-jin'e-a, *s.* (*pyon*, pus, and *gennao*, I generate, Gr.) Generation of pus.

PYOMETRA, pi-on'e-tra, *s.* (*pyon*, pus, and *metra*, the womb, Gr.) A collection of pus in the womb.

PTOPHTHALMIA, pi-of-thal'me-a, *s.* (*pyon*, pus, and *ophthalmia*, inflammation of the eye, Gr.) Purulent ophthalmia.

PYOPLANTIA, pi-o-pla'ne-a, *s.* (*pyon*, pus, and *plane*, wandering, Gr.) Metastasis of pus.

PYOPTYSIS, pi-op-ti'sis, *s.* (*pyon*, pus, and *ptysis*, a spitting, Gr.) Expectoration of pus.

PYORRHAGIA, pi-or-ra'je-a, *s.* (*pyon*, pus, and *rhegnymi*, I burst out, Gr.) A sudden and copious eruption of pus.

PYORRHEA, pi-or-re'a, *s.* (*pyon*, pus, and *rheo*, I flow or gush, Gr.) A continued purulent discharge, especially from the genital organs, anus, lungs, and other parts.

PYRACANTHUS, pir-a-kan'thus, *s.* (*pyr*, fire, and *akantha*, a thorn, Gr. from red berries.) A species of the genus *Cratægus*: Order, Pomaceæ.

PYRALIDÆ, pe-ra'l'e-de, *s.* (*pyralis*, one of the genera.) A genus of Nocturnal Lepidoptera, remarkable for their long legs, aquatic habits, and the propensity of many of the species to fly by night.

PYRALIS, pe-ra'lis, *s.* (Greek name of a red-winged bird.) A genus of Nocturnal Butterflies: Type of the family *Pyralidæ*.

PYRALLOLITE, pir-al'lo-lite, *s.* (*pyr*, fire, *allos*, another, and *lithos*, a stone, Gr. in allusion to its change of colour when undergoing the action of fire.) A mineral occurring, both massive and crystallized, in flat rhombic prisms, resembling those of tremolite; opaque in the mass, but translucent when reduced to thin laminae parallel to the cleavage. Composition—silica, 56.62; magnesia, 23.38; alumina, 3.38; lime, 5.58; peroxide of iron, 0.99;

483

PYRAMID—PYRARGILLITE.

protoxide of manganese, 0.99; water, 3.58: sp. gr. 2.55 to 2.6: hardness = 3.5.

PYRAMID, *pir'a-mid*, *s.* (*pyramis*, Gr.) In Geometry, a solid having any plane figure for its base, and triangles for its sides, all terminating in one common point. If the base be a regular figure, the solid is then a regular pyramid, and takes a particular name according to the number of its sides, as triangular, square, &c.; any solid of the form described, as the *pyramids* of Egypt. In Anatomy, an osseous eminence in the tympanum, enclosing the stapedius muscle. In Surgery, the pivot or centre-pin attached to the crown of the trephine.

NOTE.—The etymology of this word is involved in great obscurity: the *is* in *pyramis* seems to be a Greek termination; the *py* is considered to be the Greek version of the Egyptian article *pi*, and the syllable *ram* to be from the Egyptian root *ram*, signifying *separating* or *setting apart from common use*; consequently, a pyramid would signify a sacred edifice.

PYRAMIDAL, *pir-am'e-dal*, } *a.* Having the
PYRAMIDICAL, *pir-am'id'e-kal*, } form of a pyramid. In Anatomy, the *pyramidalis* is a muscle arising from the pubes, and inserted into the linea alba. It assists the rectus. *Pyramidalis nasi*, a slip of the occipito-frontalis muscle, which goes down over the nasal bones, and is fixed to the compressor nasi. *Pyramidal numbers* are such as are formed by the successive sums of polygonal numbers, in the same manner as the latter are formed from arithmetical progressions; thus—Arithmetical progression, 1, 2, 3, 4, 5, &c.; Polygonal numbers, 1, 3, 6, 10, 15, &c.; Pyramidal numbers, 1, 4, 10, 20, 35, &c.

PYRAMIDICALLY, *pir-a-mid'e-kal-le*, *ad.* In the form of a pyramid.

PYRAMIDICALNESS, *pir-a-mid'e-kal-nes*, *s.* The state of being pyramidal.

PYRAMIDEA, *pir-a-mid'e-a*, *s.* (*pyramis*, a pyramid, Gr.) A genus of Gasteropodous Mollusca, belonging to the Trochinea, or Top-shells; shell imperforate; spire much elevated, pyramidal, and acute; basal whorl much flattened, and scarcely convex; pillar spiral, turning inwards, and then outwards, but smooth; outer lip thin; inner wanting: Family, Trochidae.

PYRAMIDELLA, *pir-a-me-del'la*, *s.* (*pyramis*, a pyramid, Gr.) A genus of Gasteropodous Mollusca, the shell of which is smooth and polished; outer lip thin; base of the pillar produced, and marked with distinct plaits: Family, Turbidæ.

PYRAMIDOID, *pir'am-e-doyd*, } *s.* In Geometry, a
PYRAMOID, *pir'a-moyd*, } parabolic spindle, the solid formed by the revolution of a semiparabola about its base, or greatest ordinate.

PYRAMIS, *pir'am-is*, *s.* (Greek, a pyramid.) In Conchology, a genus of Gasteropods, which includes two species from the shales, near Hebben Bridge.

PYRARGILLITE, *pir-är-jil'ite*, *s.* (*pyr*, fire, *argillos*, white clay, and *lithos*, a stone, Gr. from its emitting an argillaceous odour when heated.) A mineral occurring massive; assuming, though rarely, a form analogous to the four-sided prism, with bevelled edges; frequently traversed by chlorite; colour partly black and shining, or partly bluish, and then devoid of lustre. Composition—potash, 1.05; soda, 1.83; silica, 43.93; alumina, 28.93; oxide of iron, 5.30; magnesia, 2.90; water, 15.47: sp. gr. 2.50: hardness = 3.5.

PYRE—PYRITOUS.

PYRE, *pire*, *s.* (*pyr*, Gr. *pyra*, Lat. fire.) A funeral pile; a pile to be burned.

PYRELLA, *pi-rel'la*, *s.* (*pyrum*, a pear, Lat.) A genus of Mollusca, the shell of which is pyriform; spire very short and papillary; channel lengthened; inner lip flattened, elevated, and smooth; pillar with a single sharp fold at the base: Family, Turbellidae.

PYREN, *pi'ren*, *s.* A crystalline substance obtained from gas tar; insipid and inodorous; melts about 350° Fahrenheit, and concretes, on cooling, into a crystalline mass. Not yet known to have been analyzed.

PYRENARIA, *pir-e-na're-a*, *s.* (*pyren*, a kernel, or cherry-stone, Gr. in reference to the bony seeds.) A genus of plants, natives of Java: Order, Pomaceæ.

PYRENEAN, *pir-e-ne-an*, *a.* Pertaining to the Pyrenees.

PYRENEITE, *pir-en-e'ite*, *s.* (from its being found in the French Pyrenees.) A black variety of garnet, occurring in minute but very symmetrical rhombic dodecahedrons, which glisten externally; it is found embedded in primitive limestone. It consists of silica, 43; alumina, 16; lime, 20; oxide of iron, 16; water, 4.

PYRENESTES, *pir-e-nes'tis*, *s.* (*pyren*, the stone of fruit, and *esthio*, I eat, Gr.) A genus of birds with enormously large conic bills: Family, Fringillidae.

PYRENULA, *pir-en'u-la*, *s.* (*pyren*, a kernel, Gr.) A genus of Lichens: Tribe, Idialthalamæ.

PYRETHRUM, *pir-e-thrum*, *s.* (*pyr*, fire, Gr. in allusion to the hot taste of the root.) A genus of Composite plants: Suborder, Tubulifloræ.

PYRETIC, *pir-et'ik*, *s.* (*pyrexia*, fever, Gr.) A medicine for the cure of fever.

PYRETOLOGIST, *pir-e-to'l'o-jist*, *s.* A physician who directs his special attention to the subject of fever.

PYRETOLOGY, *pir-e-to'l'o-je*, *s.* (*pyrexia*, fever, and *logos*, a discourse, Gr.) The doctrine of fevers; a discourse or treatise on fevers.

PYREXICAL, *pir-ek'se-kal*, *a.* Pertaining to fever; feverish.

PYREXY, *pir-ek'se*, } *s.* (*pyrexia*, Gr.) Fever.

PYREXIA, *pir-ek'she-a*, }
PYRGITA, *pir-ji'ta*, *s.* (*pyrgites*, the house-sparrow, Gr.) The sparrow; a genus of well-known birds, of which *P. domestica*, or common sparrow, is the type. The sparrows belong to the Fringillinae, or Ground-finches: Family, Fringillidae.

PYRGO, *pir'go*, *s.* (*pyrgos*, a tower, Gr.) A genus of microscopic Foraminifera.

PYRIFORM, *pir'e-faw'rim*, *a.* (*pyrum*, a pear, and *forma*, form, Lat.) Having the form of a pear;—*s.* in Anatomy, *pyriformis*, a muscle arising from the hollow of the sacrum, and inserted into the cavity at the root of the trochanter major: it moves the thigh.

PYRINA, *pir-i'na*, *s.* (*pyrum*, a pear, Lat.) A genus of fossil Echinodermata, proposed by Des Moulins for the *Nucleolites depressa* of the green sand.

PYRITACEOUS, *pir-e-ta'she-us*, *a.* Pertaining to pyrites.

PYRITES, *pir-i'tes*, *s.* (Greek, from *pyr*, fire.) Fire-stone, consisting of native compounds of sulphur with iron or copper.—See, under Iron and Copper.

PYRITIC, *pir-it'ik*, } *a.* Pertaining to, con-
PYRITICAL, *pir-it'e-kal*, } sisting of, or resembling
PYRITOUS, *pir'e-tus*, } pyrites.

PYRITIFEROUS—PYROLUSITE.

PYRITIFEROUS, *pir-e-tif'ur-us*, *a.* (*pyrites*, and *fero*, I produce, Lat.) Containing or producing pyrites.

PYRITIZE, *pir'e-tize*, *v. a.* To convert into pyrites.

PYRITOLOGY, *pir-e-to'l'o-je*, *s.* (*pyrites*, and *logos*, a discourse, Gr.) A discourse or treatise on pyrites.

PYRO. A prefix from the Greek *pyr*, fire, denoting, in any word with which it is compounded, the idea of fire, heat, fever, &c. Hence, in Chemistry, the products which are obtained by subjecting certain organic acids to heat, are termed *pyro-acids*; the acids are thus modified, and give rise to certain classes of salts. Thus, we have pyro-citric, pyro-gallic, pyro-kinic, pyro-malic, pyro-meconic, and pyro-sorbic acids, giving rise to pyro-citrates, pyro-kinates, &c. *Pyro-phosphoric acid*, an acid obtained by exposing concentrated phosphoric acid for some time to a heat of 415°. Formula, $X_2 P_2 O_5$, where X represents an equivalent of water to any base. Equiv. 71.4.

PYROCHLORE, *pir'o-klore*, *s.* (*pyr*, fire, and *chloros*, greenish-yellow, Gr.) A mineral occurring almost always crystallized, the crystals firmly attached to the rock; in thin splinters it is translucent, and appears brown; in larger pieces always opaque; its primary form is the regular octahedron. Composition—titanic acid, 62.75; lime, 12.85; protoxide of uranium, 5.18; peroxide of cerium, 6.80; protoxide of manganese, 2.75; peroxide of iron, 2.16; peroxide of tin, 0.61; water, 4.20: sp. gr. 4.206 to 4.216: hardness = 5.

PYROGEN, *pir'o-jen*, *s.* (*pyr*, fire, and *gennao*, I generate, Gr.) A name given by Mr. Lake to the electric fluid, which he considers as a material body.

PYROGENOUS, *pir'o-je-nus*, *a.* (*pyr*, fire, and *gennao*, I generate, Gr.) Produced by fire; igneous.

PYROLA, *pir'o-la*, *s.* (dim. of *Pyrus*, a pear-tree, Lat. from the similarity of the leaves.) Winter-green, a genus of plants: Order, Ericaceæ.

PYROLATRY, *pir'o-la-tre*, *s.* (*pyr*, fire, and *latreia*, worship, Gr.) The worship of fire.

PYROLIGNEOUS, *pir'o-lig'ne-us*, *a.* (*pyr*, fire, Gr. *lignum*, wood, Lat.) Generated or produced by the combustion of wood; applied in Chemistry to *pyroligneous* or *pyrolignous acid*, the acid liquor which passes over along with the tar and gaseous products, when wood is subjected to destructive distillation: it is an impure vinegar.

PYROLIGNITE, *pir'o-lig'nite*, *s.* A salt formed by the union of pyroligneous acid with a base.

PYROLIRION, *pir'o-lir'e-un*, *s.* (*pyr*, fire, and *leirion*, a lily, Gr. from the colour of the perianth.) A genus of plants: Order, Liliaceæ.

PYROLITHIC, *pir'o-lith'ik*, *a.* (*pyr*, fire, *lithos*, a stone, and *ouron*, urine, Gr.) In Chemistry, *pyrolithic* or *pyruric acid* is a substance obtained from the silvery white plates which sublime from uric acid concretions, when distilled in a retort.

PYROLOGIST, *pir'o-l'o-jist*, *s.* A believer in pyrology; an investigator of the laws of heat.

PYROLOGY, *pir'o-l'o-je*, *s.* (*pyr*, fire, and *logos*, a discourse, Gr.) A treatise or discourse on heat, or the natural history of heat, latent and sensible.

PYROLUSITE, *pir'o-lu'site*, *s.* (*pyr*, fire, and *lous*, I wash, in allusion to its property of discharging the brown and green tints in glass.) A mineral of an

PYROMALATE—PYROPHYLLITE.

iron-black or bluish colour; opaque; lustre metallic; streak black; primary form, a right rhombic prism. It is the most important and most abundant of all the ores of manganese, and, according to Thomson, consists of binocide of manganese, 99.242; silica, 0.840; peroxide of iron, 0.130: sp. gr. when pure, 4.97: hardness = 2 to 2.8.

PYROMALATE, *pir'om'a-late*, *s.* A compound of pyromalic acid and a salifiable base.

PYROMALIC, *pir'o-ma'lik*, *a.* (*pyr*, fire, Gr. and *malum*, an apple, Lat.) In Chemistry, *pyromalic acid* is a volatile substance, obtained by heating malic acid in close vessels. It is supposed to be isomeric with malic acid.

PYROMANCY, *pir'o-man-se*, *s.* (*pyr*, fire, and *man-teia*, prophecy, Gr.) In Antiquity, a species of divination by means of the fire of the sacrifice.

PYROMANTIC, *pir'o-man'tik*, *a.* Pertaining to pyromancy;—*s.* one who pretends to divine by fire.

PYROMETER, *pir'om'e-ter*, *s.* (*pyr*, fire, and *metron*, a measure, Gr.) An instrument for measuring the expansion of bodies by heat; usually restricted to denote one of the many instruments contrived for measuring temperatures of a very high intensity. The extremity of the scale of the celebrated pyrometer of Wedgewood reaching to 240°, is = 32277° of Fahrenheit.

PYROMETRY, *pir'om'e-tre*, *s.* That branch of science which investigates the amount of dilatation produced in bodies by heat.

PYROMORPHOUS, *pir'o-mawr'fas*, *a.* (*pyr*, fire, and *morphe*, form, Gr.) In Mineralogy, having the property of crystallization by fire.

PYROMUCATE, *pir'o-mu'cate*, *s.* A compound of pyromucic acid with a salifiable base.

PYROMUCIC, *pir'o-mu'sik*, *a.* (*pyr*, fire, Gr. and *mucus*,) In Chemistry, *pyromucic acid* is formed by the distillation of mucic acid. It is a white volatile substance, closely resembling benzoic acid. Formula, $C_{10} H_3 O_5 + H_2 O$.

PYRONOMY, *pir'on'o-me*, *s.* (*pyr*, fire, and *nomos*, a rule, Gr.) Instructions for regulating the fire in chemical processes.

PYROPE, *pir'o-pe*, *s.* (*pyr*, fire, and *ops*, the eye, Gr.) A species of garnet nearly allied to almandine; colour deep red; generally transparent; fracture splendent, vitreous, conchoidal: as a gem it is highly prized. It consists of silica, 40.00; alumina, 28.50; lime, 3.50; magnesia, 10.00; oxide of iron, 16.50; oxide of manganese, 0.25: sp. gr. 3.8.

PYROPHANE, *pir'o-fane*, *s.* (*pyr*, fire, and *phanos*, clear, Gr.) A mineral which is opaque in its natural state, but rendered transparent by heat.

PYROPHANOUS, *pir'of-a-nus*, *a.* Rendered transparent by heat.

PYROPHOROUS, *pir'of'ur-us*, *a.* Pertaining to or resembling pyrophorus.

PYROPHORUS, *pir'of'ur-us*, *s.* (*pyr*, fire, and *phoros*, bearing, Gr.) An artificial substance which has the property of igniting merely on exposure to air. It may be variously prepared. A *pyrophorus* was formed by M. Guv Lussac, of sulphate of potash and lamp-black in the proportion of two to one.

PYROPHOSPHATE, *pir'o-fos'fate*, *s.* In Chemistry, a combination of pyrophosphoric acid with a salifiable base.

PYROPHYLLITE, *pir'o-fil'ite*, *s.* (*pyr*, fire, *phyllon*, a leaf, and *lithos*, a stone, Gr.) A mineral of a

PYROPHYSALITE—PYROTECHNICAL.

light-green colour, occurring in fibrous radiating masses, and small elongated prisms; lustre pearly; in thin laminae, transparent. When heated *per se*, it exfoliates into white leaves, and increases to about twenty times its original size, but does not fuse. Composition—silica, 59.79; alumina, 29.46; magnesia, 4.0; oxide of iron, 1.8; water, 5.62: sp. gr. 2.8: hardness = 1.5.

PYROPHYSALITE, *pir-o-fis'a-lite*, *s.* (*pyr*, fire, *physa*, an air-bubble, and *lithos*, a stone, Gr. in allusion to the effect produced on it by heat.) A variety of topaz occurring in yellowish-white crystals of considerable dimensions; structure lamellar in one direction, and splendid; the cross fracture glimmering and uneven; translucent on the edges, and not so hard as topaz: it intumesces when heated, and gives out a greenish phosphoric light. It consists of alumina, 57.74; silica, 34.36; fluoric acid, 7.77, being the same ingredients as in topaz.

PYRORHITE, *pir-awr'hte*, *s.* (*pyr*, fire, Gr. and the mineral orthite.) A mineral occurring massive; colour brownish-black, becoming yellowish-brown by decomposition; composition columnar; fracture conchoidal, splintery; earthy; internal lustre resinous, externally dull. It consists of protoxide of cerium, 13.92; silica, 10.43; lime, 1.81; alumina, 3.59; protoxide of iron, 6.08; protoxide of manganese, 1.39; yttria, 4.87; carbon, 31.41; water, 26.50: sp. gr. 2.19: hardness = 2.5.

PYROSOCPE, *pir'o-sko-pe*, *s.* (*pyr*, fire, and *sko-peo*, I view, Gr.) An instrument for measuring the pulsatory motions of the air, or the intensity of heat radiating from a fire.

PYROSIS, *pir-o'sis*, *s.* (Greek, burning.) In Pathology, pain in the epigastrium, as of extreme heat, with eructation of watery fluid. This disease in England is called black-water, and in Scotland water-brash.

PYROSKLERITE, *pir-os'kle-rite*, *s.* (*pyr*, fire, and *skleros*, hard, Gr.) A mineral: primary form a rhombic prism; colour emerald-green; streak white; fracture uneven and splintery. Composition—silica, 37.03; alumina, 13.50; magnesia, 31.62; protoxide of iron, 3.52; oxide of chromium, 1.43; water, 11.00.

PYROSMALITE, *pir-os'ma-lite*, *s.* (*pyr*, fire, and *osme*, a smell, Gr. from its emitting an odour when heated.) A mineral occurring in hexagonal prisms of a liver-brown colour; cleavage distinct and easily obtained, perpendicular to the axis; external lustre shining; structure lamellar, translucent on the edges, and brittle. It consists of protoxide of iron, 21.81; muriate of iron, 14.09; protoxide of manganese, 21.14; silica, 35.85; lime, 1.21; water, 5.89: sp. gr. 2.95 to 3.10: hardness = 4.0 to 4.5.

PYROSTRIA, *pir-os'tre-a*, *s.* (*pyrus*, a pear-tree, and *striatus*, striated, Lat. from the fruit being pear-shaped and striated.) A genus of glabrous trees, natives of the Mauritius: Order, Cinchonaceae.

PYROTARTARIC, *pir-o-tar-tar'ik*, *a.* (*pyr*, fire, Gr. and tartar.) In Chemistry, *pyrotartaric acid* is a substance obtained by heating tartaric acid in a close vessel. It is distinct from the latter.

PYROTARTRATE, *pir-o-tar'trate*, *s.* A compound of pyrotartaric acid with a salifiable base.

PYROTECHNIC, *pir-o-tek'nik*, } *a.* Pertaining to
PYROTECHNICAL, *pir-o-tek'ne-kal*, } pyrotechnics.

PYROTECHNICS—PYRRHULAUDA.

PYROTECHNICS, *pir-o-tek'niks*, } *s.* (*pyr*, fire, and
PYROTECHNY, *pir'o-tek-ne*, } *techné*, art, Gr.)

The art of making fireworks, or the science which teaches the management and application of fire in gunnery, rockets, &c. In Surgery, the art of employing fire as a topical agent in the treatment of diseases.

PYROTECHNIST, *pir-o-tek'nist*, *s.* One skilled in pyrotechny.

PYROTIC, *pir-ot'ik*, *a.* (*pyr*, fire, Gr.) Caustic; burning.

PYROXENE, *pir-ok-sene'*, *s.* (*pyr*, fire, and *xenos*, a stranger, Gr. a guest in the fire, unaltered, from its not melting before the blowpipe.) The name given by Haüy and Brongniart to augite,—which see.

PYROXENIC, *pir-ok-sen'ik*, *a.* Composed of pyroxene or augite; containing pyroxene; resembling pyroxene.

PYROXYLIC SPIRIT, *pir-ok-sil'ik spir'it*, *s.* (*pyr*, fire, *xylyon*, wood, Gr. and spirit.) One of the products of the destructive distillation of wood. When pure, it is mobile and colourless; possessing an odour resembling, at the same time, that of alcohol and that of acetic ether; it is very inflammable, and burns with a pale flame. Formula, C₈ H₈ O. Sp. gr. 0.798.

PYRRHIC, *pir'rik*, *a.* In Grecian Antiquity, invented by Pyrrhus; pertaining to Pyrrhus; hence, belonging to ancient Greece; designating a poetical foot of two syllables. *Pyrrhic dance*, a species of warlike dance still in use among the Greeks, said to have been invented by Pyrrhus to grace the funeral of his father Achilles.

You have the *Pyrrhic* dance as yet,
Where is the *Pyrrhic* phalanx gone?—Byron.

PYRRHIN, *pir'rin*, *s.* (*pyrinos*, like wheat, wheaten, Gr.) A vegeto-animal substance detected in rain-water.

PYRRHITE, *pir'rite*, *s.* (*pyrrhos*, flame-coloured, Gr.) A mineral which occurs crystallized in regular octohedrons; no cleavage observable; colour deep orange-yellow; lustre vitreous, brilliant; transparent on the edges. Hardness equal to that of felspar. Not yet analyzed.

PYRRHOCERAS, *pir-ro's'er-as*, *s.* (*pyrrhos*, flame-coloured, and *keras*, a horn, Gr.) A genus of birds: Family, Corvidae.

PYRRHOCORAX, *pir-ro-ko-raks*, *s.* (*pyrrhos*, flame-coloured, and *korax*, a crow, Gr.) A genus of birds: Family, Corvidae.

PYRRHOCORIS, *pir-rok'o-ris*, *s.* (*pyrrhos*, flame-coloured, and *koris*, a bug, Gr.) A genus of Hemipterous insects: Family, Pentatomidae.

PYRRHODES, *pir-ro-des*, *s.* (Greek, red-looking.) A genus of birds belonging to the Lorianae, or Lories, natives of the Indian islands: Family, Psittacidae.

PYRRHONIC, *pir'ron-ik*, } *a.* Pertaining to Pyr-
PYRRHONIAN, *pir-ron'e-an*, } rho; taught by Pyr-
rho, a Greek philosopher who founded the first sceptic school.

PYRRHONISM, *pir-ro'ne-izm*, *s.* The sceptical philosophy as taught by Pyrrho.

PYRRHONIST, *pir'ron-ist*, *s.* A sceptic; a follower of Pyrrho.

PYRRHULA, *pir'ru-la*, *s.* The Bullfinch, a genus of birds, type of the subfamily Pyrrhulinae: Family, Fringillidae.

PYRRHULAUDA, *pir-ru-law'da*, *s.* (*pyrrhula*, a bullfinch, and *lauda*, a lark, Gr.) A genus of birds.

PYRRHULINÆ—PYTHAGOREAN.

belonging to the Pyrrhulines, or Bullfinches: Family, Fringillidæ.

PYRRHULINÆ, *pir-ru-li'ne*, *s.* (*pyrrhula*, one of the genera.) The Bullfinches, a subfamily of the Fringillidæ, in which the bill is very short, thick, and entire; the upper mandible arched both on the culmen and commissure; wings with the four first quills of nearly equal length.

PYRULA, *pir'u-la*, *s.* (*pyrum*, a pear, Lat.) A genus of Mollusca, the shell of which is pyriform, strong, solid, and connected with spines or tubercles; the base lengthened into a long channel; spire very short, but a little elevated and pointed; inner lip wanting: Type of the subfamily Pyrrhulinæ.

PYRULINÆ, *pir-u-li'ne*, *s.* (*pyrula*, one of the genera.) A subfamily of the Turbinellidæ, the shells of which are pyriform; the base more or less produced; the spire short and typically flattened; inner lip convex and perfectly smooth.

PYRUS, *pir'us*, *s.* (*peren*, Gaelic.) The Pear-tree. Of the fruit of *P. communis*, Don enumerates 677 varieties; of *P. malus*, or apple, 1400 varieties: Order, Pomaceæ.

PYTELIA, *pi-te'le-a*, *s.* A genus of birds, belonging to the Coccothraustinæ, or Hard-bills: Family, Fringillidæ.

PYTHAGOREAN, *pi-thag-o-re'an*, *s.* A follower of Pythagoras, the founder of the Italic school of philosophy. *Pythagorean Bean*, or *Showy Nelumbium*, the plant *Nelumbium speciosum*, the fruit of which appears to have been eaten by the ancient Egyptians, though the plant is not now found in that country.

PYTHAGOREAN—PYXIS.

PYTHAGOREAN, *pi-thag-o-re'an*, } *a.* Pertaining to
PYTHAGORIC, *pi-tha-gor'ik*, } the philosophy
PYTHAGORICAL, *pi-tha-gor'e-kal*, } of Pythagoras.
PYTHAGORISM, *pi-thag'o-riz'm*, *s.* The doctrines of Pythagoras.

PYTHIAN, *pi'the-an*, *a.* (from *Pythia*, the priestess of Apollo, Gr.) Pertaining to the priestess of Apollo, who delivered oracles.

PYTHO, *pi'tho*, *s.* (Greek, I cause to rot.) A genus of Coleopterous insects: Family, Stenelytra.

PYTHON, *pi'thon*, *s.* (Greek.) In Mythology, the name of an enormous spirit which Apollo destroyed, whence called Pythius; and in memory of which the Pythian games were instituted. They formed one of the four great national festivals of Greece.

PYTHONESS, *pit'h'o-nes*, *s.* (*python*, a dragon or serpent, Gr.) A sort of witch; the priestess who gave oracular answers at Delphi, in Greece.

PYTHONIC, *pi'thon'ik*, *a.* Pretending to prophecy.

PYTHONIST, *pit'h'on-ist*, *s.* A conjuror.

PYTULA, *pi-u're-a*, *s.* (*pyon*, pus, and *ouron*, urine, Gr.) In Pathology, evacuation of pus with the urine.

PYX, *piks*, } *s.* (*pyxis*, a box, Gr.) The box
PYXIS, *pik'sis*, } in which the Roman Catholics keep the host.

PYXIDICULA, *piks-e-dik'u-la*, *s.* (*pyxis*, a box, and *diklis*, folding two ways, Gr.) An obscure genus of fossil Infusoria.

PYXIS, *pik'sis*, *s.* (Greek, a box.) A genus of Land Tortoises: Family, Testudinidæ.

PYXIS NAUTICA, *pik'sis naw'te-ka*, *s.* (*pyxis*, a box, and *nautikos*, nautical, Gr.) In Astronomy, the mariner's compass, a constellation of the southern hemisphere, formed by Lacaille.

Q.

Q—QUACK.

Q, the seventeenth letter of the English alphabet, representing the same sound as *k*, though limited to words in which *u* follows, is superfluous. In the Saxon, this letter is not used: in place of *qu*, *cw* is generally employed, as in *cwen*, queen; *cwellan*, to quell. The *qu* and *quh* in the orthography of the Old English and Scottish, seem to have been introduced from the Roman alphabet to represent the powers and pronunciation of the Saxon *cw*, *hw*, and *w*; and of the British *gw* and *chw*. **Q** never ends an English word. The name of this letter is probably from the French *queue*, a tail; its form being that of an *O* with a tail. Used as an abbreviation, **Q** stands for *quantum* (quantity), as, among physicians, *q. pl.*, *quantum placet*, as much as you please; *q. s.*, *quantum sufficit*, as much as is sufficient. In Mathematics, **Q. E. D.** stands for *quod erat demonstrandum*, which was to be demonstrated; **Q. E. F.**, which was to be done. In English, **Q** is an abbreviation for *question*.

QUACK, *kwak*, *v. n.* (*kwaaken*, Dutch, *quaken*, Germ. *quaker*, Dan. to croak.) To cry like a duck or goose; to boast; to talk boastfully and ostentatiously;—*s.* a boaster; one who pretends to knowledge which he does not possess; a boastful pretender to medical skill which he does not possess;

QUACKERY—QUADRA.

an empiric; an ignorant practitioner;—*a.* falsely pretending, or falsely alleged, to cure diseases, as *quack medicine*; a *quack doctor*.

QUACKERY, *kwak'ur-e*, *s.* The boastful pretensions or mean practices of an ignoramus, particularly in medicine; empiricism.

QUACKISH, *kwak'ish*, *a.* Like a quack; trickish.

QUACKISM, *kwak'izm*, *s.* The practice of quackery.

QUACKLE, *kwak'l*, *v. n.* (*quacken*, Teut. probably from the guttural exertion required in pronouncing the word.) To be almost choked.—Seldom used.

QUACKLED, *kwak'ld*, } *a.* Almost choked or suf-
QUACKENED, *kwak'nd*, } ficated.—Not in general use.

QUACKSALVER, *kwak'sal-yur*, *s.* (*quacksalvere*, Swed. *quack* and *salve*.) Formerly, one who prepared and sold ointments or salves; a travelling quack; a charlatan.

QUAD, *kwad*, *a.* (*kwaad*, Dutch.) Evil; bad.—Obsolete.

None *quad* (nothing bad.)—Gower.

Quad yere (bad years).—Chaucer.

QUADI, *kwa'di*, *s. plu.* An ancient people of Germany, who inhabited the country north of the Danube; between that river, the mountains of Bohemia, and the river March.

QUADRA, *kwaw'd'ra*, *s.* (Latin, a square.) In Architecture, a square border of frame surrounding a

base-column, &c.: the hands or fillets of the Ionic base on each side of the scotia; the pluck or lower member of the podium.

QUADRAGESIMA, kwad'-je-si-ma, a. (*quadragesima*, forty, Lat.) A papal indulgence multiplying remissions by forty.

QUADRAGESIMA, kwad'-je-si-ma, a. (*Latin*, the fortieth.) In the Calendar, the time of Lent, so called because it consists of forty days. *Quadragesima-Sunday* is the first Sunday in Lent, and about the fortieth day before Easter. In antiquity, the rate of taxation under the Roman Empire, amounting to the fortieth part of the goods.

QUADRAGESIMAL, kwad'-je-si-mal, a. *Latin*; belonging to Lent; used in Lent;—a. an offering solemnly made in the mother church on Mid-Lent Sunday.

QUADRANGLE, kwad'-ing-gul, } a. (*quadratus*, *quadrangular*, kwad'-en-gul'-er-ul, } four, and *angle*, an angle, Latin, a side, Lat.) In Geometry, a figure with four rectilinear sides in the same plane; it has necessarily four angles.

QUADRANGULAR, kwad'-ing-gul'-er, a. *Square*; having four sides and four angles. In Botany, having four prominent angles, as a leaf.

QUADRANS, kwad'-rans, a. (*Latin*, a quarter, a division of the Roman weight called an, consisting of one-fourth of it, or three ounces when the an was of its full weight; a sterling. Before Edward I. a penny or sterling was the smallest coin in the realm, and was marked with a cross, in allusion to being quartered; but, to avoid counterfeit, halfpence and farthings were coined in this reign.

QUADRANT, kwad'-rant, a. (*the fourth part, Lat.*) The fourth part of a circle; an arc of 90°; also the area included between this arc and two radii drawn from the centre to each extremity. An instrument variously constructed, but consisting essentially of an arc of a circle divided into degrees, used for taking the altitude of the sun and stars. In Geometry, the quarter square, an instrument for drawing and pointing circles, circles, &c. It consists of two rectangular blades of wood or brass, having a quadrantal arch between them, divided into 90°, and furnished with a fixed and gliding. *Quadrant of altitude*, an apparatus to measure altitude, consisting of a slip of brass graduated into 90°, of the same length as time as one of the great circles of the globe, and used as a scale for measuring the distance between places in degrees.

QUADRANTAL, kwad'-en-tal, a. Pertaining to a quadrant; included in the fourth part of a circle. In Trigonometry, a quadrantal triangle is a spherical triangle which has one side equal to a quadrant of a circle, or 90°;—a. In Geometry, a figure which has every angle like a right angle. In Antiquity, a vessel of the form described, and by the Romans; originally used as a measure; it contained 50 pounds of water.

QUADRANTAL, kwad'-en-tal, a. (*quadratus*, squared, Lat.) A mathematical instrument for measuring altitudes, called also a geometrical square and line of altitudes. It consists of four plates ruled parallel together at right angles, two of which, adjusted to each other, are graduated from 0° to 180° upon each face; a plummet suspended from the corner remote from the graduated sides, gives the angular distance of any object in which the instrument is directed.

QUADRATE—QUADRIDECIMAL.

directed. It is sometimes constructed as an additional member on the face of compass and other quadrants. In Printing, a piece of metal cut like the letters, to fill up the void space between words, &c. *Quadrats* are of different sizes, called *quadrata*, *quadrato*, &c.

QUADRATE, kwad'-et, a. (*quadratus*, squared, Lat.) Square; having four equal and parallel sides; divisible into four equal parts; exact; suited; fitted; applicable;—a. a square; a surface with four equal and parallel sides. In Astronomy, an aspect of the heavenly bodies, in which they are distant from each other 90°, the same as *quadrile*;—a. a. (*quadrile*, Lat.) to suit; to correspond; to be accommodated—followed by with.

Pertaining to the radius, one of the bones of the fore-arm of the human body; the *radial muscles* belong to the fore-arm—one bends the wrist, and the other extends it. In Geometry, *radial curves* are those of the spiral kind, whose ordinates all terminate in the centre of the including circle, and appear like so many radii of such circle.
- RADIANCE**, ra'de-ans, } *s.* State or quality of be-
RADIANCEY, ra'de-an-se, } ing radiant; brilliant or sparkling lustre; vivid brightness.
- RADIANT**, ra'de-ant, *a.* Shooting or darting rays of light; beaming with brightness; emitting a vivid light or splendour. In Heraldry, a charge when it is represented by rays surrounding it. In Optics, the luminous point or object from which light emanates, that falls on a mirror or lens.
- RADIANTLY**, ra'de-ant-le, *ad.* With beaming brightness; with glittering splendour.
- RADIATA**, ray-de-a'ta, *s.* (Latin, radiated.) The fourth great division of the animal kingdom.—See under Animal.
- RADIATE**, ra'de-ate, *v. n.* (*radio*, Lat.) To issue in rays, as light; to dart, as beams of brightness; to issue and proceed in direct lines from a point; —*v. a.* to enlighten; to illuminate; —*a.* in Botany, a *radiate flower* is a corolla consisting of a disc, in which the corollets are tubular and regular, and of a ray, in which the florets are irregular, ligulate, or strap-shaped; applied also to a flower with fuscous florets set round in the form of a radiant star.
- RADIATED**, ra'de-ay-tid, *a.* Adorned with rays of light. In Mineralogy, having crystals diverging from a centre. Belonging to the division Radiata. The *radiated animals* are among the most frequent organic remains in the transition strata; many of the strata appear almost entirely composed of their mineralized exuviae. These animals comprise all those which were formerly called zoophytes, or animal plants, as the corallines, &c., which were long mistaken for marine vegetables. *Radiated pyrites*, a variety of sulphuret of iron, occurring most commonly in coal-beds. It is found also in veins along with ores of silver, lead, and copper. Colour pale-bronze yellow; streak greyish-black; massive and crystallized; primary form a right rhombic prism. Its constituents are—iron, 46.40; sulphur, 53.60: sp. gr. 4.678 to 4.847; hardness = 6.
- RADIATION**, ray-de-a'shun, *s.* (*radiatio*, Lat.) A shooting in direct lines from a point as a centre; beamy lustre of rays.
- RADICAL**, rad'e-kul, *a.* (*radicalis*, from *radix*, a root, Lat.) Pertaining to the root; origin; primitive; native; fundamental; serving to originate. In Chemistry, equivalent to base, but applied only to acids; chlorine being the *simple radical* of muriatic acid, and cyanogen and iron the *compound radical* of ferro-cyanic acid. In Algebra, a *radical quantity* is one affected by the radical sign.

The *radical sign* $\sqrt{\quad}$, is that by which the root of a quantity is expressed: the particular root is indicated by a small figure placed to the left of this sign, which by itself denotes the square root— $\sqrt[3]{\quad}$, $\sqrt[4]{\quad}$, $\sqrt[5]{\quad}$, express the cube root, the biquadrate, and the 5th roots, respectively. In Music, *radical bass* is the same as Fundamental bass,—which see;—*s.* a *radical principle*; a primitive word; a person who, in politics, seeks fundamental changes in the constitution and government of a country.

- RADICALISM**, rad'e-kal-izm, *s.* The doctrine that every ascertained abuse or evil in the government of a country, or in its constitution, should be immediately and completely reformed.

As strong

As aconitum, or *rash* gunpowder.—*Shaks.*

requiring haste;

My matter is so *rash*.—*Shaks.*

—*s.* (*raschia*, Ital.) an affluence on the skin; —*v. a.* (*raschiare*, to scrape, to grate, Ital.) to slice; to cut in pieces; to divide.

RASHER, rash'ur, *s.* A thin slice of bacon.

RASHLY, rash'le, *ad.* Precipitately; hastily.

RASHNESS, rash'nes, *s.* Precipitation; inconsiderate readiness to decide or act, implying contempt of danger; temerity.

RASING, ra'zing, *s.* The act of marking, with the edge of any tool, figures upon timber, &c. A *rasing-knife* is a particular tool for this purpose.

RASKOLNIKS, ras-kol'niks, *s.* (*raskolo*, a division, Russ.) The most important body of dissenters from the Greek Church in Russia; they differ, however, from the followers of the parent church only in exercising a stricter ecclesiastical discipline, and in the outward forms of religion.

RASORES, ra-so'res, *s.* (*razor*, a scraper, Lat.) An order of birds, including, in Swainson's arrangement, the families—Pavonidae, Tetraonidae, Struthionidae, Columbidae, and Megapodiidae.

RASP, rasp, *s.* (Swed. and Dan.) A raspberry,—which see; a grater; a kind of file in which the cutting prominences are distinct, being raised by punching with a point, instead of cutting with a chisel;—*v. a.* to file with a rasp; to rub or grate to powder with a rasp.

RASPALIA, ras-pa'le-a, *s.* (in honour of M. Raspal, a French botanist.) A genus of plants: Order, Bruniaceae.

RASPATORY, ras-pa-to-re, *s.* A surgeon's rasp.

RASPBERRY, rasp'ber-re, *s.* The well-known fruit of the shrub *Rubus idaeus*: Order, Rosaceae. *Raspberry-bush*, the bramble producing raspberries.

RASURE, ra'zure, *s.* (*rasura*, a shaving, Lat.) The act of scraping or shaving; the act of erasing; an erasure.

RAT, rat, *s.* The common name of a certain species of the genus *Mus*: Order, Rodentia. *Rat-catcher*, one whose profession is to catch rats. *Rat-poison*, the common name of the plant *Chaillitia toxicaria*, a poisonous shrub, a native of Sierra Leone. In the Manege, *rat-tails* are excrescences which creep from the pastern to the middle of the shank of a horse, so called from their resemblance to the tail of a rat. To *smell a rat*, to be suspicious; to suspect danger.

RATABLE, ra'ta-bl, *a.* (from *rate*.) That may be rated, or set at a certain value; liable or subjected by law to taxation.

RATABLY, ra'ta-ble, *ad.* By rate or proportion.

RATAFIA, rat-a-fi'a, *s.* (Fr. and Span. a fine cordial.) A generic name for French and Spanish liqueurs, compounded of alcohol, sugar, and the odoriferous principles of vegetables, especially of the bruised seeds of cherries, apricots, and peaches.

RATCHET—RATHER.

genus of Cirrigrada, in which the body is oval or circular, and provided in the middle with a free probosciform stomach, and with a single row of marginal tentaculiform suckers.

RATCHET, ratsh'et, } *s.* In Mechanics, *ratchet* or *RATCH*, ratsh, } *ratch*, a bar, or piece of mechanism, one extremity of which abuts against the teeth of a *ratchet-wheel*, and the other is either freely jointed to a reciprocating driver, in order to give continuous motion to the wheel, or is attached to a fixed centre, to insure the wheel against reverse motion. In the former case, it is also called a *click* or *pawl*, in the latter, a *detent*. *Ratchet-wheel*, a wheel with angular teeth, against which the ratchet abuts.

RATCHIL, rat'shil, *s.* Among miners, fragments of stone.

RATE, rate, *s.* (Norm. *ratus*, Lat.) The price fixed on anything; settled allowance, as a daily *rate* of provisions; degree; comparative height or value;

I am a spirit of no common *rate*,

The summer still doth tend upon my state.—*Shaks.*

degree in which anything is done, as, the ship sails at the *rate* of seven knots an hour; quantity assignable;

In goodly form comes on the enemy;

And, by the ground they hide, I judge their number, Upon or near the *rate* of thirty thousand.—*Shaks.*

principle on which value is set, as, silver is valued at the *rate* of six shillings an ounce; a tax assessed on property according to its value for public uses, as parish *rates*. In the Navy, the order or class of a ship according to its magnitude or force;—*v. a.* to value at a certain price or degree of excellence; (*rate*, to find fault, Swed.) to chide with vehemence; to reprove;—*v. n.* (from the noun,) to be set in a class, as, a ship *rates* as a ship of the line; to make an estimate. In reference to Architecture, the term *rate* is used in the Building Act to denote the particular class to which a building belongs, in order to determine the thickness of its walls and mode of building.

RATELUS, ra-tel'us, *s.* The Rattel, a genus of quadrupeds allied to the badger: natives of India and the Cape of Good Hope.

RATER, ra'tur, *s.* One who sets a value on or estimates.

RATH, rath, *s.* (Irish.) A hill—obsolete; (*rath*, *raeth*, *hrath*, quick, hasty, Sax.) early; coming before others, or before the usual time;

Bring the *rath* primrose that forsaken dies,
The tufted crow-toe, and pale jessamine.—*Milton.*

—*ad.* soon; betimes; early.

Rath ripe are some, and some of later kind,
Of golden some, and some of purple rind.—*May.*

RATHER, ra'thur, *ad.* (*rathor*, comp. of *rath*, quick, prompt, Sax.: so we use *sooner* in an equivalent sense, as, I would *rather* go, or *sooner* go.) More willingly; with better liking; in preference; with better reason; in a greater degree than otherwise;

But sought in vain,

And nowhere finding, *rather* fear'd her slain.—*Dryden.*
more properly; more correctly speaking;

This is an art

Which does mend nature, change it *rather*, but
The art itself is nature.—*Shaks.*

noting some degree of contrariety in fact, as, it is nothing less, but *rather* more than you stated.

RATHOFITE—RATIONAL.

The rather, especially; for better reason. *Had rather*, said to be a corruption of *would rather*, probably from the latter's being written, *I'd rather*, and the contraction mistaken for *I had*. *I would rather*, I desire in preference.

RATHOFITE, *rat'h-o-fite*, *s.* In Mineralogy, a species of garnet found in Sweden, accompanied by calc-spar and hornblende.

RATIFICATION, *rat-e-fe-ka'shun*, *s.* (from *ratify*.) The act of ratifying; confirmation; the act of giving sanction and validity to something done by another.

RATIFIER, *rat'e-fi-ur*, *s.* He or that which ratifies. **RATIFY**, *rat'e-fi*, *v. a.* (*ratifier*, Fr. from *ratum*, firm, and *facio*, I make, Lat.) To confirm; to establish; to settle; to approve and sanction; to make valid.

RATING, *ra'ting*, *s.* (from *rate*, derived from *rata*, to find fault, Sax.) A chiding; a scolding: (from *rate*, the noun.) In the Royal Navy, the advancement of deserving seamen to be petty officers, which is done at the pleasure of the captain.

RATIO, *ra'she-o*, *s.* (Latin.) In Mathematics, the mutual relation which two magnitudes or quantities of the same kind bear to each other, the comparison being made by considering how often the one contains the other. This relation is expressed by the quotient of the one quantity divided by the other: thus, the ratio of 6 to 3, is $\frac{6}{3}$ or 2; and the ratio of 3 to 6, is $\frac{3}{6}$ or $\frac{1}{2}$. It is usually written 3:6, and read as 3 is to 6. This is *geometrical ratio*, which is always signified when the term is used without distinction; but *arithmetical ratio* is the difference between two quantities: thus, 3 is the arithmetical ratio of 2 to 5.

RATIOCINATE, *rash-e-os'e-nate*, *v. n.* (*ratiocinator*, from *ratio*, reason, Lat.) To reason; to argue.—Seldom used.

RATIOCINATION, *rash-e-os'e-na'shun*, *s.* The act or process of reasoning, or of deducing consequences from premises.

RATIOCINATIVE, *rash-e-os'e-nay-tiv*, *a.* Argumentative; consisting in the comparison of propositions or facts, and the deduction of inferences from the comparison.—Seldom used.

RATION, *ra'shun*, *s.* (French, from *ratio*, proportion, Lat.) A certain allowance or share of provisions.

RATIONAL, *rash'un-al*, *a.* (*rationnel*, Fr. *rationalis*, Lat.) Having the power of reasoning; endowed with reason; agreeable to reason; wise; judicious; —*s.* a rational being. In Arithmetic and Algebra, a *rational quantity* is an expression in definite terms, or one in which no extraction of a root is left, or at least none such indicated, which cannot be extracted by known processes: thus, 2, $\sqrt{9}$, $3\sqrt{a^6}$, are rational quantities, and $\sqrt{2}$, $3\sqrt[3]{9}$, $\sqrt[4]{a^6}$, are irrational or surd quantities, because their values can only be approximated, and not accurately assigned. In Geography, *rational horizon*, the plane passing through the centre of the earth parallel to the *sensible horizon* of the place to which it is referred. In Law, *rationabilis divisio*, a writ which lay, when two lords, in divers towns, had seignories joining together, for him who found his waste land to have been gradually encroached on, thereby to rectify their bounds.—*Cowel*. *Rationabili parte bonorum*, a writ that lay for the wife against the executors of her husband, to have the third part of his goods after his just

RATIONALISM, *rash'un-al-izm*, *s.* A system of opinions deduced from reason, as distinct from revelation, or opposed to it.

RATIONALIST, *rash'un-al-ist*, *s.* A believer in, or adherent of, the system of rationalism.

RATIONALITY, *rash-un-al'e-te*, *s.* The power of reasoning; reasonableness.

RATIONALIZE, *rash'un-al-ize*, *v. a.* To convert to rationalism.

RATIONALLY, *rash'un-al-le*, *ad.* In consistence with reason; reasonably.

RATIONALNESS, *rash'un-al-nes*, *s.* The state of being rational or consistent with reason.

RATLINES, *rat'lins*, *s. plur.* Small horizontal ropes extended over the shrouds, thus forming the steps of ladders for going up and down the rigging and masts. To *rattle the rigging*, is to fix these ratlines.

RATOON, *ra-toon*, *s.* (*retono*, from *retonar*, to sprout again, Span.) A sprout from a sugar-cane which has been cut; also, the heart-leaves in a tobacco plant.

RATSBANE, *rats'bane*, *s.* (rat and bane.) Poison for rats; arsenous acid.

RATSBANED, *rats'baynd*, *a.* Poisoned by ratsbane. Like *ratsban'd rats*.—*Junius*.

RATTAN, *rat-tan*, *s.* Rattans, or canes, are gigantic reeds, the produce of different species of palms (*Calamus ratang*, &c.), principally found on the Malay peninsula and archipelago, where they grow in the forest, climbing over trees to a greater extent than any other known plant. About 4,000,000 rattans are annually imported into Britain, split into stripes, and manufactured into chair-bottoms and similar articles.

RATTANY, *rat'ta-ne*, *s.* (*ratenhia*, native name in Chili.) The root of the plant *Krameria triandra*, which possesses powerful tonic and astringent qualities: written properly, *Rhatany*.

RATTEEN, *rat-tene*, *s.* (*ratina*, Span.) A thick twilled or quilled woollen stuff.

RATTEL.—See *Ratelus*.

RATTINET, *rat-te-net*, *s.* A woollen stuff thinner than ratteen.

RATTLE, *rat'tl*, *v. n.* (*ratelen*, Dutch.) To make a quick, sharp noise, rapidly repeated, by the collision of bodies not very sonorous. When bodies are sonorous, they are said to *jingle*;—to speak eagerly and noisily;—*v. a.* to move anything so as to make a rattle or noise; to stun with a noise; to drive with sharp sounds rapidly repeated; to scold; to rail; to clamour;—*s.* a rapid succession of sharp clattering sounds; a rapid succession of words sharply uttered; an instrument with which a clattering sound is made. In Botany, a name of a plant of the genus *Pedicularis*, lousewort. *Yellow-rattle*, a plant of the genus *Rhinanthus*. *Rattle-headed*, noisy; giddy; unsteady.

RATTLESNAKE, *rat'tl-snake*, *s.* The common name of snakes of the genus *Crotalus*, so named from the rattle they carry at the end of the tail, which is formed by several scaly cornets loosely fitted into each other. *Rattlesnake-fern*, the fern *Botrychium virginicum*, a native of North America. *Rattlesnake-root*, the root of the *Polygala senega*, a

RATTLING—RAVEN.

stimulant said to have proved a serviceable remedy in cases of the bite of the rattlesnake. *Rattle-snake-weed*, a plant of the genus *Eryngium*.

RATTLING, rat'ling, *s.* Noise produced by the wheels of a carriage in rapid motion; any rapid succession of sharp sounds.

RAUCHWACKE, raw-wak'ke, *s.* (German.) In Geology, one of the calcareous members of the Zechstein formation of Germany. It is the equivalent of the Magnesian Limestone formation in England.

RAUCITY, raw'se-te, *s.* (*raucus*, hoarse, Lat.) Hoarseness; a loud rough sound, as that of a trumpet.

RAUCOUS, raw'kus, *a.* (*raucus*, Lat.) Hoarse; harsh, as the voice of a parrot.

RAUGHT, rawt. The old past part. of *reach*.—Obsolete.

RAUNCH.—See *Wrench*.

RAUWOLFIA, raw-wulf'e-a, *s.* (in honour of L. Rauwolf, of Augsburg.) A genus of plants: Order, Apocynaceae.

RAVAGE, rav'aje, *v. a.* To lay waste; to ransack; to spoil; to pillage; to plunder;—*s.* spoil; ruin; waste; destruction by time, as the ravages of time.

RAVAGER, rav'a-jur, *s.* Spoiler; plunderer; the person or thing which lays waste.

RAVE, rave, *v. n.* (*ravelen*, Dutch, *râver*, Fr.) To be delirious; to talk irrationally; to give expression to furious language; in an improper sense, to dote; colloquially, to be unreasonably fond, followed by *upon*;

Thus *raving upon antiquity*.—Locke.

—*s.* the upper side-piece of timber of the body of a cart.—Local.

RAVEL, rav'l, *v. a.* (*raafelen*, and *ravelen*, Dutch.) To entangle; to twist together; to make intricate; to involve; to perplex; to unweave; to unknit; Sleep that knits up the *ravel'd* sleeve of care.—Shaks.

to hurry over in confusion—(not in use);

They but *ravel* over it loosely.—Digby.

—*v. n.* to fall into perplexity or confusion; to work in perplexity; to busy one's self with intricacies; to be unwoven.

RAVELIN, rav'el-in, *s.* (French.) In Fortification, a work that consists of two faces, that make a salient angle, without any flanks, and raised before the counterscarp of the place. In this it differs from a half-moon, which is placed before an angle.

RAVEN, ra'vn, *s.* (*hrafn*, *hrefn*, or *rafn*, Sax. *rabe*, Germ. *raaf*, Dutch.) The *Corvus corax* of Linnaeus, the largest of the crow family, so named from its carnivorous propensities. It is considered, superstitiously, in this country as a bird of ill omen, but the reverse by the Indians of North America;

The *raven* himself is hoarse
That croaks the fatal entrance of Duncan
Under my battlements.—Shaks.

—*v. a.* (*raefian*, Sax.) to devour with great voracity;

Like rats that *raven* down their proper bane.—Shaks.
to obtain by violence;—*v. n.* to prey with rapacity.

Benjamin shall *raven* as a wolf.—Gen. xlix.

Raven's-duck, (*ravenstuck*, Germ.) a kind of sail-cloth.

RAVENER—RAW.

RAVENER, rav'en-ur, *s.* The person or thing that plunders; a bird of the Raptores, or Rapacious order.

REDSEAR, red'sere, *v. a.* (*red* and *sear*.) To break or crack when too hot, as iron under the hammer.—A term of workmen.

REDSHANK, red'shank, *s.* The bird *Scelopax calidris*, or Pool Snipe of Linneus, and Tatanus calidris of Bechstein; it is the Gambet, Horseman, or Red-legged Sandpiper of modern British authors; an appellation of contempt for bare-legged people.

By their actions we might rather judge them to be a generation of highland thieves and *redshanks*.—*Milton*.

REDSTART, red'stärt, *s.* (*red* and *start*, *steort*, a tail, Sax.) The common name of birds of the genus *Phœnicura*.

REDSTREAK, red'streke, *s.* A kind of apple, so called from its red streaks; cyder made from the *redstreak* apples.

REDTAILS, red'tayls, *s.* In Ornithology, the common name of the Anabatinae, a subfamily of the Certhiadae, or Creepers.

REDUCCOR, re-dub'bur, *s.* In Law, one who bought stolen cloth, knowing it to be such, and changed it into some other form or colour in order to disguise it.—*Covel*.

REDUCE, re-duse', *v. a.* (*reduco*, Lat. *reduire*, Fr.) To bring back—(obsolete);

Abate the edge of traitors, gracious lord;

That would *reduce* these bloody days again.—*Shaks.*

to bring to a former state; to reform from any disorder; to bring into any state or condition, good or bad, as, to *reduce* a man to poverty, to *reduce* a substance to powder, to *reduce* a sum to fractions; to diminish in length, breadth, thickness, size, quantity, or value; to lower; to degrade; to subdue; to bring into subjection; to reclaim to order; to bring under rules, or within limits of description; to bring, as into a class, order, genus, or species. In Arithmetic, to change numbers from one denomination to another without altering their value. *Transform* has been properly proposed as expressing this sense more correctly, since the operation does not always imply the bringing down of a dimension or difficulty, but simply the transformation of one quantity to another of equal value. In Algebra, to *reduce equations*, is to clear them of all superfluous quantities, bring them to their lowest terms, and separate the known from the unknown, till at length the two sides consist only of known and of unknown quantities respectively. In Metallurgy, to bring back metals which have been combined with other substances, into the pure metallic state. In Surgery, to restore a displaced part to its original site and relative position in the system. To *reduce a figure, draught, or design*, is to make a copy of it generally smaller than the original, but preserving the form and proportion.

REDUCEMENT, re-duse'ment, *s.* The act of bringing back; the act of diminishing; the act of subduing; reduction.

REDUCENT, re-du'sent, *a.* Tending to reduce;—*s.* that which reduces.

REDUCER—REDUNDANTLY.

REDUCER, re-du'ser, *s.* One who reduces.REDUCIBLE, re-du'se-bl, *a.* That may be reduced.REDUCIBLENESS, re-du'se-bl-nes, *s.* The quality of being reducible.REDUCING, re-du'sing, *part. a.* Bringing to a different state or form. *Reducing scale*, a broad thin slip of boxwood or ivory, with several lines and scales of equal parts marked upon it; used by surveyors for turning chains and links into roods and acres by inspection, and also for reducing maps and draughts from one dimension to another.REDUCT, re-duk't, *v. a.* (*reductus*, reduced, Lat.) To reduce.—Obsolete.To resolve and *reducte* gold into a portable licon.—*Worde* (1561).

In Building, a quirk or a little piece taken out of a larger, to make it more regular and uniform. In Fortification, an advantageous piece of ground, entrenched, and separated from the rest of the camp by a foss, for an army to retire to in case of surprise.

REDUCTION, re-duk'shun, *s.* (French, from *reductio*, Lat.) The act of reducing; the state of being reduced; diminution; conquest; subjugation. In Arithmetic, the changing a quantity of one denomination into an equivalent quantity in another denomination. Probably *transformation* is a more correct term to express this idea. In Algebra, *reduction of equations* is the clearing them of all superfluous quantities, and bringing them to their lowest terms. The same applies to surds, fractions, &c. In Practical Geometry and Drawing, the *reduction* of a figure, design, or draught, is the making a copy of it either larger or smaller than the original, still preserving the form and proportion. In Scotch Law, an action for the purpose of repealing, or rendering null and void, some deed or claim against the party.—*Jacob*. In Metallurgy, the process of converting a metallic oxide into metal by expelling its oxygen. In Surgery, an operation which has for its object the restitution of displaced parts, as of the intestine in hernia, and of bones in dislocation or fracture, to their original site and relations. *Reductio ad absurdum*,—see Absurdum.REDUCTIVE, re-duk'tiv, *a.* (*reductif*, Fr.) Having the power of reducing;—*s.* that which has the power of reducing.REDUCTIVELY, re-duk'tiv-le, *ad.* By reduction; by consequence.REDUNDANCE, re-dun'dans, } *s.* (*redundantia*,
REDUNDANCY, re-dun'dan-se, } Lat.—see Redundant.) Excess or superfluous quantity; superabundance; exuberance. In discourse, superfluity of words.REDUNDANT, re-dun'dant, *a.* Superfluous; exceeding what is natural or necessary; superabundant; exuberant; using more words or images than are necessary or useful. In Mathematics, a *redundant hyperbola* is a curve of the higher kind, so called because it exceeds the conic section of that name in the number of its hyperbolic legs, it being a triple hyperbola, with six hyperbolic legs. In Music, a *redundant chord* is one which contains a greater number of tones, semitones, and lesser intervals, than it does in its natural state, as from *fa* to *sol* sharp.REDUNDANTLY, re-dun'dant-le, *ad.* Superfluously; superabundantly.

REDUPLICATE—REEF.

REDUPLICATE, re-dup'le-kate, *v. a.* (*reduplico*, Lat.)To double;—*a.* double.REDUPLICATION, re-du'ple-ka'shun, *s.* The act of doubling. In Rhetoric, a figure wherein a verse ends with the same word with which the following begins.REDUPLICATIVE, re-dup'le-ka-tiv, *a.* Double.REDUVII, re-doo've-i, *s.* (*reduvius*, one of the genera.) A family of Hemipterous insects, of which Reduvius is the type.REDUVIUS, re-doo've-us, *s.* (*reduvia*, looseness of the skin, Lat.) A genus of Hemipterous insects: Family, Reduvi.REDWING, red'wing, *s.* The bird *Merula Iliaca*, a species of Thrush; the *Turdus Iliaca* of Linnaeus.REE, } re, *s.* A Portuguese money of account. The
REA, } *milree* is a silver coin representing 1000
rees, and is of the value of 4s. 8d. sterling;—*v. a.*
(a small riddle, Scotch,) to riddle; to sieve.After malt is well rubbed and winnowed, you must then *ree* it over in a sieve.—*Mortimer*.RE-ECHO, re-ek'o, *v. a.* (*re* and *echo*.) To echo back; to reverberate again, as, the hills *re-echo* the roar of cannon;—*v. n.* to echo back; to be reverberated;And a loud groan *re-echoes* from the main.—*Pope*.—*s.* the echo of an echo.REECHY, re'ke, *a.* (probably a corruption of Reeky.) Smoky; sooty; tarnished with smoke.

The kitchen malkin purs

Her richest lockram 'bout her *reechy* neck.—*Shaks*.REED, reed, *s.* (*reed*, Sax. *riet*, Dutch.) The common name of many aquatic plants, most of them large grasses with hollow-jointed stems, such as the common reed of the genus *Arundo*, bamboo, &c. The *bur-reed*, or *reed-grass*, is of the genus *Spartanum*; the *Indian flowering-reed*, of the genus *Canna*, *reed-mace*, a plant of the genus *Typha*; a musical pipe, *reeds* being anciently used for musical instruments; the little movable tube at the mouth of a hautboy and other wind instruments. *Reed-stops*, the stops of an organ, consisting of pipes furnished with narrow plates of brass; an arrow, made of a reed, headed; a weaver's instrument for separating the threads of the warp, and driving each thread of the woof into its proper position in the cloth; thatch. In Hebrew Antiquity, a measure of length equal to three yards three inches. *Reed-crowned*, crowned with reeds.REED'D, reed'ed, *a.* Covered with reeds; formed with channels and ridges like reeds.REEDEN, reed'n, *a.* Consisting of a reed or reeds, as *reeden* pipes.RE-EDIFICATION, re-ed-e-fe-ka'shun, *s.* (from *Re-edify*.) Act or operation of rebuilding; state of being rebuilt; a new building.RE-EDIFY, re-ed'e-fi, *v. a.* (*reédifier*, Fr. *re* and *edify*.) To rebuild; to build again after destruction.REEDING, reed'ing, *s.* A number of beaded moldings joined together, as is often seen in chimney jambs, wooden pilasters, common picture frames, &c.REEDLESS, reed'les, *a.* Destitute of reeds.REEDY, reed'e, *a.* Abounding with reeds.REEF, reef, *s.* (Dutch, *rie* or *rijs*, Dan.) In Ships, a certain portion of a sail, comprehended between the top or bottom, and a row of eyelet holes parallel thereto. *Reef-band*, a piece of canvas sewn across the sail to strengthen it in the place

REEFY—RE-ESTABLISH.

where the eyelet holes of the reef are formed. *Reef-hanks*, short pieces of small line sewed at certain distances on the reefs of boom-sails. *Reef-lines*, small ropes by which the seamen formerly reefed the courses. *Reef-tackle*, a rope which passes from the deck through a block at the top-masthead, and is afterwards attached to a cringle; (*riff*, Germ. *rif*, Dutch,) a chain or range of rocks lying at or near the surface of the water;—*v. a.* to reduce a sail by taking in one or more reefs. *Close-reefed*, applied to that position of the sails when all the reefs are taken in.

REEFY, reef'e, *a.* Full of reefs or rocks.

REEN, reek, *s.* (*rec*, Sax.) Smoke; vapour; steam; 'Tis as hateful to me as the reek of a lime-kiln.—*Shaks.*

a rick,—which see;—*v. n.* (*recan*, Sax.) to steam; to exhale; to emit vapour.

REEKING, reek'ing, *part. a.* Smoking; steaming.

I found me laid

In balmy sweat; which with his beams the sun
Soon dry'd, and on the reeking moisture fed.—*Milton.*

REEKY, reek'e, *a.* Smoky; soiled with smoke or steam; foul.

Shut me in a charnel-house,
O'ercover'd quite with dead men's rattling bones,
With reeky shanks and yellow chapless skulls.—*Shaks.*

REEL, reel, *s.* (*hreeol*, *reol*, Sax.) A frame or machine turning on an axis, on which yarn is extended for winding either into skeins, or from skeins on to spools and quills; a nautical instrument on which lines of various uses are wound, as the log line, deep-sea line, &c., and named accordingly *log-reel*, &c.; an angler's implement attached to the butt of the rod, for the purpose of winding in the line when a fish is hooked; a lively dance peculiar to Scotland, generally written in common time of four crotchets in a bar, but sometimes in jig time of six quavers;—*v. a.* to gather yarn from the spindle;—*v. n.* (*ragla*, Swed.) to stagger: to incline, in walking, first to one side, then to the other; to vacillate.

RE-ELIGIBILITY, re-el-ij-e-bil'e-te, *s.* (*re* and *elegibility*.) Capacity of being again elected to the same office.

RE-ELIGIBLE, re-el-ij'e-bl, *a.* Capable of being again elected to the same office.

RE-EMERGE, re-e-merj', *v. n.* To emerge after being plunged, obscured, or overwhelmed.

REEMING, reem'ing, *s.* The opening of the seams between the planks of vessels by caulking-irons, for the purpose of recaulking them.

RE-ENFORCE, re-en-forse', *v. a.* (*re* and *enforce*.) To strengthen with new assistance or support. It is also sometimes written *reinforce*.

RE-ENFORCEMENT, re-en-forse-ment, *s.* The act of re-enforcing; additional force; fresh assistance; any augmentation of strength or force by something added.

RE-ENTER, re-en'tur, *v. a.* and *v. n.* (*re* and *enter*.) To enter anew. In Engraving, to pass the graver into those incisions of the plate so as to deepen them, where the aquafortis has not bitten in sufficiently.

RE-ENTERING, re-en'tur-ing, *part. a.* Entering anew; entering in return, as a *re-entering angle* in fortification, that is, an angle pointing inwards.

RE-ENTHrone, re-en-throne', *v. a.* (*re* and *enthroned*.) To replace on the throne; to enthrone again.

REER-MOUSE.—See *Rear-mouse*, under *Rear*.

RE-ESTABLISH, re-es-tab'lish, *v. a.* (*re* and *estab-*

RE-ESTABLISHMENT—REFEREE.

lish.) To establish anew; to fix; to confirm again, as to *re-establish* health.

RE-ESTABLISHMENT, re-es-tab'lish-ment, *s.* The act of establishing again; the state of being re-established; renewed confirmation; restoration.

REEVE, reev, *s.* (*gerefa*, an officer or governor, Sax.) A steward.—Obsolete.

The reeve, miller, and cook are distinguished.—*Dryden.*

This word is still used in Composition, as in *sheriff*, *i. e.* shire-reeve; *borough-reeve*; *port-reeve*, &c.—*v. n.* in Navigation, to pass the end of a rope through any hole, as the channel of a block.

RE-EXCHANGE, re-eks-tshanje', *s.* (*re* and *exchange*.) A renewed exchange. In Commerce, the price of a new exchange due on a protested bill.

RE-EXPORTATION, re-eks-pore-ta'shun, *s.* The act of exporting what has been imported.

REFALO.—See under *Record*.

REFECT, re-fekt', *v. a.* (*refectus*, refreshed, from *reficio*, I refresh, Lat.) To refresh; to restore after hunger or fatigue.—Obsolete.

REFECTION, re-fek'shun, *s.* (French, *refectio*, Lat.) Refreshment after hunger or fatigue; a spare meal or repast.

For sweet refectio due,

The genial viands let my train renew.—*Pope.*

REFECTIVE, re-fek'tiv, *a.* Refreshing; restoring;—*s.* that which refreshes.

REFECTORY, re-fek'tur-e, *s.* A room of refreshment; an eating-room; properly, a hall or apartment in convents and monasteries, where a moderate repast is taken.

REFEL, re-fel', *v. a.* (*refello*, Lat.) To refute; to disprove; to repress.—Little used.

How he refell'd me, and how I reply'd.—*Shaks.*

Friends, not to refel ye,
Or any way quell ye.—*Ben Jonson.*

REFER, re-fer', *v. a.* (*refero*, Lat. from *re* and *fero*, I bear.) To direct, leave, or deliver over to another person or tribunal for information or decision; to reduce, as to the ultimate end;

You profess and practise to refer all things to yourself.—*Bacon.*

to reduce; to assign, as to a certain order, genus, or class.

The salts, predominant in quick lime, we refer rather to lixiviate, than acid.—*Boyle.*

To refer one's self, to betake; to apply;

The heir of this kingdom hath referred herself unto a poor but worthy gentleman.—*Burnet.*

—*v. n.* to respect; to have relation;

Of those places that refer to the shutting and opening of the abyss.—*Burnet.*

to appeal; to have recourse to; to apply; to allude; to have respect to by intimation, without naming, as to refer to a well-known fact.

REFERABLE, ref-ur-a-bl, *a.* That may be referred; capable of being considered in relation to something else; that may be assigned, as to a particular class.

REFEREE, ref-ur-e', *s.* One to whom anything is referred, particularly a person appointed by a court to hear, examine, and decide a cause between parties pending before the court, and make report to the court.

REFERENCE—REFLECT.

REFERENCE, ref-ur-ens, *s.* A sending, dismissal, or direction to another for information; relation; respect; view toward; allusion to. In Law, the process of assigning a cause depending in court, for a hearing and decision, to persons appointed by the court.

REFERENDARY, ref-ur-en'dur-e, *s.* One to whose decision a cause was referred—(obsolete);

In suits, it is good to refer to some friends of trust; but let him chuse well his *referendaries*.—*Bacon*.

an officer who delivered the royal answer to petitions.

REFERMENT, re-fer'ment, *s.* Reference for decision.

REFERRIBLE, re-fer're-bl, *a.* Referable,—which see.

REFIND, re-finde', *v. a.* (*re* and *find*.) To find again; to experience anew.

REFINE, re-fine', *v. a.* (*refiner*, Fr. *refinar*, Span. and Port.) To purify; to dehydrate; to defecate; to clarify; to separate metallic substances from all other matter; to purify from what is gross, clownish, or vulgar; to polish; to make elegant; to remove vulgar words and barbarisms; to give a nice and delicate perception of beauty and propriety to; to give or implant in the mind a nice perception of truth, justice, and propriety. To *refine the heart or soul*, to cleanse it from all carnal or evil affections and desires, and implant in it pure and heavenly affections.—*v. n.* to improve in accuracy, delicacy, or in anything that constitutes excellence; to become pure; to be cleared of feculent matter; to affect nicety.

REFINED, re-finde', *part. a.* Purified; separated from what is coarse or improper, as, *refined wit*, *refined sugar*.

REFINEDLY, re-fi'nid-le, *ad.* With affected nicety or elegance.

REFINEMENT, re-fi'nid-nes, *s.* State of being refined; purity; refinement; affected purity.

REFINEMENT, re-fine'ment, *s.* The act of purifying by separating from a substance all extraneous matter; a clearing from dross, drugs, or recreation; the state of being pure; polish of language; purity; polish of manners; elegance; nice observation of the civilities of social intercourse, and of graceful decorum; purity of taste; purity of mind and morals; purity of heart; artificial practice; subtlety;

The rules religion prescribes are more successful in public and private affairs, than the *refinements* of irregular cunning.—*Hogers*.

affection of nicety, or of elegant improvement.

REFINER, re-fi'nur, *s.* One who refines metals or other things; an improver in purity and elegance, as a *refiner* of language; an inventor of superfluous subtleties; one who is overnice in discrimination, in argument, reasoning, philosophy, &c.

REFINERY, re-fi'nur-e, *s.* The place and apparatus for refining metals.

REFINING, re-fi'ning, *s.* The use of too much refinement or subtlety; great nicety of speculation. In Metallurgy, the separation of the metal from all other matters; particularly applied to the separation of gold and silver from metals with which they are alloyed.

REFIT, re-fit', *v. a.* (*re* and *fit*.) To fit or prepare again; to repair; to restore after damage or decay.

REFLECT, re-flekt', *v. a.* (*reflecto*, from *re* and *flecto*, I bend, Lat.) To throw back; to return;—*v. n.*

534

REFLECTED—REFLEXION.

to throw back light; to return rays or beams; to bend back; to throw or turn back the thoughts upon the past operations of the mind, or upon past events; to consider attentively; to revolve in the mind; to contemplate; to bring reproach.

Errors of wives *reflect* on husbands still.—*Dryden*.

To *reflect on*, to cast censure or reproach.

REFLECTED, re-flek'ted, *part. a.* Thrown back; returned, as *reflected light*.

REFLECTENT, re-flek'tent, *a.* Bending or flying back, as a *reflectent ray*.

REFLECTIBLE, re-flek'te-bl, *a.* Capable of being reflected or thrown back.

REFLECTING, re-flek'ting, *part. a.* Turning back; given to reflection or serious consideration. *Reflecting on*, casting censure or reproach. In Astronomy, *reflecting circle*, an instrument for measuring angles. It is a modification of Hadley's quadrant; one of the objects of the angle is measured by direct vision, and the other by reflection from plane mirrors. *Reflecting dial*, a kind of dial which shows the hour by means of a mirror so placed as to throw the sun's rays to a part of a ceiling on which the hour lines are drawn. *Reflecting telescope*, a telescope so called on account of the speculum with which it is furnished, and in which the *reflected* image of the object under examination is viewed.

REFLECTINGLY, re-flek'ting-le, *ad.* With reflection; with censure.

REFLECTION, re-flek'shun, *s.* The act of bending back; that which is reflected; the operation of the mind, by which it turns its views upon itself and its operations; thought thrown back on itself, on the past, or on the absent, as, melancholy *reflections*, painful *reflections*; the expression of thought; attentive consideration; meditation; contemplation; censure; reproach cast. In Physics, the resiliency of a rapidly moving body, as light, from the surface of another body by which its progress is arrested, at an angle equal to that of its incidence. The *angle of reflection*, is the angle at which a ray of light leaves a reflecting surface; it is always equal to the angle of incidence.

REFLECTIVE, re-flek'tiv, *a.* Throwing back images; considering things past, or the operations of the mind, as *reflective* reason.

REFLECTIVELY, re-flek'tiv-le, *ad.* By reflection.

REFLECTOR, re-flek'tar, *s.* One who reflects or considers; that which reflects; a speculum.

REFLEX, re-fleks, *a.* (*reflexus*, Lat.) Directed back, as a *reflex* act of the mind; applied to the parts of a painting illuminated by light reflected from another part of the same picture. In Botany, bent back; reflected.

REFLEX, re-fleks', *s.* Reflection—(obsolete);

I'll say yon gray is not the morning's eye,
'Tis but the pale *reflex* of Cynthia's brow.—*Shaks*.

—*v. a.* to reflect;

May never glorious sun *reflex* his beams
Upon the country where you make abode.—*Shaks*.

to bend back; to turn back.

A dog lay,—his head *reflex* upon his tail.—*Gregory*.

—Little used as a verb.

REFLEXIBILITY, re-flek-se-bil'e-te, *s.* The quality of being reflexible.

REFLEXIBLE, re-flek'se-bl, *a.* Capable of being reflected or thrown back.

REFLEXION.—See Reflection.

REFLEXITY—REFRACTED.

REFLEXITY, re-flek'se-te, *s.* Capacity of being reflected.

REFLEXIVE, re-flek'siv, *a.* Having respect to something past.

REFLEXIVELY, re-flek'siv-le, *ad.* In a direction backward; with a regard to censure or reproach.

REFLOAT, re-floate', *s.* (*re* and *float*.) Reflux; ebb; a flowing back.—Obsolete.

The main and *refloat* of the sea.—*Bacon*.

REFLUENT, reflu-ent, *a.* Flowing back; ebbing; returning, as the *refluent* blood.

REFLUX, re-fluks, *s.* (French, *refluxus*, Lat. from *re* and *fluo*, I flow.) A flowing back; the returning of a fluid, as the flux and *reflux* of the tides.

REFOCILLATE, re-fo-sil-late, *v. a.* (*refocillo*, Lat.) To refresh; to revive; to give new vigour to.—Little used.

REFOCILLATION, re-fo-sil-la'shun, *s.* The act of refreshing or giving new vigour; restoration of strength by refreshment.—Little used.

REFORM, re-fawm, *v. a.* (*reformer*, Fr. *reformo*, from *re* and *formo*, I form, Lat.) To form anew; to create or shape again.

REFORM, re-fawm', *v. a.* To change from worse to better; to amend; to correct; to restore to a former good state; to change from bad to good; to remove that which is evil or corrupt;—*v. n.* to abandon that which is evil or corrupt, and return to a good state; to be amended or corrected;—*s.* reformation; amendment of what is defective, vicious, corrupt, or depraved.

REFORMADO, re-fawr-ma'do, *s.* (Spanish.) A monk who adheres to the reformation of his order; an officer retained in a regiment when his company is disbanded.—Little used in the last sense.

REFORMALIZE, re-fawr-ma-lize, *v. n.* To affect reformation; to pretend correctness.

Christ's doctrine (is) pure, correcting all the unpure glosses of the *reformalizing* Pharisees.—*Lee* (1614).

REFORMATION, ref-awr-ma'shun, *s.* The act of forming anew; a second forming in order; the act of reforming; correction or amendment of life, manners, or of anything vicious or corrupt. By way of eminence, the change of religion from the corruptions of popery to its primitive purity, begun by Luther, A.D. 1517.

REFORMATIVE, re-fawr-ma-tiv, *a.* Forming anew; having the quality of renewing form.

REFORMATORY, re-fawr-ma-tur-e, *a.* Tending to produce reformation.

REFORMED, re-fawm'd, *part. a.* Corrected; amended; restored to a good state, as the *reformed* church.

REFORMER, re-fawr'mur, *s.* One who effects a reformation or amendment; one of those who commenced the reformation of religion from the corruptions of popery; one who advocates political reform.

REFORMIST, re-fawr'mist, *s.* One who is of the reformed religion; one who proposes or favours political reform.

REFOSSION, re-fosh'un, *s.* (*refossus*, dug up, Lat.) The act of digging up.

Hence are murders of men, rapes of virgins, mangling of carcases, *refossion* of graves.—*Bp. Hall*.

REFRACT, re-frakt', *v. a.* (*refractus*, broken, from *re* and *frango*, I break, Lat.) To break the rectilinear course of the rays of light, or to cause them to deviate from a direct course.

REFRACTED, re-frakt'id, *part. a.* Turned from a

REFRACTING—REFRESH.

direct course, as *refracted* light. In Botany, bent back at an acute angle, as a *refracted* corolla.

REFRACTING, re-frak'ting, *part. a.* That turns from a direct course, as a *refracting* medium. *Refracting telescope*, one which shows the magnified image of an object, by means of rays of light refracted and collected into a focus through lenses.

REFRACTION, re-frak'shun, *s.* The deviation of a moving body from a direct course. In Optics, the deviation of a ray of light from its previous course, in entering a medium of a different density. *Astronomical refraction* is the apparent angular elevation of the celestial bodies above their true places, caused by the *refraction* of the rays of light in their passage through the earth's atmosphere. *Angle of refraction*, the angle made by a ray of light and a perpendicular to the surface of the medium through which it is passing: it always bears a constant ratio to the angle of incidence, which ratio is called the *index of refraction*, and constitutes the measure of the refractive power of the medium.—See *Refractive power*, under *Power*. *Double refraction* is the separation of a ray of light into two separate parts, by passing through certain mediums, as Iceland spar. All crystals, except those whose primitive form is either a cube or a regular octahedron, exhibit double refraction.

REFRACTIVE, re-frak'tiv, *a.* Having the power of refraction; pertaining to refraction.

REFRACTORINESS, re-frak'tur-e-nes, *s.* (from *Refractory*.) Perverse or sullen obstinacy in opposition or disobedience.

REFRACTORY, re-frak'tur-e, *a.* (*refractaire*, Fr. *refractorius*, from *refragor*, I resist, Lat.) Obstinate; perverse; contumacious; unmanageable; obstinately unyielding; applied to metals, difficult of fusion;—*s.* a person obstinate in opposition or disobedience; obstinate opposition.—Obsolete in the last sense.

Glorying in their scandalous *refractoriness* to public order and constitutions.—*Bp. Taylor*.

REFRAGABLE, ref-ra-ga-bl, *a.* That may be refuted.

REFRAIN, re-frano', *v. a.* (*refrēner*, Fr. *refrāno*, from *re* and *frēno*, I curb, Lat.) To hold back; to restrain; to keep from action;—*v. n.* to forbear; to abstain;—*s.* the burden of a song, or return to the first part, as in a *rondeau*.

REFRANGIBILITY, re-fran-je-bil'e-te, *s.* In Optics, the disposition of the rays of light to be refracted, or turned out of a direct course, in passing out of one transparent medium into another.

REFRANGIBLE, re-fran'je-bl, *a.* (*re* and *frango*, I break, Lat.) Capable of being refracted.

REFREINATION, ref-re-na'shun, *s.* (see *Refrain*.) The act of refraining.—Not used. *Refrenation*, in Astrology, the condition of a planet, when, applying to another by conjunction of aspect, it becomes retrograde before it draws near.

REFRESH, re-fresh', *v. a.* (*refraichir*, from *re* and *fraichir*, to freshen, Fr.) To cool; to allay heat; A dew coming after heat *refresheth*.—*Ecclesiasticus* xliii. 22.

to give new strength; to invigorate; to relieve after fatigue; to revive; to reanimate after depression; to cheer; to enliven; to improve by new touches anything impaired;

The rest *refresh* the scaly snakes, that sold
The shield of Pallas, and renew their gold.—*Dryden*.

—*s.* the act of refreshing.—Obsolete.

My field of flowers, quite bereaven,
Wants *refresh* of better hap.—*Daniel*.

REFRESHER—REFUND.

REFRESHER, re-fresh'ur, *s.* That which refreshes. The kind *refresher* of the summer heats.—*Thomson*.

ticular or positive.—Obsolete in this sense.

I'll have grounds

More *relative* than this.—*Shaks*.

In Grammar, a *relative* pronoun is a word which
relates to a word, a sentence, or member of a sen-
tence, generally preceding it, and which is called
its *antecedent*, as, 'he seldom lives frugally, *who*
lives by chance;' 'Judas declared him innocent,
which he could not be, if he had deceived his dis-
ciples.' The simple *relative* pronouns are *who*,
which, and *that*; *what* includes both the *antece-*
dent and its *relative* pronoun. By some gram-
marians, the *relative* and *antecedent* are more
correctly, and with greater elegance and simplicity,
denominated *cor-relatives*. In Logic, *relative terms*,
terms which imply relation, as guardian and ward;
master and servant; husband and wife. In Music,

God resisteth the proud, but giveth grace to the humble.—*James iv.*

—*v. n.* to make opposition.

All the regions
Do seemingly revolt; and who resist
Are mocked for valiant ignorance,
And perish constant fools.—*Shaks.*

RESISTANCE, re-zis'tans, *s.* The act of resisting; quality of not yielding to force or external impression; opposition. In Physics, any power that acts in opposition to another, so as to diminish or destroy its effect.

RESISTANT, re-zis'tant, *s.* The person or thing that resists.

RESISTER, re-zist'ur, *s.* One who resists; that which resists.

RESISTIBILITY, re-zist-e-bil'e-te, } *s.* The quality
RESISTIBLENESS, re-zist'e-bl-nes, } of resisting;
the quality of being resistible, as, the *resistibility* of grace.

RESISTIBLE, re-zist'e-bl, *a.* That may be resisted.

RESISTIBLY, re-zist'e-ble, *ad.* In a resistible manner.

RESISTIVE, re-zist'iv, *a.* Having the power to resist.

RESISTLESS, re-zist'les, *a.* Irresistless; that cannot be opposed.

RESISTLESSLY, re-zist'les-le, *ad.* So as not to be opposed or resisted.

RESISTLESSNESS, re-zist'les-nes, *s.* State of being irresistible.

RESOLUBLE, rez'o-lu-bl, *a.* (*re* and *solubilis*, Lat. see *Resolve*.) That may be melted or dissolved.

RESOLUTE, rez'o-lute, *a.* (*resolu*, Fr. *resoluto*, Ital.) Having a fixed purpose—hence determined; fixed; steady; firm; constant in pursuing a purpose;—*s.* a determined person; one bent to a particular purpose.—Not used as a noun.

Young Fortinbras

ing difficulties. In Chemistry, analysis, the process of separating the component parts of bodies. In Geometry, the orderly enumeration of the things to be done, to obtain what is required in a problem. A problem may be divided into three parts—the proposition, the *resolution*, and the demonstration. In Pathology, the subsidence of inflammation without abscess, ulceration, mortification, &c. Also, the dispersion of swellings, indurations, &c. In Music, the writing out of a canon or fugue in partition from a single line. *Resolution of a discord*, the descent by a tone or a semitone, according as the mode may require, of a discord which has been heard in the preceding harmony. In Algebra, *resolution of equations*, the finding of the values which the unknown quantity or quantities must have, so as to fulfil the conditions expressed in the proposed equation. In Mechanics, *the resolution of forces* is the act of finding the quantity of two or more forces or motions, which, taken together, shall produce a given resultant,—see Resultant. This is the reverse of *composition of forces*.

RESOLUTIONER, rez-o-lu'shun-ur, *s.* One who joins in the declarations of others.—Not in use.

Sharp was employed by the *resolutioners* of Scotland.—*Burnet*.

RESOLUTIVE, rez'o-lu-tiv, *a.* Having the power to dissolve or relax.

RESOLVABLE, re-zolv'a-bl, *a.* That may be resolved or reduced to first principles.

RESOLVABLENESS, re-zolv'a-bl-nes, *s.* State of being resolvable.

To clear of doubt; to inform; to fix in a determination; to solve; to clear; to fix in constancy; to settle an opinion; to confirm; in a primary sense, to loosen the parts of; to analyse; to reduce in its component parts; to melt; to dissolve; to disperse;

Oh that this too solid flesh would melt,
Thaw, and resolve itself into a dew.—*Shaks.*

to relax; to lay at ease;

And how his limbs, resolved through idle leisure,
Unto sweet sleep he may securely lend.—*Spenser*.

—*v. n.* to determine in mind; to determine by vote; to be settled in opinion; to melt; to be dissolved.

Have I not hideous death within my view,
Retaining but a quantity of life,
Which bleeds away even as a form of wax
Resolveth from its figure against the fire!—*Shaks.*

In Medicine, to disperse; to scatter; to discuss, as an inflammation or tumour. In Algebra, *to resolve an equation* is to find the values which the unknown quantity or quantities must have in order to fulfil the conditions of the problem. In Music, *to resolve a chord or dissonance*, is to carry it according to rule into a consonance in the subsequent chord;—*s.* resolution; fixed determination.

Rome attends her fate from our resolves.—*Addison*.

RESOLVEDLY, re-zolv'ed-le, *ad.* With firmness of determination.

RESOLVEDNESS, re-zolv'ed-nes, *s.* Resolution; constancy of purpose; firmness of mind.

RESOLVENT, re-zolv'ent, *s.* That which has the power of causing solution. In Pathology, a substance employed to allay inflammation and prevent suppuration; a discutient.

RESOLVER—RESPECT.

RESOLVER, re-zolv'ur, *s.* One who forms a firm resolution; whatever solves or clears;

A good *resolver* of all cases of conscience.—*Burnet*.
that which dissolves or separates dozes.

Water is found, when not cold, to be a great *resolver* of spasms.—*Burke*.

RESOLVING, re-zolv'ing, *s.* The act of determining or forming a resolution.

RESONANCE, rez'o-nans, } *s.* A resounding; a re-
RESONANCY, rez'o-nan-se, } verberation of sound,
as from the case or sides of a hollow-stringed instrument.

RESONANT, rez'o-nant, *a.* Resounding; echoing back.

RESORB, re-sawrb', *v. a.* (*resorbeo*, from *re* and *sorbeo*, I drink in, Lat.) To swallow up.

By fate *resorbed*, and sunk in endless night.—*Young*.

RESORBENT, re-sawrb'ent, *a.* Swallowing up.

Again *resorbent* ocean's wave
Receives its waters, which it gave,
From thousand rills with copious currents fraught.
—*Wadswell*.

REVEREND, rev'er-end, *a.* Worthy of reverence; entitled to respect, mingled with fear and affection; a title of respect, assumed by ecclesiastics: a common parson or minister is styled *reverend*; a bishop, *right reverend*; an archbishop, *most reverend*; a dean, the principal of a Scottish college and a presbyterian synod, *very reverend*; the general assembly of the Church of Scotland, *venerable*; the religions in catholic countries are styled *reverend fathers*; abbesses, prioresses, &c. *reverend mothers*. Such titles are not of scriptural origin, and are condemned by various dissenting bodies.

REVERENT, rev'er-ent, *a.* (*reverens*, Lat.) Expressing reverence, veneration, or submission; submissive; humble; impressed with reverence.

REVERENTIAL, rev'er-en'shal, *a.* Expressing reverence; proceeding from awe and veneration.

REVERENTIALLY, rev'er-en'shal-le, *ad.* With show of reverence.

REVERENTLY, rev'er-ent-le, *ad.* With reverence; with respectful regard; with veneration; with fear of what is great or terrifying.

So reverently men quit the open air,

When thunder speaks the angry gods abroad.—

Dryden.

REVERER, re-ve'rur, *s.* One who reveres.

REVERIE, } rev'er-e, *s.* (*reverie*, Fr.) A loose irre-
REVERY, } regular train of thought; a wild extravagant conceit of the fancy or imagination; a chimera; a vision. In Pathology, inactivity of the attention to the impressions of surrounding objects. There are three species, according to Dr. Good, of this mental aberration:—*Absence of mind*, in which the attention is truant, and does not yield readily to the dictates of the will. *Absence of mind*, in which the attention is riveted, at the instigation of the will itself, to some particular theme unconnected with surrounding objects. *Brown study*, in which the attention has the consent of the will to relax itself, and give play to whatever ideas are uppermost.

REVERSAL, re-ver'sal, *a.* Intended to reverse; implying reverse;

*After his death there were *reversal* letters found among his papers.—*Burnet.*

—*s.* a change or overthrowing, as, *reversal* of sentence. In Law, *reversal* of judgment, making it void by reason of error.

REVERSE, re-vers', *v. a.* (*reverso*, *reversus*, Lat.) To turn upside down; to overturn; to subvert; to turn to the contrary; to put each in the place of the other. In Law, to overthrow by a contrary decision; to make void; to annul; to recall or renew.—(obsolete in this sense);

Well knowing true all he did rehearse,

And to his fresh remembrance did *reverse*

The ugly view of his deformed crimes.—*Spenser.*

—*v. n.* to return.—(obsolete):

Beene they all dead and laid in doleful hearse,

Or doen they only sleepe, and shall again *reverse*.—

Spenser.

—*s.* change; vicissitude; a turn of affairs; change for the worse; misfortune; a contrary; an opposite;—(*revers*, Fr.) in Numismatics, the opposite to the obverse or face of the coin or medal.

REVERSED, re-verst', *part. a.* Turned side for side, or end for end; changed to the contrary. In Law, overturned or annulled. In Heraldry, applied to a coat of arms or an escutcheon, turned upside down by way of ignominy, as in the case of a traitor. In Conchology, a *reversed shell* is one,

 promotes revivals of religion.
REVIVE, re-viv'e, *v. n.* (*revivre*, Fr. *re* and *vivo*, I
 live, Lat.) To return to life; to recover life; to
 return to vigour or fame; to be reanimated after
 depression; to recover from a state of languor,
 oblivion, obscurity, neglect, or depression. In
 Chemistry, to recover a purely metallic state from
 a combination with oxygen or other matter. In
 Scripture, *sin revives* when the conscience is
 awakened by a conviction of guilt;—*v. a.* to bring
 again to life; to reanimate; to renew; to bring
 into action after a suspension; to bring back to
 the memory; to recall; to raise from languor, in-
 sensibility, neglect, or depression; to recomfort;
 to quicken; to refresh with hope and joy; to
 bring again into notice;
Revive the libels born to die.—*Swift*.

 A rhapsody of words.—*Shaks.*

This confusion and rhapsody of difficulties was not to be supposed in a single sinner.—*Hammond*.

RHAPTOSTYLUM, rap-tos'te-lum, *s.* (*raptos*, sewed together, and *stilos*, a style, Gr. the styles being

joined together.) A genus of plants with minute white flowers, natives of New Granada: Order, Aquifoliaceae.

RHATANY, rat'a-ne, *s.* In Pharmacy, the root of the *Krameria triandra*, used as an astringent. It is imported from Peru, and consists of cylindrical ramifications, varying in size from that of a quill to a finger.

RHATHYMUS, rat'h'e-mus, *s.* (*rhythmus*, lazy, sluggish, Gr.) A genus of Hymenopterous insects: Family, Anthophyla.

RHEA, re'a, *s.* (Greek.) The daughter of Cœlus and Terra, wife of Saturn, and mother of Jupiter, Vesta, Ceres, Juno, Pluto, Neptune, &c. Residing with her husband in Italy, her benevolence was so great, that the golden age of Saturn is sometimes called the age of Rhea. In Ornithology, a genus of birds belonging to the Struthionidae, or Ostrich family.

RHEDA, re'da, *s.* (Latin.) In Roman Antiquity, a four-wheeled carriage drawn by eight or ten horses, invented by the Gauls.

RHEEDIA, re'de-a, *s.* (in honour of Henry Reede Van Draakenstein, author of 'Hortus Malabaricus,' in 10 vols. folio.) A genus of plants: Order, Clusiaceae.

RHEINE, re'ine, *s.* (*rheum*, rhubarb, Lat.) An inodorous bitterish substance of a yellow colour, obtained by gently heating powdered rhubarb with eight parts of nitric acid, of the sp. gr. 1.37, evaporating to the consistence of syrup, and diluting with cold water.

RHENISH, ren'ish, *a.* Pertaining to the river Rhine, or to Rheims in France, as *Rhenish wine*:—*s.* the wine produced in the neighbourhood of Rheims, which is remarkable as a solvent of iron.

RHENITE, ren'ite, *s.* Hydrous phosphate of copper, a mineral found at Rheinbreitbach, near Bonn, on the Rhine. It occurs crystallized and massive; colour blackish-green; fracture uneven; lustre vitreous, translucent, opaque. Composition—phosphoric acid, 21.687; oxide of copper, 62.847; water, 15.454: sp. gr. 4.2 to 4.3; hardness = 5.0.

RHENO, re'no, *s.* In Antiquity, a cloak worn by the Germans, made of skins, the rough side outermost: it covered the shoulders and breast down to the middle.

RHEOMETER, re-on'e-tur, *s.* (*rheo*, I flow, and *metron*, a measure, Gr.) An instrument by which the force of an electric, magnetic, or galvanic current is measured.

RHESUS MONKEY, re'sus mung'ke, *s.* A species of *Quadrumanus*, belonging to the genus *Macacus*: Family, Simiadae.

RHETOR, re'tor, *s.* (Greek, an orator or speaker.) A rhetorician.—Little used.

Senators and pretors,
With great dictators, us'd to apply to *rhetors*.—Butler.

RHETORIAN, ret-o're-an, *s.* One of a sect of heretics in Egypt, so called from Rhetorius their leader, whose distinguishing doctrine was the approval of all the heresies before him: he taught they were all in the right.

RHETORIC, ret'o-rik, *s.* (*rhetorike*, Gr.) The art of speaking with propriety, elegance, and force; the power of persuasion or attraction; that which allures or charms.

The heart's still *rhetoric*, disclos'd with eyes.—Shaks.

RHETORICAL, re-tor'e-kal, *a.* Pertaining to rhetoric; containing the rules of rhetoric; oratorical.

RHETORICALLY, re-tor'e-kal-le, *ad.* In the manner of rhetoric; according to the rules of rhetoric.

RHETORICATE, re-tor'e-kate, *v. n.* To play the orator; to attack the passions.—Obsolete.

'Twill be much more seasonable to reform, than apologize or *rhetoricate*.—Decay of Piety.

RHETORICATION, re-tor-e-ka'shun, *s.* Rhetorical amplification.—Obsolete.

Take but away their *rhetorications* and equivocal expressions.—Waterland.

RHETORICIAN, ret-o-rish'an, *s.* (*rhetoricien*, Fr.) One who teaches the art of rhetoric, or the principles and rules of correct and elegant speaking; one well versed in the rules and principles of rhetoric; an orator,—less proper.

He played at Lyons a declaiming prize,

At which the vanquish'd *rhetorician* dies.—Dryden.

RHETORIZE, ret'o-rize, *v. n.* To play the orator;—*v. a.* to represent by a figure of oratory.

RHETORIZED, ret'o-riz'd, *part. a.* Represented by a figure of oratory.

A certain *rhetorized* woman whom he calls mother.—Milton

RHEUM, room, *s.* (*rheuma*, a flow, that which flows, Gr.) An increased action of the vessels of any organ; generally applied to the increased action of mucous glands, attended with an increased discharge, and an altered state of the excreted fluids; a thin serous fluid secreted by the mucous glands, &c., as in catarrh.

RHEUM, re'um, *s.* (formed from *Rha*, the ancient name of the Volga.) Rhubarb, a genus of plants: Order, Polygonaceae. *Rheumatic acid*, a name given to the acid principle contained in the garden rhubarb; it has been shown to be oxalic acid.

RHEUMATIC, roo-mat'ik, *a.* Pertaining to rheumatism, or partaking of its nature.

RHEUMATISM, rü'ma-tizm, *s.* (*rheumatismos*, from *rheuma*, a watery humour, Gr. the ancients supposing that swellings were caused from a defluxion of humours to the part swollen.) In Pathology, pain and inflammation about the joints and surrounding muscles: its varieties are—*Articular rheumatism*, occurring in the joints and muscles of the extremities; *Lumbago*, occurring in the loins, and mostly shooting upwards; *Sciatica*, occurring in the hip-joint, with emaciation of the nates; *Spurious pleurisy*, occurring in the muscles of the diaphragm, often inducing pleurisy of the diaphragm.

RHEUMATOPYRA, rü-ma-to-pi'ra, *s.* (*rheumatikos*, rheumatic, and *pyr*, fever, Gr.) In Pathology, rheumatic fever.

RHEUMY, room'e, *a.* Full of rheum or watery matter; consisting of rheum, or partaking of its nature.

RHEXIA, rek'se-a, *s.* (*rhexis*, a rupture, Gr. which it is supposed to cure by its astringent qualities.) A genus of plants, consisting of smooth North American shrubs: Order, Melastomaceae.

RHEXIS, rek'sis, *s.* (Greek, a bursting.) In Pathology, the rupture of a vein, or the spontaneous bursting of a purulent collection.

RHIME.—See Rhyme.

RHINA, ri'na, *s.* (*rhin*, a snout, Gr.) A genus of fishes, furnished with a short, broad, and rounded muzzle, by which it is chiefly distinguished from *Rhinobates*: Family, Balidae.

RHINALGIA—RHINOCARCINOMA.

RHINALGIA, ri-nal'je-a, *s.* (*rhin*, the nose, and *algos*, pain, Gr.) In Pathology, pain in the nose.

RHINANTHACEÆ, ri-nan-tha'se-e, *s.* (*rhinanthus*, one of the genera.) A natural order of plants, generally herbaceous, with opposite pinnatifid leaves; calyx tubular, four or five-cleft, and permanent; corolla tubular; stamens four; anthers spurred at the base; ovary two-celled; stigma undivided; capsule two or four-celled.

RHANTHERA, ri-nan-the'ra, *s.* (*rhin*, a snout, and *anthera*, Gr. in allusion to the anthers being beaked.) A genus of plants, with small sweet-scented flowers, natives of Batavia: Order, Homaliniaceæ.

RHINANTHUS, ri-nan'thus, *s.* (*rhin*, a snout, and *anthos*, a flower, Gr. in allusion to the form of its corolla.) Yellow-rattle, a genus of plants: Type of the natural order Rhinanthaceæ.

RHINCHICHTHYS, ring-kik'this, *s.* (*rhynchos*, a snout, and *ichthys*, a fish, Gr.) A genus of fishes, having the body ovate, and the upper jaw produced and pointed: Family, Triglidae.

RHINCHOGLOSSUM, ring-ko-glos'sum, *s.* (*rhynchos*, a beak, and *glossa*, a tongue, Gr.) A genus of plants, natives of Java: Order, Scrophulariaceæ.

RHINOTHECA, ring-ko-the'ka, *s.* (*rhynchos*, a beak, and *theka*, a case or box, Gr. in reference to the form of the capsules.) A genus of plants which differs from Geranium in being without petals, and in the stamens being free: Order, Geraniaceæ.

RHINECANTHUS, ri-ne-kan'thus, *s.* (*rhin*, the snout, and *akantha*, a spine, Gr.) A genus of fishes, furnished with dorsal spines; the first of which is thick, obtuse, and serrated or tuberculated: Family, Balistidae.

RHINELEPIA, ri-ne-le'pis, *s.* (*rhin*, a snout, and *lepis*, a scale, Gr.) A genus of fishes, belonging to the Siluridae, or Cat-fish family.

RHINELLA, ri-nel'la, *s.* (*rhin*, a snout, Gr.) A genus of Amphibians, allied to the toad, so named from the muzzle being pointed: Order, Anoura.

RHINENCEPHALUS, ri-nen-sef'a-lus, *s.* (*rhin*, the nose, and *engkephalos*, the brain, Gr.) A term applied, by Geoffroy St. Hilaire, to a genus of unocular monsters, characterized by the conversion of the nose into a sort of proboscis.

RHINENCHYSIS, ri-nen-ki'sis, *s.* (*rhin*, the nose, and *engchysis*, an infusing, Gr.) An infusion into the nose by means of an instrument.

RHINENCHYTES, ri-nen-ki'tes, *s.* (*rhin*, the nose, and *engchysis*, an infusing, Gr.) A surgical instrument, by which rhinenchysis is performed.

RHINEODON, ri-ne'o-don, *s.* (*rhin*, the snout, and *odous*, *odontes*, a tooth, Gr. from the mouth being situated on the top of the snout.) A genus of spiraculated sharks: Family, Squalidae.

RHINESOMUS, ri-ne-so'mus, *s.* (*rhin*, a snout, and *soma*, the body, Gr.) A genus of fishes, in which the body is triangular, destitute of spines, and scored and reticulated as in Balistes: Family, Balistidae.

RHINGIA, rin'je-a, *s.* (*rhin*, the snout, Gr.) A genus of Coleopterous insects: Family, Syrphidae.

RHINO, ri'no, *s.* A cant word for gold or silver, or money.

RHINOBAATES, ri-no-ba'tes, *s.* (*rhin*, a snout, and *bates*, the bramble, Gr. in allusion to the pointed snout.) A genus of flat fishes, belonging to the Rhinobatidae: Family, Raideæ.

RHINOCARCINOMA, ri-no-kar-se-no'ma, *s.* (*rhin*, the

RHINOCARPUS—RHINOPOTINÆ.

nose, and *karkina*, cancer, Gr.) In Pathology, cancer of the nose.

RHINOCARPUS, ri-no-karp'us, *s.* (*rhin*, a snout, and *karpus*, a fruit; the fruit being beaked, Gr.) A genus of plants, consisting of one species, *R. excelsa*, a tree which attains the height of 140 feet. It is a native of South America: Order, Terebinthaceæ.

RHINOCERIAL, ri-no-se're-al, *a.* Pertaining to the rhinoceros; resembling the rhinoceros.

RHINOCEROS, ri-nos'ur-os, *s.* (*rhin*, a snout, and *keras*, a horn, Gr.) A genus of Pachydermatous quadrupeds, next in size to the elephant. The rhinoceroses, of which there are several species, are stupid and ferocious animals, living, like the tapirs and other swine-like quadrupeds, in marshy and humid places; the skin of the body has no covering, but is so hard as to turn a musket ball; the muzzle is armed with a pointed and curved horn: some species have two horns. The *rhinoceros unicornis* is thought to be the unicorn of scripture. The fossil remains of the rhinoceros occur with those of the elephant and hippopotamus, in the Miocene and Pliocene beds of the tertiary era, in this and the other countries of Europe. *Rhinoceros-bird*, a bird of the genus *Buceros*, so called from its having a crooked horn on the forehead joined to the upper mandible.

RHINOCLAVIS, ri-nok'la-vis, *s.* (*rhin*, a snout, Gr. and *clava*, a club, Lat.) A genus of Mollusca, the shells of which are univalves, with the channel curved backwards in an erect position; inner lip very thick, with a tumid margin; pillar generally with a central plait; the operculum ear-shaped: Subfamily, Cerithinae.

RHINODOMUS, ri-no-do'mus, *s.* (*rhin*, a snout, and *domos*, a house, Gr.) A genus of Mollusca, the shell of which is clavate; no internal groove; the spire larger than, or equal with, the aperture; the whorls with ridges or longitudinal varices, and rendered hispid by transverse grooves; inner lip wanting; pillar with a terminal fold; aperture striated; outer lip with a basal sinus: Family, Turbellidae.

RHINOLOPHUS, ri-nol'o-fus, *s.* (*rhin*, a snout, and *lophos*, a crest, Gr.) A subgenus of the *Vespertilio*, or Bats: Family, Carnaria.

RHINOPETALUM, ri-no-pet'a-lum, *s.* (*rhin*, a nose or snout, and *petalon*, a petal, Gr. in reference to the form of the base of the upper sepal.) A genus of plants: Order, Liliaceæ.

RHINOPHIS, ri'no-fis, *s.* (*rhin*, a snout, and *ophis*, a serpent, Gr. on account of its pointed conical muzzle.) A genus of serpents, which have the tip of the tail enveloped in an oval horny shield: Family, Amphisbanidae, or Blind-worms.

RHINOPHONIA, ri-no-fo'ne-a, *s.* (*rhin*, the nose, and *phone*, sound, Gr.) In Pathology, speaking through the nose.

RHINOPLASTIC, ri-no-plas'tik, *a.* (*rhin*, the nose, and *plasso*, I form, Gr.) Forming a nose. In Surgery, the *rhinoplastic operation* is one which renews the nose, or supplies a substitute for the natural organ.

RHINOPOMA, ri-no-po'ma, *s.* (*rhin*, a snout, and *poma*, a drinking-cup, Gr.) A subgenus of the *Vespertilio*, or Bats: Family, Carnaria.

RHINOPOTINÆ, ri-no-po-ti'ne, *s.* (*rhinobates*, one of the genera.) A subfamily of flat fishes, distinguished by the muzzle being lengthened and pointed: Family, Raideæ.

RHINOPTERA—RHIZOMORPHA.

RHINOPTERA, ri-nop'ter-a, *s.* (*rhin*, a snout, and *pteron*, a wing, Gr.) A genus of flat fishes, in which the body is broader than long, and the tail without fins: Family, Raïdæ.

RHINOPTES, ri-nop'tes, *s.* (*rhin*, the nose, and *optoma*, I see, Gr.) A person who, from a disease in the great canthus of the eye, laying open the passage to the nostrils, is enabled to see through his nose.

RHINOSIMUS, ri-nos'e-mus, *s.* (*rhinosimos*, snub-nosed, Gr.) A genus of Coleopterous insects: Family, Stenelytra.

RHINSBURGERS, rins'bur-gurs, *s. plu.* (from Rhinsburg, where they held solemn half-yearly meetings.) The name of a sect who sprung up in Holland in the eighteenth century. They held all the doctrines of the church, while they rejected all discipline; any member, women excepted, might preach and expound in their meetings, which were held in places called *colleges of piety*; they admitted no priests.

RHIFICERA, ri-pis'e-ra, *s.* (*rhapis*, a fan, and *keras*, a horn, Gr.) A genus of Coleopterous insects: Family, Serricornes.

RHIPIDEA, ri-pid'e-a, *s.* (*rhapis*, a fan, Gr.) A genus of Dipterous insects: Family, Nemocera.

RHIPIDODENDRON, ri-pe-do-den'drun, *s.* (*rhapis*, a fan, and *dendron*, a tree, Gr.) A genus of plants: Order, Liliaceæ.

RHIPIDURA, ri-pid-u'ra, *s.* (*rhapidion*, a small bellows or fan, and *oura*, a tail, Gr. from its fan-shaped tail.) A genus of birds, belonging to the Muscipinæ, or Fly-catchers: Family, Muscipidæ.

RHIPIPHORUS, ri-pif'o-rus, *s.* (*rhapis*, a fan, and *phoreo*, I bear, Gr.) A genus of Coleopterous insects: Family, Trachelides.

RHIPSALIS, rip-sa'lis, *s.* (*rhips*, a willow branch, Gr. in reference to the flexible branches.) A genus of small West Indian shrubs: Order, Catæceæ.

RHIZAGRA, ri-zag'ra, *s.* (*rhiza*, a root, and *agra*, a seizure, Gr.) A surgical instrument for taking out the stumps and roots of the teeth.

RHIZOBOLACEÆ, ri-zo-bo-la'se-e, } *s.* (*rhizobolus*,
RHIZOBOLÆ, ri-zo-bo'le-e, } one of the
names of the genus *Caryocar*.) A natural order of plants, consisting of large trees, with opposite coriaceous leaves, and large regular racemose flowers; sepals five or six; petals five to eight; stamens extremely numerous; anthers roundish and two-celled; ovary superior, four or five-celled; stigmas minute; ovules solitary.

RHIZOCTONIA, ri-zok-to'ne-a, *s.* (*rhiza*, a root, and *kteinō*, I destroy, Gr.) A genus of subterranean Fungi, reposing upon the roots of living plants, which they destroy: Tribe, Hymenomyces.

RHIZODUS, ri-zo'dus, *s.* (*rhiza*, a root, and *odus*, a tooth, Gr.) A genus of fossil fishes from the Carboniferous strata of Scotland.

RHIZOLITHA, ri-zo-lith'a, *s.* (*rhiza*, a root, and *lithos*, a stone, Gr.) A genus of Lepidopterous insects: Family, Noctuidæ.

RHIZOMA, ri-zo'ma, *s.* (Greek, something firmly rooted.) In Botany, a species of creeping stem which grows under ground, of which the *carrot* and the *beet* form examples.

RHIZOMATOSE, ri-zo'ma-to'se, *a.* Having rhizomas, as the carrot.

RHIZOMORPHA, ri-zo-maw'r'fa, *s.* (*rhiza*, a root, and *morphe*, Gr.) A singular genus of Fungi, which

RHIZOPHAGOUS—RHODIUM.

has the appearance of the root of a tree. It grows in damp cellars, in old walls, in mines, and other subterranean places.

RHIZOPHAGOUS, ri-zof'a-gus, *a.* (*rhiza*, a root, and *phago*, I eat, Gr.) In Zoology, living upon roots.

RHIZOPHORA, ri-zof'o-ra, *s.* (*rhiza*, a root, and *phoreo*, I bear, Gr.) A genus of plants: Type of the order Rhizophoraceæ.

RHIZOPHORACEÆ, ri-zo-f'o-ra'se-e, *s.* (*rhizophora*, one of the genera.) A natural order of Exogenous plants, with simple opposite leaves; calyx adherent, often surrounded at the base by a cup-shaped bract, with the lobes valvate, and varying in number from four to twelve, occasionally all cohering in a calyptra; petals arising from the calyx, alternate with the lobes, and equal to them in number; stamens twice or thrice the number of petals; filaments distinct; ovary two, three, or four-celled; fruit indehiscent; seed pendulous, and without albumen.

RHIZOPHYZA, ri-zo-fi'za, *s.* (*rhiza*, a root, and *physa*, a bladder, Gr.) A genus of Acalephans: Order, Hydrostatica.

RHIZOPODES, ri-zop'o-des, *s.* (*rhiza*, a root, and *pous*, *podes*, the foot, Gr.) The name proposed by M. Dujardin to a new class of animals, of lower degree than the Radiata, possessing a power of locomotion by means of minute tentacular filaments.

RHIZOPOGON, ri-zo-po'gon, *s.* (*rhiza*, a root, and *pogon*, a beard, Gr.) A genus of Fungi: Tribe, Gasteromycetes.

RHIZOSTOMA, ri-zos'to-ma, *s.* (*rhiza*, a root, and *stoma*, a mouth, Gr.) A genus of Acalephans, or Pulmograda, belonging to the order Simplicia of Cuvier. It includes those Medusæ which have the absorbing orifices of their nutritive canals of small size, and situated in great numbers on the branches of arms or peduncles, extending from the centre of the interior surface of the disc.

RHODALITE, ro'da-lite, *s.* (*rhodon*, a rose, and *lithos*, a stone, Gr. in reference to its colour.) A mineral discovered in Ireland by Mr. Doran, occurring in an amygdaloidal rock; colour between rose-red and flesh-red; texture earthy. Composition—silica, 55.9; alumina, 8.8; peroxide of iron, 11.4; lime, 1.1; magnesia, 0.6; water, 22.0: sp. gr. 2.000; hardness, about 2.

RHODANTHE, ro-dan'the, *s.* (*rhodon*, a rose, and *anthos*, a flower, Gr. the inner scales being rose-coloured.) A genus of Composite plants: Suborder, Tubulifloræ.

RHODEA, ro'de-a, *s.* (*rhodon*, a rose, Gr.) A genus of fossil Ferns, found in the Coal formation.

RHODIAN, ro'de-an, *a.* Pertaining to Rhodes, an island in the Mediterranean sea; as, *Rhodian* laws.

RHODIOLA, ro-di'o-la, *s.* (*rhodon*, a rose, Gr. the roots smelling like a rose.) A genus of plants, natives of Britain: Order, Crassulaceæ.

RHODIUM, ro'de-um, *s.* (*rhodon*, a rose, Gr. on account of the rose-red colour of some of its salts.) A metal discovered by Wollaston in 1803, associated with palladium in the ore of platinum. It is of a whitish colour, very difficult of fusion, and very hard. It has been used for the points of metallic pens. Sp. gr. about 11; equiv. 52.2; symb. R. *Rhodio-chlorides*, compounds of rhodium and chlorine, in combination with the chlorides of potassium or sodium, thus forming double salts: they are composed of one atom of the perchloride of rhodium, and one of the basic chloride.

RHODIZITE—RHOMB.

RHODIZITE, ro'de-zite, *s.* (*rhodizo*, I tinge of a rose colour, Gr. in reference to its effect on flame.) A mineral observed in small crystals on some of the red tourmalines from Siberia: colour white; translucent; lustre splendid, vitreous; hard enough to resist the action of the knife; fracture and specific gravity not determined.

RHODIZONATE, ro-de-zo'nate, *s.* (*rhodon*, a rose, Gr.) In Chemistry, a salt of a scarlet colour, composed of potassium and carbonic oxide. Formula, $C_7 O_7 + 3KO$. It contains a peculiar acid, which has been named *rhodizonic acid*, and which is represented by the formula, $C_7 H_3 O_{10}$, or $C_7 O_7 + 3 aq$.

RHODOCRINITES, ro-do-kre-ni'tes, *s.* (*rhodon*, a rose, and *krinon*, a lily, Gr. rose-like, lily-shaped animal.) A genus of Crinoidians, with a round and sometimes slightly pentagonal column, formed of numerous joints, perforated by a pentapetalous alimentary canal. The pelvis formed of three pieces supporting five square plates, in the spaces of whose lateral bevelled angles five pentagonal first costals are inserted.

RHODOENDRON, ro-do-den'dron, *s.* (*rhodon*, a rose, and *dendron*, a tree, Gr. in reference to the terminal branches of flowers, which are usually red.) A genus of ornamental plants, consisting of shrubs or trees, usually evergreen: Order, Ericaceæ.

RHODOLÉNA, ro-do-le'na, *s.* (*rhodos*, a rose, and *chlaina*, a clock, Gr.) A genus of plants, natives of Madagascar. Order, Chlénaceæ.

RHODOMELA, ro-do-me'la, *s.* (*rhodos*, red, and *melos*, a limb, Gr. in allusion to the colour of the fronds.) A genus of Algae: Order, Ceramniaceæ.

RHODONITE, ro'do-nite, *s.* In Mineralogy, a variety of siliciferous oxide of manganese, of a pale rose colour: composed of oxide of manganese, 49.87; silica, 39.00; carbonic acid, 4.00; alumina, 0.12; oxide of iron, 0.25; water, 6.00; sp. gr. 3.5 to 3.7; hardness = 5.0 to 5.5.

RHODOSTOMA, ro-dos'to-ma, *s.* (*rhodon*, a rose, and *stoma*, a mouth, Gr.) A genus of Mollusca, the shells of which have the general form of Melampus and Tornatella; but the aperture is not striated, and the inner margin of the lip is broad, considerably thickened, and distinctly notched towards the top: Subfamily, Turbinæ.

RHOMB, rome, } *s.* (*rhombos*, Gr.) An equi-
RHOMBUS, rome'bus, } lateral four-sided figure, whose opposite angles only are equal, the adjacent angles being unequal. When the adjacent angles are equal, and consequently right angles, the figure is a square. In Zoology, a genus of flat fishes: Family, Pleuronectidæ. In Grecian Antiquity, the *rhombus* was also a magical instrument, consisting of a kind of top whirled by bandelets, and, while in motion, presumed to have the power of giving to men the passions and affections which the magicians desired to inspire. In Mineralogy, *rhomb-spar*, bitter-spar,—which see.

RHOMBIC, rom'bik, *a.* Having the figure of a rhomb.
RHOMBOEDRAL, rom-bo-he'dral, *a.* (*rhombos*, a rhomb, and *hedra*, a side, Gr.) Having similarity of form to the rhombohedron.

RHOMBOHEDRON, rom-bo-he'dron, *s.* A solid bounded by six equal and similar rhombic faces, parallel, two and two.

RHOMBOID, rom'boyd, *s.* (*rhombos*, a rhomb, and *eidos*, likeness, Gr.) In Geometry, a quadrilateral figure whose opposite sides and angles only are

RHOMBOIDAL—RHYNCHITES.

equal; the adjacent sides and angles are therefore unequal. When the adjacent angles are equal, the figure is a rectangle, or oblong.

RHOMBOIDAL, rom-boy'dal, *a.* Having the form of a rhomboid.

RHOMBOIDEUS, rom-boy-de'us, *s.* (*rhombus*, Lat.) In Anatomy, the name given to a dorsal muscle, consisting of two distinct fasciculi, and hence sometimes described as constituting two muscles—the *lesser* or *superior*, and the *greater* or *inferior* *rhomboideus*.

RHONCUS, rong'kus, *s.* (*rhonchos*, a snoring, Gr.) A rattling or wheezing sound: applied chiefly to sounds occasioned by certain morbid states of respiration, as indicated by the stethoscope.

RHUBARB, roo'bar-be, *a.* Like rhubarb.

RHUMB, rum, *s.* (from *rhombos*, derived from *rhembo*, I turn round, Gr.) In Geography and Navigation, a circle on the earth's surface making a given angle with the meridian of a place, marking the direction of any object through which it passes. The divisions on the compass card are called *rhumbs*. *Rhumb-line*, the track of a ship which cuts all the meridians through which it passes at right angles; called also, the *loxodromic curve*. This, being the simplest curve, is the route universally pursued; but a ship sailing on this curve never looks direct for her port till it comes in sight.

RHUS, rus, *s.* (*rhoos* or *rhous*, red, Gr.) A genus of plants: Order, Terebinthaceæ.

RHYME, rime, *s.* (*rim*, number, from *riman*, to number, *ryman*, to give place, to open a way, Sax. *rim*, Swed. and Dan. *rym*, Dutch, *reim*, Germ.) In Poetry, the correspondence of sounds in the terminating words or syllables of two verses, one of which succeeds the other immediately, or at no great distance;

For rhyme with reason may dispense,
And sound has right to govern sense.—*Prior*.

a harmonical succession of sounds;

The youth with songs and rhymes,
Some dance, some hale the rope.—*Dehnen*.

poetry; a poem;

Who would not sing for Lycidas? he knew
Himself to sing, and build the lofty rhyme.—*Millon*.

a word of a sound to answer to another word.

Rhyme or *reason*, number or sense;—*r. n.* to accord in sound; to make verses;

There march'd the bard and blockhead side by side,
Who *rhym'd* for hire, and patronis'd for pride.—*Pope*.

—*v. a.* to put into rhyme.

RHYMELESS, rim'les, *a.* Destitute of rhyme; not having consonance of sound.

RHYMER, ri'mur, }

RHYMIST, ri'mist, } *s.* One who makes rhymes;

RHYMSTER, rime'stur, } a mere versifier.

RHYMIC, ri'mik, *a.* Pertaining to rhyme.

RHYNCHLEA, ring-ke'a, *s.* (*rhynchos*, a bill, Gr.) A genus of birds of the Snipe kind: Family, Scolopacidae.

RHYNCHÆXUS, ring-ke'nus, *s.* (*rhynchos*, a snout, Gr.) A genus of Coleopterous insects: Family, Rhynchophora.

RHYNCHANTHERA, ring-kan-the'ra, *s.* (*rhynchos*, a beak, and *anthero*, an anther, Gr. in reference to the anthers being terminated by a beak.) A genus of plants: Order, Melastomaceæ.

RHYNCHITES, ring-ki'tes, *s.* (*rhynchos*, a snout, Gr.) A genus of Coleopterous insects: Family, Rhynchophora.

RHYNCHOBDELLA—RIB.

RHYNCHOBDELLA, ring-kob-del'la, *s.* (*rhynchos*, a snout, *bdella*, a leech, Gr.) A genus of fishes: Family, Zeidae.

RHYNCHOLITE, ring'ko-lite, *s.* (*rhynchos*, a beak, and *lithos*, a stone, Gr.) The petrified beak of a fowl.

RHYNCHOPHORA, ring-kof'o-ra, *s.* (*rhynchos*, a snout, and *phoreo*, I bear, Gr.) A name given by Cuvier to his first family of Tetramerous Coleoptera, distinguished by the entire prolongation of the head, which forms a sort of snout or proboscis.

Swearing till my very roof was dry
With oaths of love.—*Shaks.*

—*v. a.* to cover with a roof; to enclose in a house; to shelter.

Here had we now our country's honour roof'd,
Were the grac'd person of our Banquo present.—*Shaks.*

ROOFING, roofing, *s.* The materials of which a roof is composed; materials for a roof.

ROOFLESS, roof'les, *a.* Having no roof; without a home; unsheltered.

ROOFY, roof'e, *a.* Having roofs.

Whether to *roofy* houses they repair.—*Dryden.*

ROOK, rook, *s.* (*hroc*, Sax. *roche*, Germ.) The *Corvus frugilegus* of Linnaeus, a species of crow, varying from the other species somewhat in its gregarious habits, and by the bareness of its bill. Its food is less frequently of animal matter than that of the other crows;—a cheat; a trickish, rapacious fellow;—(*rocco*, a bishop's staff, a crosier, Ital.) in Chess-playing, the four pieces placed on the corner squares of the board are called *rooks*. A rook moves the whole extent of the board, unless impeded by some other piece;—*v. n.* to cheat; to defraud;—*v. a.* to cheat; to plunder by cheating. In Scotland, *to rook*, signifies to take all from another in gambling; to squat or settle; same as *to ruck*,—which see.

The raven *rook'd* him on the chimney-top.—*Shaks.*

ROOKERY, rook'er-e, *s.* The trees on which rooks are accustomed to build their nests; a nursery of rooks.

ROOKY, rook'e, *a.* Inhabited by rooks.

Light thickens, and the crow
Makes wing to the *rooky* wood.—*Shaks.*

ROOM, room, *s.* (*rum*, Sax. Swed. Iceland. Pol. and Irish, *raum*, Germ. *roum*, old Germ.) Space; extent of place, great or small; space or place unoccupied; way unobstructed; place of another; stead; unobstructed opportunity; possible admission;

Is there no *room* for pardon?—*A. Philips.*

an apartment in a house; any division separated from another by a partition; office;

He exercised his high *rome* of chancellorship, as he was accustomed.—*Cavendish, Life of Wolsey.*

ROOMAGE—ROOT.

ROOMAGE, room'aje, *s.* Space; place.—Not used.

Man, of all sensible creatures, has the fullest brain to his proportion, for the lodging of the intellectual faculties: it must be a silent character of hope, when there is good *roomage* and receipt where these powers are stored.—*Wotton.*

ROOMFUL, room'fel, *a.* Abounding in room.—Not in use.

Now in a *roomful* house.—*Donne.*

ROOMINESS, room'e-nes, *s.* Space; quantity of extent.

ROOMTH, roomth, *s.* Space; place.—Obsolete.

Not finding *roomth* upon the rising side.—*Drayton.*

ROOMTHY, room'the, *a.* Space.—Obsolete.

The land was *roomthier* than the scale of miles doth make it.—*Fuller's Holy War.*

ROOMY, room'e, *a.* Wide; spacious.

ROOP, roop, *s.* (*roup*, Scot.) Hoarseness.—Local.

ROOPY, roop'e, *s.* (*roupy*, Scot.) Hoarse.—Local.

ROOST, roost, *s.* (*hrost*, Sax. *roest*, Dutch.) The pole or other support on which fowls rest at night.

At roost, in a state of rest and sleep;—*v. n.* (*roosten*, Dutch,) to sleep or rest, as a bird, on a pole or tree; to lodge, in burlesque.

ROOT, root, *s.* (*rot*, Swed. *roed*, Dutch, *wgrt*, an herb, a root, Sax.) That part of a plant which grows downwards into the earth, while the stem ascends into the air. Every part of a plant which grows under ground is not necessarily the root, as large portions of the stem itself, and large buds, called bulbs, may also exist under the surface. The smaller divisions of roots are called fibrils. Roots never have leaves, scales, or other appendages developed on their surface, nor are they developed like branches from buds; nor is the cuticle of roots ever found to possess stomates, which are frequently very numerous on various parts of the stem;—the part of anything which resembles the root of a plant in its manner of growth, as the roots of a cancer; the bottom or lower part of anything;

Deep to the roots of hell the gathered beach
They fastened.—*Milton.*

a plant, of which the root is esculent, as beets, carrots, &c.; the original;

It was said,
That myself should be the root and father
Of many kings.—*Shaks.*

means of growth.

Yet hath he not *root* in himself.—*Matt. xiii. 21.*

In Arithmetic and Algebra, the *root* of any quantity, is an expression whose continued multiplication into itself a given number of times produces the quantity proposed, which is called a *power* of such root,—see under *Power*. A *root of an equation*, is any quantity which fulfils the conditions proposed in such equation. In Music, a *root* is the sound in thorough bass from which all other sounds take their rise; also, the fundamental note of any chord. In Scripture, *root of bitterness*, any error or evil that produces discord or immorality. *To take root*, to become planted or fixed; to be established; to increase and spread. *Root-bound*, fixed in the earth by roots. *Root-built*, built of roots. *Root-eater*, an animal that feeds on roots. *Root-house*, a house built of roots, or one for keeping roots. *Root-leaf*, a leaf growing immediately from the root;—*v. n.* to fix the root; to enter the earth as roots; to be firmly fixed; to be established; to sink deep;—*v. a.* to plant or fix deep in the earth; to impress deeply and dur-

ably. In Scripture, to be *rooted* and grounded in Christ, is to be firmly united to him by faith and love;—*v. a.* or *v. n.* (*werotan*, Sax.) to turn up the earth with the snout, as swine. To *root up* or *out*, to eradicate; to extirpate; to exterminate.

ROOTED, root'ed, *part. a.* Fixed; deep; radical, as *rooted* sorrow.

ROOTEDLY, root'ed-le, *ad.* Deeply; from the heart.

ROOTER, root'ur, *s.* One who roots; one who tears up by the roots.

ROOTLET, root'let, *s.* A radical; a little root.

ROOTY, root'e, *a.* Full of roots, as *rooty* ground.

ROOTSTOCK, root'stok, *s.* (*root* and *stock*.) In Botany, a prostrate, rooting, thickened stem, which yearly produces young branches or plants. It is common in Iridaceæ and Epiphytous Orchidaceæ, and is often confounded with the root. Ginger and orris root are examples.

ROPALIC, ro-pal'ik, *a.* (*ropalon*, a club, Gr.) Club-formed; increasing or swelling towards the end.

ROPALOMERA, ro-pa-lo-me'ra, *s.* (*ropalon*, a club, and *meros*, the thigh, Gr.) A genus of Dipterous insects: Family, Muscidae.

ROPE, rope, *s.* (*rap*, Sax. *reep*, Dutch, *raap*, Friesic.) A large string or line, composed of several strands twisted together; a row or string of a number of things united, as a *rope* of onions;—*plu.* (*roppas*, Sax.) the intestines of birds;—*v. n.* to draw out into viscosities; to congregate into glutinous filaments. Among Seamen, *cable-laid ropes* are composed of nine strands, or three great strands consisting each of three small ones. *Hawser-laid ropes* are made with three strands, each consisting of a certain number of *rope-yarns*. *Rope-bands* (pronounced *robins*) are pieces of small rope, having an eye at one end, which are used in pairs to the upper edges of the square sails. *Rope-yarn*, the smallest and simplest part of any rope, being one of the threads of which a strand is composed; it denotes also the yarn of any rope untwisted. In Botany, *rope-grass*, the common name of the plants of the genus *Restio*, from the supple shoots of many of the species being used as withes at the Cape of Good Hope. *Rope-dancer*, one who walks on an extended rope. *Rope-ladder*, a ladder made of ropes. *Rope-maker*, one whose occupation is to make ropes or cordage. *Rope-making*, the business of a rope-maker. *Rope-trick*, a trick that deserves the halter. *Rope-walk*, a long covered walk where ropes are manufactured.

ROPERY, ro'per-e, *s.* A place where ropes are made; rogues' tricks.

What saucy merchant was this, that was so full of his *ropery*?—*Shaks.*

ROPHITES, ro-fi'tes, *s.* (*ropheo*, I sup greedily, Gr.) A genus of Bees: Family, Andrenidae.

ROPINESS, ro'pe-nes, *s.* (from *Ropy*.) Stringiness; viscosity; glutinousness.

ROPY, ro'pe, *a.* (from *Rope*.) Stringy; adhesive; that may be drawn into a thread, as a glutinous substance; viscous; tenacious; glutinous, as *ropy* wine.

ROQUELAURE, rok'e-lawr, *s.* (French, supposed to be derived from a nobleman of that name.) A cloak for men.

RORAL, ro'ral, }
RORID, ro'rid, } *a.* (*ros*, *roris*, dew, Lat.) Dewy.
RORY, ro're, }

RORARIL, ro-ra're-i, *s. plu.* (Latin.) In Antiquity, a class of light-armed soldiers in the Roman armies.

RORATION—ROSE.

RORATION, ro-ra'shun, *s.* (*roratio*, Lat.) A falling of dew.—Not used.

RORIDULA, ro-rid'u-la, *s.* (*ros*, *roris*, dew, Lat. in reference to the leaves being beset with granular hairs, which appear like dew.) A genus of plants: Order, Droseraceæ.

RORIFEROUS, ro-rif'e-rus, *a.* (*ros*, dew, and *fero*, I bear, Lat.) Producing dew.

RORIFLUENT, ro-rif'lu-ent, *a.* (*ros*, dew and *fluo*, I flow, Lat.) Flowing with dew.

RORQUAL, rok'wal, *s.*—See *Rorqualus*.

RORQUALUS, rok'kwa-lus, *s.* (Norwegian, a whale with folds.) The *Rorquals*, a genus of large whales, characterized by the want of teeth, a short dorsal fin, and folds under the chin and throat. The razor-back and finner of whales, *R. borealis*, attains the length of from 100 to 110 feet.

ROSA, ro'za, *s.* (*rosa*, Lat. *ros*, a rose, Celtic.) A genus of plants, distinguished by the beauty of the flowers. Don enumerates 205 species, some of which have many varieties.

ROSACEÆ, ro-za'se-e, *s.* (*rosa*, one of the genera.) A natural order of Exogenous plants, composed of herbaceous plants or shrubs, with simple or compound leaves, having two stipules at the base; calyx four or five-lobed; valvate in æstivation, with the disc surrounding the orifice, having the fifth lobe next the axis; petals perigynous; stamens indefinite, arising from the calyx; anthers innate, two-celled, and bursting lengthwise; ovaries superior, several, one-celled, and one-seeded; style lateral, near the apex of the ovaries; stigmas simple, and emarginate on one side; fruit either one-seeded nuts or akenia; seeds erect or inverted.

ROSACEOUS, ro-za'shus, *a.* (*rosaceus*, Lat.) Rose-like. In Botany, belonging to the order Rosaceæ; applied to polypetalous corollas, consisting of four or more petals, spreading like a rose.

ROSACIC ACID, ro-za'sik as'sid, *s.* (*roseus*, red, Lat.) A peculiar acid deposited from the urine of persons labouring under gout and inflammatory fever. It is of a rose colour, and sometimes forms reddish crystals.

ROSALIA, ro-za'le-a, *s.* (*rosa*, a rose, Lat.) The ancient name for the disease now more unclassically termed the scarlet fever.

ROSALINA, ro-za-li'na, *s.* (*rosa*, a rose, Lat.) A genus of fossil Foraminifera.

ROSA-MACHA, ro'za-ma'ka, *s.* The name given in Caraccas to the plant *Brownea capitata*, the scarlet flowers of which are disposed in dense heads.

ROSARY, ro'za-re, *s.* (*rosarium*, Lat.) A bunch or string of beads on which Roman Catholics count their prayers; a bed of roses; a place where rose-bushes are nursed or planted for ornament; a chapel.

ROSCID, ros'sid, *a.* (*roschidus*, Lat.) Dewy; abounding with dew; consisting of dew.

ROSCOEÆ, ros-ko'e-a, *s.* (in honour of W. Roscoe, Esq., the first botanist who elucidated the plants of the order Scitamineæ, the Zingiberaceæ of Lindley.) A genus of plants: Order, Zingiberaceæ.

ROSE, roze, *s.* (*rosa*, Lat. *ros*, Celtic.) The flower of a plant of the genus *Rosa*; a knot of ribbon in the form of a rose, used as an ornamental tie of a shoe. Under the rose, in secret; privately; in a manner that forbids disclosure. In Architecture, *rose ornament*, a common ornament somewhat of the form of a rose, used in cornices around apertures, &c., particularly in works of the Gothic style. *Rose-*

scindow, a circular window, with compartments of mullions or tracery branching from a centre; sometimes called a *catherine-wheel*, and sometimes a *marigold-window*. In Botany, *rose-acacia*, the Leguminous plants, *Robinia rosea* and *hispida*, the flowers of which are large, showy, and rose-coloured: natives of North America. *Rose-apple*, the common name of the plants belonging to the genus *Jambosa*. *Rose-bay*, the shrub *Rhododendron pontus*, or Pontic *Rhododendron*. *Rose-campion*, the English name of the plants of the genus *Agrostemma*. *Rose of Jericho*, the plant *Anastatica hierochuntina*, a native of Palestine, Barbary, Egypt, and Arabia. In Palestine, it is called *Maryam*, or *Mary's flower*, because it is supposed the flower opened at the instant our Saviour was born. *Rose-gall*, an excrescence on the *dog-rose*. *Rose-mallow*, the hollyhock. *Rose-root*, the English name of *Sedum rhodiola*, and other species of the same genus. *Rose-wood*, the wood of the tree *Physocalymna floribunda*, a native of Brazil. In English History, the *Wars of the Roses* were the feuds that prevailed between the houses of York and Lancaster, a *white rose* and a *red* one being the respective emblems of the adherents of these families. *Rose-noble*, a gold coin first used in the reign of Edward III., value 6s. 8d.; it was stamped with the figure of a *rose*—hence the name. In Jewelry, *rose-cut*, the epithet applied to such precious stones as are cut with a smooth rounded surface, to distinguish them from such as have numerous facets, as *rose-diamond*, a diamond nearly hemispherical, cut into 24 triangular planes. In Mineralogy, *rose-quartz*, a variety of quartz of a rose colour. *Rose-pink*, a pigment made by dyeing chalk or whiting with a decoction of Brazil-wood and alum. *Rose-water*, water tinctured with roses by distillation. In Turning, the *rose-engine* is an appendage to the lathe, by which a surface of wood or metal is engraved with a variety of curved lines. *Festival of roses*, a rural festival in France, in which the best-behaved maiden of the town or village is annually crowned with roses in the church, whither she is conducted with great pomp by the villagers. The Persians also have a *festival of roses*, in which the youth parade the streets with music, offering roses to all they meet. *Rose* is also the preterite of *rise*.

ROSEAL, ro'ze-al, *a.* (*roseus*, Lat.) Like a rose in smell and colour.

The rich and *roseal* spring of those rare sweets.—*Crashaw*.

ROSEATE, ro'ze-ate, *a.* Full of roses; blooming.

ROSED, rozde, *a.* Crimsoned; flushed.

A maid yet *rosed* over with the virgin crimson of modesty.—*Shaks*.

ROSELITE, ro'ze-lite, *s.* (in honour of Dr. Gustavus Rose of Berlin.) A very rare mineral, which occurs in small deep rose-coloured twin crystals, associated with cobalt bloom, at Schneeberg in Saxony; lustre vitreous; translucent; streak white: it contains oxide of cobalt, arsenic acid, lime, magnesia, and water. Hardness = 3.0.

ROSEMARY, roze'ma-re, *s.* The common English name of the plant *Rosmarinus officinalis*, which is highly valued for stimulating and strengthening the nervous system.

ROSENFELDERS, ro-zen-fel'ders, *s. plu.* The followers of Hans Rosenfeld, a German impostor, who, about the year 1793, declared himself the Messiah,

affirming that Jesus Christ and his apostles were impostors, that the king of Prussia was the devil, and that he himself, with the assistance of four-and-twenty elders, was to govern the world.

ROSEOLA, ro-ze-o'la, *s.* (*roseus*, rosy, Lat.) In Pathology, *Rose-rash*, a rose-coloured efflorescence, variously figured, without wheals or papule, and not contagious. Its different species are, *R. aestiva*, summer rose-rash; *R. autumnalis*, autumnal rose-rash; *R. annulata*, annular rose-rash; *R. infantilis*, infantile rose-rash; *R. variolosa*, variolous rose-rash; *R. vaccina*, vaccine rose-rash; *R. miliaris*, miliary rose-rash.

ROSET, ro'zet, *s.* A red colour used by painters.

ROSICRUCIAN, ros-e-kroo-shan, *s.* (*ros*, dew, and *crux*, *crucis*, a cross, Lat.) One of a sect who sprung up in the 14th century, who, among other absurd pretensions to science, laid claim to the discovery of the philosopher's stone, deriving their name from the assumed facts, that *dew* is the most powerful natural solvent of gold, and that *light*, of which the *cross* is the emblem, is what produces that precious metal;—*a.* pertaining to the Rosicrucians or their arts.

ROSIER, ro'zier, *s.* A rose-bush.—Obsolete.

Ne other tire she on her head did wear,
Crowned with a garland of sweet *rosier*.—*Spenser*.

ROSIN, ro'zin, *s.* (probably from *Resin*.) The residuum of the distillation of turpentine. It is a light, hard, brittle, inflammable substance, of a dark colour, of which, in commerce, there are several kinds;—*v. a.* to rub with rosin.

ROSINESS, ro'ze-nes, *s.* State or quality of being rosy.

ROSITE, ro'zite, *s.* A mineral which occurs in small uncrystallized grains; fracture splintery and shining; colour faint rose-red or brownish-red. Analysis—silica, 44.901; alumina, 34.506; peroxide of iron, 0.688; oxide of manganese, 0.191; potash, 6.628; lime, 3.592; magnesia, 2.489; soda, a trace; water, 6.333. Sp. gr. 2.72: hardness = 2.5.

ROSLAND, ros'land, *s.* (*rhos*, peat, or a moor, Welsh.) Heathy land; moorish or watery land.

ROSLINIA, ros-lin'e-a, *s.* (meaning not known.) A genus of plants: Order, Gentianaceae.

ROSMARINUS, ros-ma-rin-us, *s.* (*ros*, dew, and *marinus*, pertaining to the sea, Lat.) A genus of plants, growing generally in maritime situations.

ROSS, ros, *s.* (*grays*, rubbish, Germ.?) The rough, scaly matter on the bark of some trees.

ROSSEL, ros'sel, *s.* (*rhos*, peat or moss, Welsh.) Peat or mossy land.

A true *rossel* or light land.—*Mortimer*.

ROSSELLY, ros'sel-le, *a.* Light; loose.

The best soil is a *rosselly* top.—*Mortimer*.

ROSTEL, ros'tel, } *s.* (*rostellum*, dim. of

ROSTELLUM, ros-tel'lum, } *rostrum*, a beak, Lat.)

In Botany, an elevated and rather thickened portion of the stigma of Orchidaceous plants, from which the peculiar gland separates by which the pollen masses of some species of that order are eventually held together. In Entomology, the mouth of the louse and similar apterous insects, in which the ordinary trophi are replaced by an exarticulate retractile tube, from which a retractile siphuncle is protruded. The uncinated proboscis of the tape-worms is also so called.

ROSTELLARIA, ros-tel-la're-a, *s.* (*rostellum*, a little beak, Lat.) A genus of Mollusca, belonging to the

ROSTELLATE—ROTALIA.

Strombineæ. The shell has an ascending siphon, formed by a groove thickened on each side, which extends upwards on the spire; outer lip various, but never sinuated at the base.

ROSTELLATE, ros'tel-late, *a.* Having a rostell.

ROSTELLIFORM, ros-tel-le-fawrm, *a.* Having the form of a rostell.

ROSTER, ros'tur, *s.* (corrupted from Register.) In Military affairs, a plan or table by which the duty of officers is regulated.

ROSTRAL, ros'tral, *a.* (*rostrum*, a beak, Lat.) Resembling the beak of a ship; pertaining to the beak.

ROSTRARIA, ros-tra're-a, *s.* (*rostrum*, a beak, Lat.) A genus of plants, consisting of an annual European grass: Order, Graminaceæ.

ROSTRATE, ros'trate, } *a.* (*rostratus*, from *rostrum*, a beak, Lat.)

ROSTRATED, ros'tra-ted, } Beaked: applied to parts of plants, to shells, &c., which have a beak-like process; furnished or adorned with beaks, as a *rostrated* galley.

ROSTRIFORM, ros'tre-fawrm, *a.* Having the form of a beak.

ROSTRULUM, ros'trū-lum, *s.* (diminutive of *rostrum*, a beak, Lat.) In Entomology, the oral instrument of the flea and other Aphaniptera, in which the ordinary trophi are replaced by a bivalved beak, between the valves of which there are three lancet-shaped instruments.

ROSTRUM, ros'trum, *s.* (Latin.) The beak or bill of a bird; the beak or head of a ship. In ancient Rome, the elevated platform in the forum, so called from its basement being decorated with the prows of ships. In Chemistry, the pipe which conveys the distilling liquor into its receiver, in the common alembic. In Surgery, a crooked pair of scissors, used for dilating wounds.

ROSY, ro'ze, *a.* Like a rose; blooming; red; blushing; charming; made in the form of a rose. *Rosy-bosomed*, embosomed among roses. *Rosy-crowned*, crowned with roses. *Rosy-tinted*, having the tints of the rose.

ROT, rot, *v. n.* (*rotian*, Sax. *rotten*, Dutch.) To become decomposed; to putrefy; to decay;—*v. a.* to make putrid; to bring to corruption;—*s.* putrefaction; putrid decay; a distemper incident to sheep, arising from a great number of small animals of the genus *Fasciola* breeding in the liver. The disease is usually attributed to wet seasons and moist pasture. *Dry-rot*, a highly destructive vegetable disease, affecting timber in the foundations and other parts of buildings in particular soils and situations.

ROTA, ro'ta, *s.* (Latin, a wheel.) An ecclesiastical court at Rome, composed of twelve prelates, of whom one must be a German, another a Frenchman, two Spaniards, and eight Italians. This court takes cognizance of all suits in the territory of the church by appeal, and of all matters beneficiary and patrimonial. In British History, a club of politicians, who, when the government so often wavered in 1650, were for contriving an equal government by rotation.

ROTALIA, ro-ta'la, *s.* (*rota*, a wheel, Lat. in reference to the leaves being whorled.) A genus of plants, consisting of small herbs: Order, Lythraceæ.

ROTALIA, ro-ta'le-a, *s.* (*rota*, a wheel, Lat.) A genus of Foraminifera, found abundantly in the Chalk formation; the genus is also recent as well as fossil.

ROTARY—ROTTEN.

ROTARY, ro'ta-re, *s.* (*rota*, a wheel, Lat.) Turning, as a wheel on its axis. *Rotary-engine*, an engine which acts by a rotatory motion, instead of the alternate or reciprocating one of the beam and piston.

ROTATE, ro'tate, *a.* In Botany, wheel-shaped; monopetalous; spreading nearly flat without any tube, or expanding into a nearly flat border with scarcely any tube. *Rotate-plane*, wheel-shaped, and flat without a tube.

ROTATED, ro'ta-ted, *a.* (*rotatus*, Lat.) Turned round, as a wheel; wheel-shaped.

ROTATION, ro-ta'shun, *s.* (*rotatio*, Lat.) The act of turning, as a wheel on its axis.

ROTATIVE, ro'ta-tiv, *a.* Turning, as a wheel.—Little used.

ROTATOR, ro-ta'tur, *s.* (Latin.) That which gives a circular or rolling motion. In Anatomy, a muscle producing a rolling motion.

ROTATORIA, ro-ta-to're-a, } *s.*—See Rotifera.

ROTATORIES, ro'ta-to-res, }

ROTATORY, ro'ta-tur-e, *a.* (from Rotator.) Turning on an axle, as a wheel; rotary; going in a circle; following in succession.

ROTE, rote, *s.* (*rota*, a wheel, Lat.) A round of words; frequent repetition of words or sounds, without attending to the meaning, or to principles and rules. An ancient musical instrument, which appears to have been somewhat similar to what the French call a *vielle*, and the English a *hurdy-gurdy*. It is mentioned by Chaucer and some others of our early poets—(obsolete in this sense);—*v. a.* to repeat frequently.

Speak to the people
Words *roted* in your tongue; bastards and syllables
Of no allowance to your bosom's truth.—*Shaks.*

—*v. n.* to go out by rotation or succession.—Little used as a verb.

ROTELLA, ro-tel'la, *s.* (*rota*, a wheel, Lat.) A genus of Mollusca, belonging to the Rotellineæ; the shell is flattened, nearly discoid, and polished; inner lip very thick, and spreading over half of the under surface; aperture small; angulated; operculum horny.

ROTELLINEÆ, ro-tel-li'ne, *s.* (*rotella*, one of the genera.) A subfamily of the Trochidae, or Trochidae; the shell perlaceous, depressed, smooth, and highly polished; mouth smooth; umbilicus closed.

ROTHER-BEAST, roth'ur-beest, *s.* (*hryther*, a quadruped, Sax.) An animal of the Bovine genus.—Obsolete.

The beare to chase, the hinde to run, the cruel boare to fall
Upon the heards of *rother-beasts*, had now no lust at all.—*Golding* (1567).

ROTHER-NAILS, roth'ur-nayls, *s. plu.* (corrupted from *rudder-nails*.) Among Shipwrights, nails with very full heads, for fastening the rudder-irons of ships.

ROTHIA, ro'the-a, *s.* (in honour of A. W. Roth of Bremen, author of *Teutamen Floræ Germanicæ*.) A genus of Leguminous plants: Suborder, Papilionaceæ.

ROTIFERA, ro-tif'er-a, } *s.* (*rota*, a wheel, and *fero*, I carry, Lat.)

ROTIFERS, ro'te-furs, } Wheel animalcules, an order of Infusoria, distinguished by certain ciliated appendages at the anterior part of the body, which seem to move in a rapid rotatory manner.

ROTTEN, rotn, *a.* (*rutten*, Swed.) Putrid; carious;

ROTTENNESS—ROUGH.

putrescent; not firm or trusty; unsound; defective in principle; treacherous; deceitful;

Hence, rotten thing! or I shall shake thy bones
Out of thy garments.—*Shaks.*

defective in substance; not sound or hard; fetid; ill-smelling. *Rotten-stone*, a mineral occurring at Bakewell, in Derbyshire, and believed to arise from the decomposition of the shale of that country; colour dirty-grey, or reddish-brown, passing into black; dull, earthy, soft, meagre to the touch, and emitting an unpleasant odour when rubbed. Composition—alumina, 86; silica, 4; carbon, 10. It is used for polishing metals, stones, and glass, as well as many other purposes. The name is also given to the various kinds of tripoli.—See Tripoli.

ROTTENNESS, *rot'nes*, *s.* The state of being rotten; cariousness; putrefaction; unsoundness.

ROTTLERIA, *rot-le're-a*, *s.* (in honour of the Rev. Dr. Rottler, a botanist and Danish missionary at Tranquebar, in the East Indies.) A genus of plants: Order, Euphorbiaceæ.

ROTULA, *rot'u-la*, *s.* (diminutive of *rota*, a wheel, Lat.) In Anatomy, the knee-pan.

ROTULINA, *rot-u-li-na*, *s.* (*rotula*, a little wheel, Lat.) A genus of fossil Foraminifera.

ROTULUS WINTONIE, *rot'u-lus win-to'ne-e*, *s.* An exact survey of England made by King Alfred, and so called from its being kept at Winchester; it is now no longer in existence.—*Cowel.*

ROTUND, *ro-tund'*, *a.* (*rotundus*, Lat.) Round; circular; spherical. In Botany, circumscribed by one unbroken curve, as a *rotund* leaf.

ROTUNDA, *ro-tun'da*, *s.* A round building; any building which is round, both on the outside and inside.

ROTUNDIFOLIOLUS, *ro-tun-de-fo'le-us*, *a.* (*rotundus*, round, and *folium*, a leaf, Lat.) Having round leaves.

ROTUNDITY, *ro-tun'de-te*, *s.* Roundness; sphericity; circularity.

ROUBLE, *roo'bl*, *s.* A Russian coin.—See Ruble.

ROCCOO, *roo'koo*, *s.* A substance used in dyeing; the same as Anotto,—which see.

ROUE, *roo'ay*, *s.* (French.) In the fashionable world, a person devoted to a life of pleasure and sensuality, and regardless of the constraints of moral principle.

ROUGE, *roozh*, *s.* (French, red.) SACCATE, sak'kate, *a.* In Botany, bagged; having a pouch or bag, as in many petals and sepals.

SACCHARATE, sak'ka-rate, *s.* A salt formed by the combination of saccharic acid with a salifiable base.

SACCHARIC ACID, sak-kar'ik as'sid, *s.* A product of the action of dilute nitric acid on cane or grape sugar: the diluted acid is a colourless, slightly acid liquid; when concentrated, it is syrupy, colourless, strongly acid, and, by long standing, it deposits colourless crystals. It is also called *oxalidic acid*. Formula, $C_{12}H_{10}O_{16}$.

SACCHARIFEROUS, sak-ka-rif'er-us, *a.* (*saccharum*, sugar, Lat. and *fero*, I bear, Lat.) Producing sugar.

SACCHARINE, sak'ka-rine, *a.* Having the qualities of sugar. *Saccharine fermentation*, a kind of spontaneous fermentation which takes place in various bodies, by which sugar is formed in them either at the expense of the gluten, or of an acid.

SACCHAROID, sak'ka-royd, } *a.* (*sakhar*, su-
SACCHAROIDAL, sak'ka-royd-al, } gar, *eidōs*, re-
semblance, Gr.) Resembling sugar.

SACCHAROLOGY, sak-ka-ro'l'o-je, *s.* (*sakhar*, sugar, and *logos*, a discourse, Gr.) A treatise on sugar.

SACCHAROMETER, sak-ka-rom'e-tur, *s.* (*saccharum*, sugar, and *metron* I measure, Lat.) An instrument used to indicate the density of the liquid extracted from malt, or the degree to which the juice expressed from the sugar-cane is concentrated, previously to undergoing the process of crystallization.

SACCHARUM, sak'a-rum, *s.* (Latin, *soukar*, Arab. *sukre*, Fr. *sucker*, Germ.) The Sugar-cane, a genus of plants from which sugar is obtained: Order, Gramineae. In Chemistry and Medicine, *saccharum saturni*, acetate of lead; vulgarly, *sugar of lead*; a salt which crystallizes in right rhombic prisms, or in needles; transparent; astringent; of a sweetish metallic taste, and poisonous, chiefly from its tendency to pass into the carbonate. Formula, $PbO, \bar{A} + 3 \text{ aq.}$

SACCHOLACTATES, sak-ko-lak'ta-tis, *s.* Salts formed by the union of saccholactic acid with salifiable bases.—See Saccholactic.

SACCHOLACTIC, sak-ko-lak'tik, *a.* (*saccharum*, sugar, and *lac*, milk, Lat.) Saccholactic acid, same as mucic acid.

SACCHULMIC ACID, sak-kul'mik as'sid, *s.* An acid obtained along with sacchulmine, by boiling cane-sugar in sulphuric acid. When dry, it is a light-brown powder, insoluble in alcohol and ether: by long boiling in water, it is converted into sacchulmine, but without any change in composition. VOL. II.

4 H

SAILABLE—SAINT.

This verb has no active voice. *To sail* the sea, is to *sail on* the sea. In 'She sails th' aerial space,' *through* is understood. *Sail-broad*, borne or conveyed by sails; expanding like sails.

At last his *sail-broad* vana
He spreads for flight.—*Milton.*

SAILABLE, sale'a-bl, *a.* Navigable; that may be passed by ships.

SAILER, sa'lur, *s.* A sailor; a seaman; a ship or other vessel, in reference to her manner of sailing, as, a heavy sailer, a fast sailer, &c. *Sailor* is the way in which the word in the first sense is now almost universally spelt.

SAILING, sale'ing, *s.* In Nautical affairs, the method in which the path of a ship at sea, and the variations of its geographical positions, are represented on paper. As this can be accomplished in different ways, each particular mode has a distinctive name; thus, *plane sailing* proceeds on the idea of the earth's being an extended plane; *globular sailing*, on the supposition of its being a sphere. The series of zig-zag lines which a ship describes in its course is termed a *traverse*, and the reduction of these to one line, extending directly from the point of the ship's starting to that of its arrival, is designated *traverse sailing*; *parallel sailing* determines how far due east or west a ship should run in sailing from one meridian to another on any parallel of latitude: this is also sometimes termed *Mercator's sailing*; *oblique sailing* is simply the application of oblique-angled triangles to determine a ship's course; *current sailing* is the method of determining the true motion of a ship, when, besides being acted on by the wind, she is moving in a current; *windward sailing* is the mode of navigating a ship, in which the navigator endeavours to reach a port situated in the direction from which the wind is blowing; *great circle sailing* consists in determining a series of points in an arc of a great circle, between two points on the surface of the earth, for the purpose of directing a ship's course as nearly as possible on such arc;—movement through the air, as in a balloon; the act of setting sail. *Sailing order*, or *order of sailing*, any determinate order preserved by a fleet of ships.

SAILLESS, sale'les, *a.* Destitute of sails.

SATURN, sat'urn, *s.* (*saturnus*, Lat.) In Mythology,
 one of the oldest and principal deities, the son of
 Coelus and Terra, and the father of Jupiter. He
 answers to the Greek *Chronos*, or Time. He is
 said to have been driven from heaven by his son
 Jupiter, and to have shared the kingdom of Italy
 with Janus, under whom the golden age existed.
 In Astronomy, one of the primary planets, the
 largest of all the bodies of the solar system except
 the sun and Jupiter. It is attended by seven sat-
 ellites, and also by two rings of solid matter, which
 revolve around the planet, independent of it and
 of each other. Saturn's distance from the sun,
 round which it revolves in 29,456 years, is above
 890,000,000 miles; the rotation on its axis is per-
 formed in 10 hours, 16 minutes, 19 seconds, con-
 stituting its day; the mean diameter is 76,078
 miles, and consequently this planet is nearly 1000
 times larger than the earth. Saturn is character-
 ized by the mark ♄ representing a sickle, with
 which time mows down all things, in allusion to
 his being the god of time among the Greeks and
 Egyptians. In Astrology, Saturn is reckoned an

SECTIONALLY, sek'shun-al-le, *ad.* By sections; in a sectional manner.

SECTOR, sek'tur, *s.* (*sector*, Fr.) Literally, that which cuts; that which, being applied to a circle, cuts off a part of it. A mathematical instrument, consisting of two rulers, representing the radii of a circular arc, and movable round a joint, the middle of which forms the centre of the circle; from this centre various scales are drawn on the faces of the rulers, useful in making diagrams, laying down plans, &c. In Astronomy, an instrument for determining, with great accuracy, the zenith distances of stars, passing within a few degrees of the zenith, where the effect of refraction is small. In Geometry, the *sector of a circle* is a portion of the area of the circle bounded by two radii, and the intercepted arc. *Sector of a sphere*, the conic solid, whose vertex ends in the centre of the sphere, and whose base is a segment of the same sphere.

SECULAR, sek'u-lar, *a.* (*secularis*, from *seculum*, an age, a century, the world, Lat.) Pertaining to the present world; not spiritual; worldly. In the Roman Catholic Church, not regular; not bound by monastic rules; coming once in a century. In Antiquity, *secular games*, games celebrated once in a hundred years. *Secular poems*, those which were recited at the celebration of secular games. *Secular year*, the same with jubilee, kept once in a hundred years. In Astronomy, the term is applied to those variations in the planetary motions which are of long duration, so that their periods are better expressed in centuries than in years. In Geology, *secular refrigeration*, the periodical cooling, and consequent consolidation of the crust of the globe;—*s.* not a spiritual person; a layman; an ecclesiastic of the Roman Catholic church not bound by monastic rule.

SECULARITY, sek-u-lar'e-te, } *s.* Worldliness;

SEGMENT, *seg'ment*, *s.* (*segmentum*, from *seco*, I cut,
Lat.) A part cut off or divided, as the segments
of a calyx. In Geometry, a part cut off from a
figure by a line, as a plane; the *segment of a*
circle is a part of the area comprised between an
arc and its chord. *Segment of a sphere*, any part
of a sphere which is cut off by a plane. *Line of*
segments, two particular lines on the mathematical
instrument called the sector; they represent the
diameter of a circle, so divided into 100 parts, that
a right line drawn through these parts, and per-
pendicular to the diameter, shall cut the circle into
two segments, the greater of which shall have the
same proportion to the whole circle, as the parts
cut off have to 100. These lines are between the
lines of sines and superficies, and are numbered 5,
6, 7, 8, 9, 10. In Anatomy, *seggoid valves*, the
valves of the pulmonary artery, so called from
their resemblance to segments of circles.

up above the surface of the earth, after sowing.

SEICIRCUS, *se-e-sir'kus*, *s.* (*seio*, I wag, and *kirkos*,
a circle.) A genus of birds belonging to the
Fluvicolinae, or stonechats and wagtails: Family,
Muscicapidae.

SEIDLITZ-WATER, *sed'litz-waw'tur*, *s.* The mineral
water of Seidlitz, a village of Bohemia: sulphate
of magnesia, sulphate of soda, and carbonic acid,
are its active ingredients. *Seidlitz-powders*, or
carbonated effervescent Cheltenham salts, are an
intimate mixture of equal parts of tartaric acid
and bicarbonate of soda in atomic proportions: to
these is often added a portion of sulphate of mag-
nesia, or of the tartrate of potash and soda.

SEIGNEURIAL, *seen-u're-al*, } *a.* (see Seignior.)
SEIGNIORIAL, *seen-yo're-al*, } Pertaining to the
lord of a manor; vested with large powers; inde-
pendent.

a setting aside.

Without any *sequestration* of elementary principles.—*Boyle.*

In Law, *sequestration* is of several kinds. The setting aside of a thing in controversy from both parties who contend for it: a commission directed against a defendant in chancery authorizing the persons named in it to take the defendant's property into their hands, and to receive the profits thereof until he shall have discharged the plaintiff's bill, or performed the decree of court, for not doing whereof he is in contempt; a kind of execution for debt, in the case of a beneficed clerk, of the profits of the benefice, till he shall have satisfied some debt established by decree; the gathering up of the fruits of a benefice during a vacancy for the use of the next incumbent; the disposing of the goods, by the ordinary, of one who is dead, whose estate no man will meddle with. In Scotch Law, *sequestration* is two-fold, viz., the *sequestration* of landed estates, and the *sequestration* in a mercantile bankruptcy of the whole estate, both heritable and movable, of a bankrupt. The former is intended to preserve a disputed property for the right owner; the latter to distribute the estate equally among the creditors of the bankrupt.

SEQUESTRATOR, sek'wes-tray-tur, *s.* One who sequesters.

SEQUESTRUM, se-kwes'trum, *s.* In Pathology, the portion of dead bone which is thrown off in Necrosis, or gangrene of the bony tissue.

SEQUIN, se'kwin, *a.* A gold coin of Italy and Turkey, of different values in different places. In Italy its value is about 9s. 5d.

SERAGLIO, se-ral'yo, *s.* (*serraglio*, Ital.) The palace of an Eastern prince, but more particularly that in which the women are lodged. The *seraglio* of the Turkish sultan is a long range of buildings inhabited by himself, and the officers and dependents of his court, and in which all the business of the state is transacted. It contains also the apartments in which the females of the harem reside.

SERAI—SERENE.

SERAI, ser-i', *s.* (Persian, the king's court, a palace, a large edifice.) A large building for the accommodation of travellers, common in eastern countries. The erection of these buildings is considered highly meritorious both by Hindoos and Mahomedans, who frequently endow them; *seraglio*.

SERGEANCY, ser'jan-se, *s.* The office of a sergeant-at-law.

SERGEANT, } ser'jánt, *s.* (*sergent*, Fr. *sergente*, Ital. *SERJEANT*, } from *sarjank*, a prefect, Persian.)

In Law, formerly an officer in England nearly answering to the more modern bailiff of the hundred; also an officer whose duty was to attend on the king and on the lord high steward, to arrest traitors and other offenders. This officer is now called *sergeant-at-arms* or *mace*. Other officers of an inferior kind, who attend on mayors and magistrates to execute their orders, are likewise called *sergeants*. A *sergeant-at-law* is the highest degree in the common law; all must pass through this degree before attaining the dignity of judge. In the Army, a non-commissioned officer in a troop of cavalry, or a company of infantry. His duty in general is to drill the recruits of his regiment, to assist in preserving discipline, and on parade to act as a mark or guide in the performance of evolutions. Four or six sergeants are charged with the important duty of guarding the colours of a regiment, and are called *colour-sergeants*. *Sergeant-major*, the first non-commissioned officer in a regiment after the quarter-master. There are various officers holding this title, coupled with an epithet indicating the nature of the duties which they have to perform, as *armourer-sergeant*; *covering-sergeant*, from his standing immediately behind his superior officer on parade; *drill-sergeant*; *hospital-sergeant*; *quarter-master-sergeant*; *schoolmaster-sergeant*. SERIANA.—See *Serjania*.

SERIATIM, se-re-a'tim, *s.* (Latin.) In regular order.

SERICA, se-re-ka, *s.* (*serikos*, silken, Gr.) A genus of Coleopterous insects, belonging to the Melolonthinae, or True beetles: Family, Cetoniadae.

SERICARIA, se-re-ka're-a, *s.* (*serikos*, silken, Gr.) A genus of Nocturnal butterflies: Tribe or Section, Pseudo-bombyces.

SERICATE, ser'e-kate, *s.* A compound of sericic acid with a base.

SERICEOUS, ser-ish'us, *a.* (*sericeus*, from *sericum*, silk, Lat.) Silky; in Botany, applied to the fine down of some plants.

SERICIC ACID, ser-ik' as'id, *s.* (*sericum*, silk, Lat.) An oily acid obtained from the butter of nutmegs, in brilliant white scales of a silky lustre. Formula, C₂₈ H₂₇ O₃ + HO.

SERICINE, ser'e-sine, *s.* A substance which exists in combination with sericic acid in butter of nutmegs: when this butter is dissolved in 4 parts of hot alcohol, the liquor, on cooling, deposits the sericine in silky crystals: it is an oxide of glycerule, and is also called myristine, from the botanical name of the fruit from which it is derived, *Myristica moschata*.

SERICIOUS, se'rish-shus, *a.* (*sericus*, Latin, *serikos*, Gr.) Silky; consisting of silk; pertaining to silk. In Botany, covered with soft silky hairs pressed close to the surface.

SERICOMYIA, se-re-ko-mi'a, *s.* (*serikos*, silken, and *myia*, a fly, Gr.) A genus of Dipterous insects: Family or Tribe, Syrphidae.

SERICOPHORUS, ser-e-kof'o-rus, *s.* (*serikos*, silken, and *phoreo*, I bear, Gr.) A genus of Hymenopterous insects: Family, Crabronidae.

SERICOSTOMA, ser-e-kos'to-ma, *s.* (*serikos*, silken, and *stoma*, the mouth, Gr.) A genus of Neuropterous insects belonging to the Phryganinae, or Mayflies: Family, Phryganidae.

SERICTIUS, ser-ik'shus, *s.* (*serikos*, silken, Gr.) A genus of fishes of the Shark kind: Family, Squalidae.

SERICULUS, se-rik'u-lus, *s.* (*serikos*, silken, Lat.) A genus of birds belonging to the Oriolidae orioles, natives of Australia: Family, Merulidae.

SERIES, se'ris, *s.* (*seri*, Fr.) A continued succession of things in the same order, and bearing the same relation to each other, as a *series* of kings; sequence; order; course; succession of things, as a *series* of calamitous events. In Natural History, an order or subdivision of some class of natural objects. In Arithmetic and Algebra, a continued succession of quantities, connected by the signs + or —, and proceeding according to some determinate law. A *converging series* is one in which the terms decrease or become successively less and less, as $1 + \frac{1}{2} + \frac{1}{4} + \frac{1}{8} + \frac{1}{16}$, &c. A *diverging series* is one in which the terms continually increase, as $1 - 2 + 4 - 8 + 16$, &c. An *indeterminate series* is one whose terms proceed by the powers of an indeterminate quantity, as $x - \frac{1}{2}x + \frac{1}{3}x - \frac{1}{4}x$, &c.; and this is either ascending or descending, according as the indices of the unknown quantity increase or diminish,—see also Progression.

SERILOPUS, se-ril'o-pus, *s.* (*serikos*, silken, and *lophos*, a crest, Gr. the head being furnished with a crest of silky feathers.) A genus of birds be-

SERINGEA—SEROSITY.

longing to the Eurylaminæ, or broad-bills: Family, Muscipidæ.

SERINGEA, se-rin'je-a, *s.* (in honour of N. C. Seringe, a Swiss botanist.) A genus of plants: Order, Byttneriaceæ.

SERIOLOA, ser-i'o-la, *s.* (dim. of *seris*, chicory, Gr.) A genus of Composite plants: Suborder, Tubulifloræ. A genus of fishes: Family, Zeidæ.

SERIOUS, se're-us, *a.* (*sereux*, Fr. *serius*, Lat. *serio*, Span. and Ital.) Grave in manner or disposition; solemn; not light or volatile; really intending what is said; in earnest; opposed to being in jest; important; weighty; not trifling.

SERIOUSLY, se're-us-le, *ad.* Gravely; solemnly; in earnest; without levity.

SERIOUSNESS, se're-us-ness, *s.* Gravity of manner or of mind; solemnity; earnestness of attention.

SERISOMUS, se-ro-so'mus, *s.* (*serikos*, silken, and *soma*, the body, Gr.) A genus of birds belonging to the Coccozine, or Hook-billed cuckoos: Family, Cuculidæ.

SERISSA, se-ris'sa, *s.* (meaning unknown.) A genus of plants: Order, Cinchonaceæ.

SERJANIA, ser-ja-ne-a, *s.* (in honour of Philip Serjeant, a French botanist.) A genus of plants: Order, Sapindaceæ.

SERJEANT.—See Sergeant.

SERMOCINATION, ser-mo-se-na'shun, *s.* (*sermocinatio*, Lat.) Speech-making.—Not used.

No sermocination of ironmongers, felt-makers, cobblers, broommen!—*Ep. Hall*.

SERMOCINATOR, ser-mo-se-na'tur, *s.* One who preaches, or is given to make speeches.—Not used.

These obstreperous sermocinators make easy impression on the minds of the vulgar.—*Howell*.

SERMON, ser'mun, *s.* (*sermo*, Lat.) A written or extemporary discourse on religious matters, addressed to a congregation by a clergyman or pastor of a church, having generally a text from Scripture, in which the subject is contained or alluded to; also a printed discourse on a religious subject;—*v. a.* to discourse, as in a sermon; to tutor; to teach dogmatically.—Not much used.

Come, sermon me no farther,
No villanous bounty yet hath passed my heart.—*Shaks.*

SERMONING, ser'mun-ing, *s.* Discourse; instruction; advice.—Obsolete.

I trow there nedeth litle sermoning
To make you assenten to this thing.—*Chaucer.*

SERMONIZE, ser'mo-nize, *v. a.* To preach; to make sermons or long dull speeches; to inculcate rigid rules.

The dictates of a morose and sermonizing father.—*Lord Chesterfield.*

SEROLIS, ser'o-lis, *s.* (*sero*, I knit or join, from its jointed plates, Lat. and *lithos*, a stone, Gr.) A genus of Crustaceans, affording the nearest approach among living animals, to the external form of the trilobite.

SEROON, se-roon', *s.* (*seron*, Span.) A kind of package formed of pieces of wood fastened with hides, used especially for packing drugs; a seroon of almonds weighs 200 lbs.; of anise, from 2 to 3 cwt.; of Castile soap, 2½ to 3¼ cwt.

SEROSITY, ser-os'e-te, *s.* (*serosité*, Fr.) The liquid which exudes from the serum of the blood when it is coagulated by heat; it is water holding some of the salts of the blood, and a trace of albumen in solution.

SEROTINE—SERPIGINOUS.

SEROTINE, ser'o-tine, *s.* (*serò*, late in the evening, Lat.) A species of bat.

SEROUS, se'rus, *a.* (*sereux*, Fr.) Having the nature or qualities of serum; thin; watery; resembling whey.

SERPENT, ser'pent, *s.* (*serpens*, creeping, Lat. *sarpa*, a serpent, Sanscrit.) An Ophidian reptile. Serpents have elongated bodies without feet, and move by means of the folds they form when in contact with the ground: figuratively, a subtle or malicious person; a kind of firework. In Mythology, a symbol of the sun, and as such, represented as biting the tail with his body formed into a circle, in order to indicate the ordinary course of that luminary. The serpent was also the symbol of Medicine, and of the gods who presided over it, as of Apollo and Æsculapius. *Serpent-worship* was very prevalent in ancient idolatry. In Music, an instrument consisting of a long conical tube of wood covered with leather, having a mouth piece, ventages, and keys, and bent in a serpentine form. Its compass is from B flat below the bass staff, to G, the treble clef line, including every tone and semitone between these extremes. In Astronomy (*serpens*), a constellation distinguished astronomically, but not mythologically, from Ophiuchus, being the serpent carried by the serpent-bearer: the windings of the figure bring it into contact with Aquila, Ophiuchus, Libra, and Hercules. *Serpent-cucumber*, or *Snake-gourd*, a plant of the genus *Trichosanthes*. *Serpent-easter*, the bird *Gypogerranus serpentarius* or secretary bird, a native of Africa. *Serpent's-tongue*, a fern of the genus *Ophioglossum*.

SERPENTARIUS, ser-pen-ta're-us, *s.* One of the names of the constellation Ophiuchus, or serpent-bearer. In Ornithology, the secretary bird.

SERPENTIFORM, ser-pent'e-fawrm, *a.* Having the form of a serpent.

SERPENTINE, ser'pen-tine, *s.* (in allusion to its spotted appearance, like the skin of a snake, which it frequently presents.) A mineral commonly of a dark green colour, passing into yellow and grey; translucent or opaque, with a slightly resinous lustre; fracture conchoidal or splintery; sometimes a little unctuous to the touch, and yields easily to the knife. Analysis of a specimen from Fahlun in Sweden—magnesia, 40.64; silica, 41.95; alumina, 0.37; oxide of iron, 2.12; carbonic acid and bitumen, 3.42; water, 11.68: sp. gr. 2.5 to 2.56; hardness = 3.0. In Botany, the name of a plant;—*a.* resembling a serpent; twisted like a serpent; anfractuons; spiral; having the colour or properties of a serpent;—*v. n.* to meander; to wind like a serpent.

Where Guadalquivir serpentines with ease.—*Harte.*
A rivulet that serpentined in view.—*Lord Lyttleton.*

SERPENTINELY, ser'pen-tine-le, *ad.* In a serpentine manner.

SERPENTIZE, ser'pen-tize, *v. n.* To serpentine.

The road serpentizes through a tall shrubbery.—*Barrow's Travels.*

The Lune serpentizes for many a mile.—*Mason's Notes on Gray's Letters.*

SERPET, ser'pet, *s.* A basket.—Not in use.

SERPICULA, ser-pik'u-la, *s.* (*serpo*, I creep, Lat. from the genus being composed of small creeping plants.) A genus of plants: Order, Haloragaceæ.

SERPIGINOUS, ser-pij'e-nus, *a.* (*serpigo*, ringworm, Lat.) In Pathology, creeping; as ulcers which extend at one extremity as they cicatrize at the other.

SERPIGO—SERRATION.

SERPIGO, ser-pi'go, *s.* (*serpo*, I creep, Lat.) In Pathology, ringworm or tetter; so called because it creeps over the surface of the skin.

SERPULA, ser-pu-la, *s.* (*serpo*, I creep, Lat.) A genus of Annelides of the order Tubicolæ, the calcareous shells of which twine round and cover stones, shells, and other marine bodies.

SERPULACEA, ser-pu-la'se-a, } *s.* (*serpulea*, one of
SERPULEANS, ser-pu-le-ans, } the genera.) A family of Cephalobranchiate Annelides, inhabiting cylindrical and tortuous calcareous tubes; generally parasite on shells.

SERPULIDEAN, ser-pu-lid'e-an, *s.* An animal of the family Serpulacea.

SERPULITE, ser-pul-ite, *s.* A fossil shell of the genus Serpulites.

SERPULITES, ser-pu-li'tes, *s.* A genus of fossil shells from the Silurian strata of Salop.

SERR, ser, } *v. a.* (*serrer*, Fr.) To crowd; to
SERRY, ser're, } press or drive together.—Obsolete.

The more gross parts contract and *serr* themselves together.—Bacon.

SERRA, ser-ra, *s.* (in memory of — Serra, a Spanish botanist, who wrote upon the plants of Majorca.) A genus of plants, natives of the Arabian isle of Socotora: Order, Malvaceæ.

SERRADILLA, ser-ra-dil'la, *s.* (Portuguese.) The valuable agricultural plant *Ornithopus sativus*. It produces excellent fodder crops, where nothing else will grow: hence the name.

SERRAFALCUS, sar-ra-fal'kus, *s.* (*serra*, a saw, and *falcus*, I cut, Lat.) A genus of plants: Order, Gramineæ.

SERRANINÆ, ser-ra-ni'ne, *s.* A subfamily of the Percidæ, of which the genus *Serranus* is the type; distinguished by the dorsal fin being single, sometimes emarginate, the branchial being furnished with seven rays, and the jaws with strong canines.

SERRANUS, ser-ra'nus, *s.* (*serra*, a saw, Lat.) A genus of fishes; the body ovate and fusiform, the peroperculum crenated: Type of the subfamily Serraninæ.

SERRAPALPUS, ser-ra-pal'pus, *s.* (*serra*, a saw, and *palpus*, a feeler, Lat.) A genus of Coleopterous insects: Family, Stenelytra.

SERRASALMA, ser-ra-sal'ma, *s.* (*serra*, a saw, and *salmo*, a salmon, Lat.) A genus of fishes, with short, broad, thick bodies, somewhat rhomboidal, and having the belly serrated: Family, Salmonidæ.

SERRATE, ser-rate, } *a.* (*serratus*, from *servo*, I
SERRATED, ser-ra-ted, } saw, Lat.) Notched on

the edge like a saw. In Anatomy, *serratus magnus*, a muscle arising from eight or nine of the first ribs, and inserted into the base of the scapula. It brings the scapula forward, and is a muscle of inspiration. *Serratus posticus superior*, a muscle arising from the spinous processes of the last cervical, and three upper dorsal vertebrae, and inserted into the second, third, fourth, and sometimes fifth, ribs. It raises the ribs, and thus dilates the thorax. *Serratus posticus inferior*, a muscle arising from the spinous processes of the two lower dorsal, and three upper lumbar, vertebrae, and inserted into the four inferior ribs, which it depresses and draws backward. In Botany, a *serrate-ciliate leaf* is one having fine hairs, like the eye-lashes, on the serratures; a *serrate-dentate leaf* has the serratures toothed.

SERRATION, ser-ra'shun, *s.* Formation in the shape of a saw.

SERRATURE—SERVE.

SERRATURE, ser-ra-ture, *s.* A notching in the edge of anything like a saw.

SERRATULA, ser-ra-tu-la, *s.* (*serra*, a saw, Lat. the leaves being serrated.) Saw-wort, a genus of Composite plants of the Thistle kind: Suborder, Tubulifloræ.

SERRICORNES, ser-re-kawr'nes, } *s.* (*serra*, a saw,
SERRICORNS, ser-re-kawrus, } and *cornu*, a horn, Lat.) A family of Coleopterous insects, comprehending those which have serrated antennæ.

SERRIED, ser'ried, *part. a.* Crowded, pressed close together.

With them rose
A forest huge of spears; and thronging helms
Appear'd, and *serried* shields in thick array.—Milton.

SERROUS, ser-rus, *a.* Like the teeth of a saw; irregular.

SERRULATE, ser-ru-late, *a.* (*serrulatus*, from *serrula*, a little saw, Lat.) Minutely serrated; having very fine notches.

SERRULATION, ser-ru-la'shun, *s.* In Botany, notching, like that of a fine saw.

SERRURIA, ser-roo're-a, *s.* (in honour of Professor Jos. Serrurier.) A genus of plants: Order, Protacæ.

SERSALISIA, ser-sa-lis'e-a, *s.* (in memory of John Baptist Sersalis, a Neapolitan priest.) A genus of plants: Order, Sapotacæ.

SERTULARIA, ser-tu-la're-a, *s.* (*sertula*, clover, Gr.) A genus of Corals which propagate by ova or buds.

SERTULARIÆA, ser-tu-la-ri'e-a, } *s.* A family of
SERTULARIDÆ, ser-tu-la-ri-de, } Poppyparia, or corals, founded on the genus *Sertularia* of Linnæus.

SERUM, se'rum, *s.* (Latin.) The essentially liquid part of the blood; also the fluid secreted by certain membranes in the human body, such as the pericardium, pleura, &c.: the thin part of milk; whey.

SERVANT, ser'vant, *s.* (French; *servant*, from *servo*, I keep, hold, save, or take heed, Lat.) One who serves; a menial; a person or thing which is in a state of subjection;

Being unprepared,
Our will became the *servant* to defect.
Which else should free have wrong'd.—Shaks.

the subject of a sovereign; a word of civility. In a theological sense, all living creatures, more especially the ministers of religion, those in sovereign authority, and rulers under them, are called *servants* or *ministers* of God;—*v. a.* to subject.—Obsolete.

My affairs
Are *servanted* to others.—Shaks.

SERVE, serv, *v. a.* (*servir*, Fr. and Span. *servir*, Ital. from *servio*, Lat. which is supposed to be from *servus*, a servant or slave, and this again from *servo*, I keep, or perhaps from *שרר*, to bind, because of prisoners taken in war being bound and made servants or slaves of the conquerors.) To work or labour in mind and body for another; to act as the minister of, or perform official duties; to attend at command; to wait;

A goddess among gods, ador'd and *serv'd*
By angels numberless, thy daily train.—Milton.

to obey meekly and servilely; to supply with food; to be subservient or obedient to;

Bodies, bright and greater, should not *serve*
The less, not bright.—Milton.

to perform the duties required in;

They that *serve* the city shall *serve* it out of all the tribes of Israel.—Ezek. xlviii. 19.

to obey or perform duties in the employment of, as to *serve* the king or country; to be sufficient for;

SERVIAN—SERVICE.

to be in the place of anything to a person, as a sofa may *serve* for a seat by day, and a bed by night; to treat; to requite, as he *served* me ungratefully. In Theology, to obey and worship; to yield compliance with, in a bad sense;

Serving divers lusts and pleasures.—*Titus* iii.
to be in bondage to.

Thy seed shall be a stranger in a land that is not theirs, and shall *serve* them, and they shall afflict them four hundred years.—*Gen.* xv. 13.

In Nautical language, to use; to manage; to apply, as the guns were well *served*; to *serve* a rope, to wind spun yarn or old canvas. &c., round it, by means of a mallet, to prevent its being chafed or rubbed. To *serve one's self* (*se servir de*, Fr.), to make use of. To *serve up*, to prepare and present in a dish. To *serve in*, used by Shakspeare for to bring in—as meat by a servant. To *serve out*, to distribute in portions, as provisions to soldiers. To *serve a writ*, to read it to the defendant, or to leave an attested copy at his usual place of abode. To *serve an attachment or writ of attachment*, to levy it on the person or goods by seizure; or to seize. To *serve an execution*, to levy it on lands, goods, or person, by seizure or taking possession. To *serve a warrant*, to read it, and to seize the person against whom it is issued. SESSION, sesh'un, *s.* (*sessio*, from *sedeo*, I sit, Lat.)
A sitting; the sitting of an assembly, of a court,
of a council, of a political, or of an academical
body. When magistrates or judges compose the
sitting body, the plural, *sessions*, is generally used;
the space for which a court sits, with no other in-
terval than adjournments, as, the *session* of par-
liament. *Court of Session*, the supreme civil
court of Scotland, having jurisdiction in all civil
questions of whatever nature. It was constituted
by an act of the Scottish parliament in 1537, and
was intended to supply the place of the previously
existing courts, and especially of a judicial commit-
tee of parliament, called 'lords of session;' whence
the name of the court, and the title of the judges,
who succeeded to that borne by their predecessors.
The *lords of session* are thirteen in number,
forming an *inner court* of seven, under the presi-

dency of the Lord President, and an *outer court* of
six, under that of the Lord Justice Clerk. *Kirk-
session*, the lowest judicial court of the Church of
Scotland, having jurisdiction only over a single
parish. It is composed of the minister, who is,
ex officio, moderator or chairman, and of the lay
elders, who must be at least two in number: the
moderator has only a casting vote. The same title
is applied to similar courts among the various
presbyterian dissenters of Scotland, amidst whom
each *kirk-session* exercises jurisdiction only over
the members of the congregation with which it is
connected. *Quarter Sessions*, or *Sessions of the
Peace*, a court held in England once every quarter,
by two justices of the peace, one of whom is of the
quorum, for the trial of small felonies and misde-
meanors.

SEVERAL, sev'er-al, *a.* Separate; distinct; different; divers; consisting of a number; particular.

Each might his *several* province well command.

Would all but stoop to what they understand.—*Pope.*

Joint and several, applied to a deed of obligation, by which the persons signing it are unitedly or individually bound;—*s.* state of separation; each particular taken singly; in an obsolete signification, an enclosed or separate place; also a piece of open ground which was a joint property of the inhabitants of a parish.

SEVERALITY—SEW.

SEVERALITY, sev'er-al'e-te, *s.* Each particular singly taken; distinction.—Not in use.

The *severalities* of the degrees prohibited.—*Bp. Hall.*

SEVERALIZE, sev'er-al-lize, *v. a.* To distinguish.—Not in use.

SEVERALLY, sev'er-al-le, *ad.* Distinctly; particularly; separately; apart from others.

SEVERALTY, sev'er-al-te, *s.* State of separation from the rest. In Law, *an estate in severalty* is that in which the tenant holds in his own right, without being bound in interest with any other person. It is distinguished from joint tenancy, copartnership, and common.

SEVERANCE, sev'er-ans, *s.* A state of separating or disuniting. In Law, the *severance of a jointure* is made by destroying the unity of interest. Thus, when there are two joint-tenants for life, and the inheritance is by or descends upon another, it is called a *severance*. So also when two persons are joined in a writ, and one is non-suited, in this case *severance* is permitted, and the other plaintiff may proceed in the suit. So also in Assize, when two or more disseizes appear upon the writ, and not the other, *severance* is permitted.—*Blackstone.*

SEVERE, se-vere', *a.* (French, from *severus*, Lat. *severo*, Span. and Ital.) Rigid; harsh; sharp; rigorous; regulated by strict rules; grave; sedate; close; concise; painful; afflictive; cruel; biting sharp; extreme, as *severe* cold; exact; critical; nice.

SEVUM, se'vum, *s.* (*sebum*, suet, Lat.) In Surgery, *secum praparatum*, prepared suet, suet cut into slices, melted over a slow fire, and strained through a cloth; used principally in giving consistence to ointments and plasters.

SEW, su, *v. n.* To follow, now written *sue*,—which see. If me thou deign to serve and *sew*, It was a knight who to her sewde.—*Spenser.*

SEW, so, *v. a.* (*sewian*, Sax.) To join by the use of needle and thread; to practise sewing; to join or fasten together with a needle and thread. To *sew up*, to enclose in anything sewed;—(*sicco*, I make dry, Lat.) to drain a fish pond; to catch fish—(obsolete in this sense.) In Nautical language, to *sew*, to rest upon the ground, as a ship when she has not a sufficiency of water to float her.

SEWED—SEXLOCULAR.

SEWED, sode, *a.* Wrought or ornamented with the needle, as *sewed* muslin.

SEWER, soor, *s.* A drain or passage to convey off water under ground, particularly in cities.

SEWER, su'ur, *s.* (from *shaffer*, to provide or dish up, Dutch.) An officer who serves up a feast.

SEWER, so'ur, *s.* One who sews or uses a needle.

SEWING, so'ing, *s.* The act of using a needle; the work done with a needle, as, the *sewing* is bad.

SEWSTER, so'stur, *s.* A female who sews.

At every twisted thrid, my rock let fly
Unto the *sewster* that did sit me nigh.—*Ben Jonson.*

SEX, seks, *s.* (*sexe*, Fr. *sextus*, Lat.) The distinction between male and female, or that property by which an animal is male or female. In Botany, the distinction of plants founded on the absence or presence of stamens and pistils; by way of emphasis, womankind; females.

The *sex* whose presence civilizes ours.—*Cowper.*

SEXAGENARIAN, seks-a-je-na're-an, *s.* (see next word.) A person who has arrived at the age of sixty years.

SEXAGENARY, seks-aj'e-na-re, *a.* (*sexagenarius*, Lat. *sexagenaire*, Fr.) Threescore;—*s.* a person sixty years of age; a sexagenarian.

SEXAGESIMA, seks-a-jes'e-ma, *s.* (*sexagesimus*, Lat.) The second Sunday before Lent, and next to Shrove Sunday; so called as being about the sixtieth day before Easter.

SEXAGESIMAL, seks-a-jes'e-mal, *a.* Sixtieth; pertaining to the number sixty. *Sexagenary*, or *sexagesimal arithmetic*, is a method of computation by sixties, as that which is used in dividing minutes into seconds. *Sexagesimals*, or *sexagesimal fractions*, are fractions whose denominators proceed by the powers of 60, in the same way as common decimals proceed by those of 10. Thus a prime, or first minute, being $\frac{1}{60}$, a second is $\frac{1}{60} \times \frac{1}{60} = \frac{1}{3600}$, a third $\frac{1}{60} \times \frac{1}{60} \times \frac{1}{60} = \frac{1}{216000}$. *Sexagesimals* are used in the division of time and of the circle; and in these cases, the law of the series being known, the denominators are now written as 4°, 12', 3'', 17''', which numbers represent the several numerators of fractions, whose powers decrease in a sexagesimal ratio.

SEXANGLED, seks-ang'gld, } *a.* (*sex*, six, and

From lofty *siege*, began these words aloud to sound.—
Spenser.

place; rank; class;

I fetch my life and being
From men of royal *siege*.—*Shaks.*

SIENITE, *si'en-ite*, *s.* (so called from Syene, a city
SYENITE, *si'en-ite*, *s.* of Egypt, where this rock occurs in abundance, and whence the Romans obtained it for architectural and other purposes.) An igneous rock composed of felspar, hornblende, and quartz; or of felspar, hornblende, quartz, and mica; it often bears the general aspect of a granite. Felspar and hornblende may be considered its two constant and essential ingredients, but it frequently contains quartz and mica, and occasionally talc and epidote.

SIENITIC, *si-e-nit'ik*, *a.* Containing sienite, or resembling it, or possessing some of its properties.

SIERRA, *se-er'ra*, *s.* (Spanish, a chain of hills.) A word prefixed to the names of several places in Spain, and other parts discovered or colonized by the Spaniards, as Sierra Leone.

Siesta, *se-es'ta*, *s.* A Spanish word signifying the hottest part of the day. It also means a nap, or short sleep after dinner, according to the custom in warm countries, and in this sense it is used by English writers.

SIEVE, *seev*, *s.* (*sife*, *syfe*, from *sifan*, to sift, Sax. *seef*, Dutch, *sieb*, Germ.) A utensil consisting of a hoop, with a hair or wire cloth, used in separating flour from bran, or the fine part of any substance from the coarse; that used in a mill is called a bolter. The term is also applied to a similar utensil for straining milk or other fluids.

SIEVERSIA, *se-versh'e-a*, *s.* (in honour of M. Sievers, a Russian botanist and traveller.) A genus of plants allied to Geum: Order, Rosaceæ.

SIFT, *sift*, *v. a.* (*sifan*, Sax. *ziefen*, Dutch, *sieben*, Germ.) To separate the fine from the coarse by a sieve; to separate; to part; to examine minutely and critically; to scrutinize.

SIFTER, *sif'tur*, *s.* One who sifts; that which sifts; a sieve.

SIG, *sig*, (from *sige*, victory, Sax.) A prefix to certain names, signifying victory, as *sigbert*; *i. e.* bright victory.) It answers to the Greek *Nic*, in Nicander, and the Latin *Vic*, in Victorinus.

SIGALION, *si-ga'le-on*, *s.* (*sigaloeis*, smooth, shining, Gr.) A genus of Annelides: Family, Amphroditidæ.

SIGALIONES, *sig-a-li'o-nes*, *s.* (*sigaloeis*, smooth, shining, Gr.) A name given to those Aphroditæ, which have a very elongated form, and each foot furnished with cirri.

SIGALPHUS, *si-gal'fus*, *s.* (*sigaloeis*, shining, *phos*, light, Gr.) A genus of Hymenopterous insects: Family, Papivora.

SIGANUS, *si-ga'nus*, *s.* (meaning unknown to us.) A genus of fishes, the body oval, with a recumbent spine in the front of the dorsal, which is single, long, and deeply emarginate, with more spinal than soft rays; mouth small, with compressed and emarginate teeth; pectorals small; the colours bright: Family, Zeidæ.

SIGERETUS, *si-ge-re'tus*, *s.* (*sigeretes*, one that glides silently, Gr.) A genus of Mollusca, belonging to the Naticinæ, or Sea-snails; the shell oval, flattened, and ear-shaped; inner lip wanting; no umbilicus: Family, Naticidæ. This word is often improperly written *sigaretus*.

SIGH, *si*, *v. a.* (*sican*, Sax. *suchtan*, Dutch.) To inhale a larger quantity of air than usual, and immediately expel it, as in grief; —*v. n.* to lament; to mourn; to express by sighs;

The gentle swain *sighs* back her fate.—*Hoole.*
—*s.* a single deep and audible respiration, as in the expression of sorrow.

SIGHER, *si'ur*, *s.* One who sighs.

SIGHING, *si'ing*, *s.* The act of respiring audibly, as in grief.

SIGHINGLY, *si'ing-le*, *ad.* With sighing.

SIGHT, *site*, *s.* (*gesicht*, Sax. *sicht*, Germ. *sigt*, Dan.) The act of seeing; perception of objects by the eye; the faculty of vision; open view or situation in which nothing obstructs the view; the eye or organ of vision; an aperture in an instrument through which objects are seen, as the *sight* of a quadrant or theodolite; that which is beheld; a show or spectacle, particularly something new or wonderful. To take *sight*, to take aim, as in directing a piece of artillery.

SIGHTED, *si'ted*, *a.* A word used only in composition, in which it signifies having sight, or seeing in a particular manner, as *short-sighted*, *near-sighted*, *quick-sighted*, &c.

SIGHTFULNESS, *site'fûl-nes*, *s.* Clearness of sight. —Obsolete.

Let us not wink, though void of purest *sightfulness*.—
Spenser.

SIGHTLESS, *site'les*, *a.* Wanting sight; blind.

SIGHTLESSLY, *site'les-le*, *ad.* Blindly; in a sightless manner.—Not much used.

SIGHTLESSNESS, *site'les-nes*, *s.* Blindness.—Not used.

SIGHTLINESS, *site'le-nes*, *s.* Comeliness; an appearance which is pleasant to the view.

SIGHTLY, *site'le*, *a.* Pleasing to the eye; striking to the view.

SIGHTSMAN, *site'se-man*, *s.* Among Musicians, one who reads music at first sight.

SIGIL, *si'jil*, *s.* (*sigillum*, a seal, Lat.) A seal or signature.

Sorceries to raise the infernal powers,
And *sigils* fram'd in planetary hours.—*Dryden.*

SIGILLATUR, *se-jil'la-tur*, *a.* Fit to seal; belonging to a seal.—Not in use.

SIGILLARIA, *si-jil-la're-a*, *s.* (*sigillum*, a seal, Lat. from the nature of the markings on the stem.) An extinct genus of plants, the stems of which are found in the coal formation and mountain lime-

stone. They are deeply furrowed, but not jointed, with oblong, discoid, or nearly round cicatrices or scars, not arranged in a distinctly spiral manner, with frequently three smaller vascular scars in the centre of the larger ones. These fossil trees are frequently found penetrating the strata in a vertical direction, or rather perpendicularly, to the plane of stratification, with their roots ramified in the rocks. In Mythology, feasts in honour of Saturn, celebrated after the Saturnalia. At this festival, little statues of gold, silver, &c., were sacrificed to the god, instead of human beings, who had been the usual victims, till the barbarous custom was changed by Hercules.

SIGMA, sig'ma, *s.* The name of the Greek letter Σ , σ , equivalent to the English *S*. The Greeks originally used this letter for the English *C*, and the Romans adopted this form into their tables.

SIGMOID, sig'moyd, } *a.* (from the letter Σ ,
SIGMOIDAL, sig-moyd'al, } *sigma*, and *eidos*, like-
ness, Gr.) Resembling the Greek letter Σ , sigma.
In Anatomy, applied to a flexure of the colon, where it forms a double curve in the iliac region, and also to the semicircular valves which guard the orifice of the pulmonary artery, and of the aorta.

SIGN, sine, *s.* (*segn* or *segen*, Sax. *signe*, Fr. *signum*, Lat. *segno*, Ital. *seno*, Span.) A token; anything by which another thing is shown, represented, or indicated, as, a *sign* of fair weather, *sign* of good health, &c.; a motion of the hand, nod, or other gesture, indicating a wish or command; a wonder; a prodigy; a miracle; some visible transaction, event, or appearance, intended as a proof of something else;

Show me a *sign* that thou talkest with me—*Judges* vi. 17.
something hung or written over a door or on a wall to give notice of the name, or name and occupation, of the tenant; a memorial or thing to be remembered as a token;

What time the fire devoured two hundred and fifty men: and they became a *sign*.—*Numbers* xxvi. 10.

visible mark or representation, as, a *sign* of spiritual grace; a mark of distinction, as the cross;

The ensign of Messiah blazed,

Aloft by angels borne, his *sign* in heaven.—*Milton*.

typical representation or symbol. In Algebra, a character indicating an operation to be performed, or a relation subsisting between two quantities: of the former kind, those most commonly used are— $+$ for addition, $-$ for subtraction, \times for multiplication, \div for division, $\sqrt{}$ for the square root, $\sqrt[3]{}$ for the cube root, $\sqrt[n]{}$ for the *n*th root, &c.: the signs denoting a relation are, $=$ equal to, $>$ greater than, $<$ less than, &c. In Astronomy, a portion of the ecliptic or zodiac, containing 30° or a twelfth part of the complete circle: the first commences at the point of the equator through which the sun passes at the time of the vernal equinox, and they are counted onwards from west to east all round the circle. The names of these signs in their order, with the characters by which they are indicated on globes, and in almanacs and works on astronomy, are as follow:—Aries Υ , Taurus $\mathbf{\Upsilon}$, Gemini Π , Cancer $\mathbf{\Upsilon}$, Leo $\mathbf{\Upsilon}$, Virgo $\mathbf{\Upsilon}$, Libra $\mathbf{\Upsilon}$, Scorpio $\mathbf{\Upsilon}$, Sagittarius $\mathbf{\Upsilon}$, Capricornus $\mathbf{\Upsilon}$, Aquarius $\mathbf{\Upsilon}$, Pisces $\mathbf{\Upsilon}$. It is to be observed, that these are also the names of the twelve constellations of the zodiac, which anciently coincided with the places of the *signs*; but, on account of the motion of the earth's equator, by which the equinoctial points are carried

backwards in the ecliptic about $56' 6''$ annually, the commencement of the signs now correspond to different stars, the first point of the sign Aries being at present near the beginning of the constellation Pisces. The *ascending signs* are the six beginning with Capricornus, through which the sun passes while advancing from the winter to the summer solstice, and is consequently acquiring altitude with respect to the inhabitants of the northern hemisphere; the other six, beginning with Cancer, are called the *descending signs*. *Sign-board*, a board on which a person gives notice of his avocation, or of the articles he deals in. *Sign-manual*, the royal signature superscribed at the top of bills of grants and letters-patent, which are then sealed with the privy signet, or great seal, as the case may be, to complete their validity. *Sign-post*, a post on which a sign hangs, or on which papers are placed to give public notice of anything;—*v. a.* to mark or ratify with one's name or other character; to subscribe, as in paper, letter, note, deed, &c.; to signify typically;

The sacraments are made to be *signs* of a secret mystery; they receive the names of what they themselves do *sign*.—*Bp. Taylor*.

to denote; to show; to mark; to signify by the hand, &c., without using words;

He dies and makes no *sign*.—*Shaks*.

—*v. n.* to be a sign or omen.

Music! 't the air?—under the earth—

—It *signs* well, does't not?—*No*.—*Shaks*.

SIGNAL, sig'nal, *s.* (French, from *signum*, Lat.) A sign that gives or is intended to give notice; the notice given. In Nautical affairs, *signals* are certain signs agreed upon for suddenly communicating intelligence at sea, in cases wherein the voice could not possibly reach the required distance: they are either *day-signals*, *night-signals*, or *fog-signals*;—*a.* eminent; remarkable; memorable; distinguished from what is ordinary, as, a *signal* exploit. *Signal-fire*, a fire intended for a signal.

SIGNALITY, sig'nal'e-te, *s.* Quality of being remarkable or memorable.—Not in use.

They inquired and determined its *signality*.—*Brown*.

SIGNALIZE, sig'nal-lize, *v. a.* To render remarkable or eminent: to distinguish one's self by remarkable deeds or talents.

SIGNALLY, sig'nal-le, *ad.* Eminently; remarkably; memorably: in a distinguished manner.

SIGNATION, sig-na'shun, *s.* Sign given; act of betokening.—Not in use.

A horse-shoe Baptista, Porta hath thought too low a *signation*; he raised it into a lunar representation.—*Brown*.

SIGNATORY, sig'na-tur-e, *a.* Relating to a seal; used in sealing.

SIGNATURE, sig'na-ture, *s.* (French, from *signo*, I sign, Lat.) A sign, stamp, or mark impressed; a sign manual, or name of a person written or subscribed by himself; a mark for proof, or proof from marks.

The most despicable pieces of decayed nature are curiously wrought with eminent *signatures* of Divine wisdom.—*Plants*.

In old Medical writers, an external mark or character which was supposed to indicate its suitableness to cure a particular disease, or diseases of particular parts; thus, plants with yellow flowers were considered adapted to cure jaundice. In Music, the flats and sharps placed after the clef, which

affect throughout the movement all notes of the same letter. In Law, a writing presented to the Barons of the Court of Exchequer in Scotland as the ground of a royal grant, which, after being passed by the barons, has, in some cases, the sign-manual of the sovereign.—*Bell*. In Printing, a letter of the alphabet placed at the bottom of the first page of each sheet of a work, to denote, alphabetically, the order of the sheets;—*v. a.* to mark; to distinguish—(not in use.) In Physiognomy, an external mark or feature by which some persons pretend to discover the genius or temper of the person possessing it.

SIGNATURIST, sig-na-tu-ris-t, *s.* One who holds the doctrine of signatures being impressed on objects indicative of their characters or qualities.

SIGNER, si-nur, *s.* One who signs or subscribes his name.

SIGNET, sig-net, *s.* (from *signo*, I sign, Lat.) A seal, particularly, the *Privy-signet*, one of the king's seals in England, used in sealing private letters and grants under the sign-manual: it is in the custody of the Secretary of State for the Home Department. In Scottish Law, the *signet* is the seal by which the king's letters and writs for the purpose of justice are now authenticated. *Writer to the Signet*, anciently a clerk in the office of the Secretary of State, by whom writs were prepared; and when the signet became employed in judicial proceedings, the writers or clerks obtained a monopoly of the privileges of acting as agents or attorneys before the Court of Session. Their business is nearly the same with that of attorneys in England.

SIGNIFICANCE, sig-nif-e-kan-s, } *s.* (see *Signify*.)
SIGNIFICANCY, sig-nif-e-kan-se, } Power of signifying; meaning; force; energy; importance.

SIGNIFICANT, sig-nif-e-kant, *a.* (*significans*, Lat.) Expressive of something beyond the external mark; bearing a meaning; betokening; expressive in an eminent degree; important—(little used in this sense);—*s.* a sign;

Since you are tongue-tied, and so loth to speak,
In dumb *significants* proclaim your thoughts.—*Shaks.*
a token; a sign of something.

An erect and forward stature, a large breast, neat and pliant joints, and the like, may be good *significants* of health, of strength, or agility; but are very foreign arguments of wit.—*Wotton*.

SIGNIFICANTLY, sig-nif-e-kant-le, *ad.* In a significant manner.

SIGNIFICATION, sig-nif-e-ka-shun, *s.* (Fr. *significatio*, Lat.—see *Signify*.) The act of making known by signs, or of communicating ideas to another by anything that is understood; meaning; that idea of a sign or expression which the person using it intends to convey, or that which men in general who use it understand it to convey.

SIGNIFICATIVE, sig-nif-e-ka-tiv, *a.* (*significatif*, Fr.) Betokening by an external sign; strongly expressive.

SIGNIFICATIVELY, sig-nif-e-ka-tiv-le, *ad.* So as to betoken by an external sign; with significance.

SIGNIFICATIVENESS, sig-nif-e-ka-tiv-nes, *s.* The quality of being significative. In Law, *significavit*, a writ issuing out of Chancery, upon certificate given by the ordinary, of a man's standing excommunicate during the space of forty days, for laying him up in prison, till he submit to the authority of the church.—*Reg. Orig.*

SIGNIFICATOR, sig-nif-e-ka-tur, *s.* That which betokens, signifies, or represents.

SIGNIFICATORY—SILENCE.

SIGNIFICATORY, sig-nif-e-ka-tur-e, *a.* That betokens or signifies;—*s.* that which betokens; a signification.—Not used as a noun.

Here is a double *significatory* of the Spirit, a word and a sign.—*Bp. Taylor*.

SIGNIFY, sig-ne-fi, *v. a.* (*signifier*, Fr. *significo*, from *signum*, a sign, and *facio*, I make, Lat.) To make known by some token or sign; to declare; to make known;

I'll to the king, and *signify* to him,
That thus I have resigned to you my charge.—*Shaks.*

to mean; to express;

Life's but a walking shadow; a poor player
That struts and frets his hour upon the stage,
And then is heard no more! It is a tale
Told by an idiot, full of sound and fury,
Signifying nothing.—*Shaks.*

to import, weigh, or have consequence; used in particular phrases, as, it *signifies* much or little; it *signifies* nothing; what can it *signify*, &c.

SIGNIFYING, sig-ne-fi-ing, *part. a.* Expressive; significant.—Not used.

If the words be but comely and *signifying*, and the sense gentle, there is juice; but where that wanteth, the language is thin.—*Ben Jonson*.

SIGNIOR, sin-yor, *s.* (*signore*, Ital.) A term equivalent to the English Lord, Sir, or Mr.; the French Monsieur, and the German Herr.—See *Seignior*.

SIGNIORIZE.—See *Seigniorize*.

SIGNIORY.—See *Seignior*.

SIK, } sik, *a.* (*sic*, Scotch.)—Obsolete forms of
SIKE, } *sich*.

Sike syrlie shepherds han we none,
They keepen all the path.—*Spenser*.

SIKE, sike, *s.* (*sic*, *sich*, a water-furrow, Sax.) A small stream or rill; one which is generally dry in summer.—Obsolete or local.

SIKER, sik-ur, *a.* and *ad.* (*sicker*, secure, cautious, denoting preciseness, Scot.) Sure;

"I doubt I have slain the red Comyn." "Leave you such a matter in doubt? I've made *sicker*."—*Hist. of Scot.*
(They) holden the *siker* way.—*Chaucer*.

surely.—Obsolete.

SIKERNESS, sik'er-nes, *s.* Sureness; safety.—Obsolete.

Brotelnesse

They finden, when they wenen *sikerne*se.—*Chaucer*.

SILAGO, si-la-go, *s.* (meaning unknown to us.) A genus of fishes, having the head lengthened; mouth small; eyes minute; first dorsal fin on a line with the pectoral and the ventral; the first ray excessively long: Family, Percidæ.

SILAUS, si-la-us, *s.* (a name used by Pliny for an Umbelliferous plant.) Pepper-saxifrage, a genus of Umbelliferous plants: Suborder, Orthospermæ.

SILE, sile, *v. a.* (Scottish; *sila*, Sueo-Goth.) To strain, as fresh milk from the cow; whence *sile-dish*, a strainer.—Local.

SILENCE, si-lens, *s.* (French; *silentium*, from *sileo*, I am still, Lat.) Stillness, or an entire absence of sound; forbearance of speech in man, or of noise in other animals; habitual taciturnity, opposed to loquacity;

I think the best grace of wit will shortly turn into
silence, and discourse grow commendable in none but
parrots.—*Shaks.*

secrecy; absence of mention; obscurity; oblivion.

Eternal *silence* be their doom.—*Milton*.

Silence is used elliptically for *let there be silence*;

—*v. a.* to restrain from noise or speaking; to quiet;

to restrain; to appease;

This would *silence* all further opposition.—*Clarendon*.

SILENE—SILICA.

to cause to cease firing, as a battery; to put an end to;

A decision which *silenced* the rivalships between them.—*Hamilton*.

to restrain from preaching, by revoking a license to preach.

SILENE, si-le'ne, *s.* (said to be derived from *sialon*, saliva, Gr. in allusion to the viscid frothy moisture on the stalks of many of the species, by which small flies are entrapped—hence the English name Catch-fly. Du Theis deduces the name from the drunken god Silenus, whose name he supposes referred to his body being covered with slaver.) A genus of plants: Order, Caryophyllaceae.

SILENT, si'lent, *a.* (*silens*, Lat.) Not speaking; mute, habitually taciturn; not loquacious; still; having no noise, as the *silent* night; wanting efficacy, not operative;

The sun to me is dark,
And *silent* as the moon,
When she deserts the night,
Hid in her vacant, interlunar cave.—*Milton*.

not mentioning nor proclaiming; calm, as, the winds were *silent*; not acting; not transacting business in person, as, a *silent* partner; not pronounced, as, a *silent* letter.

SILENTIARY, si-len'sha-re, *s.* One appointed to keep silence and order in court; one sworn not to divulge secrets of state.

SILENTLY, si'lent-le, *ad.* Without speech, noise, or mention.

SILENTNESS, si'lent-nes, *s.* The state of being silent; stillness; silence.

SILENUS, sil-le'nus, *s.* (Latin; *silenos*, Gr.) In Mythology, a Grecian divinity, the foster-father and attendant of Bacchus, and likewise leader of the Satyrs: he was remarkable for wisdom, his drunkenness being regarded as inspiration. He was represented as a robust old man in a state of intoxication, riding on an ass, and with a can in his hand.

SILER, si'lur, *s.* (Latin, an osier.) A genus of glabrous Umbelliferous perennial shrubs: Suborder, Orthospermæ.

SILESIA, si-le'she-a, *s.* A kind of linen cloth, so called on account of its being brought from a duchy of that name, now belonging chiefly to Prussia.

SILESIAN, si-le'she-an, *a.* Pertaining to or produced in Silesia, as *Silesian* linen.

SILEX, si'leks, *s.* (Latin.) Flint.

SILHOUETTE, } sil-oo-et', *s.* (*silhouette*, Fr.) The
SILOUETTE, } profile of a person's face, not painted according to natural colours, nor yet in outline, but the exact side face, painted so as to present an even black surface. A contrivance for taking the exact outline of an object, particularly of a person's face: it consists of a slender rod fixed in a universal joint, its extremities moving freely in every direction; one end is traced along the figure to be copied, while the other, carrying a pencil, traces a figure precisely similar on paper inserted in a frame, which is kept gently pressing on the point of the pencil by a spring or other contrivance.

SILICA, sil'e-ka, *s.* (from *silex*, Lat.) A substance which enters into the composition of most earthy minerals, and, under the name of quartz-rock, forms independent mountainous masses: it is the chief ingredient of sandstones, flint, chalcedony, rock crystal, and other analogous substances. It was formerly considered as a pure earth, but, from

SILICATE—SILICIOUS.

its ascertained acid properties, it is now usually called by chemists *silicic acid*: when pure, it is a light white powder, which feels rough and dry when rubbed between the fingers; it is insipid and inodorous. Equiv. 46.5; symb. SiO_3 : sp. gr. 2.69. This substance is also known by the name of *siliceous earth*.

SILICATE, sil'e-kate, *s.* A compound of silicic acid and a salifiable base. The *silicates* constitute the greater number by far of the hard minerals which encrust the globe. In Mineralogy, *Silicate of Alumina*,—see Bucholzite. *Silicate of cerium*, a mineral which occurs in regular hexagonal prisms of a pale yellowish-brown colour; cleavage parallel to the axis of the prism; translucent. It is found with emerald in magnesian carbonate of lime, at Santa Fé de Bogota, in Peru.

SILICERNIUM, sil-e-ser'ne-um, *s.* (Latin, from *silex*, a stone, and *coena*, supper, i. e. supper upon a stone.) In Roman Antiquity, a feast of a private nature, provided for the dead some time after the funeral: it consisted of beans, lettuces, bread, eggs, &c., which were laid upon the tomb, in the foolish expectation that the dead would come for the repast.

SILICIC ACID, sil-is'ik as'sid, *s.* The same as *Silica*,—which see.

SILICICALCAREOUS, sil-is-e-kal-ka're-us, *a.* (*silex*, and *calcareous*.) Consisting of silicious and calcareous matter.

SILICALCOP, sil-is-e-kal'se, *s.* (*silex*, flint, and *calx*, lime, Lat.) A mineral substance which occurs in amorphous masses, and in thin beds, under strata of compact limestone, in Provence: it is of a grey or brown colour, sometimes nearly black; it is a mixture of flint and carbonate of lime.

SILICIFEROUS, sil-e-sif'e-rus, *a.* (*silex*, flint, and *fero*, I produce, Lat.) Producing *silex*; united with a portion of *silex*. *Siliciferous hydrate of alumina*, a mineral which occurs in white and nearly opaque masses, perfectly sectile: when broken it presents an earthy fracture, with a somewhat vitreous lustre. Composition—alumina, 45.0; silica, 14.0; water, 40.0: sp. gr. 2.06 to 2.11. *Siliciferous oxide of manganese*, a mineral which occurs massive, of a pale rose-red colour; fracture even, or flat conchoidal; translucent on the edges, and very hard. Composition—oxide of manganese, 52.60; silica, 39.60; oxide of iron, 4.60; lime and magnesia, 1.50; water, 2.75: sp. gr. 3.5 to 3.7; hardness = 5.0 to 5.5.

SILICIFICATION, sil-is-e-fe-ka'shun, *s.* The conversion of any substance into stone by the infiltration of silicious matter.

SILICIFY, sil-is'e-fi, *v. a.* (*silex*, flint, and *facio*, I make, Lat.) To convert into flint; to petrify by infiltration of silicious matter;—*v. n.* to become silica.

SILICIMURITE, sil-is-e-mu'rite, *s.* (*silex*, flint, and *muria*, brine, Lat.) An earth composed of *silex* and magnesia.

SILICIOUS, sil-ish'e-us, *a.* Flinty; containing silica; pertaining to or partaking of silica. This word, by an improper spelling, is often mistaken for *silicious*. *Silicious oxide of zinc*, a mineral which occurs of various colours, the most prevalent of which is white, occasionally blue, green, yellow, or brown; primary form a right rhombic prism. It occurs crystallized, stalactitic, mammillated, botryoidal, and massive. Composition of a specimen from Limbourg—oxide of zinc, 66.83; silica, 24.89:

SILICITED—SILK.

water, 7.46: sp. gr. 3.3 to 3.6. Hardness = 5.0 when crystallized, the massive varieties being less.

SILICITED, sil-is'it-ed, *a.* Impregnated with silic.

SILICIUM, sil-ish'e-um, } *s.* Same as Silicon,—which

SILICUM, sil'e-kum, } see.

SILICON, sil'e-kon, *s.* (*silic*, flint, Lat.) An elementary substance of a dark-brown colour, destitute of metallic lustre, and a non-conductor of electricity. It is incombustible in atmospheric air and oxygen gas, and infusible by the blowpipe. It is neither dissolved nor oxidized by the sulphuric, nitric, hydrochloric, or hydrofluoric acids; but a mixture of the nitric and hydrofluoric acids dissolves it readily. Equiv. 22.5; symb. Si.

SILICULA, sil-ik'u-la, } *s.* (*silicula*, Lat.) In Botany,

SILICLE, sil'e-kl, } a dry bivalve pericarp, di-

SILICULE, sil'e-kule, } vided interiorly by a membranous septum, which contains the seeds, and of breadth nearly equal to its length.

SILICULOSE, sil-ik'u-lose, *a.* Having the form of a silicle.

SILICULOUS, sil-ik'u-lus, *a.* Having small pods or husks.

SILIGINOUS, sil-ij'e-nus, *a.* (*siligo*, a kind of corn, Lat.) Made of fine wheat.

SILING-DISH, si'ling-dish, *s.* A colander.—See Sile.

SILQUA, sil'e-kwa, } *s.* (*siliqua*, Lat.) In Botany,

SILIQUE, sil'ik, } a dry pericarp of elongated figure, exhibiting two opposite longitudinal sutures and an interior partition, to which the seed is attached. It differs principally from the silicle in its greater proportionate length. Among Goldfinches, a *siliqua* is the weight called a *carat*, of which six make a scruple.

SILQUARIA, sil-e-kwa're-a, *s.* (*siliqua*, a pod, Lat.) A genus of Tubulibranchiate Mollusca, the shells of which have the terminal whorls spiral, and a narrow punctured fissure on one side of the shell.

SILQUIFORM, sil'e-kwe-fawrm, } *a.* (*siliquosus*, Lat.)

SILQUOSE, sil-e-kwose, } Having the form of a silique or siliqua.

SILQUOSE, sil-e-kwose, } *a.* Pod-bearing: applied

SILQUOUS, sil'e-kwus, } to plants having that sort of pericarp denominated a pod or legume.

SILIS, si'lis, *s.* (*silo*, a person with a snub-nose, Lat.) A genus of Coleopterous insects: Family, Lampyridæ.

SILK, silk, *s.* (*seolc*, Sax. *silke*, Swed. and Dan. *schilk*, Rus.) The fine soft thread produced by the larvæ of the silk-moth; cloth made of this material—in this sense the word has a plural, as white *silks*, coloured *silks*; the filiform style of the female flower of maize, which resembles real silk in softness and fineness;—*a.* pertaining to or consisting of silk. *Silk-gut*, a hard, white, transparent thread, about a foot in length, made in China and Italy from the intestines of the silkworm, and used for angling. *Silk-man*, or *Silk-merc*, a dealer in silk. *Silk-thrower*, or *Silk-throaster*, one who throws silk. *Silk-throwing* is the art of twisting two, three, or more *singles*, according to the fineness required, into a single thread, the twist of which runs in a direction contrary to that of the singles composing it. *Silk-weaver*, one who weaves silk. In Botany, *Silk-cotton-tree*, the common name of plants of the genus *Bombax*. *Silk-tree*, the tree *Acacia julibrissin*, a native of the Levant. In Entomology, *Silk-moth*, a moth or butterfly of the silkworm family. *Silk-spinners*, or *Silk-worms*, the larvæ of the Lepidopterous insects of

the family Bombycidae. These insects are enclosed in the pupa state in a cocoon or edge-shaped case, rendered impervious to wet or other injury by the innumerable folds of silk which the caterpillar spins around itself, the whole being attached to trees. The larva is generally covered with stellate tufts of short hairs, very stiff, and sometimes endowed with a poisonous, or, at least, a highly irritating property.
